Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Edmund Durso

Dear Bianco,

Dearest Energy Facility Siting Board,

Please recognize the danger of the proposed Fracking Power Plant. Invenergy's application for the Clear River Energy Center MUST Be Denied and Dismissed. This short-sighted economic solution is not worth the long-term damage to the people and state of Rhode Island. Please do not pollute Our beautiful state with one of these atrocities (!). The effects on air-quality and the environment are Undeniable.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job. Please do not let Invenergy take advantage of our wonderful state.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Additionally, fracking is a practice that will benefit big business and not the consumer or our environment. In this new presidential administration, I expect we'll see more corporations grow and the general public's power over issues that matter to them diminish.

This deal is vehemently opposed by the citizens of Woonsocket, with only a small portion of people in favor of it. Those that do support it are the union workers who would benefit from only 225 temporary jobs. After construction of the facility completes, only 25 nonunion jobs would be generated. Is the cost of business greater than the will of the people?

If the government truly cares about the people's voice and not those of corporations and unions, the choice is clear. We must oppose Invenergy's application and invest instead in clean, renewable energy. Please do what is right for the environment and the next generation of voters. Too often I think deals are made with no foresight in this country. Thank you.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Erik Lougee

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Not many pristine areas left in our small state where our future generations can enjoy nature. Why would we jeopardize that including our clean water and air? For a fracking plant that will be obsolete in 10 years. The time to start thinking about tomorrow is today. Not to mention the need for electricity within the state is not at a critical state. The plan invenergy has purposed has been riddled with holes and question marks. It's completely intolerable for the public and the powers at be to mortgage off public safety and resources for maybe 30 jobs and some tax revenue.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenenergy's application and close the docket for this project.

Sincerely,

James Burge

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

What's more it appears that agencies given the responsibility to review the information are short staffed and just don't have the time to do their job.

Placing a power plant in an area surrounded by state parks and wildlife refuges is a terrible idea! Not to mention we have a surplus of energy now. There is absolutely NO benefit to allowing this out of state company to destroy the NW corner of our state.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Jan Luby

Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to meet the information requirements set by the Energy Facility Siting Act. Beyond this, however, the Independent System Operator auction shows that no new capacity is needed, there is already excess capacity. Further, dozens and dozens of Rhode Island towns have soundly rejected this plant, largely for fears for safety and health. It would be a betrayal of the democratic will and spirit--as well as a betrayal of the people of Rhode Island--to let Invenergy move forward or continue at all with this project. We do not need new fossil-fuel-powered plants.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Jennifer Stout

Feb 15, 2017

Todd Bianco
RI

Dear Bianco,

February 15, 2017 ,

I am a Providence Constituent living in Ward 1, Fox Point. I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI. I have been following this situation for the past year and the details are quite disturbing when brought to light. There are volumes of letters in opposition to the plant as well as troubling information from our planning, environmental and health experts from all over the state available at this website:

http://www.ripuc.ri.gov/efsb/2015_SB_6.html. To date, 26 out of 39 municipality councils in RI have opposed the construction of this power plant through resolutions in these municipalities. The city of Pawtucket, who a few weeks ago sought to become a backup water provider to Invenergy, is now opposed to the construction of this plant based on the deceitful nature of Invenergy's tactics in securing water and approval for its power plant.

During the Woonsocket Town Council meeting to decide whether or not to sell water to Invenergy, there were very few Woonsocket residents who spoke in support of the sale of water. Most who supported the sale were union workers looking forward to the 225 temporary union jobs that would construct the facility. Once construction of the facility is complete, only 25 nonunion jobs would be available. A paltry three nonunion jobs would emerge from the transit of water from Johnston to Burrillville. Surprisingly, a few people who opposed the sale of water actually supported the construction of the power plant in theory but after witnessing the constantly changing presentation of Invenergy plans, had a deep distrust for this company and the potentially catastrophic deal that Woonsocket would be entering into with the sale of water to the power plant and so they opposed the sale of water in this case. When asked why the Woonsocket Town Council members rejected the sale of water to Invenergy, nearly all cited distrust for Invenergy, and the manipulative manner in which they approached the city of Woonsocket, pitting Mayor against Councilmembers. Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. It is clear that this deal is rushed, that there has not been time allowed to review the details of impact, even financial impacts, of the deal. As evidenced by the recent ISO NE energy auction, in which Invenergy was not able to sell its second half of power output to the energy grid, RI is in an energy surplus. So, if we are in a position here in RI to shop around for energy, who stands to benefit from this rushed deal with Invenergy? If the majority of the RI citizen supporters of the power plant are union workers who would like a construction opportunity here in the state, this only tells us that we need more construction jobs, not necessarily more energy. Invenergy clearly is using the leverage of union workers to push its agenda on RI, as seen in the tragic and ugly way that Johnston "leaders" cleared a path to not only use this situation for its own economic benefit but also to disenfranchise legitimate residents of Johnston who wished to voice a dissenting opinion.

In addition to fossil fuel power plants, Invenergy also has expertise in solar and wind energy facilities. When asked why they are not building these clean energy facilities here in RI, their reply was that sometimes the wind does not blow and the sky gets cloudy. Even if we stopped using fossil fuels today, we are on track to endure the hottest and driest weather in history with each passing year. This sets the stage for massive droughts, even worse than what we

experienced this year. We simply cannot afford to "see what happens" when Johnston sells potentially hundreds of thousands of gallons of water per day to Invenegy, never mind the impacts of particulate matter polluting a 30 mile radius around this plant. We have no precedent for this kind of water usage in the Scituate Reservoir, but this agreement sets a precedent that other unregulated wholesale and retail customers of Providence Water can sell our water at a profit. Clearly, the effects could be catastrophic on many levels with no recourse once the deal is made. We unfortunately do have a precedent for air pollution in RI, one that makes our citizens victims of asthma and other respiratory diseases and diminishes the small areas of intact ecosystems that act as carbon sinks and help the our climate regulate the disturbance of atmospheric degradation and global warming caused by this exact action of humanity- burning fossil fuels for energy. Let's work together to build clean energy power plants. Solar and wind energy are the future.

Give our noble unions something worth building, not something that will reduce our quality and longevity of life. Please oppose the Invenegy Power Plant and the sale of water to Invenegy through Johnston's contract with Providence Water Supply Board.

Sincerely,

Jim Frain

[REDACTED]
Providence, RI 02906

Please issue an order to dismiss Invenegy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas and diesel power plant in Burrillville.

Everything about this plan is wrong and blatantly immoral. The facts supporting this statement are contained right in the application .

Using RI WATER - the best drinking water in the country to cool filthy turbines and grossly polluting our entire state with carcinogens, using 100's of acres of beautiful RI forest as a site- all to generate electricity that is not need needed and WILL NOT even be used in our state is outrageous.

Corrupt politics ar it's finest. Why are we prostituting our state to make this obscenely rich Chicago guy even richer ? It is clear that the people of RI have NO PROTECTION in the EFSB.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Joanne Borodemos

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Invenergy has clearly lied about "facts" and made continuous changes to their plans. How will we ever know the truth in this case?

How can we possibly trust they will actually follow the laws and safety regulations?

We were told if there are "real" concerns that this wouldn't continue to move forward. There are MANY real health and safety concerns which means this NEEDS to be dismissed.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Dear Bianco,

I am writing as a citizen of Gloucester, RI to plead with you(EFSB) to dismiss the application by Invenergy Thermal Development, LLC to build the Clean River Energy Center.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

There seem to be plenty of studies and opinions on whether or not the New England power grid needs the electricity produced by CREC. I think with added renewable sources, energy storage, and efficiency measures, there will be enough electricity for our region. More effort needs to be given to these "green" advances for New England's energy demands to be met.

Even more importantly we, as a State and society as a whole, cannot allow yesterday's energy production methods to pollute our land, air, and water and seal our fate with catastrophic climate change! For the sake of our children and grandchildren, we need to switch course to more environmentally compatible solutions. This will be a brave step for you to take, but necessary for societies' continuation.

Finally, with all the shenanigans with the water supply acquisition, it seems that Invenergy is not the most truthful company with which to deal. This is particularly bothersome, especially with a sensitive and potentially damaging environmental issue such as this!

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Joel Gates

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Issues around the development of this project also are dubious. The Natural History Surveys latest survey sites conservation concerns in the area of the state where Invenergy is proposing to build. Also the Johnston water-deal with Invenergy was extremely unfair to the public who were allowed no conversation on the matter.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

John Kenny
