PUBLIC UTILITIES COMMISSION

January 16,, 2017

Mr. Ted Benoit
EFSB
89 Jefferson Blvd
Warwick, R.I.

Dear Mr. Benoit:

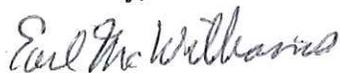

I am enclosing communication I received from the only "long term" supplier of demineralization trailers that I could find on the internet. These are the trailers that Invenergy proposes to use in its latest attempt to secure water for its Burrilville site.

As Ted Lawson off Veolia makes clear, the use of demineralized trailers is not intended for long term (i.e. twenty of thirty years) use. It's not practical from an economic standpoint.

Invenergy was instructed by the EFSB to come up with a permanent solution to their water supply problem. This plan is not it.

Don't be fooled.

Sincerely,

Earl Mc Williams
