# Live stream problems

Today at 8:59 PM

Hi Todd, I am writing to you to ask you to please help me during live stream. I have been watching the hearing and I did not understand when the video system was down. I did not watch them the first part of the hearing and during recess had no sound through the entire second part of the hearing as I am a working person. Since the hearing is in January, it is really important to be able to watch in its entirety. I am and always have been a power plant. It does not belong in this ecology.

Thank you,

Jeannine Fortin
