Re: Invenergy Thermal Development LLC – Clear River Energy Center
Docket No. SB-2015-06

Dear Dr. Bianco:

Enclosed for filing in this matter are an original and 3 copies of the Town of Burrillville's 39th Set of Data Requests to Invenergy Thermal Development LLC. Electronic copies have been sent to the service list.

If you have any questions, please feel free to call.

Very truly yours,

Michael R. McElroy

cc: Service List

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
ENERGY FACILITY SITING BOARD

IN RE: INVENERGY THERMAL DEVELOPMENT LLC's :
APPLICATION TO CONSTRUCT THE CLEAR RIVER : DOCKET No. SB-2015-06
ENERGY CENTER IN BURRILLVILLE, RHODE ISLAND :

**THE TOWN OF BURRILLVILLE'S 39th SET OF DATA REQUESTS TO
INVENERGY THERMAL DEVELOPMENT LLC**

- 39-1 During a weather or other emergency event whereby the power plant loses its electric or primary power source, what measures are in place to keep the plant running, to insure general safety for plant employees and the general public, and to insure that hazardous materials and supplies on site will be contained? How long will these measures keep the plant running and/or maintain safety protocols?
- 39-2 If standby generators or other equipment is to be used to provide emergency power and/or to insure that safety protocols are maintained, are the emissions from such equipment incorporated into permit applications and submissions required to permit this project?
- 39-3 Does Invenergy or any of its related companies or subsidiaries operate a so-called "dry cooled" plant of the size and scope of the CREC project in Burrillville? If so, where are those plants located?
- 39-4 Are water tanker trucks normally filled to capacity? For instance, will a tanker truck of 8,000 gallons actually carry 8,000 gallons of water, or will it be less? Does that calculation remain the same for winter and freezing conditions?
- 39-5 During drought conditions, and when water bans or restrictions are implemented by water producing entities, how will CREC procure water to supply the needs of the plant – both in normal operating conditions and when running on fossil fuel oil?
- 39-6 If potential noise violations occur on site, how will CREC address those concerns? Specifically, what process and procedure(s) will be used to address a potential violation? Will monitoring be used and, if yes, where and what measures will be employed?
- 39-7 Will noise from the facility potentially be affected by weather or atmospheric conditions? Does noise from the facility have the potential to "travel" beyond the perimeter of the facility and impact areas of the community some distance from the perimeter of the facility? If yes, please elaborate.
- 39-8 Please detail the fire suppression system(s) to be utilized at the facility and the scope of its coverage. Will different types of fire suppression systems be installed and, if yes, what does each protect? If any part of the facility is not protected or does not need to be protected, please provide details and explain.

Respectfully submitted,
Town of Burrillville
By its attorneys
