In this filing, Verizon Rhode Island (“Verizon RI”) proposes increases to certain Frame Relay Service (FRS) and Asynchronous Transfer Mode Cell Relay Service (ATM CRS) rates. Frame Relay Service is a virtual private data network service that allows a customer to simulate a dedicated high-speed data network, and Asynchronous Transfer Mode Cell Relay Service is a telecommunications transport and switching service that provides for high-speed connectivity between customer-designated locations. A detailed list of the changes is contained in Attachment A to this filing.

If you have any questions regarding this filing, please contact Frances O'Neill-Cunha of my staff at 401 525-3560.

Enclosed are an original and nine copies of the tariff material. Please return a copy of this letter with your stamp of receipt.

Respectfully submitted,

Theresa L. O'Brien
