**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

Dear Mr. Bianco,

I urge you to reject the fracked gas power plant proposed for Burrillville. Simply put, this power plant would take Rhode Island in the wrong direction.

There are serious concerns about local air and water pollution wherever a fracked gas power plant is built and operates, resulting in environmental and health concerns. If built, this plant would use thousands of gallons of Rhode Island's water and generate huge amounts of wastewater every single day. And it would promote fracking and accelerate climate change. Moreover, energy analysis and grid operators have proven that there isn't even a demand in the region for this power plant.

Burrillville residents deserve better than this fracked gas Invenergy plant. Rhode Island's future deserves better, too.

Protect our climate, our water, and the next generation of Rhode Islanders by rejecting Inenergy's Burrillville Power Plant proposal.

Sincerely,

Marianna Richardson  
1223 Saugatucket Rd  
wakefield RI, 02879-8113
