Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

I urge RI to get on board w/ REAL renewable & sustainable energy sources. We are small enough where we could switch to solar powered energy storage unit systems and become one of the first states in the US to do so.. paving the way for the rest of the country and world.

Instead, you've been pushed to approve this hazardous plant for the benefit of very few. Do the right thing and make sure you know the whole story and all the facts before making a decision.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Pam Glennon

Burrillville, RI 02830-1917

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Rhode Island is a state particularly vulnerable to sea level rise as a result of burning fossil fuels, which has caused and is accelerating climate change. We must invest in true clean energy solutions in this state, such as solar and wind energy, not cleverly disguised projects such as this, which increase the rampant carbon dioxide output of our state.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

This proposed power plant is wrong for Burrillville, it is wrong for R.I.

R.I. does not need the electricity and the people do not want it. The power plant will be a monster polluter and it will consume millions of

gallons of water from the Scituate reservoir. It will destroy

hundreds of acres of the last swath of forest in R.I. and it will be gone forever!

It is unfair to burden R.I. with yet another power plant in North West R.I.

There will be many public safety issues and public health issues if this power plant comes to fruition.....at the time of this letter, there are 31 cities and towns around R.I. who are opposed to The Clear River Energy Center...

Please say NO to Invenergy!

Rhoda-Ann Northrup

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new \$1 billion fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Invenergy is using and abusing R.I. Invenergy will destroy hundreds of acres of forest that will be gone forever. Invenergy will consume millions of gallons of water from the Scituate reservoir almost daily.

More than half of the residence in R.I. depend on the Scituate reservoir for their water source.

Invenergy will be a monster polluter, almost 4 times the size of the Providence Mall. The power plant will spew 52 known cancer causing toxic pollutants. The truck traffic will increase by about 60 tankers daily, traveling through the historic communities of Northwest R.I.

carrying volatile oil and gas and ammonia.

R.I. does not need the electricity and the people do not want the power plant!

Say NO to the power plant.

Burrillville already has a power plant and there has been a toxic spill that contaminated their wells with poisonous MTBE!

Does anyone care about the people in Burrillville?

Rhoda-Ann Northrup

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

As a native Rhode Islander, I strenuously oppose this application.

Sincerely,

Richard E. Crawford, Ph.D.

[REDACTED]
Washington, NC 27889
[REDACTED]

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Richard Crawford

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job. I want to know the real reason for this project? Who and how much was promised by our governor and local politicians, to what individuals and what companies, so that the health of our state and it's citizens would be seen as such a low priority, that this is necessary? I have live in this beautiful state all my life, and I know political and financial deals are always the bases for the reasons of such ill conceived plans such as these. Realizing that once the damaged is done there is no repairing it! I also know that the construction on this project's pipeline was started approximately three years ago with the laying of the pipe lines in Northern Rhode Island, by who's hand was that allowed, and what was promised and to whom, at that time? Please reject this idea, it's a bad one! Governor Raimondo be honest and stand behind your citizens, WE DON'T WANT THIS !, remember the next election, YOUR OUT and your CAREER WILL BE OVER, that I promise you, Sincerely, Richard Iadevaia [REDACTED] Glendale, RI 02826, [REDACTED]

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Richard Iadevaia

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Rhode Island needs to invest in clean renewable energy to provide more jobs, Invest in our future, and protect our water and air.

A natural gas power plant emits significant amounts of carbon monoxide, nitrous oxide compounds and ammonia slip especially during startup and shutdown that can occur on a daily basis.

There is also the danger of anhydrous ammonia storage tank leaks (huge risk to the community), and freon compound leaks from intake air conditioning to the gas turbine.

I would also consider toxic boiler water chemicals discharged to the public sewer system, cleaning chemicals, large water usage, and drums of lubricating oils for storage and spent hazardous waste.

I have been employed in a natural gas generation combined cycle facility for fifteen years. These are not "clean" powerplants and the public needs to be informed.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Ron Moniz

Feb 15, 2017

Todd Bianco
RI

Dear Bianco,

I live in East Providence, Riverside area. I encourage you to support the Resolution to oppose the Invenergy Power Plant, oppose the sale of Providence Water to Invenergy through Johnston's wholesale contract with the Providence Water Supply Board and to go to whatever means necessary, including amending state legislation to avoid the allowance of the town of Johnston to sell Providence Water Supply Board water at a profit to Invenergy. I have been following this situation for many weeks and the details are quite disturbing when brought to light.

There are volumes of letters in opposition to the plant as well as troubling information from our planning, environmental and health experts from all over the state available at this website:

http://www.ripuc.ri.gov/efsb/2015_SB_6.html. To date, 24 out of 39 municipality councils in RI have opposed the construction of this power plant through similar resolutions and these municipalities are not even facing threat of a massive potable water hijack. The city of Pawtucket, who a few weeks ago sought to become a backup water provider to Invenergy, is now opposed to the construction of this plant based on the deceitful nature of Invenergy's tactics in securing water and approval for its power plant.

During the Woonsocket Town Council meeting to decide whether or not to sell water to Invenergy, there were very few Woonsocket residents who spoke in support of the sale of water. Most who supported the sale were union workers looking forward to the 225 temporary union jobs that would construct the facility. Once construction of the facility is complete, only 25 nonunion jobs would be available. A paltry three nonunion jobs would emerge from the transit of water from Johnston to Burrillville. Surprisingly, a few people who opposed the sale of water actually supported the construction of the power plant in theory but after witnessing the constantly changing presentation of Invenergy plans, had a deep distrust for this company and the potentially catastrophic deal that Woonsocket would be entering into with the sale of water to the power plant and so they opposed the sale of water in this case. When asked why the Woonsocket Town Council members rejected the sale of water to Invenergy, nearly all cited distrust for Invenergy, and the manipulative manner in which they approached the city of Woonsocket, pitting Mayor against Councilmembers. It is clear that this deal is rushed, that there has not been time allowed to review the details of impact, even financial impacts, of the deal. As evidenced by the recent ISO NE energy auction, in which Invenergy was not able to sell its second half of power output to the energy grid, RI is in an energy surplus. So, if we are in a position here in RI to shop around for energy, who stands to benefit from this rushed deal with Invenergy? If the majority of the RI citizen supporters of the power plant are union workers who would like a construction opportunity here in the state, this only tells us that we need more construction jobs, not necessarily more energy. Invenergy clearly is using the leverage of union workers to push its agenda on RI, as seen in the tragic and ugly way that Johnston "leaders" cleared a path to not only use this situation for its own economic benefit but also to disenfranchise legitimate residents of Johnston who wished to voice a dissenting opinion.

In addition to fossil fuel power plants, Invenergy also has expertise in solar and wind energy facilities. When asked why they are not building these clean energy facilities here in RI, their reply was that sometimes the wind does not blow and the sky gets cloudy. Even if we stopped using fossil fuels today, we are on track to endure the hottest and driest

weather in history with each passing year. This sets the stage for massive droughts, even worse than what we experienced this year. We simply cannot afford to "see what happens" when Johnston sells potentially hundreds of thousands of water per day to Invenenergy, never mind the impacts of particulate matter polluting a 30 mile radius around this plant. We have no precedent for this kind of water usage in the Scituate Reservoir, but this agreement sets a precedent that other unregulated wholesale and retail customers of Providence Water can sell our water at a profit. Clearly, the effects could be catastrophic on many levels with no recourse once the deal is made. We unfortunately do have a precedent for air pollution in RI, one that makes our citizens victims of asthma and other respiratory diseases and diminishes the small areas of intact ecosystems that act as carbon sinks and help the our climate regulate the disturbance of atmospheric degradation and global warming caused by this exact action of humanity- burning fossil fuels for energy. Let's work together to build clean energy power plants. Solar and wind energy are the future. Give our noble unions something worth building, not something that will reduce our quality and longevity of life. Please oppose the Invenenergy Power Plant and the sale of water to Invenenergy through Johnston's contract with Providence Water Supply Board.

Thank you,
Sara Flanders

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please do not approve this. Keep RI rural.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Sara Huber

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job. The will of the vast majority of the people of our State have spoken. They've all said no!

As a Board you must listen. The proposed plant will be obsolete in 20 years. Yet the damage to this pristine second growth forest will be irreparable. We as citizens, as well as stewards of the land we occupy, must draw that line in the sand.

Our parents' generation did it for us! It is well past time we did what science has proven is necessary to prevent catastrophic loss of life due to climate change. Starting here, starting Now. This will come down to you, your voice. Do you jeer our voices?

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Shannon Donahue

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job. You know what the right & moral decision is to make- the power plant is not needed, all the communities in Rhode Island as of today that have taken the time to learn & decide on their own about the need for this plant have passed resolutions opposing it. It makes no sense to destroy acres of beautiful forest in a rural corner of Rhode Island that has been cherished and cared for as well as enjoyed for so very many years. Why on earth our leaders can not see or understand this is beyond me. I implore you, the EFSB, to be true to your heart & what you know is true to Rhode Island, our environment, whether it be the coastline in South County of our beautiful state that gives us our jewels of beaches or our rugged forests of Northern RI that gives us the beauty of our lakes & rivers with our campgrounds, I ask you, how can you allow such an "unnatural" thing to invade our "natural" space. If this power plant is approved our state will never, ever, be the same. The thought of this plant truly horrifies me- it is not needed, not wanted, and I implore you to not allow it. Sincerely from my heart, Sharon Ponce

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Sharon Ponce

Dear Bianco,

My husband and I worked hard and went without many things to own a house and raise our children in this beautiful country town. I was born in this town, my adult children have chosen to live in this country town with their children. We all live on the rout for the trucks also only a few miles away from the power plant sight. I worry so much about the Amonia trucks that will be going by every other day. I worry about the safety of my Family. If this power plant goes in how can we all sell our homes if every other home in Pascoag will also be for sale. This breaks my Heart and also the Hearts of my fellow towns people. Stress is something my cardiologist has told me to try and avoid, he said pick your battles, how can I avoid this? I have to make this my battle it is all for my Grandchildren. I pray often that the stress of this power plant will not effect my Aneurysm so much that it causes it to burts. Please help all of us, please stop this from happening. Let us live in Peace and good health just as you would want for your family. Thank You.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I SUBMIT THIS: INVENERGY'S ORIGINAL APPLICATION DOES NOT REPRESENT THE PRESENT PROPOSED POWER PLANT. THE WATER VOLUME HAS CHANGED WHICH CHANGES THE POWER PLANT'S EFFICIENCY AND THE AIR EMISSIONS (NEEDS A NEW MAJOR SOURCE APPLICATION). THE VOLUME OF LIQUID AMMONIA USED HAS CHANGED DRAMATICALLY. THE WASTEWATER WILL NOW BE TOO CONTAMINATED TO BE TREATED BY BURRILLVILLE'S MUNICIPAL POTW SO IT MUST BE TRUCKED OUT.

THERE HAS BEEN NO MENTION OF THE INCREASED HYDROGEN GAS USAGE ANYWHERE IN THE SUPPLEMENTS. THE NOISE LEVEL WILL INCREASED DUE TO THIS NEW LOW WATER SYSTEM. SO LET ME RECAP: CHANGED: NOISE, AIR EMISSIONS, CHEMICAL USAGE, WATER VOLUMES, WASTEWATER VOLUME/CONCENTRATIONS. THERE SHOULD BE ANOTHER AIR IMPACT REPORT, AIR EMISSION REPORT. ALSO, DUE TO THE FACT THAT THE SPECTRA/ALGONQUIN COMPRESSOR STATION HAS GONE THROUGH A RECENT UPGRADE, THE AMBIENT NOISE REPORT SHOULD BE REDONE.

MY CONCLUSION IS THAT THE EFSB SHOULD MANDATE THAT INVENERGY WRITE A NEW APPLICATION AND NEW MAJOR SOURCE APPLICATION.

THANK YOU.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Stephanie Sloman

Dear Bianco,

I demand that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

To date, at least 31 municipalities have voted to reject the new gas plant proposed in Burrillville. This is because Rhode Islanders want to be a leader in promoting sustainable, responsible energy solutions.

Make no mistake about it, burning fracked gas is dirty energy, producing greenhouse gases carbon dioxide and the even-more potent methane, making it even worse a climate disrupter than coal and oil.

There is no engineering solution for methane leaks at the point of drilling. To disregard climate science and continue building infrastructure that warms the planet and pollutes water and air is a crime against humanity.

Invenergy and politicians say its jobs they want, but what they really mean is exports. That's where the money is, exporting fracked gas. More jobs would be created by solar and wind installations and upkeep. Jobs that would endure in the future, as toxic and disruptive fossil fuel energies prove unusable and a bad investment.

Please decide with the people of Rhode Island, against the proposed gas plant in Burrillville.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Stephen Dahl

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Steve Tundermann
