**VIA HAND DELIVERY & ELECTRONIC MAIL**

Luly E. Massaro, Commission Clerk  
Rhode Island Public Utilities Commission  
89 Jefferson Boulevard  
Warwick, RI 02888

**RE: Docket 3943 – National Grid Request for Change of Gas Distribution Rates Responses to Division Data Requests – Set 4**

Dear Ms. Massaro:

Enclosed please find ten (10) copies of National Grid's<sup>1</sup> responses to the fourth set of data requests issued by the Rhode Island Division of Public Utilities and Carriers ("Division") in the above-captioned proceeding.

Thank you for your attention to this transmittal. If you have any questions, please feel free to contact me at (401) 784-7667.

Very truly yours,

Thomas R. Teehan

Enclosures

cc: Docket 3943 Service List

---

<sup>1</sup> The Narragansett Electric Company d/b/a National Grid ("Company").

## Certificate of Service

I hereby certify that a copy of the cover letter and/or any materials accompanying this certificate were electronically submitted, hand delivered and mailed to the individuals listed below.

Division Data Request DIV 4-2

Request:

Please provide documentation of the test year charges from the Service Company. The response should show the total Service Company expenses and the allocation of those expenses to Narragansett and to gas operations. The response should also clearly show the basis of allocation to Narragansett and to the other subsidiaries of National Grid USA.

Response:

Test year charges from the Service Company to National Grid – RI Gas include direct charges for discrete activities performed by the Service Company specifically on behalf of National Grid – Rhode Island Gas; Service Company operating costs, and charges allocated through “bill pools”. Bill pool allocators are used when the resulting breakdown accurately reflects the nature of the effort performed and the companies that benefit from such effort. As indicated in the response to Data Request DIV-3-4, the Company maintains separate financial statements for gas and electric operations before consolidating those statements into a single statement for Narragansett Electric Company (as the legal entity). The amounts charged to National Grid – RI Gas operations are shown below.

	Test Year 12-Months Ended <u>September 30, 2007</u>
Direct O&M charges	\$ 8,516,203
Allocated O&M charges	11,284,804
Service Company operating costs	(345,203)
Total O&M charges	<u>\$19,455,804</u>

The allocated charges quantified above are detailed in Attachment DIV 4-2, which shows total Service Company expenses and the amount allocated to National Grid – RI Gas for each applicable bill pool. A description of each bill pool, as well as the basis of allocation is also provided.

Division Data Request DIV 4-3

Request:

Please provide the contract between Narragansett and the Service Company for the provision of services.

Response:

Please see Attachment DIV 4-3, which is the service agreement between The Narragansett Electric Company and National Grid USA Service Company, Inc.

**NATIONAL GRID USA SERVICE COMPANY, INC.**  
**25 Research Drive**  
**Westborough, Massachusetts 01582**

**SERVICE CONTRACT**

Dated as of: April 1, 2008

The Narragansett Electric Company  
280 Melrose Street  
Providence, RI 02907

National Grid USA Service Company, Inc. (hereinafter called Service Company) is a company engaged primarily in the rendering of services to companies in the National Grid USA holding company system. The organization, conduct of business and method of cost allocation of the Service Company are designed to result in the performance of services and the provision of goods economically and efficiently for the benefit of associate companies at cost, fairly and equitably allocated among such companies. Services will be rendered by Service Company only upon receipt from time to time of specific or general requests therefor. Said requests may always be modified or canceled by you at your discretion. The parties hereto agree as follows:

1. The Service Company agrees to furnish you upon the terms and conditions herein set forth such of the services described in Schedule I hereto as you may from time to time request. Service Company will also furnish, if available, such services not described in Schedule I as you may request. Notwithstanding the foregoing, the Service Company shall not furnish under this agreement any engineering, construction, or maintenance services for a nuclear generating plant.

2. The Service Company has and will maintain a staff trained and experienced in the provision of services of a general and administrative nature. In addition to the services of its own staff, Service Company will, after consultation with you concerning services to be rendered pursuant to your request, arrange for services of non-affiliated experts, consultants, accountants and attorneys.

3. All of the services rendered under this agreement will be at actual cost thereof. Direct charges will be made for services where a direct allocation of cost is possible. The methods of determining such costs and the allocation thereof are set forth in Schedule II hereto. These methods are reviewed annually and more frequently, if appropriate. Such methods may be modified or changed by Service Company without the necessity of an amendment of this agreement provided that in each instance all services rendered hereunder will be at actual cost thereof, fairly and equitably allocated. You will be advised from time to time of any material changes in such methods.

4. Bills will be rendered during the first week of each month covering amounts due for the month calculated on an estimated basis using the actual expenses incurred to the extent possible during the second previous month. This estimated amount would be adjusted on the bill to be rendered by the conclusion of the following month. Any amount remaining unpaid after fifteen days following receipt of the bill shall bear interest thereon from the date of the bill at an annual rate of 2% above the lowest interest rate then being charged by the Bank of America on 90 day commercial loans. The effective date of this agreement shall be April 1, 2008; services will be performed under this agreement through March 31, 2009, unless terminated at an earlier date by either party giving thirty days' written notice to the other of such termination at the end

of any month.

5. This agreement will be subject to termination or modification at any time to the extent its performance may conflict with any federal or state law or any rule, regulation or order of a federal or state regulatory body having jurisdiction. This agreement shall be subject to approval of any federal or state regulatory body whose approval is a legal prerequisite to its execution and delivery or performance. Cost allocations and the methods of allocation provided herein may also be subject to the jurisdiction of the Federal Energy Regulatory Commission ("FERC") under Section 1275 of the Energy Policy Act of 2005 and the rules promulgated thereunder and, to the extent applicable, FERC determinations regarding the allocation of costs shall be dispositive. Any number of counterparts of this agreement may be executed, and each shall have the same force and effect as an original instrument, as if all parties to all counterparts had signed the same instrument.

**SCHEDULE I****Description of Services Available from  
National Grid USA Service Company, Inc.****Accounting:**

The keeping of accounts and collateral activities, including billing, payroll and customer relations; preparation of reports and preservation of records.

**Auditing:**

Periodic audits by Service Company auditors and the furnishing of reports and recommendations.

**Construction:**

Labor and equipment for construction and maintenance of properties. Assistance in obtaining, and supervision of, non-affiliated contractors.

**Corporate and Corporate Records:**

Cooperation with attorneys, officers and special counsel of associate companies on corporate matters, financing, regulation, contracts, claims and litigation. Services in connection with stockholders' and directors' meetings and keeping of corporate records.

**Customer Services:**

Services re policy development and functional direction of field business service departments, including rate application and training, plus specialized residential, commercial and industrial services.

**Emergencies:**

Assistance in emergency maintenance and restoration of utility service and in mobilization of personnel and equipment.

**Employee Relations:**

Service re labor relations, personnel, wage and salary schedules, employee training and safety and medical programs.

**Engineering:**

Civil, mechanical, electrical, and other engineering services; technical advice, design, installation, supervision, planning, research, testing, operation of communications, including microwave, and operation and maintenance of specialized technical equipment.

**Executive and Administrative:**

Consultation and services in management and administration of all aspects of utility business.

**Information Systems:**

Maintenance and operation of information systems and equipment for accounting, engineering, administration and other functions.

Insurance:

Development, placement and administration of insurance coverages and employee benefit programs, including group insurance and retirement annuities, property inspections and valuations for insurance.

Intellectual Property:

Filing applications, owning, licensing, and holding licenses for copyrights, patents, servicemarks, and trademarks for associated companies.

Properties:

Services re acquisition and disposition of properties; cooperation with attorneys of associate companies in title examinations and conveyancing; maintenance of property records; and making property inventories and valuations.

Power Supply:

Planning and other services for supply of electric power, and negotiation of contracts therefore.

Public Information and Relations:

Services re information to and relations with the public, including customers, security holders, employees, financial analysts, rating agencies and investment firms.

Purchasing and Stores:

Services re purchase and storing of materials, supplies and equipment.

Rates:

Review, design, interpretation, analysis and other services re rates and special contracts .

Regulation:

Analysis of laws, rules and regulations and recommendations for action hereunder; handling of matters with regulatory and governmental authorities; preparation of applications and registrations.

Systems:

Establishing of accounting and other procedures and standards.

Taxes:

Service re federal, state and municipal taxes, preparation of returns and handling of audits and claims by taxing authorities.

Treasury and Statistical:

Services re financing of associate companies, both short and long-term, determination of capital needs, and preparation of financial and statistical reports.

## SCHEDULE II

### Determination of Cost and Allocation Thereof

Records will be maintained for each Department and Division of the Service Company in order to accumulate all costs of doing business and to determine the cost of service. These costs will include wages and salaries of employees and related expenses such as insurance, taxes, pensions and other employee welfare expenses, and rent, light, heat, telephone, supplies, and other housekeeping costs. In addition, records will be maintained of general administrative expenses, which will include the costs of operating the Service Company as a corporate entity.

Charges for services rendered and related expenses and non-personnel expenses (e.g., use of automotive equipment, etc.) will be billed directly to the serviced companies, either individually or, when the services performed are for a group of companies, by means of an equitable allocation formula. Each formula will have an appropriate basis such as customers, meters, employees, plant investments, inventories, or operation and maintenance expenses. Specific allocation ratios, implementing allocation methods previously authorized by the Securities and Exchange Commission, are described further below.

Charges for services will be determined from the time sheets of employees and will be computed on the basis of each employee's hourly rate plus a percentage factor to cover related expenses and general administrative expenses. Records of such related expenses and general administrative expenses will be maintained and subjected to periodic review.

Out-of-pocket expenses which are incurred for the serviced companies will be billed at cost. Charges for non-personnel expenses, such as for the use of automobiles, trucks and heavy equipment, will normally be computed on the basis of costs per hour or per mile.

#### *Summary of Authorized Allocation Methods<sup>1</sup>*

##### Microwave air line circuit miles

A ratio based on the total microwave air line circuit miles as of the end of the prior fiscal year for the systems of the applicable National Grid operating companies. The numerator for this ratio is the total microwave air line circuit miles for each applicable company, and the denominator is the total of all microwave air line circuit miles for all applicable companies combined. This data is updated annually.<sup>2</sup> This allocation method is currently used to allocate charges incurred by Service Company in

<sup>1</sup> The parties agree that each approved Allocation Methodology described below may be applied to any appropriate Service Company Department(s) based on the nature of the specific Allocation Methodology.

<sup>2</sup> The update frequencies reflected in this Schedule II reflect current practice, but are subject to change at the election of Service Company.

the operation of the National Grid system's shared microwave radio transmission system.

#### **Number of employees**

A ratio based on the sum of the number of employees as of the end of the prior fiscal year, the numerator of which reflects the number of employees for each applicable National Grid system company or Service Company Department, and the denominator of which reflects all employees for the National Grid system companies, including the Service Company, combined. This ratio is updated annually. Costs for Service Company employees are reallocated based on how Service Company personnel charged their time to National Grid system companies in the prior year. Currently, this allocation method is used primarily to allocate costs in the Employee Relations and Labor Relations Departments of the Service Company among all National Grid system companies.

#### **Number of customers**

A ratio based on the number of ultimate customers, as of the end of the prior fiscal year, for those National Grid system companies that have ultimate customers. For the allocation of electric distribution-related costs, the numerator is the number of ultimate electric distribution customers of each applicable company, and the denominator is the total number of ultimate electric distribution customers of all applicable companies combined. For the allocation of gas distribution-related costs, the numerator is the number of ultimate gas distribution customers of each applicable company, and the denominator is the total number of ultimate gas distribution customers of all applicable companies combined. The data to establish customer counts is updated annually. This allocation method is currently used to allocate costs of the following Service Company Departments: Customer Service and Load Management, Billing Insertion and Mailing, Customer Information Services, Northborough Facilities Group, Customer Service Center Account Processing, and Credit and Collections Operations.

#### **Number of meters in service**

A ratio based on the number of meters of ultimate customers, as of the end of the prior fiscal year, in each of the National Grid system companies that have ultimate customers. For the allocation of electric distribution-related costs, the numerator of this ratio is the number of electric meters for each applicable company, and the denominator is the total of all such electric meters in all applicable companies combined. For the allocation of gas distribution-related costs, the numerator of this ratio is the number of gas meters for each applicable company, and the denominator is the total of all such gas meters in all applicable companies combined. For the allocation of combined electric and gas distribution-related costs, the numerator of this ratio is the total number of electric meters and gas meters for each applicable company, and the denominator is the total of all such electric meters and gas meters in all applicable companies combined. The data establishing number of meters is updated annually. This allocation methodology is currently used to allocate costs incurred in the Service Company's Meter Testing Laboratory.

**Number of aerial devices (including utility vehicle aerial lifts and buckets)**

A ratio based on the number of assigned aerial devices (such as, for example, utility vehicle aerial lifts and buckets) per the applicable National Grid system operating company as of the end of the prior fiscal year. The numerator is the number of such aerial devices for the applicable National Grid system operating company, and the denominator is the total number of such aerial devices for all National Grid system operating companies combined. The data to establish the number of aerial devices is updated annually. This allocation method is currently used to allocate certain costs of the Engineering Laboratory of the Service Company.

**Number of Rubber Gloves**

A ratio based on the number of rubber glove users in each National Grid system company for the prior fiscal year, the numerator of which is the number of rubber glove users in the applicable National Grid system company, and the denominator of which is the total number of rubber glove users for all National Grid system companies combined. Amounts that would be allocated to the Service Company are reallocated based on how Service Company personnel using rubber gloves charged their time to such National Grid system companies in the prior year. The data to establish the number of rubber glove users is updated annually. This allocation method is currently used to allocate certain costs associated with the Engineering Laboratory of the Service Company.

**Operation and Maintenance Expenses**

A methodology based on the dollar amount, for the prior fiscal year, of the operation and maintenance ("O&M") expenses (excluding transmission of electricity by others as applicable), including customer accounts, customer service and information, and sales expenses, if applicable, for those National Grid system companies that have such expenses. Following are the ratios used to implement this methodology.

*Combined electric transmission and distribution O&M expenses:*

The numerator is the amount of electric transmission and distribution operation and maintenance expenses (excluding transmission of electricity by others), customer accounts, customer service and information, and sales expenses, incurred by the applicable National Grid system company, and the denominator is the total of all such expenses for all National Grid system companies combined..

*Electric transmission-only O&M expenses:*

The numerator is the amount of transmission-only operations and maintenance expenses (excluding transmission of electricity by others), incurred by the applicable National Grid system company, and the denominator is the total of all such expenses incurred by all National Grid system companies combined.

*Electric distribution-only O&M expenses:*

The numerator is the amount of electric distribution-only operations and maintenance expenses, customer accounts, customer service and information, and sales expenses, incurred by the applicable National Grid system company, and the denominator is the total of all such expenses incurred by all National Grid system companies combined.

*Gas distribution-only O&M expenses:*

The numerator is the amount of gas distribution-only operations and maintenance expenses, customer accounts, customer service and information, and sales expenses, incurred by the applicable National Grid system company, and the denominator is the total of all such expenses incurred by all National Grid system companies combined. This ratio is not currently in use; however, Service Company may elect to employ this ratio in the future.

*Combined electric and gas distribution O&M expenses:*

The numerator is the amount of electric and gas distribution operations and maintenance expenses, customer accounts, customer service and information, and sales expenses, incurred by the applicable National Grid system company, and the denominator is the total of all such expenses incurred by all National Grid system companies combined.

The data for calculation of these ratios is updated annually.

This allocation method is a general allocation method to be used when other allocation methods are deemed less reflective of the value of the benefits received by the National Grid system company(ies) serviced. This method is used to calculate allocation ratios for various possible combinations of National Grid system companies that may benefit from such services.

**Budgeted transmission/distribution operation and maintenance expenditures**

A methodology based on the dollar amount of budgeted transmission /distribution operation and maintenance expenditures for the prior fiscal year of each National Grid system company having such expenditures. The numerator is the budgeted transmission /distribution operation and maintenance expenditure amount for each applicable company, and the denominator is the total budgeted transmission /distribution operation and maintenance expenditure amount for all applicable companies combined. This data is updated annually. This allocation method is currently used to allocate charges for Service Company personnel incurred in connection with general supervision of electric distribution and/or electric transmission functions or operations among the applicable National Grid system companies.

**Budgeted transmission/distribution capital expenditures**

A methodology based on the dollar amount of budgeted transmission /distribution capital expenditures for the prior fiscal year of each National Grid system company having such expenditures. The numerator is the budgeted transmission /distribution capital expenditures amount for each applicable company, and the denominator is the total budgeted transmission /distribution capital expenditures amount for all applicable companies combined. This data is updated annually. This allocation method is currently used to allocate electric distribution and/or electric transmission function costs for the various Service Company Engineering Departments such as the Engineering Laboratory, Substation Design, Meter Engineering, Asset Strategy and Performance, and Underground Engineering and Operations.

**Average of number of purchase orders issued, number of checks processed and inventory balances**

A ratio based on the combined averages of invoices processed, purchase orders issued and 13 month average inventory balances by National Grid system companies for the prior fiscal year<sup>3</sup>. The numerator is the combined averages of invoices processed, purchase orders issued and 13 month average inventory balances for the applicable National Grid system company, and the denominator is the combined averages of invoices processed, purchase orders issued and 13 month average inventory balances for all National Grid system companies combined. The calculation of averages is updated annually. This allocation methodology is currently used to allocate costs associated with the Supply Chain and Accounts Payable Departments of the Service Company. Amounts that would be allocated to the Service Company are reallocated based on how Service Company personnel charged their time to National Grid system companies in the prior year.

**Total billings to associated companies for services rendered (excluding convenience payments)**

A ratio based on the dollar amount of the Service Company charges for services rendered (excluding convenience payments) to associated companies in the National Grid system for the prior fiscal year, the numerator of which is the total amount charged to the applicable National Grid system company, and the denominator of which is the total amount charged to all National Grid system companies. The data for these charges is updated annually. This allocation method is used to allocate Service Company's

---

<sup>3</sup> Such combination is calculated as follows. Three averages are calculated: the total number of invoices for each National Grid system company, divided by the total number of invoices for all such companies combined; the total number of Purchase Orders for each National Grid system company, divided by the total number of Purchase Orders for all such companies combined; and the average inventory balance for each National Grid system company, divided by the total average inventory of all such companies combined. These three averages are summed and the final result is then divided by three.

administrative and general service costs that are not strictly operating company costs and are therefore allocated among all of the National Grid system companies. The charges that would be allocated to the Service Company are reallocated based on the prior year average of time charged by Service Company personnel to the applicable National Grid system company.

#### **Materials and supplies issues**

A ratio based on the dollar amount of inventory issues to each applicable National Grid system operating company (including, but not limited to, the dollar amount of issues for capitalized meters and transformers.) The numerator is the number of inventory issues during the prior 13 months for the applicable National Grid system operating company, and the denominator is the number of inventory issues during the prior 13 months, for all applicable National Grid system operating companies combined. The data is updated on a quarterly basis. This allocation method is used to allocate Service Company materials and supplies costs among the applicable National Grid system operating companies. When used in connection with costs and inventory associated with National Grid's New England Central Distribution Centers, this ratio is used to allocate costs solely among National Grid's New England operating companies.

#### **Inventory, less fuel**

A ratio based on the total dollar amount of inventory other than fuel inventory held by each of National Grid's direct or indirect subsidiaries that maintain inventory. The numerator is the total dollar amount of such inventory for the applicable subsidiary, and the denominator is the total dollar amount of inventory for all these subsidiaries combined. This method has typically been used to allocate costs in the Materials Management Department of the Service Company. This allocation method is not currently in use; however, Service Company may elect to employ this method in the future.

#### **Number of purchase orders**

A ratio based on the number of purchase orders issued for each National Grid system company during the previous fiscal year, the numerator of which is the number of such purchase orders for the applicable National Grid system company, and the denominator of which is the total number of such purchase orders issued for all National Grid system companies combined. This allocation methodology is not presently in use; however, Service Company may elect to employ this method in the future.

#### **Archive space occupied**

A ratio based on the square footage occupied per National Grid system company during the prior fiscal year in archive space of the National Grid system, the numerator of which is the square footage occupied by the applicable National Grid system company, and the denominator of which is the total square footage of all such archive space of the

National Grid system. This occupancy data is updated annually. This allocation methodology is not currently in use; however, Service Company may elect to employ this method in the future.

### Department specific costs

**Data Center** – An allocation ratio for each National Grid system company is derived from the amount of mainframe resources used by Service Company applications charged to each such National Grid system company using a predetermined application allocation basis as appropriate for the application in question and selected from the methodologies described in this Schedule II (e.g. the predetermined allocation basis for payroll related systems is the “Number of Employees” allocation methodology). The numerator for this ratio is the amount of resources charged to the applicable National Grid system company, and the denominator is the amount of total resources charged to all National Grid system companies combined. This calculation is updated annually or when significant business events materially alter existing mainframe resources. This ratio is used to allocate the costs associated with the Data Center among all National Grid system companies.

**Facilities , Grounds and Buildings** – To derive the allocation ratio for these costs; the time charged to the National Grid system companies by Service Company Departments that use the National Grid facilities located in Westborough, MA is weighted by the amount of square footage occupied by each such Department at the Westborough facilities. This ratio is used to allocate the costs associated with the National Grid Westborough facilities among those National Grid system companies serviced by Service Company Departments that use the National Grid Westborough facilities. This calculation is revised annually.

**Mid Range Servers** – An allocation ratio for each National Grid system company is derived from the amount of Mid Range resources used by Service Company applications charged to each such National Grid system company using a predetermined application allocation basis as appropriate for the application in question and selected from the methodologies described in this Schedule II (e.g. the predetermined allocation basis for payroll related systems is the “Number of Employees” allocation methodology.) The numerator for this ratio is the amount of resources charged to the applicable National Grid system company, and the denominator is the amount of total resources charged to all National Grid system companies combined. This calculation is updated annually or when significant business events materially alter existing Mid Range resources. This ratio is used to allocate the costs associated with the Service Company’s Mid Range Servers among all National Grid system companies.

**Millbury Training Center** – An allocation ratio is calculated for each National Grid system company based on the amount of time charged, in the prior fiscal year, to each such National Grid system company by the Service Company Departments that utilize the Millbury Training Center facility. The numerator for this ratio is the amount of

such time charged to the applicable National Grid system company, and the denominator is the amount of such time charged to all National Grid system companies combined. This calculation is updated annually. This ratio is used to allocate costs associated with the property which houses the Millbury Training Center located in Millbury, MA among all National Grid system companies.

**Transportation Supervision** - A ratio based on budgeted transportation costs for the prior fiscal year for each National Grid system company having such costs. The numerator is the amount of such budgeted transportation costs for each applicable company, and the denominator is the total amount of budgeted transportation costs for all applicable companies combined. Data for this calculation is updated annually. This ratio is used to allocate Transportation Department general supervision charges.

Division Data Request DIV 4-4

Request:

Referring to the response to DIV 1-1, page 2, please explain how the Accelerated Pipe Replacement spending was allocated among the months.

Response:

Of the total \$10,663,155 capital expenditure forecast for the Accelerated Pipe Replacement Program for the fiscal year ending March 31, 2009, the Company anticipates that \$1,037,642 in annual spending would occur prior to the significant ramp-up of spending that would result from implementation of the program. Consequently, the monthly amounts shown on the response to Information Request DIV 1-1, page 2 for the months Apr-2008 through Sep- 2008 equal one twelfth of \$1,037,642, or \$86,470. For the period Oct-2008 through Mar-2009, the incremental \$9,625,513 (\$10,633,155 minus \$1,037,642) was spread evenly over those six months, or \$1,604,252 per month. The Oct-2008 through Mar-2009 monthly totals of \$1,690,722 equals the sum of the \$86,470 monthly amount prior to ramp-up and the \$1,604,252 monthly ramp-up amount.

Division Data Request DIV 4-5

Request:

Referring to the response to DIV 1-1, pages 2 and 3, please explain what the “New Program Capital Spend” represents.

Response:

“New Program Capital Spend” represents incremental capital spend from Capital Adjusted Base Budget FY 2007/2008 versus projected Total Capital Spend FY 2008/2009 for existing capital programs.

Division Data Request DIV 4-6

Request:

Please provide an update to the response to DIV 1-2.

Response:

The Company does not have more recent data compiled at this time to update this response but will do so at a later date.

Division Data Request DIV 4-7

Request:

Referring to the response to DIV 1-6, please provide the latest gross earnings tax return filed by the Company.

Response:

Please see the Attachment DIV 4-7, which is the gross earnings tax return filed by The Narragansett Electric Company for both the regulated electric and gas operations in Rhode Island for calendar year ended December 31, 2007.

**CERTIFIED MAIL # 7101 9237 6680 4000 6295**  
**RETURN RECEIPT REQUESTED**

February 26, 2008

State of Rhode Island  
Division of Taxation  
One Capitol Hill, Ste. 9  
Providence, RI 02908-5811

Ladies and Gentlemen:

We are enclosing the Rhode Island Public Service Corporation Gross Earnings Tax Return, Form T-72 for two companies.

1) The Narragansett Electric Company for calendar year December 31, 2007 with the amount due of \$2,690,497 which was remitted by wire transfer.

2) New England Power Company for the calendar year December 31, 2007 and has no remittance due with this return.

Please acknowledge receipt of the above return on the attached copy of this letter and return to me.

Sincerely,

  
Frances M. Skypeck  
Assistant Treasurer

Enclosure

R:\2007 Letters\RI-T72.doc

THIS RETURN MUST BE FILED WITH, AND THE TOTAL TAX (NOT LESS THAN \$100.00) MUST BE PAID TO THE TAX ADMINISTRATOR,  
RHODE ISLAND DIVISION OF TAXATION, ONE CAPITOL HILL, STE 9, PROVIDENCE, R.I. 02908-5811, ON OR BEFORE MARCH 1, 2008

Federal I.D. #: 05-0187805

Name: THE NARRAGANSETT ELECTRIC COMPANY  
280 MELROSE STREET  
Address: PROVIDENCE, RI 02901

Type of Public Service Corporation: ELEC/GAS

Schedule A. ANALYSIS OF GROSS EARNINGS	
1. Total amount of gross earnings from whatever source derived both within and without Rhode Island for the calendar year ending December 31, 2007 .....	\$ 1,417,429,658
2. Amount, if any, of Item 1 claimed not to be derived from operation. (This item applies only to corporations operating both within and without Rhode Island. Schedule must be submitted itemizing sources and amounts.) .....	\$ _____
Note: Space for merchandise sales deduction is provided in applicable schedules.	
3. Capital Investment Deduction .....	\$ _____
4. Total gross earnings from operation (Item 1 minus Item 2 minus Item 3) .....	\$ 1,417,429,658

Schedule B. GAS CORPORATIONS	
(This schedule is not to be used by gas corporations also engaged in selling electricity. See Schedule H.)	
1. Entire gross earnings from all sources including sales (same as Item 4, Schedule A) .....	\$ _____
2. Portion of such earnings representing merchandise sales .....	\$ _____
3. NET invoice price of such merchandise plus transportation costs prior to sales .....	\$ _____
4. Taxable gross earnings (Item 1 less Item 3) .....	\$ _____
5. Amount of Line 4 relating to non-manufacturing purposes 1/1/07 through 12/31/07 .....	\$ _____
6. Line 5 times 3% (Enter as Item 1, Schedule E) .....	\$ _____

Schedule C. ELECTRIC CORPORATIONS	
(This schedule is not to be used by electric corporations also engaged in selling gas. See Schedule H.)	
1. Entire gross earnings from all sources including sales (same as Item 4, Schedule A) .....	\$ _____
2. Portion of such earnings representing merchandise sales .....	\$ _____
3. NET invoice price of such merchandise plus transportation costs prior to sales .....	\$ _____
4. Taxable gross earnings (Item 1 less Item 3) .....	\$ _____
5. Amount of Line 4 relating to non-manufacturing purposes 1/1/07 through 12/31/07 .....	\$ _____
6. Line 5 times 4% .....	\$ _____
7. Amount of Line 4 relating to manufacturing purposes 1/1/07 through 12/31/07 .....	\$ _____
8. Line 7 times 0% .....	\$ _____
9. Total amount of Tax (Line 6 plus Line 8, enter as Item 1, Schedule E) .....	\$ _____

Schedule D. STEAMBOAT, FERRYBOAT, TOLL BRIDGE, WATER OR EXPRESS CORPORATIONS	
1. Total amount of gross earnings from all sources within Rhode Island (Item 4 of Schedule A) .....	\$ _____
2. Tax (1.25% of Item 1 for steamboat, ferryboat, toll bridge or water corporations; 4% of Item 1 for express corporations.) Enter as Item 1, Schedule E. ....	\$ _____

Schedule E. TAXPAYER REPORT OF AMOUNT OF TAX DUE	
1. Total amount of tax due as per computation of appropriate schedule (Notate Schedule) <u>H</u> .....	\$ 47,690,497
2. Less appropriate credits (Attach proper form for calculation) .....	\$ _____
3. Tax Due (Line 1 minus Line 2, not less than \$100.00) .....	\$ 47,690,497
4. Less estimated payments made for taxable year of this return .....	\$ 45,000,000
5. Net payment due at time of filing (Line 3 less Line 4) .....	\$ 2,690,497
6. Overpayment _____ Credit to Estimated Tax _____ Refund _____	

Form T-72 (Page 2)  
PUBLIC SERVICE

Schedule F. STEAM OR ELECTRIC RAILROAD OR STREET RAILWAY CORPORATIONS

- 1. Total mileage of tracks within Rhode Island operated by such utility for steam or electric railroad or street railway purposes, exclusive of sidings and turnouts, on December 31, \_\_\_\_\_ miles
- 2. Total mileage of tracks both within and without Rhode Island operated by such utility for steam or electric railroad or street railway purposes, exclusive of sidings and turnouts, on December 31, \_\_\_\_\_ miles
- 3. Proportion in Rhode Island (Item 1 divided by Item 2, carry to 6 decimal places, such as .962357) \_\_\_\_\_
- 4. Entire gross earnings from operation (Item 4 of Schedule A) \$ \_\_\_\_\_
- 5. Gross earnings apportioned to Rhode Island (Item 4 times Item 3) \$ \_\_\_\_\_
- 6. Tax (1.25% of Item 5) Enter as Item 1, Schedule E \$ \_\_\_\_\_

Schedule G. DINING, SLEEPING, CHAIR OR PARLOR CAR CORPORATION

A steam or electric railroad or street railway corporation operating such cars as part or incidental to its railroad or railway business within this state should not fill in this schedule but should fill in Schedule F.

- 1. Number of miles within Rhode Island cars were operated during the year ending December 31, \_\_\_\_\_ miles
- 2. Number of miles both within and without Rhode Island cars were operated during the year ending December 31, \_\_\_\_\_ miles
- 3. Proportion in Rhode Island (Item 1 divided by Item 2, carry to 6 decimal places, such as .962357) \_\_\_\_\_
- 4. Entire gross earnings from operation (Item 4 of Schedule A) \$ \_\_\_\_\_
- 5. Gross earnings apportioned to Rhode Island (Item 4 times Item 3) \$ \_\_\_\_\_
- 6. Tax (1.25% of Item 5) Enter as Item 1, Schedule E \$ \_\_\_\_\_

Schedule H. GAS AND ELECTRIC CORPORATIONS

(This schedule is to be used by corporations selling both gas and electricity and merchandise)

- 1. Entire gross earnings from all sources including sales (same as Item 4, Schedule A) \$ 1,417,429,658
- 2. Gross earnings from sale of gas and gas merchandise \$ 471,338,166
- 3. Portion of such earnings representing merchandise sales \$ \_\_\_\_\_
- 4. NET invoice price of such merchandise plus transportation costs prior to sales \$ \_\_\_\_\_
- 5. Taxable gross earnings (gas basis) (Item 2 less Item 4) \$ 471,338,166
- 6. Amount of Line 5 relating to non-manufacturing purposes 1/1/07 through 12/31/07 \$ 454,926,603
- 7. Line 6 times 3% \$ 13,647,798
- 8. Gross earnings from all sources less earnings from gas operations (Item 1 less Item 2) \$ 946,091,492
- 9. Portion of such earnings representing electric merchandise sales \$ \_\_\_\_\_
- 10. NET invoice price of such merchandise plus transportation costs prior to sale \$ \_\_\_\_\_
- 11. Taxable gross earnings (electric basis) (Item 8 less Item 10) \$ 946,091,492
- 12. Amount of Line 11 relating to non-manufacturing purposes 1/1/07 through 12/31/07 \$ 851,067,480
- 13. Line 12 times 4% \$ 34,042,699
- 14. Total Tax (Line 7 plus Line 13, enter as Item 1, Schedule E) \$ 47,690,497

Schedule I. TELEGRAPH AND CABLE CORPORATIONS

- 1. Gross earnings from operations within the State (Item 4, Schedule A, Submit detailed schedule) \$ \_\_\_\_\_
- 2. Tax (4% for telegraph corporations; 8% for cable corporations; enter as Item 1, Schedule D) \$ \_\_\_\_\_

Schedule J. TELECOMMUNICATIONS CORPORATIONS

- 1. Gross earnings from operations within the State, January 1, 2007 through December 31, 2007 \$ \_\_\_\_\_
- 2. Total tax (Line 1 times 5%, enter as Item 1, Schedule E) \$ \_\_\_\_\_

CERTIFICATION

This certification must be executed or the return must be sworn before a Notary Public

I, the undersigned, Treasurer of THE NARRAGANSETT ELECTRIC COMPANY  
hereby certify under the penalties of perjury that I have personal knowledge of the statements and other information constituting this return, and that the same are true, correct and complete to the best of my knowledge and belief.

Date 2/22/08 Signature *John S. Beltran* Title Treasurer

## Encroachment Workload Increase Factors

1. Backlog of existing encroachments
2. Increased water service replacements

Division Data Request DIV 4-10

Request:

Referring to the response to DIV 1-11, please provide a complete description of the “increased encroachment activity”, and explain why this activity is expected to result in increased expenses prospectively.

Response:

By “increased encroachment activity,” the Company is referring to the significant increase in work that has resulted from increased Public Works activities and third party excavations. As a result of these activities, O & M cast-iron main encroachment activity has increased significantly from the period October 2006 to September 2007. For example, in the period October 2006 to September 2007, the Company completed five O&M cast-iron main encroachments at a cost of \$20,559.

For the period October 2007 to February 2008, the Company completed 23 encroachments at an O&M expense of \$124,349. At the end of that period, the Company had a backlog of 125 uncompleted encroachment projects.

The forecast for O&M encroachment spending for FY 2008/2009 was based upon the encroachment backlog existing at the time of the filing, plus an estimate of new encroachments anticipated during FY 2008/2009. Based upon these factors, the O&M forecast for encroachment repairs for FY 2008/2009 is \$1,054,263. O&M encroachment spend during the period October 2006 to September 2007 was \$20,559. Therefore, incremental O&M expense for encroachment repairs in FY 2008/2009 is calculated as \$1,033,704.

Division Data Request DIV 4-11

Request:

Referring to the response to DIV 1-14, please provide the actual medical and dental costs incurred by month from October 2006 until the latest month available. The response should show the total medical and dental costs and the medical and dental costs charged to expense for each month.

Response:

Please see Attachment DIV 4-11, which provides actual medical and dental costs incurred by month from October 2006 to April 2008, both in total and charged to expense. Consistent with the response to Data Request DIV 1-14, these costs reflect National – RI Gas charges only and exclude any charges from Service Company.

National Grid - RI Gas

Division Data Request DIV 4-12

Request:

Referring to Attachment NG-MDL-1, Page 8, line 9, please provide the corresponding National Grid – RI gas employees by month from October 2006 until the latest month available.

Response:

The number of National Grid – RI gas employees by month from October 2006 to May 2008 is as follows.

<u>Month</u>	<u>Number of Employees</u>	<u>Month</u>	<u>Number of Employees</u>
Oct-2006	525	Aug-2007	467
Nov-2006	524	Sep-2007	464
Dec-2006	517	Oct-2007	455
Jan-2007	509	Nov-2007	453
Feb-2007	505	Dec-2007	452
Mar-2007	501	Jan-2008	421
Apr-2007	506	Feb-2008	422
May-2007	500	Mar-2008	408
Jun-2007	495	Apr-2008	393
Jul-2007	490	May-2008	392

It should be noted that the decline in employees is related principally to employee transfers to Service Company and employee acceptances of voluntary severances and a voluntary early retirement offer (VERO) in connection with the Company's call center relocation, as well as employee acceptances of a VERO in connection with the KeySpan acquisition. The employee counts used to calculate the Company's steady state wages on Attachment NG-MDL-1, page 6 and medical and dental costs on Attachment NG-MDL-1, page 8 are based on employee counts excluding reductions associated with the KeySpan VERO, as those savings are reflected as part of the National Grid/KeySpan transaction synergy savings credit to the cost of service as shown on Exhibit NG-MDL-1, page 1, line 27 and Attachment NG-MDL-4.

Division Data Request DIV 4-13

Request:

Referring to the response to DIV 1-19, please explain the process to identify how the write-off was assigned to previous fiscal years and to verify that any write-offs applicable to service rendered subsequent to September 2007 were not assigned to earlier periods.

Response:

Attached is a table representing the aggregate amount, as of February 29, 2008, of accounts that were written off to the reserve in March 2008 (debiting FERC Account 144 and crediting FERC Account 142). The table, which was generated from data retrieved from the Company's customer billing system, segregates the accounts by the number of days delinquent. To arrive at the adjustment for the periods prior to September 30, 2007, which is the end of the Test Year in this proceeding, the days delinquent periods were adjusted for 150 days, representing the period September 30, 2007 to February 29, 2008 as shown in the column titled "As of 30-Sep-2007". Lastly, the adjustment assumed that accounts more than 90 days delinquent should have been written off to the reserve account. The totals for 360 day increments, representing annual periods ending September 30<sup>th</sup>, are shown on the table and in Volume 5 of 5, Page 93, Workpapers of Michael D. Laflamme in the "Mar 08 Req'd Adjust" column.
