Ms. Luly Massaro, Commission Clerk
Rhode Island Public Utilities Commission
89 Jefferson Boulevard
Warwick, Rhode Island 02888

Dear Ms. Massaro,

We are filing, herewith, for effect September 23, 2004, tariff material consisting of:

RI PUC No. 20

Section	Revision of Page(s)	Original of Pages
TOC	33	N/A
13	1	N/A
30	14	N/A

In this filing, Verizon Rhode Island introduces 1+ Coin Rating Service. Verizon developed 1+ Coin Rating Service as a wholesale network solution to enable any Interexchange Carrier ("IXCs") to provide their end users operator services for 1+ coin calls originating from Verizon provisioned Public Assess Smart-Pay Lines (PASL) used to operate network controlled pay telephones. 1+ Coin Rating Service includes real-time (automated) rating, live operator assistance and the management and reporting of coin deposits.

Verizon certifies that the rates for 1+ Coin Rating Service are not less than the Long-run Incremental Cost of providing the service.

If you have any questions regarding this filing, please contact Pat Tapley of my staff on 401 525-2133.

Respectfully submitted,

Theresa L. O'Brien
Vice President – Regulatory Affairs

Verizon Rhode Island

Introduction of 1+ Coin Rating Service August 2004

Section 1 - Service Description

In this filing, Verizon Rhode Island introduces 1+ Coin Rating Service. This wholesale service will provide Interexchange Carriers ("IXCs") with the use of Verizon's LiveSource Operator Services for the IXCs 1+ coin pay telephone calls originating from Verizon provisioned Public Access Smart-Pay Lines (PASL) used to operate network controlled ("dumb") pay telephones. The term "1+ Coin" refers to calls that are directly dialed from such pay telephones and for which payment is made through coin deposits.

The service includes real time (automated) rating, live operator assistance, management of coin deposit, and development of billing data to provide accounting for coin funds. IXCs will be responsible for call transport and termination after the applicable coin deposit is made and the call is released to the Carrier for completion. Carriers may order 1+ Coin Rating Service for their IntraLATA and/or InterLATA toll calls.

IXCs wishing to subscribe to the 1+InterLATA coin service will be required to complete a Technical Questionnaire (TQ). This TQ will provide information specific to the carrier; including such items as rate tables, Carrier Identification Code (CIC), Special Purpose Identification (SPID), branding requirements and technical contacts.

Section 2 - Target Market

The target market for 1+ Coin Rating Service is Interexchange Carriers that wish to provide their end users with sent-paid service originating from Verizon network controlled coin stations.

Section 3 - Rationale for Filing

In May 2001, AT&T, who was the sole designated national provider of 1+ InterLATA coin (sent-paid) calling from LEC (Local Exchange Carrier) network controlled payphones, filed an application with the FCC to withdraw from the 1+ InterLATA coin sent-paid business. AT&T subsequently filed tariffs with state commissions as well. Following approval, AT&T implemented a transition plan to phase out the service. AT&T's service utilized Feature Group C based signaling for the coin functionality and no other Interexchange Carrier had the technical capability to provide this service. At the end of the phased transition, AT&T disconnected and removed the Feature Group C trunks. End user customers were then unable to complete 1+ InterLATA calls on a sent

paid basis; instead, they would reach an intercept message: “The call cannot be completed as dialed.”

AT&T's withdrawal had a significant impact on Verizon RI, since the Company offers payphone providers Public Access Smart-Pay Line Service (PASL). To remain competitive and viable, PASLs require a 1+ coin rating service. As a result, Verizon developed 1+ Coin Rating Service as a wholesale network solution to provide sent-paid calling from payphones.

Section 4 - Application of Rates

The pricing structure for 1+Coin Rating Service is set forth below:

Service Category	Rate Element	Rate
1+ Coin Rating Service	Rating Per Call	.0886 per call
	Live Operator Assistance – Per Work Second	.0297 per operator work second
	Rate Table Change – NRC	\$550.00 Per Change
	Branding	.0579 per call

Verizon certifies that the rates for providing 1+ Coin Rating Service are not less than the Long-run Incremental Cost of providing the service.
