To whom it may concern:

RE: Proposed Power Plant in Burrillville

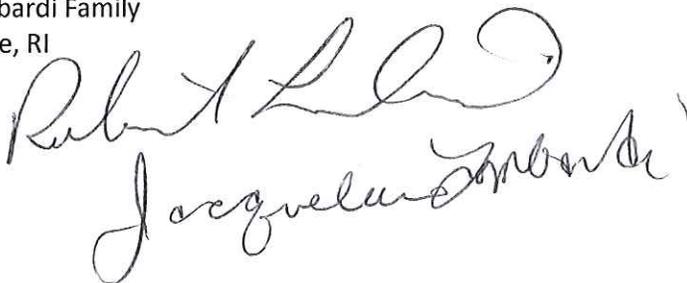

Robert and Jacqueline Lombardi, longtime residents of Burrillville, oppose the proposed plans for a Power Plant in Burrillville for various reasons relating to traffic, noise, environmental, pollution and mainly; ruins the town of Burrillville which has been in the past a country quiet town. No site like this should be seen in Burrillville. These types of ideas change the whole characteristics of our town, making it more like a busy, industrial city. That is not fair to residents of the town who live and enjoy Burrillville's quiet country living, especially for those whom have lived here since childhood and plan to enjoy their home and land for many years to come; that they purchased. No one should be forced to sell their home to get out of something like this, and I'm sure homeowners in Burrillville will not want to stay if this proposal is approved.

Just because Burrillville has the land space to support a project as this, it should not be allowed. That is not what the land is for, our town is known for the beautiful open space, wildlife and quiet country living. The town is already built up enough through the years, but a project as this will truly change the town completely.

This project should be located in an already industrial area, which I am sure could be found and agreed upon elsewhere.

Sincerely,

The Lombardi Family  
Harrisville, RI
