

To whom it may concern:

My name is Christy Cook and I'm a resident of Pascoag, RI. I live down the street from the site of the new power plant. I

have 3 young children and my family has lived on this land for generations. I beg you to oppose the power plant. Our system of living is broken and needs to revert to the old "natural" ways of living or to create something new. This land needs to be cherished and protected because that's what important. Not money or even jobs. I fear for the health and safety of my family and all of the children. The big companies can spoon feed us all the promises they want, but we all know, deep in our hearts that this is wrong and un-natural. I have tears in my eyes whenever I think about the rape and destruction of our beautiful town, state, country, Earth. I will close with this: If I asked you to close your eyes and imagine your dream home, what would you see? Would there be a power plant in your backyard? Or even your town? Help me keep my dream home. Please.
