Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Adam Graffunder

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Invenergy has not been transparent at all throughout this process and has not come to the table with respect for the town of Burrillville or the state of Rhode Island. This plant has been planned and presented one way, and then when denied a "new" technology is used to try to present.

Invenergy is bad business, and a bad decision for Rhode Island.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Burrillville and 25 other towns/cities in RI DO NOT want this facility.

Not only will this impact RI but also our neighbors in CT and MA who truly have no say in what is being proposed. We were targeted years ago for an airport runway and for land fill from Massachusetts. This facility is not going to help anyone in the long-run. Sure there will be many construction jobs for a very short period, but his place will only have 25 positions all of which I'm sure will not consist of Burrillville residents.

If by some chance you do approve this monster, we ask that the 3 of you relocate with your family to a home within a mile from the plant.

Would you do that?

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Allison Gelfuso

Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

On top of that, Invenergy has twice been unable to sell more than half the energy it proposes to produce. If we are to believe the oft repeated defense of natural gas that it is a bridge fuel, it would also follow that the utility of this plant will be long outlived by the scar it will cause to the unique and invaluable forest habitat which it threatens to further fragment. If half the energy isn't even marketable now (let alone needed!), the situation is only going to get worse. There is absolutely no need for this facility. Even if there were, the town doesn't want it and they're already carrying more than their fair share of the burden for power in the state/region.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Amanda Freitas

Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Angel Williamson Salois

Dear Bianco,

My name is Ben Fortier. My Father Richard Fortier lives on tarkiln road. I was born and raised in Burrillville and lived there for 23 years of my life. After graduating Burrillville High School in 2005 I enlisted in the Marine Corps and was deployed to Iraq for a seven-month deployment. I feel like during my time as a Burrillville high school student, environmental awareness was always harped on our generation.

To see that we are still in such heavy reliance for fossil fuels is discouraging at best. To see that these fossil fuel Industries wants to move into our little corner of the world is deplorable at best. Our government is trying to wring out the very last bits of this finite resource. We can do better than that. We're smarter than that. We don't have to bring it into our little part of Rhode Island that's been so well-known to be part of the history of the Industrial Revolution. We don't have to keep it going. We can start our own clean energy Revolution. And it starts now and it's starts with you.

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Benjamin Fortier

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Brandon Green

Feb 15, 2017

Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

The Hudson Valley is under attack from "Corporate Bully #1", the Gas/Oil (fossil fuel) industry. We face the Pilgrim Pipeline, barges full of oil in the Hudson River, the CPV methane-powered electric plant in Minisink, and the Spectra Atlantic Bridge pipeline in Westchester.

More than just "bullies", gas and oil companies are criminal organizations.

In addition to poisoning our land, air, and water, the fossil fuel industry bribes and pays off public officials to obtain permits and favorable laws. It takes citizens' property by eminent domain and threats of eminent domain. The "public service" agencies that are supposed to regulate the industry are staffed by former (and future) industry employees. One outrageous example: Maggie Suter, an official at the Federal Energy Regulatory Commission (FERC) led the review process for two gas pipeline projects by Spectra Energy, while her husband, Phil Suter, was a paid consultant for Spectra Energy.

The fossil fuel industry only cares about profit; it does not care about the harm it does to you, your friends and family, the Hudson Valley, or the human race.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

charles davenport

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Christine Butler

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

The proposed site would destroy a beautiful forest and is situated very near several bodies of water. The water supply would come from one of the cleanest reservoirs in the country and would be trucked in daily. The water supply has not been fully vetted as it was proposed at the last hour and does not provide details. Not has it been scrutinized by accountable entities.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Colleen Joubert

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

If approved the entire tristate region will be subjected to dangerous levels of pollution. Why would we do this, when we can invest in more viable forms of clean energy that won't harm our citizens, our wild life, and our ecosystems? It doesn't make sense. Asthma rates will sky rocket.

Noise pollution will plague Burrillville residents, and we will destroy a significant parcel of our State's remaining pristine woodlands to build a fossil fuel power plant. Fossil fuels are a thing of the past.

We need to focus on clean and renewable energy sources, and the job creation that we can generate for our state by cleaning up the toxic waste that fossil fuel plants have wrought, and creating a renewable energy infrastructure conversion and maintenance jobs.

Additionally, selling our valuable drinking water to a company like invenergy to use to cool this monstrosity of a power plant is a criminal use of our limited natural resources.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Crow Grando

Dear Bianco,

I request that the Energy Facility Siting Board DISMISS Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

We should NOT be investing in dirty energy sources like fracked gas.

We are in a climate change crisis right now, where a massive sheet of ice is on the verge of breaking off of Antarctica.

The global temperatures are getting higher and higher, each year breaking the previous year's record breaking heat.

As a coastal state, we in Rhode Island are at risk of sea level rise.

We need to get off of fossil fuels IMMEDIATELY.

Instead of a gas power plant, Invenergy should be investing in wind and solar power, which they ALSO develop.

Please REJECT the gas power plant for the healthy and safety of Rhode Islanders today and in the future.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Daniel Schleifer

Feb 15, 2017

Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

There is also much missing information in regard to impacts to wildlife in the area of the proposed plant.

In the DEM advisory opinion (Sept. 12) they did not provide ANY review of the Natural Heritage database, instead simply recognizing that there were no records for the subject site because "a lack of Natural Heritage records is typical of private property in Rhode Island regardless of its conservation value and is often a reflection of the property not having been inventoried. DEM does not enter onto private property without permission, and generally not without invitation."

This excuse is preposterous!

Review of the Natural Heritage database would have shown there to be dozens of records within a 2-mile radius of the power plant, a reasonable area to look at given the magnitude of this project--- its land clearing; its power line right-of-way clearing; its resulting invasive species impact; its noise impact, aural and low frequency; its piggy-back effect on the existing power lines, gas lines and the pipeline compressor station; etc and etc. In that two mile radius alone you have over 6,000 acres of state-owned conservation land in the Durfee Hill, George Washington, Pulaski, and Buck Hill state forests, and another 300 acres protected by the Burrillville Land Trust.

Yet, no DEM review of the existing Natural Heritage database.

Also, no DEM field survey of the power plant site itself. Reasoning or excuse? " DEM does not enter onto private property without permission, and generally not without invitation." This is nonsense! By state law, DEM is allowed to enter private property to conduct surveys even without landowner permission, but they didn't even ask. The presence of the Black-throated Blue Warbler on the property (as reported by Invenergy) does constitute a Natural Heritage record even though it does not yet appear in the database. DEM should have at least conducted a cursory field review to determine the size of the population (both on and off-site) to get a better handle on the impact to this species. They should also have conducted an inventory for one Federally-listed plant that has been recorded in Glocester in a forest not unlike the subject property. They could have easily sought and been granted a determination from the EFSB that the power plant company, Invenergy, grant DEM permission for the survey. That is entirely within the EFSB's powers.

Also, in DEM's on words, this plant is not needed, which was confirmed by the lack of Invenegy to sell power in the recent ISO auction where it was found that there is an anticipated excess of 1,500 MW in the system.

Therefore, I once again I request that the Energy Facility Siting Board dismisses Invenegy's application for the Clear River Energy Center.

Please issue an order to dismiss Invenegy's application and close the docket for this project.

Sincerely,

David Brunetti

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Deb Yablonski

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invernergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invernergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

I live in Chepachet and do not want such a potential energy nightmare in this area. This should not be about creating jobs for people or expansion for Invernergy's. Please do not overlook our environment or Invernergy's hastily completed application.

I and an overwhelming majority of my neighbors do not support this power plant. We ask that you listen to us and not Invernergy.

Sincerely,
Dennis Sidoti

Please issue an order to dismiss Invernergy's application and close the docket for this project.

Sincerely,

Dennis Sidoti

Dear Bianco,

February 14th, 2017
SB-2015-06: Public Comment

Dear Energy Facility Siting Board,

I am writing to you in opposition of the Burrillville Power Plant.

There are so many reasons that I am opposed to this plant, but the biggest, and most important one is that this plant will use gas that is fracked. If you know anything about fracked gas, and I am sure that you do, you would know that if more than 3.2 percent of the methane is leaked at the well head, than natural gas is no cleaner than coal. Peer reviewed studies have found that in many areas where gas is fracked, the levels are much, much, higher. Levels as high as 17% have been found.

Calling natural gas clean is a misnomer. When taking into consideration the effect of methane leaked from wellheads, it is anything but clean.

Methane is a powerful greenhouse gas, persisting for decades in the atmosphere.

It would be unconscionable of us to build this plant. The greenhouse gases emitted from the fracked gas will contribute to global warming.

Our planet simply cannot afford this.

The financial gain from this plant would go to just a few people. The harm would be shared equally around the world from Rhode Islanders, to the Inuit, to people living in Bangladesh... Everywhere. Greenhouse gasses know no boundaries.

So, please, issue an order to dismiss Invenergy application and close the docket for this project. Deny it on humanitarian grounds. Now is the time for we people of the wealthy industrial nations to start acting responsibly. Our children are freaking out that we are not dealing with this real and imminent crisis in a responsible and adult manner.

Thank You,

Hope Valley RI 02832

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Diana Kushner
