People make mistakes we do it everyday.

How can we risk the lives and
well-being of so many Humans,
Animals + plants by allowing this
Power Plant to be built on OUR
watershed.

Our beautiful lakes will dry up. Our quiet
days + nights will become noisy. We will
increase hazardous waste. We will cover our
beautiful skies ~ these are not good
or nice things

Please Vote NO NEW POWER
PLANT because it is the good
and right thing to do for
our part of the world.

Thank you.

MY FAMILY, STEERES, SMITHS HAVE
BEEN IN BURRILLVILLE FOR MANY MANY
MANY YEARS. THEY CHOSE THIS TOWN,
AS MY HUSBAND AND I, TO LIVE OUR LIVES
IN BECAUSE OF THE SMELL OF TREES
& GRASS, THE SOUNDS OF THE BIRDS AND
SQUIRRELS IN THE TREES, THE ABILITY TO
SEE A BEAUTIFUL SUNRISE AND SUNSET.

PLEASE DON'T TAKE THAT AWAY-FOR OUR
CHILDREN'S CHILDREN SHOULD AND DESERVE

TO HAVE THAT OPPORTUNITY
TO EXPERIENCE ALL THESE BEAUTIFUL
THINGS IN SUCH AN UGLY WORLD.

Thank you.

VOTE NO FOR NEW POWER PLANT

As this is "state of the art" new technological "Plant"
In theory they have a plan to make this
work — but not all theories are correct.

What type of safety precautions + procedures are
in place if a leak or something unexpected
happens? Are there any consequences if
something is done incorrectly or in negligence.

Will there be a "SHUT DOWN" order be available?
or will it be a "as you can fix this..... type of thing? →

Thank you.

VOTE NO FOR NEW POWER PLANT

I'm concerned with the amount of water being consumed on a daily basis.

I realize the higher amounts are under certain circumstances.

Here's the thing we have water shortages in dry summers now — those with own wells — this would make it worse for them

If we run out of water our safety is compromised — chance of fire increases — →

the families would have to pay for water
to go to the laundymat just for day to
day living.

Thank You

VOTE NO TO NEW POWER PLANT

The idea of 300 plus jobs coming to RI is misleading.

These positions are only open for a certain "limited" time frame.

For Example 30 months of construction

Day 1: person taking parking lots & roadways will not still be working on day 640.

A roofer or electrician is not working for that time frame. These jobs/positions are not family supporting for long term -

VOTE NO TO NEW POWER PLANT!

Increasing in traffic with more vehicles increases pollution from the extra vehicles and the current commuters when you are idling more while sitting in traffic.

Rt. 44 in Chepachet all the way through to Greenville. That road has a lot of traffic now with school buses and workers.

Rt. 6 - Rt. 10 + 8950 always have traffic back-ups and delays. These trucks would be adding to that problem.

If this is going to be a major power source - how susceptible or desirable will this be to terrorism?

What type of security measure are planned to make sure this does not happen?

VOTE NO NEW POWER PLANT

DESMOGBLOG.COM has a true story about a family in Pennsylvania. It tells about how they are living with "flammable" water from fracking industry. It describes how they are not being "taken care of" for lack of better term.
(only one of about 245)

This is dangerous to those communities & its residents why would we want to do that to our fellow humans?

Full website address on back of this card

desmogblog.com/2015/08/21/pennsylvania -
family-dealing-water-contamination -
linked-fracking-industry

if you cannot get on this I would be
glad to share by email or facebook

TAX REVENUE: Are we financially wealthy enough to sustain a lengthy battle with this company to be paid appropriate tax monies or will they have the ability to set their own figure on what they will pay?

I noticed when there was a lot of foreclosure properties in town the average value of property went down & our taxes did not. Will this major amount from Envergy give us any relief from the money or then again when our values drop.... →

The price of commodities change with
the level of supply and demand.

As this company will be demanding more oil,
water, gasoline.... The supplier will have the
opportunity to price it accordingly.... This
will affect the citizens adversely when
trying to fill the tanks of oil + gas

If MTBE is introduced back into our water system people will become sick.

Sick people do not work. Workers who do not work do not make money. Without money people won't be able to afford to buy food, water, electricity, medical care, rent, mortgages — in turn this will make people further into debt possibly even lose their homes (whether it is a house or apartment.)

This would affect quality of their life! Thank you

VOTE NO NEW POWER PLANT!

The stirring up of MTBE in a closed well could cause current structure to become damaged. This could cause MTBE to leak undetected + uncontrollably into our Pure Water we use to live.

This concerns me deeply!

Thank you
