Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Tahlia Badessa

Todd Bianco
RI

Dear Bianco,

I request that the Energy Facility Siting Board DISMISS Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrilville, RI.

We should NOT be investing in dirty energy sources like fracked gas. We are in a climate change crisis right now, where a massive sheet of ice is on the verge of breaking off of Antarctica. The global temperatures are getting higher and higher, each year breaking the previous year's record breaking heat.

As a coastal state, we in Rhode Island are at risk of sea level rise. We need to get off of fossil fuels IMMEDIATELY.

Instead of a gas power plant, Invenergy should be investing in wind and solar power, which they ALSO develop.

Please REJECT the gas power plant for the healthy and safety of Rhode Islanders today and in the future.

Sincerely,
Tatyana

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Tatyana Yanishevsky

Feb 15, 2017

Todd Bianco
RI

Dear Bianco,

I strongly urge the Energy Facility Siting Board to dismiss Invenergy's application for the Clean River Energy Center. The massive new \$700 million fracked-gas power plant in Burrillville, RI presents a health and environmental threat not only to Burrillville, but also to communities downwind from the plant. Furthermore, the truck traffic involved in transporting water from Johnston to the plant site will create increased stresses on our roads and highways as well as raising new dangers.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion. This violates the Energy Facility Siting Act. Please place your priorities on the citizens affected by this proposal rather than on the industry that is likely to profit from it. I ask that you choose health, the environment, and safety over corporate profits.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Terry Bontrager

Dear Bianco,

Hi there,

I'm writing to ask that the Energy Facility Siting Board dismisses the application submitted by Invenenergy to build a fracked-gas power plant in Burrillville, RI. The community and people from across the state have spoken out against this power plant, and there is inadequate information about the possible effects and dangers of this plant to satisfy public leaders or their constituencies in making an educated ruling on this proposed plant. Moving forward without more ancillary information would violate the Energy Facility Siting Act. There is not enough information for the Board to rule appropriately.

Thank you for your attention to this matter, and thank you for hearing the will of the people in denying Invenenergy its needed permits.

Sincerely,
Tess Brown-Lavoie

Please issue an order to dismiss Invenenergy's application and close the docket for this project.

Sincerely,

Tess Brown-Lavoie

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

If we are in actual need of more power, which is debatable, we should instead be investing in wind and solar energy instead of continuing to harm our environment through the usage of fossil fuels. The new wind turbines installed off the coast of Block Island prove that Rhode Island can be a leader in alternative sources of energy.

If Rhode Island and its government are truly serious about meeting its fossil fuel reduction goals in the next several years, this power plant is, frankly, a transparently stupid venture. I surmise that its only purpose is to increase the wealth of powerful people, and will do so at the expense of those without such wealth and power.

I grew up in Burrillville, and as a strong believer in preserving the rural character and pristine environment of the town, I strongly oppose this power plant. As a lifelong resident of the state of Rhode Island, and concerned about its well-being, I strongly oppose this power plant.

And I will refuse to vote for, or otherwise provide support for, any public figure who supports this plant publicly or privately. And of course, I will advise anyone who will listen to do the same.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Thomas White

Dear Bianco,

I request that the Energy Facility Siting Board dismiss Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Vikki Warner

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Wade Richmond

Dear Bianco,

My name is William Hancock-Brainerd and I'm writing to request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

So far twelve cities and towns across the State have passed resolutions against the plant, including Burrillville who has formally requested your help in stopping the power plant.

I know you will keep the longevity of the town, it's residents and the surrounding towns and cities in your mind as you make your decisions.

Thanks again!

Sincerely William Hancock-Brainerd

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

william hancock-brainerd

Dear Bianco,

Would anyone connected to this energy project be willing to move to and live near these power plants and compressor stations. I didn't think so. It's cleaner than coal but that is not saying a lot.

I request that the Energy Facility Siting Board dismiss Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

William Luther

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

As a home owner in town I am against this power plant. Allowing this to hapoen will diminish the value of the homes in the area, over burden the natural resources of the Scituate reservoir, raise pollution levels and destroy the environment and quality of life for the residents in a the immediate and outer areas of the proposed plant. Health issues will increase, roads will be hazardous with the trucking of amonia, water and then the dangers of fracked-gas gas and diesel. An accident with trucking of amonia diesel etc will destroy the environment and natural surroundings. The gas leak in Burrillville that contaminated a drinking water supply says it all. Many became ill and are still dealing with the repercussions. We have to stop this before it's too late for the enviroment and residents of the community. The power is not needed, the risks are too high and this should not be a consideration. The majority of the state is against the plant. What does that tell you.

Sincerely
William MacNeill
