Energy Sitting Board

Dear Sir or Madam;

My name is Julia M. O'Rourke and I reside at 1065 Wallum Lake Road, Burrillville Rhode Island. I live in the immediate vicinity (less than ¼ mile) of the proposed Clear River Energy Center Project. I grew up in the town of Burrillville after college I purchased a home in Cranston Rhode Island. In 2005, I decided to purchase and renovate my grandmother's house. I moved back to rural Burrillville because of the environmental factors and my quality of life. I have a genuine interest in preserving my personal property rights and I am concerned about the adverse economic impact that this project will have on my property value. In addition, because of the close proximity of the project to my home, I have serious concerns of the negative impact it will have on my and family's health (air emissions, water, noise), safety (security, traffic) and quality of life due to the noise and traffic during the construction and long term site operation. Specifically, in the past year, I have experienced excessive noise and vibrations throughout the day and night hours that are coming from the Algonquin Compressor Station site which this project will be located next to. The noise and vibrations emanating from this site are extremely disruptive and negatively impacting our health and we are unable to sleep or enjoy the peace and quiet of our home. I am concerned that the noise levels and vibrations are only going to increase during the construction and operational phase of this project. We are also greatly concerned about the pollution and the dangerous toxins that the plant will emit. I plead that each and every one of you votes against the Clear River Energy Project.

Respectfully,

Julia M. O'Rourke & family
