In Re: The Narragansett Electric Company,
Notice of Intent to Construct a Tap line of Less
Than 1,000 Feet (Kilvert Street Substation Tap)

ORDER

On January 27th, 2004, the Narragansett Electric Company ("Narragansett") filed with the Energy Facility Siting Board ("EFSB") a Notice of Intent to Construct a Tap Line of less than 1,000 feet in accordance with Rule 1.6(c) of the EFSBs Rules of Practice and Procedure.

Narragansett is planning to install a Substation at Kilvert Street in Warwick. In connection with this project, Narragansett will install a new 115 kV transmission tap line from I-187 into the substation. The length of the new tap line will be approximately one hundred eighty-five feet. The work will occur within the substation site and the adjacent developed transmission line corridor.

EFSB's Rules of Practice and Procedure require that a Notice of Intent to construct power lines of less than 1,000 feet be filed with the councils of any town or city affected by the construction of said lines at least sixty (60) days before construction is to commence, and allows the city of town or any intervenor to file an objection of with the EFSB within thirty (30) days after the filing. Narragansett stated that copies of the materials filed with the EFSB were filed with the City of Warwick. No objection has been received by the EFSB.

The project identified by Narragansett does not constitute a major energy facility under the Energy Facility Siting Act since all the work will occur within the substation site and the adjacent transmission line corridor.

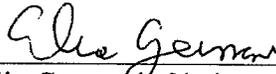

THEREFORE, it is hereby

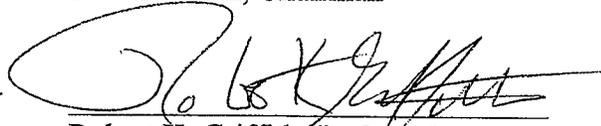

(52) ORDERED

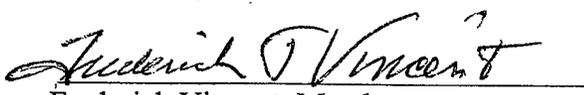

The Notice to Construct a Tap Line of less than 1,000 feet in connection with the Kilvert Street Substation is accepted. Construction may begin on or after March 29th which is sixty-one days following the date said Notice was filed with the EFSB.

EFFECTIVE AT WARWICK, RHODE ISLAND ON March 19 2004 PURSUANT TO AN OPEN MEETING DECISION.
