In re: The Narragansett Electric Company :
(E-183 115 kV Transmission Line : Docket No. SB-2003-01
Relocation Project – A/C I-195 Relocation) :

The Narragansett Electric Company d/b/a National Grid's
Response to the
Energy Facility Siting Board's Record Request of October 22, 2014

RECORD REQUEST NO. 1:

- (a) How much money is in the rate case refund account, including accumulated interest?

RESPONSE: There is currently approximately \$8.4 million, including interest, in the refund account. With the \$8.7 million of other funding set aside for this Project, total funding of approximately \$17.1 million is available to offset the estimated cost of the Project, leaving approximately \$16.8 to be recovered from Providence and East Providence customers.

- (b) What is the estimated impact of the Project cost (in excess of what has been raised) on a typical Providence or East Providence electric customer?

RESPONSE: The estimated monthly bill increase if this amount were recovered through a per kWh charge to Providence and East Providence customers over a 20-year period would be approximately \$0.44 per month for a typical 500 kWh per month customer, or an increase of 0.5% above the bill based on rates currently in effect. This amount is based upon a levelized revenue requirement over the 20-year period. If the charge is based upon a revenue requirement that declines over the 20-year recovery period, the first year monthly bill increase would be \$0.59 or approximately 0.7%, and would decrease in each subsequent year.
