PUBLIC UTILITIES COMMISSION

Honorable Members of the Energy Facilities Siting Board:

My name is Ronald Newman and I own ,
IT'S MY Health a local business located in
PASCONG , Rhode Island. I am writing to express my opposition to
Invenergy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenergy offering our businesses a spot on Invenergy's 'preferred vendors list' in exchange for our support of this proposed project. Invenergy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

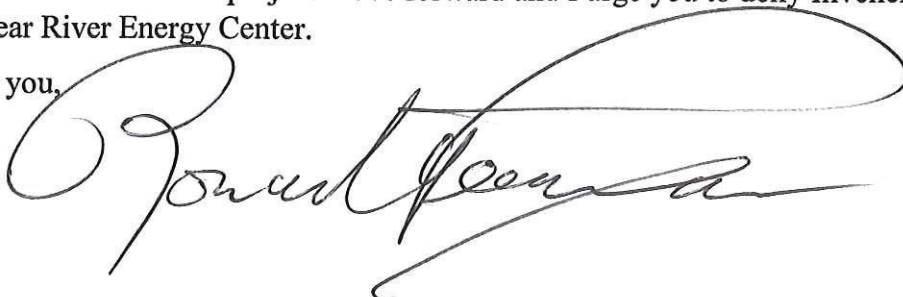

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

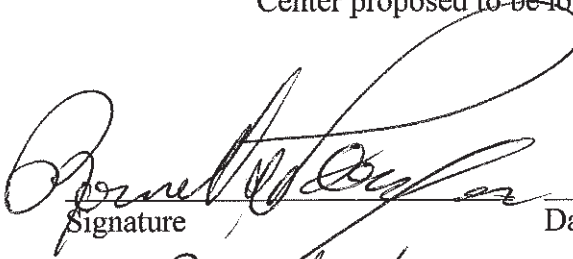

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

I authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

I DO NOT authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

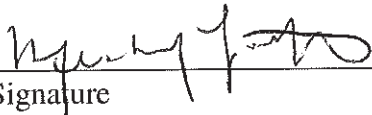

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

D314

Honorable Members of the Energy Facilities Siting Board:

My name is *Kenneth Hopkins* and I own *Affordable Tent Rental*, a local business located in *Mapleville*, Rhode Island. I am writing to express my opposition to Invenergy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenergy offering our businesses a spot on Invenergy's 'preferred vendors list' in exchange for our support of this proposed project. Invenergy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. PUBLIC UTILITIES COMMISSION

Honorable Members of the Energy Facilities Siting Board:

My name is RICHARD POLSEN/O and I own MIKE A POLSEN/O + SON, a local business located in PASCOAG, Rhode Island. I am writing to express my opposition to Invenergy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenergy offering our businesses a spot on Invenergy's 'preferred vendors list' in exchange for our support of this proposed project. Invenergy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

RI Public Utilities Commission

Invenergy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

I authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

I DO NOT authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

I authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

I DO NOT authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

Honorable Members of the Energy Facilities Siting Board:

We are the Harrisville Fire District a quasi-municipality located in Harrisville, Rhode Island. We, as the Harrisville Fire District Operating voted to have the Chairman Ronald W Slocum express our opposition to Invenergy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenergy offering the businesses a spot on Invenergy's 'preferred vendors list' in exchange for support of this proposed project. Invenergy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my quasi-municipality is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project to go forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again, signaling that this plant is not needed in order to meet demand, even with the recent closure of Brayton Point.

We stand in opposition of this project along with thirty-four other communities in the State of Rhode Island. We speak not only as a quasi-municipality in this community, but as a proud member of this community. The facts do not lie; the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

We do not wish to see this project move forward and we urge you to deny Invenergy's application for the Clear River Energy Center.

✓ We authorize the use of my name and location to be used in any press releases regarding the quasi-municipality's opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

_____ **WE DO NOT** authorize the use of the quasi-municipality's name and location to be used in any press releases regarding the quasi-municipality's opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

Sincerely,

A handwritten signature in cursive script, appearing to read "Ronald W. Slocum", with a long horizontal flourish extending to the right.

I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

PUBLIC UTILITIES COMMISSION

Honorable Members of the Energy Facilities Siting Board:

My name is Jon Greenwood and I own ,
Green Vapes a local business located in
North Smithfield, Rhode Island. I am writing to express my opposition to
Invenergy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenergy offering our businesses a spot on Invenergy's 'preferred vendors list' in exchange for our support of this proposed project. Invenergy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenergy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

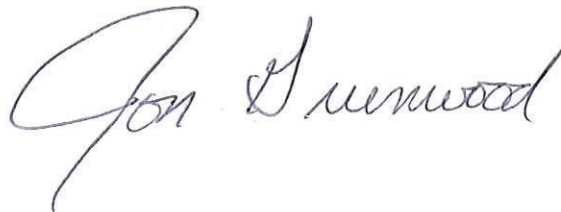

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that abut Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenergy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenergy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud *member* of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenergy's application for the Clear River Energy Center.

Thank you,

Honorable Members of the Energy Facilities Siting Board:

My name is ANGELA VETRO and I own, THE TACO SHOP, INC. a local business located in HARRISVILLE, Rhode Island. I am writing to express my opposition to Invenegy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenegy offering our businesses a spot on Invenegy's 'preferred vendors list' in exchange for our support of this proposed project. Invenegy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenegy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that about Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenegy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenegy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud member of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenegy's application for the Clear River Energy Center.

Thank you,

I authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

Honorable Members of the Energy Facilities Siting Board:

My name is Jeffrey Steckwell and I own,

Steckwell Home Improvement a local business located in

Burrillville, Rhode Island. I am writing to express my opposition to

Invenegy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenegy offering our businesses a

spot on Invenegy's 'preferred vendors list' in exchange for our support of this proposed project.

Invenegy promised a 'boom' to local businesses during the construction phase of this project. I

do not, however, feel that this implied short term increase in revenue for my business is worth

the long term devastation this project would cause the Town of Burrillville and neighboring

communities. Clearly Invenegy wishes to garner community support of the Clear River Energy

Center by enticing local businesses with the promise of additional business in order to propel

their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of

approximately 200 acres of forests that about Pulaski Park and George Washington Campground

would ultimately drive revenue out of our state in the long term.

Invenegy promises that the Clear River Energy Center will help drive down energy costs in

Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone.

Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be

between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%.

The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the

amount of power in the grid for 2019 by allowing Invenegy to sell its' obligation of 485MW to

another power supplier due to its lack of a permit at this time. Again signaling that this plant is

not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of

Rhode Island. I speak not only as a business owner in this community, but as a proud member of

this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in

the Town of Burrillville.

I do not wish to see this project move forward and I urge you to deny Invenegy's application for

the Clear River Energy Center.

Thank you,

I authorize the use of my business' name and location to be used in any press releases regarding my business' opposition of the Clear River Energy Center proposed to be located in Burrillville, RI.

Honorable Members of the Energy Facilities Siting Board:

My name is Madison Brimmer and I own Madison Brimmer a local business located in Warwick RI, Rhode Island. I am writing to express my opposition to Invenegy's proposed Clear River Energy Center in Burrillville, RI.

Recently, many businesses in town received a letter from Invenegy offering our businesses a spot on Invenegy's 'preferred vendors list' in exchange for our support of this proposed project. Invenegy promised a 'boom' to local businesses during the construction phase of this project. I do not, however, feel that this implied short term increase in revenue for my business is worth the long term devastation this project would cause the Town of Burrillville and neighboring communities. Clearly Invenegy wishes to garner community support of the Clear River Energy Center by enticing local businesses with the promise of additional business in order to propel their case for this project forward.

In a community and state where heavy emphasis is placed on tourism, the destruction of approximately 200 acres of forests that about Pulaski Park and George Washington Campground would ultimately drive revenue out of our state in the long term.

Invenegy promises that the Clear River Energy Center will help drive down energy costs in Rhode Island, passing along a savings of over \$200 million dollars in the first four years alone. Testimony provided to the Rhode Island Public Utility Commissions revealed the savings to be between \$0 and \$36 million dollars for the first year, with rate payers' saving a measly 1-2%. The recent ISO-NE Annual Reconfiguration Auction proved that there was no threat to the amount of power in the grid for 2019 by allowing Invenegy to sell its' obligation of 485MW to another power supplier due to its lack of a permit at this time. Again signaling that this plant is not needed in order to meet demand, even with recent closure of Brayton Point.

I stand in opposition of this project along with thirty four other communities in the State of Rhode Island. I speak not only as a business owner in this community, but as a proud member of this community. The facts do not lie: the Clear River Energy Center is not needed or wanted in the Town of Burrillville.
