Set 4

DIV 4-2: Reference CPNW Schedule 3.0, page 3. Would witness Woodcock agree that police details would generally be required for transmission and distribution mains replacement and maintenance rather than meter and service replacement and maintenance? Please explain.

Response: Mr. Woodcock generally agrees that police details are needed for transmission and distribution pipe work in roads and highways with public passage and vehicular traffic; they are not necessarily needed for cross country pipe installations where there is no traffic. Unless a meter is in a meter box within a highway right of way where workers are in danger of traffic, there should be no need for police details. There may be a need for some service pipe replacement work, but only for that work that is within a road or highway or may involve entry of construction equipment into a travelled way.
