#### VIA HAND DELIVERY AND ELECTRONIC MAIL

Luly E. Massaro, Commission Clerk Rhode Island Public Utilities Commission 89 Jefferson Boulevard Warwick, RI 02888

RE: National Grid, Annual Gas Cost Recovery Filing Docket No.\_\_\_\_\_

Dear Ms. Massaro:

Enclosed please find ten (10) copies of the pre-filed testimony and schedules of Elizabeth Arangio and Gary Beland in support of National Grid's<sup>1</sup> Annual Gas Cost Recovery ("GCR") filing. The proposed rates contained in this GCR filing reflect the customer class-specific factors necessary for the Company to collect sufficient revenues to recover projected gas costs for the period November 1, 2009 through October 31, 2010. As described in this filing, the proposed GCR rate will result in an average residential heating customer using 922 therms per year experiencing an annual bill decrease of approximately \$7.68 over the currently effective rates. That customer should also experience an additional decrease of approximately \$7.84 associated with the proposed Distribution Adjustment Charge rates found in Docket 4077. Overall, the combined impact of the proposed GCR and DAC rates is an annual reduction of approximately \$15.50 for the average residential heating customer.

This filing also contains a Motion for Protective Treatment in accordance with Rule 1.2(g) of the Commission's Rules of Practice and Procedure and R.I.G.L. § 38-2-2(4)(B). The Company seeks protection from public disclosure certain pricing terms contained in its FCS contract with Distrigas as well as forecast basis numbers, which are purchased subject to a contractual confidentiality agreement. Accordingly, National Grid requests that the Commission protect the price terms and basis information set forth in designated portions of Attachments EDA-2 and EDA-4. To that end, the Company has provided the Commission with the confidential materials for its review, and has included redacted copies of these attachments in the filing.

Thank you for your attention to this filing. If you have any questions, please do not hesitate to contact me at (401) 784-7667.

Very truly yours,

Thomas R. Teehan

# STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS RHODE ISLAND PUBLIC UTILITIES COMMISSION

Annual Gas Cost Recovery Filing Docket No.	2009

### NATIONAL GRID'S REQUEST FOR PROTECTIVE TREATMENT OF CONFIDENTIAL INFORMATION

National Grid<sup>1</sup> hereby requests that the Rhode Island Public Utilities Commission ("Commission") provide confidential treatment and grant protection from public disclosure of certain confidential, competitively sensitive, and proprietary information submitted in this proceeding, as permitted by Commission Rule 1.2(g) and R.I.G.L. § 38-2-2(4)(i)(B). National Grid also hereby requests that, pending entry of that finding, the Commission preliminarily grant National Grid's request for confidential treatment pursuant to Rule 1.2 (g)(2).

### I. BACKGROUND

On September 1, 2009, National Grid filed with the Commission its Annual Gas Cost Recovery filing in this docket. This filing included information relative to the Company's Distrigas contract (Attachment EDA-2) and relative to forecasted basis numbers (Attachment EDA-4) for which National Grid is requesting confidential treatment.

#### II. LEGAL STANDARD

The Commission's Rule 1.2(g) provides that access to public records shall be granted in accordance with the Access to Public Records Act ("APRA"), R.I.G.L. §38-2-1, et seq. Under APRA, all documents and materials submitted in connection with the transaction of official business by an agency is deemed to be a "public record," unless the information contained in such documents and materials falls within one of the exceptions specifically identified in R.I.G.L. §38-2-2(4). Therefore, to the extent that information provided to the Commission falls within one of the designated exceptions to the public records law, the Commission has the authority under the terms of APRA to deem such information to be confidential and to protect that information from public disclosure.

In that regard, R.I.G.L. §38-2-2(4)(i)(B) provides that the following types of records shall not be deemed public:

Trade secrets and commercial or financial information obtained from a person, firm, or corporation which is of a privileged or confidential nature.

The Rhode Island Supreme Court has held that this confidential information exemption applies where disclosure of information would be likely either (1) to impair the Government's ability to obtain necessary information in the future; or (2) to cause substantial harm to the competitive position of the person from whom the information was obtained. Providence Journal Company v. Convention Center Authority, 774 A.2d 40 (R.I.2001).

The first prong of the test is satisfied when information is voluntarily provided to the governmental agency and that information is of a kind that would customarily not be

-2-

<sup>&</sup>lt;sup>1</sup> The Narragansett Electric Company d/b/a National Grid ("National Grid or "the Company").

released to the public by the person from whom it was obtained. <u>Providence Journal</u>, 774 A.2d at 47.

In addition, the Court has held that the agencies making determinations as to the disclosure of information under APRA may apply the balancing test established in <u>Providence Journal v. Kane</u>, 577 A.2d 661 (R.I.1990). Under that balancing test, the Commission may protect information from public disclosure if the benefit of such protection outweighs the public interest inherent in disclosure of information pending before regulatory agencies.

### II. BASIS FOR CONFIDENTIALITY

The Company has redacted forecasts of basis numbers that appear at Attachment EDA-2, pages 3 through 6 and Attachment EDA-4, pages 1 through 4 and pages 13 through 16 and page 18. The Company seeks protective treatment for its basis number information which provides price forecasts at specific points where gas is purchased. This information is assembled by a third-party and purchased by the Company subject to contractual agreement to maintain it as proprietary and confidential information.

The Company has also redacted confidential pricing information from its FCS contract with Distrigas, which information appears at EDA-2, pages 10 through 14 and page 17. The Company seeks protective treatment for that information because it is proprietary and competitively sensitive information that is the subject of a confidentiality agreement between the Company and Distrigas.

### III. CONCLUSION

Accordingly, the Company requests that the Commission grant protective treatment to those previously identified portions of its GCR filing.

**WHEREFORE**, the Company respectfully requests that the Commission grant its Motion for Protective Treatment as stated herein.

Respectfully submitted,

**NATIONAL GRID** 

By its attorney,

Thomas R. Teehan, Esq. (RI Bar #4698)

H RTucken

NATIONAL GRID

DOCKET No. \_\_\_\_\_

DIRECT TESTIMONY

OF

ELIZABETH D. ARANGIO

September 1, 2009

### **Table of Contents**

I.	Introduction	1
II.	Projected Gas Costs	3
III.	Marketer Capacity Assignment	10
IV.	Miscellaneous Issues	13

### I. INTRODUCTION

- 2 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
- 3 A. My name is Elizabeth Danehy Arangio. My business address is 40 Sylvan Road,
- 4 Waltham, Massachusetts 02451.

### 5 Q. WHAT IS YOUR POSITION WITH NATIONAL GRID?

- 6 A. I am the Director of Gas Supply Planning with responsibility for the gas-resource
- 7 portfolio held by National Grid in Rhode Island. I am also responsible for gas supply
- 8 planning for the National Grid resource portfolios in Massachusetts, New York, and
- 9 New Hampshire. For purposes of this testimony, references to "National Grid" or the
- 10 "Company" relate solely to The Narragansett Electric Company which is doing business
- in Rhode Island as National Grid.

### 12 Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND YOUR

- 13 **PROFESSIONAL EXPERIENCE.**
- 14 A. I graduated from the University of Massachusetts in 1991 with a Bachelor of Business
- Administration. In 1995, I graduated from Bentley College with a Master of Business
- Administration. From 1991 to 1994, I worked as a Gas Accounting Analyst in the
- Marketing Operations Department at Algonquin Gas Transmission Company. In 1994,
- I joined Boston Gas Company as a Gas Supply Analyst. In 1997, I was promoted to
- 19 Group Leader Transportation Services, with responsibility for managing all activities

2

3

4

5

6

7

8

9

14

15

16

17

18

19

associated with the customer-choice program. In 1998, I was promoted to Director of Gas Acquisition and Transportation Services with responsibility for the administration of the Company's gas-resource portfolio and customer-choice program in Massachusetts and, as of 2000, the resource portfolio of EnergyNorth Natural Gas, Inc in New Hampshire. In February 2004, I assumed the additional responsibility of gas supply planning for the former KeySpan Corporation New York and Long Island resource portfolios. Following the acquisition of KeySpan Corporation by National Grid, plc, I was named to my current position with the added responsibility for the National Grid gas resource portfolios in upstate New York and in Rhode Island.

### 10 Q. ARE YOU A MEMBER OF ANY PROFESSIONAL ORGANIZATIONS?

11 A. I am a member of the Northeast Gas Association and the New England-Canada
 Business Council.

### 13 Q. HAVE YOU PREVIOUSLY TESTIFIED IN REGULATORY PROCEEDINGS?

A. Yes. I have recently testified before the Rhode Island Public Utility Commission in support of National Grid's Natural Gas Portfolio Management Plan ("NGPMP")

(Docket No. 4038) and the Long Range Gas Supply plan. In the past, I have testified numerous times before the Massachusetts Department of Public Utilities and the New Hampshire Public Utilities Commission.

### Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

1	A.	My testimony provides support for the estimated gas costs, assignments of pipeline
2		capacity to marketers and other issues relating to the Company's proposed Gas Cost
3		Recovery ("GCR") factors.
4	Q.	ARE YOU SPONSORING ATTACHMENTS TO YOUR TESTIMONY?
5	A.	Yes. I am sponsoring the following attachments:
6 7 8 9 10 11 12 13		EDA-1 Summary of Projected Gas Costs  EDA-2 Gas Cost Details - CONFIDENTIAL Information Redacted  EDA-3 NYMEX Strip Comparison  EDA-4 Assignment of Pipeline Capacity - CONFIDENTIAL Information Redacted  EDA-5 FT-2 Operational Parameters  EDA-6 Default Transportation Service  EDA-7 Update of Forecasted Purchases for Incentive Plan
14	II.	PROJECTED GAS COSTS
15	Q.	WHAT COMMODITY PRICES WERE USED TO DEVELOP THE PROPOSED
16		GCR FACTORS?
17	A.	In terms of commodity prices, the proposed GCR factors are based on the following: (1)
18		the NYMEX strip as of the close of trading on August 24, 2009 purchases; and (2) the
19		difference between the futures contract purchases under the GPIP Plan as of July 31,
20		2008 and the August 24, 2009 NYMEX strip. The GCR factors also reflect storage and
21		inventory costs as of April 1, 2009, as well as the projected cost of purchasing gas
22		ratably through the summer, as provided for in the Natural Gas Portfolio Management
23		Plan ("NGPMP"). Attachment EDA-1 provides a summary of gas costs by major cost

categories. Attachment EDA-2 shows the details of the calculations including the cost

- detail by supply source for both forward purchases under the GPIP and the cost impact
- of financial hedges as well as the cost of supplies not locked in price.

### 3 Q. OVERALL, WHAT ARE THE PRICES AND QUANTITIES OF GAS

### 4 PURCHASED UNDER THE PLAN?

- 5 A. Attachment EDA-3 is a graph that compares August 24, 2008 NYMEX pricing to
- August 24, 2009 pricing for the dates used in this filing. This graph shows a \$3.29
- 7 decrease in average prices as compared to a year ago.

supplies further east and northeast.

### 8 Q. WHAT MAJOR CHANGES HAVE OCCURRED IN THE SUPPLY OF

### 9 **NATURAL GAS?**

19

10 Since the Company's May 23, 2008 filing, prices for natural gas have dropped A. 11 significantly. The market has begun to recognize that domestic gas production is 12 continuing to increase, extending the improvement begun two years ago. In the Gulf of 13 Mexico, an area where a longer term decline had been accelerated by the production 14 losses caused by hurricanes Katrina and Rita in 2005, there are new supplies coming on, 15 though production is still below historical levels. There has been considerable success 16 in the Rocky Mountain Basin with ample supply to support the new Rockies Express 17 Pipeline which will be able to deliver approximately 1.8 Bcf/day by November 2009 to 18 Clarington, Ohio. Beyond that, plans are being developed to move some of those

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

Furthermore, the Marcellus Shale formation, which extends from West Virginia northeast through Pennsylvania into southern New York to the western boundary in Ohio and to the base of the Appalachian Mountains in Pennsylvania, has a reserve base estimated between 200 Tcf to 500 Tcf. It is anticipated that the ramp up in supply from Marcellus shale will take place over the next 3 to 5 years. However, it should be noted that while there are many interconnections into the interstate pipelines, increasing the flow into New England and New York will require main line capacity expansions. As a result of these mainline capacity constraints, the impact of Marcellus shale supply may be more of displacement of long-haul gas supplies

In addition, a number of other shale areas are in development as new drilling technology has made previously uneconomic formations profitable. While drilling has receded significantly from its record level, it is expected that this expansion of new supply basins will result in intensification of gas on gas competition, likely causing a flattening of the basis differentials throughout the United States.

# Q. ARE THERE ANY LOCAL PROJECTS IN NEW ENGLAND THAT HAVE OCCURRED IN THE SUPPLY OF NATURAL GAS?

Yes. There are several local projects in the Northeast that will be in-service during the 2009/2010 year. Some of these projects are: (1) Maritimes Phase IV which was built to facilitate delivery of natural gas from the Canaport LNG Terminal to markets in the Northeast and was completed with an in service date of March 1, 2009. (2) The Repsol

A.

Project which had its first LNG shipment arrived at the Repsol's Canaport LNG Terminal on June 27, 2009. Once fully operational, the Canaport LNG Terminal will have a firm sendout capacity of 1 billion cubic feet per day. (3) The Neptune Project developed by Suez LNG, which consists of a 13 mile lateral off the coast of Gloucester, Massachusetts that ties into Spectra's HubLine. The Neptune Project is expected to have an average sendout of 400 million cubic feet per day with a peak capability of 750 million cubic feet per day and is expected to be in-service in spring 2010.

### 8 Q. PLEASE DESCRIBE HOW GAS COSTS ARE CALCULATED.

Consistent with prior filings, projected gas costs are calculated using the SENDOUT model to perform a dispatch optimization of the entire Rhode Island portfolio of gas supply, pipeline transportation, underground storage and peaking supplies. The model uses commodity price, pipeline contract and storage information to determine the dispatch of supplies to minimize the cost of supply over the year. The pricing of various pipeline services is based directly on the pipeline tariffs and the prices in effect as of August 24, 2009. For Company purchases at locations other than the Henry Hub, the model uses the forward basis differential to the Henry Hub prices to determine the expected difference or "basis." Applying the basis to the NYMEX pricing creates a reasonable estimate of the expected cost of supply.

For forecasting future supply costs, the Company uses a forward looking 12 month basis for projecting the differential. To the extent the Company has purchased gas

1 futures, the difference between the cost of the futures and the August 24, 2009 futures 2 prices has also been reflected in the calculations. HOW DID THE COMPANY CATEGORIZE THE PROJECTED GAS COST 3 Q. 4 **COMPONENTS?** 5 Gas costs are disaggregated into five components: (1) Supply Fixed Costs; (2) Storage A. 6 Fixed Costs; (3) Supply Variable Costs; (4) Storage Variable Product Costs; and (5) 7 Storage Variable Non-Product Costs. Each are described below. 8 1. The Supply Fixed Cost component includes all fixed costs related to the 9 purchase of firm gas, including pipeline demand charges and supplier (fixed) 10 reservation costs. 11 2. The Storage Fixed Cost component includes all fixed costs related to the 12 operation and maintenance of storage including fixed storage demand charges, 13 fixed costs associated with delivery of storage gas to the Company's distribution 14 system, and local production and storage costs. 15 3. The Supply Variable Cost component includes all variable costs of firm gas 16 supplies, including the commodity costs and expenses incurred to transport gas. 17 Commodity costs included in the Supply Variable Cost component reflect the 18

sum of purchases made under the Gas Purchasing Program and projections of

gas costs based on the NYMEX prices of wellhead futures contracts as of the

A.

close of regular trading on August 24, 2009 as well as the basis differentials between the point of purchase and Henry Hub.

- 4. The Storage Variable Product Cost component includes all variable costs related to the operation, maintenance and delivery of storage gas, including storage injection and withdrawal costs, delivery of storage gas to the Company's distribution system and the cost of LNG supplies. A summary of gas costs included in the GCR and disaggregated into these cost components by month for the period November 2009 through October 2010 is shown on Attachment EDA-1.
- 5. The Storage Variable Non-Product Cost component includes all variable costs related to the operations, maintenance and delivery of storage, as determined in the most recent rate case proceeding, (Docket No. 3943) injection and withdrawal costs, taxes on storage, delivery of storage gas to the Company's Distribution System, and requirements for storage gas working capital.

### Q. PLEASE DESCRIBE ATTACHMENT EDA-2, PAGES 1 THROUGH 17.

Attachment EDA-2 shows the supporting detail for gas costs included in the filing for the period November 2009 through October 2010. The first two pages show the optimized, forecasted sendout by supply source from the SENDOUT model and the detailed makeup of supply by pipeline source, storage contract and peaking facility. The next section, pages 3 through 6, show the calculation of the full commodity cost,

24th NYMEX strip. Pages 7 through 9 show the calculation of the delivered cost for

each path (the cost times the quantity). Pages 10 through 14 show the detailed

the dispatch cost, for each unit delivered for each pipeline path based on the August

calculation of fixed costs including the unit rates, the billing quantities and the projected

total invoice cost. All known changes to pipeline demand costs have been included.

The cost details for gas injected into and withdrawn from pipeline storage are shown on pages 15 and 16 while the costs for LNG are shown on page 17. The price the Company will be paying will mimic all storage related costs, including the various injection and withdrawal related charges shown in EDA-2. Charges for the Distrigas contracts have been redacted in the public version of the filing in order to comply with

### Q. HOW DO YOU CALCULATE THE DELIVERED COST FOR A PARTICULAR

#### GAS SUPPLY?

the confidentiality terms of the contracts.

**A.** On Attachment EDA-2, page 3, the first supply source shown is gas purchased on Tennessee Pipeline in Zone 0, located in South Texas. The calculation for November begins with the \$4.307 NYMEX price which is then adjusted for basis by, in this case, subtracting \$0.363. This reflects the forward basis strip for gas supply in South Texas delivered into Tennessee Pipeline. Next the price is adjusted to reflect the fuel retention

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

A.

percentage of the pipeline, 8.71%, to bring the price to \$4.320. That adjustment is made by dividing the price by one minus the loss factor, .9129, effectively adjusting the commodity price to incorporate the fact that only 91.29% of the supply delivered to the pipeline in South Texas will be delivered to Rhode Island. The pipeline usage fee of 16.25 cents is then added to reflect the cost of transportation on the pipeline, resulting in a delivered cost of \$4.4823 per Dth.

### III. MARKETER CAPACITY ASSIGNMENT

### Q. HOW IS PIPELINE CAPACITY ASSIGNED TO MARKETERS?

At the time a sales service customer switches to transportation service, the portion of the Company's interstate pipeline transportation capacity under contract to meet the customer's requirements are assigned to the marketer. Under RIPUC NG-GAS 101, Section 6, Schedule C, Sheets 10-13, sub-part 1.07.0 of the Company's Tariff, a pro rata share of upstream pipeline capacity is assigned to marketers serving customers who convert to firm transportation service after October 1, 1997. The pro rata share equals the ratio of the customer's average normalized winter day usage to the average normalized winter day usage for the system as a whole. This share is multiplied by the amount of pipeline capacity in the Company's portfolio to determine the amount of capacity to be assigned.

Α.

The Company's tariff utilizes a path-specific assignment approach that allows marketers to select the path or paths upon which they prefer to acquire capacity. In order to reflect the differing values of various paths, sub-part1.07.0 provides in pertinent part that:

The Company shall assess a surcharge/credit to marketers based on the difference between the charges of the upstream pipeline transportation capacity and the weighted average of the Company's upstream pipeline transportation capacity charges as calculated by the Company. To the extent that the charges of such released pipeline capacity are greater than the weighted average charges, the marketer shall receive credit for such difference in charges based on the total quantity of capacity released by the Company to the Marketer.

The weighted average charge and the surcharge/credit charges applicable to individual pipeline paths selected by the marketer are updated at Attachment EDA-4 of this filing.

# Q. WHAT TRANSPORTATION PATHS WILL BE AVAILABLE FOR ASSIGNMENT TO MARKETERS?

Attachment EDA-4, page 1 shows the paths and corresponding quantities available for assignment to marketers. In total, the Company has made available 25,258 Dth per day of capacity on six different pipeline paths, which is unchanged from last year. The capacity provides marketers with the flexibility to select paths that best compliment their individual resource portfolios and requirements. In the event an individual path is over-subscribed, the Company will assign capacity on a pro rata basis.

### Q. PLEASE EXPLAIN THE SURCHARGE/CREDIT CALCULATION FOR EACH

### **ASSIGNED PIPELINE PATH?**

The first step in calculating the adjustment charge for each path starts with calculating the system-average cost. The derivation of the weighted-average pipeline path cost of \$.9987 per Dth is shown at Attachment EDA-4, Page 10. This cost is equal to the sum of the 100% load factor fixed-cost unit value and the system-average unit variable cost. The fixed costs are similar to reservation charges, which reserve space on the pipeline and ensure that there is a path available to transport gas to the Rhode Island area. The 100% load factor fixed-cost unit value is \$.6020 per Dth. The variable costs include the pipeline compressor fuel loss and the usage fees on the pipelines. The system-average pipeline unit variable cost is \$0.3976 per Dth. The sum of the \$0.6020 (100% load factor) unit fixed-cost and \$0.3967 system-average pipeline unit variable cost results in a weighted average pipeline cost of \$.9987 per Dth.

A.

### Q. HOW ARE THE DELIVERED COSTS FOR EACH PATH DEVELOPED?

A. The calculations for delivered cost for each path are similar to those described for the system average. For illustration, the calculation for the first path (Tennessee Zone 1, shown on Attachment EDA-4, page 6) is comprised of a single contract originating in Zone 1 and terminating in Zone 6. Total fixed costs of \$1,123,092 and total variable

costs of \$14,158,645 are shown near the bottom, right of page 6 of EDA-4. Commodity gas costs of \$13,133,118 priced at the August 24, 2009 NYMEX prices used in this filing are subtracted from the variable costs to arrive at the non-gas variable costs, which include pipeline charges and any basis differential associated with the path. The cost of the path equals the sum of the fixed unit cost of \$0.513 per Dth at 100% load factor plus the non-gas variable unit cost of \$0.468 per Dth, or \$.981 per Dth. The unit cost of \$.981 per Dth represents the direct costs incurred by the marketer, which are paid to the transporter or other provider. Since these costs are \$0.018 per Dth less than the system-average, marketers electing this path would be charged \$0.018 per Dth per day each month on their bill from the Company. A summary of the individual path costs and associated credits or surcharges, for which approval is sought, is shown on Page 1 of Schedule EDA-4.

1

2

3

4

5

6

7

8

9

10

11

12

14

### IV. MISCELLANEOUS ISSUES

15 Q. HAVE THERE BEEN ANY CHANGES TO THE COMPANY'S PIPELINE

16 **CAPACITY?** 

13

14

15

16

17

18

19

1 **A.** No. The Company's next capacity change will occur November 1, 2010 or later with the addition of new Algonquin pipeline capacity from their East to West Project being added to serve a number of constrained areas. Originally, this capacity was scheduled to be added in November 2009 but the project has been delayed. That capacity addition is fully described in the Company's Long Range Plan filing.

# 6 Q. ARE THERE ANY OTHER CONTRACT CHANGES AFFECTING THE 7 SUPPLY PORTFOLIO AND GAS COSTS?

Yes. There are three significant changes. (1) On March 31, 2009 the asset management contract with Merrill Lynch terminated. (2) The new Natural Gas Portfolio Management Plan ("NGPMP") became effective April 1, 2009 and (3) the LNG liquid supply contract with Distrigas of Massachusetts terminated on March 31, 2009.

The NGPMP (Docket No. 4038) was designed to encourage the Company to minimize gas costs to customers by coupling a least-cost dispatch with an asset optimization program designed to obtain the maximum value from the gas supply portfolio resources.

The Company's LNG liquid supply contract with Distrigas commenced in December 1, 2008 and ended on March 31, 2009. The Company retained the right to purchase a quantity of LNG up to the MDQ of 6,000 MMBtu/day with a total quantity during the term of up to 100,000 MMBtus. The contract was structured in a format that allowed the Company to request the total requirements on any two (2) occasions during the term

- of the agreement. This filing reflects an estimate assuming replacement of the contract.
- 2 The Company is still in the process of determining the appropriate level of LNG liquid
- 3 that it should contract for the 2009/10 Peak Season.

### 4 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

5 **A**. Yes, it does.

Attachment EDA-1 Redacted Docket No. \_\_\_\_\_ September 1, 2009 Page1 of 1

#### SUMMARY OF ESTIMATED GAS COSTS FOR 2010 GCR Estimate

8/24/2009 NYMEX

# Operational Parameters Non-Daily Metered FT-2 Storage and Peaking Resources

The following Operational Parameters are pursuant to RIPUC NG No. 101, Section 5, Schedule E:

Effective Period: November 1, 2008 through October 31, 2009

### <u>Underground Storage:</u>

Maximum Inventory Level at any time is 100% of Aggregation Pool's MSQ-U Minimum Inventory Levels:

November 1st	98%
December 1st	92%
January 1st	75%
February 1st	50%
March 1st	25%
April 1st	3%

Maximum Monthly Withdrawals expressed as percentage of MSQ-U:

November	10%
December	23%
January	25%
February	23%
March	22%

# Maximum Daily Withdrawals:

Level of Storage	Allowable Daily
Inventory Expressed	Withdrawal Expressed
as % of MSQ-U	as % of MDQ-U
>35% to 100%	100%
>25% to 35%	85%
>10% to 25%	68%
>0% to 10%	50%

Maximum Daily Injections expressed as percentage of MDQ-U:

April - September 55%

# Peaking Inventory:

Injections are not allowed.

Inventory Level allocated on November 1, 2008= MSQ-P

# Minimum Inventory Levels:

11,011001, 20,015.	
•	<u>Minimum</u>
November 1st	100%
January 1st	81%
February 1st	42%
March 1st	14%
April 1st	5%

Maximum Daily Withdrawals = MDQ-P

MSQ-U	Maximum Storage Quantity - Underground
MDQ-U	Maximum Daily Quantity - Underground
MSQ-P	Maximum Storage Quantity - Peaking
MDQ-P	Maximum Daily Quantity - Peaking

Attachment EDA-6 Docket No. September 1, 2009 Page 1 of 2

### NATIONAL GRID – RHODE ISLAND TRANSPORTATION DEFAULT SERVICE

#### **Price Sheet**

As indicated in Item 2.04.0 of Section 6, Schedule C of the Company's Transportation Terms and Conditions, two Default Transportation Services are available in the event that a marketer stops delivering gas on behalf of Large and Extra Large FT-1 customers who have elected to forgo the Company's assignment of pipeline capacity:

### **Short-Notice Service:**

The commodity charge for Short-Notice service shall be the higher of:

a. The Company's applicable firm sales rate

OR

b. Winter (November – March) – 135% of the Daily Algonquin Citygates average price or 135% of the Daily Tennessee Zone 6 (delivered) average price published in Gas Daily. The citygate (Algonquin or Tennessee) used for pricing shall be based on the customer's location, load characteristics and distribution system requirements in accordance with Item 1.08.1 of the Company's Transportation Terms and Conditions. The published price will be adjusted for Company Fuel Allowance and GET as appropriate.

Summer (April – October) – 115% of the Daily Algonquin Citygates average price or 115% of the Daily Tennessee Zone 6 (delivered) average price published in Gas Daily. The citygate (Algonquin or Tennessee) used for pricing shall be based on the customer's location, load characteristics distribution and system requirements in accordance with Item 1.08.1 of the Company's Transportation Terms and The published price will be Conditions. adjusted for Company Fuel Allowance and GET as appropriate.

## NATIONAL GRID – RHODE ISLAND TRANSPORTATION DEFAULT SERVICE

#### **Advance-Notice Service:**

The commodity charge for Advance-Notice service shall be the higher of:

a. The Company's applicable firm sales rate

OR

b. Winter (November – March) – 135% of the Algonquin Citygates Monthly Contract Index price or 135% of the Tennessee Zone 6 (delivered) Monthly Contract Index price published in the Gas Daily Price Guide. The citygate (Algonquin or Tennessee) used for pricing shall be based on the customer's location, load characteristics and distribution system requirements in accordance with Item 1.08.1 of the Company's Transportation Terms and Conditions. The published price will be adjusted for Company Fuel Allowance and GET as appropriate.

Summer (April – October) – 115% of the Algonquin Citygates Monthly Contract Index price or 115% of the Tennessee Zone 6 (delivered) Monthly Contract Index price published in the Gas Daily Price Guide. The citygate (Algonquin or Tennessee) used for pricing shall be based on the customer's location, load characteristics and distribution system requirements in accordance with Item 1.08.1 of the Company's Transportation Terms and Conditions. The published price will be adjusted for Company Fuel Allowance and GET as appropriate.

The Company and Default Transportation Service supplier shall review the pricing of these services annually and file any necessary revisions with the Commission concurrent with the Company's annual Gas Charge Clause filing.

# I. INTRODUCTION

#### 1 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

- 2 A. My name is Gary L. Beland. My business address is 40 Sylvan Way, Waltham
- 3 Massachusetts,02451-1120.

#### 4 Q. WHAT IS YOUR POSITION AND RESPONSIBILITIES?

- 5 A. I am Manager of Gas Supply Regulatory for National Grid (The Narragansett Electric
- 6 Company d/b/a National Grid hereinafter referred to as "National Grid" or the
- 7 "Company"). My responsibilities include various projects and filings concerning gas
- 8 supply regulatory matters.

#### 9 Q. WHAT IS YOUR BACKGROUND AND EXPERIENCE?

- 10 A. I began my career in the natural gas industry in June 1977 as an analyst in the Rates
- and Regulatory Affairs Department of Michigan Consolidated Gas ("MichCon") after
- receiving a Masters of Business Administration from the State University of New
- 13 York in Albany. At MichCon, I worked on a variety of projects and studies including
- pipeline rate filings, state rate cases, demand modeling, gas-supply cost simulations,
- 15 conservation planning and strategic analyses.
- In 1983, I was hired by Niagara Mohawk as a Corporate Planner. In that position, I
- was responsible for strategic analysis and a variety of projects including integrated

15

16

17

resource planning, pipeline regulatory monitoring and intervention, both end-use based and econometric electric and gas-demand forecasting, fuel-cost forecasting and modeling and gas market unbundling. In 1987, I joined the newly formed gas business unit as Manager of Gas Supply Planning. While I was at Niagara Mohawk, I was involved in the Forecasting and Planning Sub-Committee of the New York Power Pool and the Planning Committee of the New York Gas Group, serving as Chairman at the time I left to join the Providence Gas Company ("ProvGas") in 1994.

I joined ProvGas in 1994 as the Manager of Gas Supply with the responsibility for Gas Supply, Gas Control and Gas Accounting. In 1997, I became Assistant Vice President. After the merger with Southern Union Company, I was named Director of Gas Supply for the New England Division. From 1997 to 1999 I served on the Executive Committee of the Gas Industries Standards Board.

I have testified in several dockets before the Federal Energy Regulatory Commission. I have also testified before the New York Public Service Commission on gas and electric market forecasts and a gas-cost incentive mechanism. In Rhode Island, I have testified before this Commission on numerous gas supply issues over the last 15 years.

#### Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

18 A. The purpose of this testimony is to explain the calculation of the Gas Cost Recovery
19 ("GCR") charges to be effective with consumption on and after November 1, 2009 for
20 the following services: (1) firm sales service customers in the Residential Non-

1	Heating and Heating rate classes as well as Commercial and Industrial ("C&I")
2	customers in the Small, Medium, Large and Extra Large rate classes and (2) Gas
3	Marketer Charges and factors associated with transportation services billed to Gas
4	Marketers. My testimony will also address the Natural Gas Vehicle ("NGV") rate,
5	certain updates and edits to the Company's tariff and the Gas Procurement Incentive
6	Plan ("GPIP"), and present the results of the GPIP for the July 1, 2008 to June 30,
7	2009 plan year.

#### 8 Q. HOW IS YOUR TESTIMONY ORGANIZED?

- 9 A. My testimony is composed of nine (9) general sections: *I.* the Introduction; *II.* a GCR
  10 Rate Development Overview; *III.* GCR Rate Development Details; *IV.* Bill Impacts;
  11 V. Natural Gas Vehicles; *VI.* Marketer Factors; *VII.* Rate Case GCR Changes; *VIII.*

## II. GCR RATE DEVELOPOMENT OVERVIEW

#### Q. PLEASE PROVIDE AN OVERVIEW OF THE DEVELOPMENT OF THE

## PROPOSED GCR RATES.

The proposed GCR rates reflect the class-specific factors necessary for the Company to collect sufficient revenues to recover projected gas costs for the period November 1, 2009 through October 31, 2010. As shown in the testimony of Ms. Arangio on Attachment EDA-1, gas costs for the period are projected to be \$273.0 million for the twelve months ended October 2010. In addition to these projected costs, the GCR factors also reflect Working Capital Costs of \$2.0 million (Attachment GLB-1, pages 8-10), Inventory Financing Costs of \$2.9 million (Attachment GLB-1, page 11), a prior period Deferred Balance of \$11.7 million (Attachment GLB-1, pages 6-7; based on actual data through July 2009 and forecast data for the period August 2009 through October 2009), LNG Operation and Maintenance ("O&M") Costs of \$1.0 million (Docket No. 3943), and a credit of \$1.4 million associated with LNG Costs which will be collected via the Distribution Adjustment Clause ("DAC") factor. Thus, the GCR factors are intended to recover \$290.4 million in costs over the period November 2009 through October 2010. Attachment GLB-1, page 1 provides a summary of the GCR factors by customer rate class.

# III. GCR RATE DEVELOPOMENT DETAILS

Q.	ATTACHMENT GLB-1, PAGE 1 SHOWS A GCR FACTOR OF \$10.4017 PER
	DEKATHERM FOR RESIDENTIAL NON-HEAT AND BOTH LARGE AND
	EXTRA LARGE HIGH LOAD FACTOR. PLEASE EXPLAIN HOW THIS
	FACTOR WAS DERIVED.
A.	The \$10.4017 per dekatherm factor is applied to the sales classes where the customer
	uses gas at a high load factor. These classes use proportionately less of their gas for
	heating and thus place less demand on the supply portfolio under peak conditions. The
	\$10.4017 GCR factor applicable to these customers consists of five gas cost
	components and an uncollectible component. The five gas-cost components are
	Supply Fixed Costs, Storage Fixed Costs, Supply Variable Costs, Storage Variable
	Product Costs and Storage Variable Non-Product Costs. The associated rate
	components are \$0.78 per Dth, \$0.29 per Dth, \$8.87 per Dth, \$0.29 per Dth, and
	(\$0.07) per Dth respectively.
	The derivation of the Supply Fixed Cost component is reflected on Attachment GLB-
	1, page 2. As shown, Supply Fixed Costs total \$29,343,973 (see also Attachment
	EDA-1; Pipeline Demand Costs of \$31,829,169, Supplier Demand Costs of
	\$2,757,600, and Marketer/Capacity Release Revenues of \$5,242,797). Also, the
	guaranteed credit of \$1,000,000 to customers required under the Natural Gas Portfolio
	Management Plan ("NGPMP") is subtracted, the Working Capital Costs (Attachment

GLB-1, page 8) associated with Supply Fixed Costs of \$218,227 is added and the prior period Supply Fixed Gas Cost under-collection of \$1,802,253 (Attachment GLB-1, page 6) is subtracted, resulting in total Supply Fixed Gas Costs of \$30,146,225 to be collected over the period November 2009 through October 2010. Because the Company's gas-supply resources are planned so that there is sufficient capacity to meet the needs of firm sales customers under severe (design) winter conditions, Supply Fixed Costs (as well as Storage Fixed Costs) are allocated to the various rate classes based on their proportion of design-winter use. As shown, the Residential, Large-HLF and Extra Large HLF design sales represents 3.6% of Design Winter Sales (GLB-1, Page 2, High Load Factor Total, Line 14). Thus, 3.6% of total Supply Fixed Costs, or \$1,086,437 is allocated to the Residential and HLF classes. Dividing \$1,086,437 by the November 2009 through October 2010 forecasted sales to those classes, 1,401,026 dekatherms, results in a Supply Fixed Cost rate component of \$0.7755 per Dth.

# Q. HOW IS THE STORAGE FIXED COST FACTOR COMPONENT FOR THE RESIDENTIAL AND HIGH LOAD FACTOR CLASSES DERIVED?

A. The derivation of the Storage Fixed Cost factor is demonstrated on Attachment GLB1, page 3. As shown, Storage Fixed Costs total \$10,450,090 (see also Attachment
GLB-1). Deducted from this amount are \$493,315 of LNG demand costs that have
been allocated to the DAC. Added to this amount are \$618,591 of supply related LNG
O&M costs and \$78,647 of Working Capital Costs associated with Storage Fixed

2

3

4

5

6

7

8

Costs (Attachment GLB-1, page 8). The prior period under-collection associated with Storage Fixed Costs of \$1,211,860 is added. Thus, Total Storage Fixed Costs to be collected over the period November 2008 through October 2009 amount to \$11,865,873. As with Supply Fixed Costs, the Storage Fixed Costs are allocated on the basis of design winter throughput. Thus, 3.95%, or \$468,292 of total Storage Fixed Costs is allocated to the Residential and HLF classes. Dividing \$468,292 by forecasted period sales of 1,622,468 Dths results in the Storage Fixed Cost component of \$0.2886 per Dth.

# 9 Q. THE PERCENT OF RESIDENTIAL AND SMALL C & I DESIGN SALES 10 USED FOR ALLOCATED SUPPLY FIXED COSTS WAS 3.6%. WHY IS THE

#### 11 COMPANY USING 3.95% FOR ALLOCATING STORAGE FIXED COSTS?

A. A portion of the Storage Fixed Costs is required to meet the needs of FT-2 transportation customers. Thus, the projected throughput has been adjusted to incorporate the consumption of this class of customers. Attachment GLB-6, page 2, reflects the development of the FT-2 Marketer Charge and the allocation of Storage Fixed Costs to this class of customers.

# 17 Q. WHY DOES THE COMPANY ASSIGN A PORTION OF STORAGE FIXED 18 COSTS TO FT-2 CUSTOMERS?

19 A. Consistent with the methodology established and approved by the Commission in 20 Docket No. 2552, the FT-2 rate is based on the development of the storage and

7

8

9

10

11

12

13

14

15

16

17

18

19

A.

peaking costs as described in the GCR tariff. The fixed and variable costs related to the operations, maintenance, and delivery of the Company's storage resources, along with requirements for purchased gas working capital, are components of this rate.

## 4 Q. HOW IS THE SUPPLY VARIABLE COST COMPONENT FOR THE 5 RESIDENTIAL AND HLF CLASSES DERIVED?

The Supply Variable Cost component is \$8.8677 per Dth for all customer classes, including the Residential and HLF classes. Attachment GLB-1, page 4 shows the derivation of the \$8.8677 per Dth Supply Variable Cost component. As shown, projected Variable Supply Costs are \$196,408,852 (see Attachment GLB-1). Deducted from this amount are Variable Delivery Storage Costs of \$210,983, Variable Injection Storage Costs of \$80,294, and Fuel Costs Allocated to Storage of \$1,360,930, resulting in total deductions of \$1,652,207. These costs have been transferred to the Storage Variable Non-Product Cost bucket. Added to this amount are Working Capital Costs associated with Supply Variable Costs of \$1,448,375 (Attachment GLB-1, page 9) and the prior period under-collection associated with Supply Variable Costs of \$45,481,451. Thus, total Supply Variable Costs for the period November 2009 through October 2010 are \$235,285,006. Dividing \$235,285,006 by projected period sales of 27,254,552 Dths results in the Supply Variable Cost factor of \$8.8677per Dth.

2

9

#### Q. WHY AREN'T THESE COSTS ALLOCATED ON THE BASIS OF DESIGN

#### THOUGHPUT, AS WITH THE SUPPLY FIXED AND STORAGE FIXED

#### 3 **COMPONENTS?**

- 4 A. Supply Variable Costs vary with the amount of gas actually used, and accordingly, are allocated to the various rate classes based on projected consumption whereas Supply
- and Storage Fixed Costs are incurred to ensure the Company is able to meet customer
- 7 requirements during design-winter conditions.

#### 8 Q. HOW IS THE STORAGE VARIABLE PRODUCT COST FACTOR

#### ASSOCIATED WITH THE RESIDENTIAL AND HLF CLASSES DERIVED?

- 10 A. The derivation of the Storage Variable Product Cost factor is shown on Attachment
- GLB-1, page 5. As shown, projected Storage Variable Product Costs are \$36,624,047.
- Deducted from this amount are \$766,752 of Balancing Related LNG costs that have
- been transferred to the DAC for collection. Added to this amount are \$430,129 of
- Supply Related LNG O&M Costs (Docket No. 3401), \$269,864 of Working Capital
- 15 Costs (Attachment GLB-1, page 9), Inventory Financing Costs of \$483,932, and
- \$2,458,050 for LNG and Underground Storage, respectively (Attachment GLB-1,
- page 11). The prior period over-collection of \$31,689,296 is subtracted. Thus, Total
- Storage Variable Costs to be collected over the period November 2009 through
- October 2010 are \$7,809,975. Dividing \$7,809,975 by forecasted period sales of
- 20 27,254,552 Dths results in the \$0.2866 per Dth Storage Variable Product Cost factor.

#### Q. HOW IS THE STORAGE VARIABLE NON-PRODUCT COST FACTOR

#### 2 ASSOCIATED WITH THE RESIDENTIAL AND THE HLF CLASSES

#### 3 **DERIVED?**

1

- The derivation of the Storage Variable Non-Product Cost factor is shown in 4 A. 5 Attachment GLB-1, page 5. As shown, projected Storage Variable Non-Product Costs 6 are \$1,128,324. Added to this amount are Variable Delivery Storage Costs of 7 \$210,983, Variable Injection Costs of \$80,294, and Fuel Costs Allocated to Storage of 8 \$1,360,930. Also, Working Capital Costs of \$8,391 are added to the calculation and 9 the prior period over-collection of \$4,883,861 is subtracted, resulting in total Storage 10 Variable Non-Product Costs of (\$2,094,939) to be refunded over the period November 11 2009 through October 2010. Dividing (\$2,094,939) by forecasted period throughput 12 of 28,852,480 Dth's results in the (\$0.0726) per Dth Storage Variable Non-Product 13 Cost factor.
- Q. WHY WERE THE STORAGE VARIABLE NON-PRODUCT COSTS DIVIDED

  BY FORECASTED THROUGHPUT OF 27,254,552 DTH WHILE STORAGE

  VARIABLE PRODUCT COSTS AND SUPPLY VARIABLE COSTS WERE
- 17 **DIVIDED BY FORECASTED SALES OF 28,852,480 DTH?**
- A. Similar to the derivation of the Storage Fixed Cost factor, a portion of Storage

  Variable Non-Product Costs are associated with the delivery of underground storage

  for FT-2 Marketers. Thus, a portion of the Storage Variable Non-Product Costs are

  assigned to FT-2 Marketers (see Attachment GLB-6).

2

3

4

5

6

7

8

10

15

16

17

18

19

20

A.

In summary, the \$10.4017 per Dth GCR factor applicable to the Residential and HLF classes consists of a \$0.7755 per Dth Supply Fixed Cost component, \$0.2886 Storage Fixed Cost component, \$8.8677 Supply Variable Cost component, \$0.2866 Storage Variable Product Cost component and (\$0.0726) Storage Variable Non-Product Cost component. The sum total of these gas cost components is \$10.1458 per Dth. Adjusting this rate by the 2.46 uncollectible percent results in the proposed Residential, Large HLF and Extra Large HLF Class GCR factor of \$10.4017 per Dth or \$1.0402 per therm.

### 9 Q. HOW ARE THE GCR FACTORS FOR THE OTHER CUSTOMER CLASSES

#### **DERIVED?**

11 A. The GCR factors for the remaining customer classes are calculated in a manner that is 12 identical to the calculation for the Residential and HLF customer classes.

## Q. WHAT IS THE COMPANY'S ESTIMATE OF THE DEFERRED GAS COST BALANCE AT THE END OF THE CURRENT GCR PERIOD?

The Company's current estimate is an undercollection of approximately \$11.7 million in the deferred gas cost account at the end of October 2009. This estimate is based on the actual deferred balance at the end of June as reflected in the Company's annual GCR reconciliation filed with the Division and Commission on August 1, 2009, actual data for July 2009, and our latest August 2009 through October 2009 projection using the current GCR factors and the estimate of gas costs included in the Company's

August 20, 2009 deferred gas cost filing. A copy of the annual GCR reconciliation filing is attached here as Attachment GLB-2 and the updated deferred gas cost balance projections for July 2008 through October 2008 are provided in Attachment GLB-1 at pages 6-7.

#### 5 Q. WHAT IS THE TOTAL DEFERRED BALANCE REFLECTED IN THE GCR

#### 6 **FACTORS?**

13

14

15

16

17

18

19

20

A.

A. Based on actual data through July 2009, and forecasted data for the period August 2009 through October 2009, the total estimated deferred balance at October 31, 2009 is \$11.7 million. The projected gas cost balances for the period November 2009 through October 31, 2010 are shown on Attachment GLB-3.

## 11 Q. PLEASE DESCRIBE THE DEVELOPMENT OF THE FORECAST 12 THROUGHPUT REQUIREMENTS.

The forecast of throughput requirements incorporated in this GCR filing were developed utilizing regression analyses of daily send out and degree days over the May 2008 – April 2009 time period. This analysis determined the relationship between degree days and sendout and was used as the base for the forecast. To this initial base period throughput level, the Company then added its forecast of annual net incremental load growth developed using statistical forecast models for the residential heating, residential non-heating, and commercial/industrial classes. Statistical models were developed for the numbers of customers and the use per customer using personal

2

3

4

6

7

8

9

10

11

12

13

14

A.

disposable income and time trends as independent variables. The Company obtained forecasts of personal income from an independent economic forecasting firm. In addition, the load forecasts were adjusted to reflect projected load reductions from the Company's energy efficiency programs based on the goals of the program.

#### IV. BILL IMPACTS

#### 5 Q. WHAT IS THE BILL IMPACT OF THE PROPOSED CHANGES?

An average residential heating customer using 922 therms per year will experience a decrease of approximately \$7 (an average \$0.64 per month), or an annual 0.5 percent decrease over the currently effective rates. A summary of annual bill impacts for customers with various levels of usage is provided on Attachment GLB-4. Please note, in addition to the proposed GCR factors, the bill impact analysis also incorporates the proposed decrease in DAC factors that was filed on August 1<sup>st</sup> and updated on September 1 in Docket No. 4077 for effect November 1, 2009. The annual decrease associated with the decreased GCR rates for a residential heating customer is \$7.68 with an additional decrease of \$7.84 associated with the proposed DAC rates.

### V. NATURAL GAS VEHICLES

#### 15 Q. IS THE COMPANY PROPOSING A CHANGE TO THE NGV RATE?

1 A. Yes. The commodity charge component of the NGV rates is based on the Supply
2 Variable Costs identified in the Company's GCR filing. Accordingly, the NGV
3 commodity charge is being updated to reflect the Supply Variable Costs included in
4 this filing. A revised NGV tariff is provided as Attachment GLB-5

#### VI. MARKETER FACTORS

### 5 Q. WHAT ARE THE VARIOUS GAS MARKETER CHARGES AND FACTORS

#### **INCLUDED IN THIS GCR FILING?**

- A. The gas marketer charges and factors covered under the Company's GCR tariff and included in this GCR filing are: (1) the FT-2 firm transportation marketer gas charges;

  (2) Pool Balancing Service charges; and (3) the Company's weighted average pipeline cost and the associated credits/surcharges applied to marketers for pipeline capacity assignments. A summary of the proposed charges that would take effect concurrent with the updating of transportation factors and capacity releases on November 1, 2009 are shown on Attachment GLB-6, page 1.
- 14 Q. PLEASE DESCRIBE THE DEVELOPMENT OF THE FT-2 FIRM
  15 TRANSPORTATION RATE FOR STORAGE AND PEAKING RESOURCES.
- A. Consistent with the methodology established and approved by the Commission in

  Docket No. 2552, the FT-2 rate is based on the development of the storage and

  peaking costs as described in the GCR tariff. The fixed and variable costs related to

  the operations, maintenance and delivery of the Company's storage resources were

1	totaled, along with requirements for purchased gas working capital. The result was
2	then divided by the forecasted firm throughput to arrive at a per therm cost.
3	Attachment GLB-6, page 2 shows the calculation of the \$0.0337 per therm FT-2
4	Marketer Charge.

### 5 Q. PLEASE DESCRIBE THE UPDATE OF THE POOL BALANCING SERVICE 6 CHARGE.

A. Pursuant to Item 5.04.1 of the Transportation Terms and Conditions and consistent with the methodology established in Item 4.2 of the GCR tariff, the Pool Balancing Charge is being updated to reflect the relevant Fixed and Storage Cost components.

As shown on Attachment GLB-6, page 3, the proposed balancing charge is \$0.0018 per percentage of balancing elected per therm of throughput in the Marketer pool.

# 12 Q. HAS THE COMPANY UPDATED THE TRANSPORATION SERVICE 13 CHARGES ASSOCIATED WITH PIPELINE CAPACITY ASSIGNMENT?

14 A. Yes, the updated Company weighted average pipeline cost is shown on Attachment
15 GLB-6, page 1. The testimony of Company witness Mr. Gary Beland describes its
16 calculation as well as the calculation of the associated credits/surcharges applied to
17 marketers for pipeline capacity assignments.

#### VII. RATE CASE GCR CHANGES

1	Q.	PLEASE DESCRIBE THE CHANGES TO THE GCR TARIFF THAT
2		RESULTED FROM THE COMPANY'S BASE GAS DISTRIBUTION RATE
3		CASE IN DOCKET NO. 3943.
4	A.	Beginning December 1, 2008, the Company began using the new methodology and

Beginning December 1, 2008, the Company began using the new methodology and factors approved in Docket No. 3943 to calculate the GCR tariff factors. The most significant change was the consolidation of the six gas cost factors into just two. That change is reflected in the calculated rates and in the discussion of the development of the GCR rates for Residential and HLF classes presented above. The DAC filing, Docket 4077, uses the approved 16.8% factor to allocate the LNG costs associated with maintaining system pressure, LNG operating and maintenance costs, as well as the capital structure and days lag incorporated in the working capital calculations, to the DAC.

13

5

6

7

8

9

10

11

12

14

15

Q.

16

### VIII TARRIFF EDITS AND AMENDMENTS

1	Q.	WHAT CHANGES DOES THE COMPANY PROPOSE TO MAKE TO ITS
2		TARIFF?
3	A.	The Company is requesting the following changes:
4		1. Eliminate references to the Asset Management Incentive Plan (AMIP).
5		2. Add terms needed to cover the changes related to the new Natural Gas Portfolio
6		Management Plan (NGPMP).
7		3. Upgrade and improve the credit standards for marketers providing gas supply service to transportation customers.
9		4. Update the communication options for marketers to reflect implementation of the Company's new electronic bulletin board (EBB).
11		5. Provide marketers with more timely estimates of the path costs, weighted average
12		upstream pipeline cos,t and expected surcharge/credit that will be in effect for the
13		upcoming GCR year.
14		Attachment GLB-7 contains a copy of the proposed tariff with both a final version and
15		a version marked with the proposed changes.

WHY IS THE COMPANY ELIMINATING REFERENCES TO THE AMIP?

4

5

6

7

8

9

10

11

12

13

1 A. The termination of the AMIP was ordered by the Commission in Docket 3982.

#### 2 Q. WHAT CHANGE DOES THE COMPANY PROPOSE TO MAKE TO

#### REFLECT THE NGPMP IN ITS TARIFF?

A. The Company proposes to change the calculation of the Supply Fixed Cost Component in the Gas Charge Recovery Clause. The change will provide that the amount guaranteed to customers under the NGPMP's terms will be included in the calculation of the GCR prospectively while the remaining revenue from optimization transactions, net of the guarantee and Company incentive portion, will be flowed through the GCR following Commission approval after the Commission has reviewed the Plan results for the year. The description of the credits shown in Section 2, Schedule A Sheet 5, the Credits to Supply Fixed Costs, TRFC, has been modified to add these additional credits. This is the same category in which any credit previously received from an asset manager would have been included.

# 14 Q. WHAT CHANGE DOES THE COMPANY PROPOSE TO MAKE TO THE 15 MARKETER CREDITWORTHINESS STANDARDS IN ITS TARIFF?

16 A. The Company proposes to amend its tariff to add specific credit requirements to
17 replace the existing credit requirements wherein the Company relied on the credit
18 check performed by the upstream pipelines, Algonquin Gas Transmission and
19 Tennessee Gas Pipeline. Unfortunately, such pipeline credit standards are subject to
20 change by the pipelines and may be different for each pipeline. This creates

uncertainty as to when creditworthiness standards will change and which standards may apply. Accordingly, the Company's tariff change details the specific criteria to apply and the methods that a Marketer may utilize to demonstrate that they meet the Company's creditworthiness standards. This includes the current methods of providing an advanced deposit, providing an irrevocable letter of credit or providing a guarantee acceptable to the Company.

The new creditworthiness test will also allow marketers' creditworthiness to be more thoroughly and readily verified than the previous approach and will also include a check of the marketers' payment history to the Company. The proposed standards appear in Section 6, Transportation Terms and Conditions, Schedule C, Sheets 30 to 32.

# Q. WHAT CHANGE IS THE COMPANY PROPOSING TO MAKE TO ITS COMMUNICATIONS WITH MARKETERS?

A. The Company believes it is no longer necessary to maintain the option for marketers to submit nominations through faxes and has eliminated that option from its tariff (Section 6, Transportation Terms and Conditions, Schedule C, Sheet 6).

The entire industry has migrated to using the internet to manage the gas nomination and scheduling process. In addition, the Company is in the process of making substantial upgrades and improvements to its EBB in order to simplify and streamline the nomination process and overall communication with marketers. Essentially, the

Company seeks to specify that all nominations will go through the Company's newly upgraded Electronic Bulletin Board (EBB) and that the Marketer will be responsible for monitoring the EBB. This provision codifies the current Marketer responsibility.

4

- 5 Q. WHAT CHANGE IS THE COMPANY PROPOSING TO MAKE FOR
- 6 PROVIDING MARKETERS WITH ESTIMATES OF FUTURE PIPELINE
- 7 PATH COSTS AND THE SURCHARGES/CREDITS THEY WILL BE
- 8 **SUBJECT TO?**
- 9 Rather than providing an estimate at June 1 of the projected path costs, the Company A. 10 is proposing to provide such estimates at the request of marketers with three weeks 11 notice. The calculated rates for path costs and the system weighted average cost are 12 subject to significant changes as commodity prices and supply and demand conditions 13 for gas change. Past experience has shown that a calculation done in May to meet a 14 June 1 filing requirement is not a good predictor of the surcharge/credit rates that will 15 be put in effect for the November 1 start of the GCR year. The proposed changes to 16 the tariff can be found in Section 2, Gas Charge, Schedule A, Sheet 14.

### IX GAS PROCUREMENT INCENTIVE PLAN

17 Q. PLEASE DESCRIBE THE INCENTIVE PORTION OF THE GAS
18 PROCUREMENT INCENTIVE PLAN (GPIP)?

2

3

5

6

7

8

9

10

11

12

13

14

15

16

17

18

- A. The GPIP encourages the Company to purchase supply in a way designed to stabilize prices and reduce the risk that commodity costs will escalate dramatically. An outline of the GPIP is provided in Attachment GLB-8.
  - The gas procurement portion of the GPIP is based on the Company's gas purchasing program under which the Company locks in the pricing of commodity purchases through purchases or financial hedges over a 24-month horizon. The minimum amount locked in price or financially hedged is 60% of the expected purchases for April and October, and 70% for all other months. These mandatory hedges are required to be made ratably over the period beginning 24 months prior to the start of each month and ending four months before the month begins. These mandatory hedges also form the benchmark for the incentive calculation. For each month, the average unit cost of the mandatory hedges is compared to the average unit cost of discretionary purchases to determine the savings or loss per dekatherm resulting from the discretionary purchases. This difference, multiplied by the discretionary volumes, determines the total savings or cost. To determine the incentive or penalty for the month, this total is multiplied by 10% except for those discretionary purchases made at least 8 months prior to the month of gas flow where the unit cost savings is greater than 50 cents per dekatherm, in which case the incentive applicable to those purchases is 20%.

# 19 Q. WHAT IS THE RESULT OF THE GAS PROCUREMENT INCENTIVE FOR 20 THE PAST YEAR?

A.	Attachment GLB-9 shows the results for the period July 1, 2008 to June 30, 2009 by								
	month. As shown, the Company purchased discretionary supply of 3,353,056 Dth								
	during the period resulting in a net calculated incentive of \$1,097,727. The average								
	cost of discretionary purchases was \$ 2.575 per Dth less than the mandatory locks.								
	The calculation of the savings and incentive is shown for each month. For example, in								
	November 2008 the average purchase cost per Dth for mandatory purchases was								
	\$9.227 and discretionary purchases were made at an average cost of \$7.683, which								
	equates to a savings of \$1.545 per Dth on discretionary purchases of 300,000 Dth,								
	esulting in a savings for the month of \$463,383.								
Q.	WHAT IS THE GAS PROCUREMENT INCENTIVE THE COMPANY IS								
Q.	WHAT IS THE GAS PROCUREMENT INCENTIVE THE COMPANY IS FILING FOR?								
<b>Q.</b> A.									
	FILING FOR?								
	FILING FOR?  While the calculated incentive is \$1,097,727, the GPIP Outline states in Section II B:  B The GPIP will be subject to limits on the magnitude of incentives applicable to								
	<ul> <li>FILING FOR?</li> <li>While the calculated incentive is \$1,097,727, the GPIP Outline states in Section II B:</li> <li>B The GPIP will be subject to limits on the magnitude of incentives applicable to the Company in each fiscal year.</li> <li>1. For the Gas Procurement Incentive Program limitations are placed on the maximum amount of incentives that can be earned or penalties paid by National Grid for each fiscal year. For at least the first two</li> </ul>								
	<ul> <li>FILING FOR?</li> <li>While the calculated incentive is \$1,097,727, the GPIP Outline states in Section II B:</li> <li>B The GPIP will be subject to limits on the magnitude of incentives applicable to the Company in each fiscal year.</li> <li>1. For the Gas Procurement Incentive Program limitations are placed on the maximum amount of incentives that can be earned or penalties paid by National Grid for each fiscal year. For at least the first two years of the program (i.e., through June 30, 2005):</li> <li>a. National Grid may not earn more than \$1,000,000 in Gas</li> </ul>								
	A.								

A.

# Q. ARE THERE ANY ADDITIONAL CHANGES IN GAS COSTS AS RESULT OF THE HEDGING PROGRAM?

Yes. The Company has experienced a significant and unexpected increase in costs as a result of the GPIP hedging position collateral requirements. Because of the sharp decline in natural gas commodity prices, the Company has had to provide large amounts of collateral to cover losses on the hedge positions. In the past, the interest paid on such collateral has been at a level that provided a significant offset to the carrying cost of the posted collateral. More recently, because of the fallout of the credit crisis, that is no longer the case as the payments by the vendor have declined even as the Company's short term borrowing costs have increased.

At this point the Company is requesting that it be allowed to recover its short term borrowing cost, less any interest earnings it may receive on the collateral from the party requiring the posting of the collateral, currently the New York Mercantile Exchange (NYMEX). After discussions with the Division, the Company has included in its gas costs the carrying cost of its hedge positions at its short term borrowing rate, net of the interest earned, on the basis that this expense is, consistent with the tariff, a recoverable gas cost. In addition, the expense was not included in the recent rate case because during the test year the vast majority of hedges were done through forward physical purchases of supply rather than financial hedges. To the extent a small portion of hedges were done financially during the test year, the collateral costs were

2

3

4

5

6

7

8

9

10

11

12

13

minimal and the compensation on the collateral by the vendor was adequate to cover the cost.

The Company believes that in the future the change it is requesting is likely to benefit customers as the need for the Company to post collateral is expected to decline significantly as gas costs recover from their extremely depressed current level and rise above the price paid for existing hedges. Note that the posting of collateral is symmetrical and hedge gains result in a payout to the Company. Under the Company's proposal the customers will then be credited interest on the funds held by the Company at the same short term rate. If in the future prices move up as a result of the current dramatic decrease in drilling, customers would likely see a reduction in the carrying cost of collateral as the spread between the interest rate paid on the short term collateral required by the vendor and the borrowing rate for the Company return to their historical relative levels.

#### 14 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

15 A. Yes.

### Gas Cost Recovery (GCR) Factors Effective November 1, 2009

**RE:** Annual Gas Cost Recovery Reconciliation

Dear Ms. Massaro:

In accordance with the provisions of the Gas Cost Recovery ("GCR") Clause Tariff, RIPUC NG No. 101, Section 2, Schedule A, Item 1.2, enclosed please find ten (10) copies of National Grid's annual GCR reconciliation filing. The filing contains actual data for the twelve months ending June 30, 2009 and consists of seven schedules.

Schedule 1 presents the monthly gas cost-specific ending deferred balances for the period July 2008 through June 2009, resulting in an end-of-period under-collection balance of \$3,321,883, as shown on the bottom of page 2. The \$3,321,883 under-collection is comprised of five distinct cost components: Supply Fixed, Storage Fixed, Supply Variable, Storage Variable Product, and Storage Variable Non-Product. The monthly balances for each of the components are contained in Schedule 1. The Company is currently reviewing the results of the assignment of costs to certain component categories. Certain features of the Company's asset management arrangement with Merrill Lynch have caused the classification of costs to be different than in prior periods even though the portfolio is fundamentally the same. In addition, the insourcing of the portfolio that began April 1, 2009 has altered the traditional injection pattern and caused the Company to purchase supplies to support optimization transactions. These issues will be addressed in the Company's upcoming September 1, 2009 GCR filing.

Schedule 2 summarizes monthly gas costs according to the five components described above. Schedule 3 summarizes Gas Cost Collections for the period of July to November 2008. Schedule 4 summarizes Gas Cost Collections for the period of December 2008 to June 2009 which reflects the new structure approved in Docket No.3982. Schedule 5 presents the calculation of inventory financing costs. For the twelve months ended June 2009, underground storage financing costs totaled \$1,184,870, and LNG inventory storage financing costs totaled \$588,568. Of the \$588,568 of LNG inventory financing costs, \$131,353 is associated with system balancing which is allocated to the Distribution Adjustment Clause account. The remaining \$457,215 of LNG inventory financing costs is associated with the GCR. Working Capital costs are calculated in Schedule 6 and include the inventory financing and working capital cost calculations which are consistent with the methodology approved in Docket No. 3401. Finally, monthly firm throughput

-

<sup>&</sup>lt;sup>1</sup> Submitted on behalf of The Narragansett Electric Company, d/b/a National Grid ("Company").

Luly E. Massaro, Commission Clerk Annual Gas Cost Reconciliation August 3, 2009 Page 2 of 2

is summarized in Schedule 7. This schedule indicates that for the twelve month period that total firm throughput was 35, 250,639 dths, which was comprised of firm sales, including Transitional Sales Service of 26,734,245 dths, FT-1 throughput of 7,307,086dths and FT-2 throughput of 1,209,308 dths..

If you have any questions related to this filing, please do not hesitate to contact me at (401) 784-7667 or Gary Beland at (781) 907-2129.

Very truly yours,

Thomas R. Teehan

Attachment GLB-5 Docket No. \_\_\_\_ September 1, 2009

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 7 Miscellaneous Services Schedule A, Sheet 1 Fourth Revision

Deleted: Third

#### NATURAL GAS VEHICLE SERVICE RATE 70

#### 1.0 NATURAL GAS VEHICLE SERVICE

**1.1 AVAILABILITY:** This rate is available for compressed natural gas dispensed at

Company-owned fueling stations for the purpose of fueling

natural gas vehicles.

No other use of gas will be included in this rate for billing

purposes.

**1.2 RATES:** Customer Charge: \$5.00 per month

Energy Charge:

Distribution Charge: \$0.1958 per Therm

Commodity Charge: \$0,9091 Therm Deleted: 8388

**1.3 MINIMUM RATE**: Customer Charge

1.4 GENERAL RULES AND

**REGULATIONS:** The Company's General Rules and Regulations in Section 1 of

RIPUC NG-GAS No. 101, as in effect from time-to-time and where not inconsistent with any specific provisions hereof, are

a part of this Schedule.

1.5 RHODE ISLAND GROSS

**EARNINGS TAX:** The application of the above rates are subject to the Rhode

Island Gross Earnings Tax provisions in Section 1,

Schedule D.

1.6 GAS ENERGY

**EFFICIENCY:** The application of the above rate is subject to Gas Energy

Efficiency provisions in Section 1, Schedule C.

Deleted: November 26, 2008

Deleted: December 1, 2008

Issued: September 1, 2009 Effective: November 1, 2009

Attachment GLB-7

#### **GAS COST RECOVERY CLAUSE**

#### 1.0 **GENERAL**:

#### 1.1 Purpose:

The purpose of this clause is to establish procedures that allow the Company, subject to the jurisdiction of the Rhode Island Public Utilities Commission ("RIPUC"), to annually adjust its rates for firm sales and the weighted average cost of upstream pipeline transportation capacity in order to recover the costs of gas supplies, pipeline and storage capacity, production capacity and storage, purchased gas working capital, and to credit supplier refunds, capacity credits from off-system sales and revenues from capacity release transactions.

The Gas Cost Recovery Clause shall include all costs of firm gas, including, but not limited to, commodity costs, demand charges, local production and storage costs and other gas supply expense incurred to procure and transport supplies, transportation fees, inventory costs, requirements for purchased gas working capital, all applicable taxes, and deferred gas costs. Any costs recovered through the application of the Gas Charge shall be identified and explained fully in the annual filing.

#### 1.2 Applicability:

The Gas Charge shall be calculated separately for the following rate groups:

- (1) Residential Non-Heating, Low Income Residential Non-Heating, Large C&I High Load Factor, Extra Large C&I High Load Factor;
- (2) Residential Heating, Low Income Residential Heating, Small C&I, Medium C&I, Large C&I Low Load Factor, and Extra Large C&I Low Load Factor;
- (3) ;FT-2 Firm Transportation Marketers
- (4) Natural Gas Vehicles

The Company will make annual Gas Charge filings based on forecasts of applicable costs and volumes and annual Reconciliation filings based on actual costs and volumes. The Gas Charge shall become effective with consumption on or after November 1<sup>st</sup> as designated by the Company. In the event of any change subsequent to the November effective date which would

Attachment GLB-7

#### GAS COST RECOVERY CLAUSE

cause the estimate of the Deferred Gas Cost Balance to differ from zero by an amount greater than one (1) percent of the Company's gas revenues, the Company may make a Gas Charge filing designed to eliminate that non-zero balance.

Unless otherwise notified by the RIPUC, the Company shall submit the Gas Charge filings no later than 60 days before they are scheduled to take effect. The Annual Reconciliation filing will be made by August 1 of each year containing actual data for the twelve months ending June 30 of that year.

#### 2.0 GAS CHARGE FACTORS

#### 2.1 Gas Charges to Sales

**Customers:** 

Issued: September 1, 2009

The Gas Charge consists of five (5) components: (1) Supply Fixed Costs, (2) Storage Fixed Costs, (3) Supply Variable Costs (4) Storage Variable Product Costs, and (5) Storage Variable Non-product Costs. These components shall be computed using a forecast of applicable costs and volumes for each firm rate schedule based on the following formula:

$$GC_S = FC_S + SFC_S + VC_S + SVC_S + SVNC_S$$

#### Where:

GCs Gas Charge applicable to Residential Non-Heating,
Low Income Residential Non-Heating, Residential
Heating, Low Income Residential Heating, Small C&I,
Medium C&I, Large Low and High Load C&I, and
Extra Large Low and High Load C&I sales.

FC<sub>S</sub> Supply Fixed Cost Component for a rate classification. See Item 3.1 for calculation.

SFC<sub>S</sub> Storage Fixed Cost Component for a rate classification. See Item 3.2 for calculation.

VC<sub>S</sub> Supply Variable Cost Component for a rate classification. See Item 3.3 for calculation.

Effective: November 1, 2009

Deleted: November 26, 2008

Deleted: December 1, 2008

rate classification. See Item 3.5 for calculation.

This calculation will be adjusted for the uncollectible percentage approved in the most recent rate case proceeding and the Gas Charges to Sales Customers are subject to the Rhode Island Gross Earnings Tax provisions in Section 1, Schedule D.

#### 2.2 Gas Charge to FT-2

**Marketers:** 

The FT-2 Firm Transportation Marketer Gas Charge (GC<sub>M</sub>) recovers costs associated with storage and peaking resources and is calculated as follows:

$$GC_M = SFC_S + SVNC_S$$

#### Where:

GC<sub>M</sub> Gas Charge applicable to Marketers for FT-2 Firm

Transportation Service

SFC<sub>S</sub> Storage Fixed Cost Component. See Item 3.2 for

calculation.

SVNC<sub>S</sub> Storage Variable Non-product Cost Component. See

Item 3.5 for calculation.

#### 2.3 Gas Charge to Natural

Gas Vehicles:

The Natural Gas Vehicle Gas Charge (GC<sub>NGV</sub>) recovers costs associated with natural gas distributed to the public at Company owned NGV stations and is calculated as follows:

$$GC_{NGV} = FC_S + VC_S$$

#### Where:

Issued: September 1, 2009 Effective: November 1, 2009

#### GAS COST RECOVERY CLAUSE

- 2. Credits to costs, including but not limited to GCR Deferred Responsibility surcharge/credits and Transitional Sales Service (TSS) surcharge revenues.
- 3. Monthly interest based on a monthly rate of the current Bank of America prime interest rate less 200 basis points (2%), multiplied by the arithmetic average of the account's beginning-of-the-month balance and the balance after entries 1. and 2. above.

#### 7.0 REFUNDS

## 7.1 During Refund Period

If the Company receives a cash refund resulting from gas supply overcharges during a historical "refund period," where the historical "refund period" is the most recent 60-month period, and the amount of the refund equals or exceeds 2% of the Company's total gas costs for the prior fiscal year, the amount to be refunded to any firm customer who used gas during the refund period and who is not on the suspended debt file shall be equal to:

The customers' billed usage during Refund Period X

Amount to be Refunded
Firm Sales during Refund Period

where the Amount to be Refunded equals Total Amount of Refund minus the incremental costs incurred by the Company in effecting the distribution of the supplier refund.

The customer shall receive this amount in the form of:

- 1. A lump-sum bill credit if the customer's account is active or if the customer's final bill has not been paid; or
- 2. A personal check if the customers account is closed and paid in full and the amount of the check exceeds \$25; or
- 3. A combination bill credit/personal check if the amount of the credit exceeds the unpaid balance of the customer's final bill.

### GAS COST RECOVERY CLAUSE

The total amount of individually calculated refunds of \$2 or less to have been paid by check will be credited to the Deferred Gas Cost Account. Checks which are not deliverable or paid within 90 days of the mailing shall be canceled and also credited to the Deferred Gas Cost Account.

Should any canceled refund checks later become a liability of the Company, the cost shall be debited to the Deferred Gas Cost Account.

# 7.2 Prior To Refund Period:

If the Company receives a cash refund resulting from gas supply overcharges during periods prior to the historical refund period, then the refund shall be credited to the appropriate Deferred Cost Account.

### 7.3 **Less Than 2%**

If the amount of the refund is less than 2% of the Company's total gas cost for the prior fiscal year, it shall be credited to the appropriate Deferred Cost Account.

### 8.0 WEIGHTED AVERAGE UPSTREAM PIPELINE TRANSPORTATION COST

At the request of a marketer or the Division, the Company will provide within 21 days an estimate of the pipeline path costs for the next GCR year beginning November 1. The estimate will be based on the most recent GCR filing updated for current commodity pricing and other known changes which would significantly affect the factor. Concurrent with the annual GCR filing, the Company shall calculate the final weighted average cost of upstream pipeline transportation capacity. The cost shall be applicable to capacity release under the Transportation Terms and Conditions effective November 1 of each year or at such time as the Commission approves the rates.

**Deleted:** On or about June 1, the Company shall provide to marketers and the Division a preliminary update of its pipeline path costs and weighted systemwide average costs including supporting schedules that show the assumptions and methodologies used to develop the rates

Deleted: . In the event the Commission changes the date when new gas cost recovery (GCR) rates to a time other than November 1, the Company will make the new rates effective concurrent with the GCR rates or at such time as the

#### TRANSPORTATION TERMS AND CONDITIONS

These terms and conditions apply to those Commercial and Industrial customers classified as Medium, Large, Extra Large, or Non-firm who purchase gas supplies from sources other than the Company for transportation service by the Company pursuant to RIPUC NG No.101, Section 5, Schedule B, C, and D, and Section 6, Schedule A, as well as to any Marketers designated to act on the Customer's behalf pursuant to a Transportation Service Application and executing a Marketer Aggregation Pool Service Agreement. Transportation service will also be governed by the Company's General Terms and Conditions of Service to the extent not inconsistent herewith.

The Company reserves the right to restrict the availability of Transportation Service should the number of customers exceed the capability of the Company to reliably administer the service or if the integrity of the distribution system is put at risk.

If a Customer requesting service hereunder has been a sales service customer of the Company at the same service location within the preceding twelve month period, any underrecovered or overrecovered gas costs attributable to such prior service under the Gas Cost Recovery Clause in Section 2, Schedule A, shall be determined and paid by Customer or credited to Customer's account. The calculation of such underrecovered or overrecovered gas costs shall be in accordance with the Customer Deferred Gas Cost Calculation Guideline as on file with the Commission from time to time.

## 1.01.0 TERM OF SERVICE:

# 1.01.1 FT-1 Transportation Service:

FT-1 Transportation Service will commence on the first day of a calendar month subject to satisfying the Company's Transportation Terms and Conditions and be for an initial term of up to one year to reflect a common anniversary of November 1<sup>st</sup>. Service shall continue thereafter on a year-to-year basis, unless terminated by Customer, marketer or the Company, effective with the

#### TRANSPORTATION TERMS AND CONDITIONS

Customer's next billing cycle, upon at least thirty (30) days' advance written notice to the other. The Marketer shall be responsible for providing the Company with an executed Transportation Service Application for each customer account being added to its FT-1 Aggregation Pool no less than thirty (30) days prior to commencement of service. The Company's receipt of the Transportation Service Application initiates the thirty (30) day notice period.

#### 1.01.2 FT-2 Transportation Service:

FT-2 Transportation Service will commence on the first day of a Customer's billing cycle subject to satisfying the Company's Transportation Terms and Conditions. Service shall continue thereafter on a year-to-year basis unless terminated by Customer, marketer or the Company, effective with the Customer's next billing cycle, upon at least fifteen (15) days advance written notice to the other. The Marketer shall be responsible for providing the Company with an executed Transportation Service Application for each Customer being added to its FT-2 Aggregation Pool no less than fifteen (15) days prior to commencement of service. The Company's receipt of the Transportation Service Application initiates the fifteen (15) day notice period.

#### 1.01.3 Non-Firm Transportation (NFT)

#### Service:

Customers classified as Non-Firm Transportation (NFT) will be able to commence transportation as of the first (1<sup>st</sup>) of any calendar month subject to meeting the nomination requirements established in Item 1.03 following and having submitted to the Company an executed Transportation Service Application.

A Customer's designation as NFS or NFT shall remain in effect until the Company is notified of a further change. Such notice is required by 9 a.m. two (2) business days before the start of the calendar month when such change is to take effect. Switching to or initiating transportation service mid-month is generally not allowed.

### 1.02.0 <u>Designation Of Marketer:</u>

#### TRANSPORTATION TERMS AND CONDITIONS

#### 1.02.1 Firm Transportation:

Customers wishing to switch Marketers will be allowed to do so at the start of a calendar month, in the case of FT-1 Service, or at the start of a customer's billing cycle, in the case of FT-2 Service. The Customer and the new Marketer shall execute a new Transportation Service Application listing the new Marketer as their designated Marketer. The Company must receive the new Transportation Service Application at least thirty (30) days prior to the change in the case of FT-1 Service, and at least fifteen (15) days prior to the customer's meter read in the case of FT-2 Service. For an FT-1 Service customer without a capacity assignment from the Company, see Item 1.07 below, the Company must be notified of such change by 9 a.m. at least two (2) business days before the start of the calendar month The Company will not accept a Transportation Service Application which designates a Marketer that has not executed an Aggregation Pool Service Agreement. If a Customer switches marketers, switches transportation services and/or switches to sales service more than once in a twelve month period, an administrative charge of \$50 shall be billed to the Customer to cover the processing of the request.

If the Company receives more than one Transportation Service Application for the same customer account with different designations of Marketer, the Company will contact the Customer for clarification and confirmation.

The Company will notify the Marketer of record in the event that a customer account assigned to the Marketer's Aggregation Pool is terminated.

Marketer must provide the Company with (30) days advance notice in the event that the Marketer terminates service to a Customer in its Aggregation Pool.

Customers not subject to Default Transportation Service in Item 2.04 below, may return to sales service with at least thirty (30) days advance notice, subject to availability, in the Company's sole discretion, of adequate gas transmission, gas supply and/or gas storage capability, and subject to the Company's Transitional Sales Service Rate,

#### TRANSPORTATION TERMS AND CONDITIONS

Section 5 Schedule H, of the Commercial and Industrial Services.

These provisions for switching marketers or returning to Sales Service do not excuse the performance of any contractual obligations between the customer and a marketer, including the potential requirement of paying damages to the marketer for a breach of any such contractual obligation.

#### 1.02.2 Non-Firm Transportation:

Switching Marketers is allowed at the start of any calendar month with the provision that the Company receive the Customer's Transportation Service Application designating the effective Marketer by 9 a.m. at least two (2) business days before the start of the month for which the switch is effective.

These provisions for switching marketers do not excuse the performance of any contractual obligations between the customer and a marketer, including the potential requirement of paying damages to the marketer for a breach of any such contractual obligation.

If the Company receives more than one Transportation Service Application for the same customer account with different designations of Marketer, the Company will contact the Customer for clarification and confirmation.

#### 1.03.0 Nominations:

#### 1.03.1 **General**:

Marketer shall provide notice via the Company's Electronic Bulletin Board the required information relative to Shipper and Transporting Pipeline names and contract number(s) on which deliveries will be made and the specified quantity of gas that Marketer will deliver to the Point(s) of Receipt on each day of the calendar month. Marketer is required to have separate nomination names and contract numbers for each of Marketer's Aggregation Pools. Additional information may be required by the Company.

#### TRANSPORTATION TERMS AND CONDITIONS

### 1.03.2 Dispatch **Communication:**

All nomination information shall be communicated to the Company's Gas Supply Operations Department via the Company's Electronic Bulletin Board (EBB). Marketer shall be responsible for monitoring the EBB 24 hours per day, seven days per week for dispatch purposes. In the event that the Company is unable to contact a Marketer regarding any nomination or dispatch, the Company may take any action it deems necessary to maintain system integrity as otherwise outlined in the General Terms and Conditions.

#### available by telephone and facsimile Formatted: Not Highlight Deleted: contact person is not available when Company attempts to contact them,

Deleted: having a contact person

Deleted: Any nominations submitted via facsimile are due two (2) hours earlier

than times indicated for the EBB and can

be sent to (401) 333-3527

# **1.03.3 Initial Nominations:**

The Nomination terms for FT-1 and NFT Service for deliveries to commence service on the first day of any calendar month will be submitted to the Company not later than the initial nomination deadline of the upstream Transporting Pipeline(s) transporting gas for Marketer. Such nominations will specify the quantity to be scheduled on each day of the month. The nomination requirements for FT-2 Service are described in Item 3.03 below.

As a condition of confirming any nomination, Company may direct Marketer to have gas delivered to an alternate Point of Receipt on the same Transporting Pipeline. Upon receipt of such directions, Marketer will arrange with the Transporting Pipeline to have gas delivered to the Point of Receipt designated by Company. Such alternate point of Receipt will remain the Point of Receipt for Marketer's gas for the period stated by the Company in its instructions until Company directs Marketer otherwise.

# 1.03.4 Subsequent **Nominations:**

After the first day of the calendar month, Marketer may alter its nomination, provided that the revised nomination for delivery on any day is submitted to Company not later than 1:00 PM, in the case of FT-1 and NFT Service, of the prior gas day. Any nomination submitted after the initial monthly nomination will include Marketer's anticipated quantities for the remainder of the calendar month. For FT-

#### TRANSPORTATION TERMS AND CONDITIONS

2 Service, the nomination requirements are described in Item 3.03 below.

### 1.03.5 Intra-Day Nominations:

For daily metered Aggregation Pools, the Company will accept and implement, on a best efforts basis, an intra-day nomination submitted after the nomination deadline for the following gas day but before the start of the following gas day. An intra-day nomination within the gas day will be accepted at the Company's sole discretion.

One (1) such nomination per gas day shall be accepted subject to confirmation by the Transporting Pipeline.

# 1.03.6 Scheduling of Service:

Company will attempt to confirm with Transporting Pipeline(s) that the nominated quantities equal the Scheduled Transportation Quantity. If such nomination is confirmed, the Company will schedule said quantities to the Marketer at the designated Point of Receipt(s).

If Marketer is purchasing gas at the Company's citygate, they are responsible for identifying the original delivering contract number, Shipper and any additional title transfers.

If Marketer's nominations on the Company's Electronic Bulletin Board are not consistent with nominations on Transporting Pipeline, then the smaller of the two nominations shall prevail, and all associated balancing and penalty assessments shall be based on the smaller nomination.

#### 1.04.0 Protection Of System Operations:

# 1.04.1 Company Operational

Flow Order (OFO):

Service hereunder may be limited as provided in the Company's General Terms and Conditions. Further, in the event that the Company determines in its sole judgment that it must take prompt action in order to maintain system integrity or to ensure Company's continued ability to provide service to its firm customers, the Company may declare a Critical Day or issue an OFO. In addition to the

#### TRANSPORTATION TERMS AND CONDITIONS

OFOs listed below, the Company shall have the right to issue any other OFO reasonably intended to serve the above stated purpose. The Company may take any one or more of the following actions:

- (1) declare a Critical Day which would require
  Marketer to fully utilize upstream capacity that it
  received from Company through Capacity Release;
  and require Marketer to fully schedule storage
  resources allocated as part of FT-2 Service, i.e., up
  to the MDQ-U, prior to relying on peaking
  resources to the extent they are needed to meet their
  customer's demands;
- (2) take any actions that are within Company's operational capability to reduce or eliminate Marketer or Aggregation Pool excess receipts; and
- (3) take any actions that are within Company's operational capability to reduce or eliminate Marketer or Aggregation Pool excess takes.

An OFO will likely be issued at forty four (44) Degree Days or colder.

# 1.04.2 Pipeline Operational Flow Order:

If, at any time, an immediate upstream pipeline issues an order changing the requirements at the Point(s) of Receipt, then Company may so notify Marketer and direct Marketer to modify requirements at the Point(s) of Receipt to the extent necessary for Company to comply with the pipeline's order. Marketer will be responsible for coordinating with their customers regarding any necessary change to Customer's quantity of Gas Usage.

# 1.04.3 Marketer Responsibility:

In the event Company takes action to alleviate excess imbalances it will nonetheless remain the obligation of Marketer to make such further adjustments to nominations, both to Company, Shipper, and to Transporting Pipeline, during the remainder of the month to resolve accumulated imbalances or to account for subsequent changes in actual

#### TRANSPORTATION TERMS AND CONDITIONS

deliveries. Company's exercise of its authority under this section will have no effect on Marketer's liability for unauthorized overrun or imbalance penalties that apply to Marketer under this tariff or any similar charge, including scheduling penalties, imposed by any upstream Transporting Pipeline(s).

An operational flow order may be issued by the Company as a blanket order to all transportation customers, or to individual Marketer's Aggregation Pools, whose actions are determined by the Company to jeopardize system integrity.

For Critical Days or OFO's aggravated by underdelivery, the Marketer will be charged a penalty of 5 times the Daily Index for the aggregated Gas Usage of Customers in the Aggregation Pool that exceed 102% of the Marketer's aggregate actual receipts on the Transporting Pipeline at the Point of Receipt. The Marketer will be charged a penalty of 0.1 times the Daily Index for the differences between said receipts and said usage that exceed 20% of said receipts [(Receipts – Usage) > (20% x Receipts)].

For Critical Days or OFO's aggravated by overdelivery, the Marketer will be charged a penalty of 0.1 times the Daily Index for the aggregated Gas Usage of Customers in the Aggregation Pool that exceed 120% of the Marketer's aggregate actual receipts on the Transporting Pipeline at the Point of Receipt. The Marketer will be charged a penalty of 5 times the Daily Index for the differences between said receipts and said usage that exceed 2% of said receipts [(Receipts – Usage) > (2% x Receipts)].

#### 1.05.0 Unauthorized Use:

In the event the Company provides a Marketer with as much notice as Company deems practicable of an Operational Flow Order per Item 1.04.0 or other curtailment of service and thereby reduces the Scheduled Transportation Quantity for delivery, the total Gas Usage by the Customer may not exceed the revised Scheduled Transportation Quantity. If, on any Gas Day, after notice

#### TRANSPORTATION TERMS AND CONDITIONS

of curtailment, the quantity of gas taken by Marketer's Customers in an Aggregation Pool, exclusive of NFT customers whose use under a curtailment is covered in Item 4.04 below, exceeds Marketer's Scheduled Transportation Quantity as so revised for the Aggregation Pool, and the Company has not authorized such excess quantity, then all such Gas Usage constitutes Unauthorized Use and is subject to an overrun penalty for each Dekatherm not delivered of 5 times the Daily Index. Such charges will be billed to the Marketer's account.

# 1.06.0 Shipper And Transporting Pipeline Requirements:

Marketer warrants with respect to each Aggregation Pool, that it has entered into the necessary agreements for the purchase and delivery of a gas supply to the Point of Receipt which it wants Company to transport and that it has entered into the necessary transportation agreements for the delivery of gas supply to the Point of Receipt. Marketer acknowledges that it must arrange for the delivery of Actual Transportation Quantities to the Company sufficient to include both the Scheduled Transportation Quantities and the applicable Company Fuel Adjustments.

In addition, Marketer warrants that at the time of delivery of its gas supply to the Point of Receipt, Marketer shall have good title to such gas, free of all liens, encumbrances and claims whatsoever. Marketer shall indemnify the Company and save it harmless from all suits, actions, debts, accounts, damage, costs, losses and expenses arising from or out of any adverse legal claims of third parties to or against said gas supply.

#### 1.07.0 Capacity Release:

Each Marketer serving any Customer migrating from Non-Firm Sales, Non-Firm Transportation or Firm Sales Service to FT-1 or FT-2 Transportation Service or from another Marketer's Aggregation Pool where they were previously assigned pipeline capacity by the Company, will be required to accept, for each such Customer account, an assignment of a portion of Company's firm interstate pipeline transportation capacity at maximum rates for an

Formatted Table

#### TRANSPORTATION TERMS AND CONDITIONS

initial term of up to one year. The Company shall determine the quantity to be released, based on a pro-rata percentage of the customer account's Average Normalized Winter Day Usage to the system total, and the pipeline on which such capacity will be released. The quantity of capacity shall be set forth in the confirmation materials provided to the Marketer. For all Customers classified as Medium, Large or Extra-Large this quantity will be reviewed annually against the Customer's most recent usage patterns. Any change in Customer's required capacity will be reflected in a revised capacity release with the Marketer for effect on the following November 1st. In the event that a marketer stops delivering gas on behalf of an existing capacity exempt customer, the customer will be prohibited from taking firm Company sales service. Such customers may select default transportation service as described in Item 2.04.0 below.

Marketer shall be required to execute a Capacity Assignment Agreement at the time a Marketer establishes an Aggregation Pool or any other instruments reasonably required by Company or interstate pipeline necessary to effectuate such assignment. Marketer is responsible for utilizing and paying for the assigned capacity consistent with the terms and conditions of the interstate pipeline's tariffs and this tariff. Marketer is responsible for payment of all upstream pipeline charges associated with the assigned firm transportation capacity, including but not limited to demand and commodity charges, shrinkage, GRI charges, cash outs, transition costs, pipeline overrun charges, annual change adjustments and all other applicable charges. These charges will be billed directly to the Marketer by the interstate pipeline.

All Capacity Assignments for FT-1 Transportation Service will be effective with the commencement of service. Capacity Assignments for FT-2 Customers will be effective the 1<sup>st</sup> of the upcoming month for Transportation Service Applications received prior to the 10<sup>th</sup>. For FT-2 Transportation Service Applications received on or after the 10<sup>th</sup> of the month, the capacity release will not be

Formatted Table

Deleted: Second

#### TRANSPORTATION TERMS AND CONDITIONS

effective until the 1<sup>st</sup> of the month subsequent to the upcoming month.

Capacity assignments will be effective for an initial term of up to one year through the following November 1<sup>st</sup>. The capacity assignments shall be reviewed each November 1<sup>st</sup> and be subject to annual adjustment as described above. All releases hereunder will be subject to recall under the following conditions: (1) when required to preserve the integrity of the Company's facilities and service; (2) at the Company's option, whenever the Marketer fails to deliver gas in an amount equal to the Scheduled Transportation Quantity; and (3) any other conditions set forth in the capacity release transaction between the Marketer and the Company.

The Company shall assess a surcharge/credit to marketers based on the difference between the charges of the upstream pipeline transportation capacity and the weighted average of the Company's upstream pipeline transportation capacity charges as calculated by the Company. To the extent that the charges of such released pipeline capacity are greater than the weighted average charges, the marketer shall receive credit for such difference in charges based on the total quantity of capacity released by the Company to the Marketer. The per Dt charge is calculated by subtracting the charge per Dt for the released pipeline capacity from the Company's weighted average Upstream Transportation charges as identified in the Company's annual Gas Cost Recovery Filing. To the extent that the cost of such released pipeline capacity is less than the weighted average cost, the marketer shall be surcharged for such difference.

On or before August 1 each year, the Company shall calculate and provide to marketers, as defined in Section 6, Schedule C, Item 5.00, its best estimate of: (1) the over (under) recovery balance in its deferred gas cost account; and (2) the anticipated fixed costs for interstate pipeline capacity, storage and peaking supplies.

#### TRANSPORTATION TERMS AND CONDITIONS

During the calendar month of September, each Marketer will be required to submit a new Capacity Assignment Agreement indicating pipeline capacity path preferences based on the available paths identified in the Company's annual Gas Cost Recovery Filing. Each Marketer shall identify pipeline capacity preferences for: (1) existing customers, and (2) any new customers. Marketer shall have the right to retain capacity released on existing paths if such paths remain available. Any changes from the Marketer's previous election will be effective November 1st in conjunction with the updating of customer capacity quantities described above. Subject to availability, Marketers may change path preferences for assignment of pipeline capacity during the year for any new customers added to their Aggregation Pool by filing with the Company a new Capacity Assignment Agreement with at least 30 days advance notice.

The capacity released to a Marketer stays with the customer account on which it is based and as such, will be reassigned at such time that a Customer terminates their contract with a Marketer or reverts back to the Company as of the date of the customer's service termination.

Each Marketer's capacity assignment associated with Customers in an aggregation pool shall be reviewed on a monthly basis prior to the tenth (10<sup>th</sup>) calendar day of the month, and adjusted to reflect any net changes resulting from the addition and deletion of customers to the pool.

1.07.1 New Loads:

New Customers classified as Large or Extra-Large electing FT-1 transportation service will not be required to take assignment of the Company's capacity resources as described in 1.07.0 above. The consumption of such Customers may be subject to annual review and confirmation by the Company. Customers who fail to meet the minimum requirement for the Large classification shall be required to take assignment of the Company's capacity resources after no less than 60 days notice. Marketers for such customers may be responsible for obtaining citygate capacity at a specific citygate on the Company's system as determined by the Company. Such determination will be

#### TRANSPORTATION TERMS AND CONDITIONS

based on the customer's location, load characteristics and distribution system requirements.

In the event that a marketer stops delivering gas on behalf of a customer without Company assigned pipeline capacity, the customer will be prohibited from taking firm Company sales service. Such customers may select default transportation service as described in Item 2.04.0 below.

1.08.0 Facilities:

Company shall own, operate and maintain, at its expense, its gas distribution facilities to the Point of Delivery. Customer shall furnish, maintain and operate the facilities required between Company's Point of Delivery and Customer's equipment.

**1.9.0** Quality:

Marketer is responsible for insuring that all gas received, transported and delivered hereunder to the Point of Receipt meets the quality specifications and standards outlined in the General Terms and Conditions of the Transporting Pipeline's FERC Gas Tariff.

1.10.0 Possession of Gas:

Company shall be deemed to be in control and possession of transportation gas to be delivered in accordance with this service from receipt at the Point(s) of Receipt until it shall have been delivered to Customer at the Point of Delivery. Marketer shall be deemed to be in possession and control of the gas prior to such receipt by the Company and Customer shall be deemed to be in control and possession of transportation gas after such delivery by the Company to the Point of Delivery. Company shall have no responsibility with respect to such gas before it passes the Point of Receipt or after it passes such Point of Delivery or on account of anything which may be done, happen or arise with respect to such gas after Point of Delivery.

1.11.0 Provision of Future Taxes, Surcharges Fees, Etc.:

In the event a tax of any kind is imposed or removed by any government authority upon the sale or transportation of gas or upon the gross revenues derived therefrom (exclusive, however, of taxes based on Company's net income), the rate for service to Customer and/or Marketer,

as the Company deems appropriate, shall be adjusted by an amount equal to or otherwise properly reflecting said tax. Similarly, the effective rate for service hereunder shall be adjusted to reflect any refund or imposition of any surcharges or penalties applicable to service hereunder which are imposed or authorized by any governmental authority.

# 1.12.0 Retention of Pipeline Fuel Adjustment:

The Company shall retain in kind, from the quantities of gas actually delivered to the Point(s) of Receipt for Marketers' accounts, the amount thereof equal to the applicable Company Fuel Allowance. Such Company Fuel Allowance shall be calculated by the Company based upon an average of the Company's most recent five (5) years experience, fuel loss and unaccounted for or similar quantity based adjustments.

# 1.13.0 Limitations of Liability:

The liability of the Company shall be limited in accordance with the provisions of the Company's General Terms and Conditions.

#### 1.14.0 Force Majeure:

Neither Company nor Marketer shall be liable to the other or to Customer for delays or interruptions in performing their respective obligations hereunder arising from any acts, delays or failure to act on the part of, or compliance by Marketer or Company with any operating standard imposed by any governmental authority, or by reason of an act of God, accident or disruption, including without limit, strikes or equipment failures, or any other reason beyond Marketer's or Company's control, provided, however, in the event of an occurrence of one or more of the foregoing events, reasonable diligence shall be used to over come such event. The party claiming force majeure shall, on request, provide the other party with a detailed written explanation thereof, and of the remedy being undertaken.

#### TRANSPORTATION TERMS AND CONDITIONS

**Service:** 

This service provides firm, 365 day transportation of Customer purchased gas supplies to customers electing to have Gas Usage recorded on a daily basis at the Point of Delivery. The Customer shall identify on the Transportation Service Application a Marketer that it has designated to perform initial and subsequent nominations, to receive scheduling and other notices from the Company, and to do balancing. Such Marketer shall assign Customer to an Aggregation Pool with other Customers electing FT-1 or NFT service or establish a one-customer Aggregation Pool and execute an appropriate Marketer Aggregation Pool Service Agreement. Specific Marketer requirements and obligations are described in Item 5.0 below.

2.02.0 Telemetering:

The Company will provide at the Customer's expense, at the Point of Delivery to the Customer, a device that the Company will attach to its metering equipment for the purpose of monitoring the Gas Usage. The Customer shall be responsible to supply a dedicated electrical supply and a telephone line at a location acceptable to Company and capable of transmitting information collected from the monitoring device to the Company's computer system. The Customer shall be responsible for the maintenance and service of the telephone line. Should a dedicated phone line be required, it is the responsibility of the Customer to schedule the installation, to notify Company when such installation has been completed, and the Customer is responsible for any associated charges. FT-1 and NFT transportation service shall not commence until the telemetering equipment is in place and operational.

2.03.0 Balancing:

Issued: September 1, 2009

FT-1 and NFT Service is subject to both Daily and Monthly balancing provisions. It will be the Marketer's responsibility to provide accurate and timely nominations of quantities proposed to be received and delivered by Company under this service and to maintain as nearly as possible, equality between the Gas Usage and the Actual Transportation Quantity. Marketer shall be solely responsible for securing faithful performance by Shipper and Transporting Pipeline, and the Company shall not be responsible as a result of any failure of Shipper or Transporting Pipeline to perform. Charges and Penalties

#### TRANSPORTATION TERMS AND CONDITIONS

associated with FT-1 and NFT balancing are billed to the Marketer.

#### 2.03.1 Daily Imbalances:

The Marketer must maintain a balance between daily receipts and daily usage within the following tolerances:

Off-Peak Season: The difference between the Marketer's

Aggregation Pool actual receipts and the aggregated gas usage of customers in the Aggregation Pool shall be within 15% of said receipts. The Marketer shall be charged a penalty of 0.1 times the Daily Index for all differences not within the

15% tolerance.

Peak Season: The difference between the Marketer's

Aggregation Pool actual receipts and the aggregated gas usage of customers in the Aggregation Pool shall be within 10% of said receipts. The Marketer shall be charged a penalty of 0.5 times the Daily Index for all differences not within the

10% tolerance.

Critical Day(s): The Company will determine if the

Critical Day will be aggravated by an underdelivery or an overdelivery, and so notify the Marketer when a Critical Day is declared pursuant to Item 1.05 above.

If the Marketer has an accumulated imbalance within a month, the Marketer may nominate to reconcile such imbalance, subject to the Company's approval, which approval shall not be unreasonably withheld.

#### 2.03.2 Monthly Imbalances:

For each Aggregation Pool, the Marketer must maintain total Actual Transportation Quantities within a reasonable tolerance of total monthly Gas Usage. Any differences between total Monthly Transportation Quantities for an Aggregation Pool and the aggregated Gas Usage of Customers in the Aggregation Pool, expressed as a

	stated rate	stated rate
> 10% ≤ 15%	0.60 times the above stated rate	1.4 times the above stated rate
> 15%	0.25 times the above	1.75 times the above
	stated rate.	stated rate.

For purposes of determining the tier at which an imbalance will be cashed out, the price will apply only to volumes within a tier. For example, if there is a 7% Underdelivery on a Delivering Pipeline, volumes that make up the first 5% of the imbalance are priced at the highest average of the seven consecutive Daily Indices. Volumes making up the remaining 2% of the imbalance are priced at 1.15 times the average of the seven consecutive Daily Indices.

All cash-out charges or credits, as determined above, will be applied to the Marketer's monthly invoice for the Aggregation Pool.

Designated Marketers may arrange with another of Company's Marketers providing service to the same Point of Receipt to exchange, purchase or sell daily or monthly imbalance gas. The Company will notify each Marketer of its monthly imbalance following the close of the billing month in which the imbalance occurs. Marketers will have

#### TRANSPORTATION TERMS AND CONDITIONS

three business days following such notification to notify Company of any imbalance exchange or sale and to confirm such transaction.

### 2.03.3 Pass-Through of Upstream Imbalance Charges:

In addition to other charges provided for in this Section, Marketer will be responsible for any imbalance charge or penalty imposed on Company by an upstream pipeline as a direct result of an imbalance, scheduling error, unauthorized overrun or other similar charges caused by Marketer. The Company shall assign imbalance penalties assessed to the Company by upstream pipelines to sales and transportation customers based on the extent that each group caused such penalties, as determined by the Company. The portion of any such penalty assigned to transportation service shall be further assigned to individual Marketers based on the extent to which each Marketer's Aggregation caused such penalties, as determined by the Company.

## 2.04.0 Default Transportation Service:

Default Transportation Service is available to any Commercial or Industrial customer account classified as Large or Extra Large that subscribes to FT-1 Transportation Service and that does not have pipeline capacity assignment from the Company. Customers electing this service must provide written notice to the Company via mail, FAX or E-mail that their marketer will no longer be delivering gas on their behalf and that they wish to avail themselves of the service. Such service will continue in effect until either service is established with a new marketer through the execution of a new Transportation Application per Item 1.03.1 above or service is terminated.

This service provides for a continuous supply of gas of not less than 1,000 Btu per cubic foot, and is provided on a best efforts basis with as little as 24 hours advance notice. Where notification is at least 24 hours in advance but less than three business days before the start of a calendar

#### TRANSPORTATION TERMS AND CONDITIONS

month, the service provided will be Short-Notice Default Transportation Service. Where notice is provided at least three business days prior to the start of a calendar month, the service provided will be Advance-Notice Default Transportation Service. Short-Notice Default Transportation Service will be switched to Advance-Notice Default Transportation Service at the start of a subsequent month once the service has been in effect for the three business day period before the start of such month.

Default Transportation Service is a temporary surrogate for provision of gas to a customer that would otherwise be provided by a marketer, hence it includes nominating and balancing. Customer must maintain an operational telemetering device as required in Item 2.02.0 above.

2.04.1 Rates:

Pricing for Default Transportation Services shall be set forth in a Price Sheet filed with the Commission. The Company and Default Transportation Service supplier shall review the pricing of these services annually and file necessary revisions with the Commission concurrent with the Company's annual Gas Cost Recovery Filing.

### 3.0 FT-2 TRANSPORTATION SERVICE:

3.01.0 Character of Service:

This service provides firm, 365 day transportation of Customer purchased gas supplies to customers without the requirement for recording daily Gas Usage at the Customer's Point of Delivery. Daily Nominations are calculated by the Company on the basis of a consumption algorithm, the marketer is obligated to deliver to the citygate such quantities, and any imbalances are netted against storage resources allocated to the Marketer on the Customer's behalf.

The Customer's designated Marketer, as identified on the Customer's Transportation Service Application, shall be allocated a quantity of Company contracted underground storage and peaking resources sufficient to meet the Customer's design winter supplemental supply requirements as determined by the Company. These

#### TRANSPORTATION TERMS AND CONDITIONS

resources are assigned to the Marketer pursuant to a written agreement with the Company, for the purpose of meeting the Company forecasted daily usage under the operational parameters described below. Additional Marketer requirements and obligations are described in Item 5.0 below.

### 3.02.0 Storage And Peaking Resources:

Annually, the Company will calculate a Customer's total storage and peaking resource requirements under design winter conditions based on the Customer's most recent historical usage. The result of the calculations will establish the Maximum Storage Quantity-Underground (MSQ-U) and Peaking (MSQ-P) allocated for Marketer's use. The calculations will also establish a Maximum Daily Quantity-Underground (MDQ-U) and Peaking (MDQ-P) to set operational parameters for daily withdrawals and injections.

# 3.02.1 Maximum Storage Quantity (MSQ):

The MSQ for a Customer is the difference between their weather normalized total consumption under design winter conditions for the November through March period, minus the quantity of gas that could be delivered with their pipeline capacity assignment. The MSQ is allocated between underground storage (MSQ-U) and Peaking (MSQ-P) in the same percentage as is available on a Company-wide basis. These quantities represent the maximum storage and peaking inventories available to the Marketer for meeting the Customer's Gas Usage needs and are key components in the operational parameters regarding management of the resources.

### 3.02.2 Maximum Daily Quantity -

**Storage (MDQ-S):** 

The Customer's MDQ-S is calculated by the Company as the difference between the Customer's peak day usage under design winter conditions and the Customer's pipeline capacity assignment. This MDQ-S requirement in MMBtu is then allocated between underground storage (MDQ-U) and Peaking (MDQ-P) in the same percentage as is available on a Company-wide basis. These quantities serve

#### TRANSPORTATION TERMS AND CONDITIONS

to define the maximum quantities that can be nominated for withdrawal by a Marketer and are a component of the operational parameters for the service.

# 3.02.3 Operational <u>Parameters</u>:

The storage resources inventory balance for the Underground Storage and Peaking accounts shall be tracked by the Company and made available to the Marketers via electronic means. These balances will be updated each Gas Day to reflect Marketer nominations for either injections or withdrawals. The balances will also be updated continuously to reflect imbalances identified at the time of the Customer's billing cycle which will be netted against the Underground Storage Account.

The Company will establish Maximum and Minimum inventory levels reflective of the Company's available resources. There will be separate inventory levels for both Underground Storage and Peaking Resources. Such levels will be as provided in the annual Gas Cost Recovery Filing.

In addition to operational parameters for overall inventory levels, there are both Daily and Monthly maximums established for the quantities which the Marketer can nominate for withdrawal or for injection. These factors vary by month and as the marketer's inventory level changes. Such factors will be as provided in conjunction with the annual Gas Cost Recovery Filing.

# 3.02.4 Inventory Purchases:

To meet the revised required minimum storage balance levels resulting from the addition of new customers to an Aggregation Pool, Marketer may trade or purchase storage supplies from another Marketer, make injections to underground storage or purchase inventory from the Company, subject to availability. The Company will update an FT-2 aggregation pool's MSQ assignments concurrent with the Customer's initiation of transportation service with the designated marketer.

At the time that a Customer migrates to FT-2 Transportation Service or switches Marketers, the new

#### TRANSPORTATION TERMS AND CONDITIONS

designated Marketer will have a one-time opportunity to purchase an amount of inventory, from the Company, based on the MSQ requirement of Customers being added to the aggregation pool and the month when transportation service will commence. The Company will calculate the amount of storage inventory to be made available and provide such information to the Marketer upon receipt of a completed Transportation Service Application. The Marketer will have 5 business days to respond to the Company's offer. For Customers migrating during the April through October period, the maximum amount of storage inventory sold to a Marketer will be calculated as follows:

Inventory Sold = (x/7)\*Customer's MSQ

#### where:

Inventory Sold = the maximum amount of inventory the Company will sell to a Marketer

x = the number of off peak months since April 1st.

7 = the total number of off peak/storage injection months

Customer's MSQ = the Customer's total storage requirements under design winter conditions

Thus, for a Customer migrating to FT-2 service effective July 1, the Marketer would be able to purchase up to three-sevenths (3/7) of the Customer's MSQ from the Company to account for injections to storage during the months of April, May and June. The marketer would then be responsible for nominating sufficient injections during the July to October period to ensure that the inventory in storage for the FT-2 aggregation pool was at the minimum level identified in the Company's operational parameters

For Customers migrating during the peak period of November through March, the inventory sold will be based on the lesser of: (1) the added Customers' monthly minimum requirement outlined in the Company's operational parameters or (2) the incremental amount of inventory required to bring the Marketer's pool in compliance with the minimum requirement. For example,

Formatted: Swedish (Sweden)

#### TRANSPORTATION TERMS AND CONDITIONS

if the customer were to start transporting in February, the Marketer would have the option to purchase storage inventory from the Company in the amount equal to the February minimum inventory level of the Customer's MSQ. Marketer may purchase such amount from the Company at a rate calculated as indicated below.

The Company shall develop a price for the inventory based on the published NYMEX price, and adjusted for transportation, storage and carrying charges.

The price per Dt at the Company's citygate shall be calculated using the following formula:

$$SDt = NY + BS + TR + ST + CC$$

where:

\$/Dt = cost per MMBtu charged to Marketers

for storage inventory at the Company's

citygate

NY = NYMEX Settlement Price

BS = Basis Differential for East Louisiana

TS = Transportation Cost

ST = Storage Cost CC = Carrying Cost

In the event that a Marketer fails to nominate or obtain sufficient storage inventory for its Customers such that the Aggregation Pool's inventory is below the operational parameter minimum, the Marketer will be unable to nominate storage or peaking quantities to satisfy the FDU.

For Customers commencing FT-2 transportation service during off-peak months (April - October), Marketer will receive an assignment of peaking inventory during the following October for a November 1<sup>st</sup> effective date. For Customers migrating to FT-2 during peak months (November - March), Marketer will receive an assignment of peaking inventory concurrent with the commencement of service. The amount of peaking inventory assigned shall be based on the lesser of: (1) the added Customers'

#### TRANSPORTATION TERMS AND CONDITIONS

monthly minimum requirement outlined in the Company's operational parameters or (2) the incremental amount required to bring the Marketer's pool in compliance with the minimum requirement. Marketers would be able to purchase peaking inventory from NG at the Company's weighted cost of LNG inventory. All transactions are subject to authorization by NG.

Marketers needing to sell underground storage inventory as a result of customers switching to other marketers would be able to sell the inventory to another marketer, subject to authorization by NG, nominate withdrawal of supplies, or sell the inventory in excess of the Maximum Storage Quantity to NG. Marketers with inventory levels in excess of the Maximum Storage Quantities may be required by the Company to nominate underground storage to satisfy their FDU. If the Marketer has excess peaking resources, they could nominate those inventories to the extent allowed under the operational parameters or would be required to sell such excess peaking resources to NG at the price the inventory was originally purchased from NG.

3.02.5 **Rates:** 

The Marketer is responsible for procuring and maintaining inventory levels associated with the underground storage and peaking resources allocated by the Company as part of FT-2 Service. The following charges are for the recovery of the fixed costs and other miscellaneous costs associated with the provision of the underground storage and peaking resources and are billed to the Marketer:

FT-2 Throughput: \$ per Therm Gas Usage . The rate is as calculated in the Company's most recent Gas Cost Recovery Filing.

3.03.0 Nominations:

The Company shall calculate the Forecasted Daily Usage (FDU) of the aggregation pool using a Consumption Algorithm for each of the customers in the aggregation pool. The Company shall have sole responsibility for such Consumption Algorithm and by selecting FT-2 service, Marketer agrees to abide by the results of such algorithm. The algorithm is:

#### TRANSPORTATION TERMS AND CONDITIONS

FDU = Base Load + (HU factor \* FDD)

where:

FDU = an individual customer account's forecasted daily usage for the next gas day
Base Load = average daily consumption for the most recent July and August billing cycles
HU Factor = most recent billing cycle consumption, minus the base load, divided by the heating degree days for the billing cycle
FDD = forecasted heating degree days for the gas day starting at 10:00 AM the next day

FDU will be adjusted for any Company fuel allowance.

The Company will provide to the Marketer no later than 9:30 AM each day using an electronic posting or via facsimile the FDU for the next gas day which would start at 10:00 AM the next day. If the Company is unable to provide to the Marketer the FDU using an electronic posting or via facsimile before 9:30 AM, the default FDU will be the prior day's FDU. The Marketer shall be obligated to nominate any combination of pipeline, underground storage or peaking equal to the FDU for the next gas day. Such nomination is to be posted on the Company's Electronic Bulletin Board no later than 1:00 PM before the start of the next gas day. The Company shall not accept or confirm any nominations that are greater than the FDU of the aggregation pool and any nominations for storage and peaking resources must be in accordance with the applicable operational parameters. Quantities nominated for injection into storage are over and above quantities to meet the FDU. Any nominations to inject supplies into storage or nominate supplies from storage must be separately identified and made to the Company's citygate. If storage inventory is below the minimums established above, Marketer will not be able to nominate storage or peaking quantities to satisfy the FDU nomination requirement.

3.03.1 Critical Days:

Issued: September 1, 2009

To satisfy the FDU nomination requirement on Critical Days, the Marketer is required to fully utilize upstream

#### TRANSPORTATION TERMS AND CONDITIONS

capacity that it received from Company through Capacity Release so as to help avoid restricting the Company's ability to provide efficient and reliable firm transportation and sales service. Notice of Critical Days will be posted on the EBB no later than concurrent with the posting of the FDU nomination requirement.

3.03.2 Under-deliveries:

Any under-deliveries of the aggregation pool's gas requirements, up to the FDU, will be treated as Unauthorized Use and subject to penalty charges as provided in Item 1.06.0 above.

3.04.0 Balancing:

Imbalances between customer Gas Usage and the Forecasted Daily Usage (FDU) will be netted out against the underground storage inventory at the time of a customer's billing cycle. Quantities used in excess of FDU will be subtracted from the underground storage inventory level. If Gas Usage is less than FDU, the difference will be treated as an injection to underground storage and added to the inventory level. All quantities will be adjusted for Company Fuel Allowance.

### 4.0 NFT SERVICE:

4.01.0 Character Of Service:

This service provides interruptible transportation of Customer purchased gas supplies to customers with telemetering equipment and that are eligible to be classified under Section 6, Schedule A of the Company's Tariff. The Customer shall identify on the Transportation Service Application a Marketer that it has designated to perform initial and subsequent nominations, to receive scheduling and other notices from the Company, and to do balancing. Such Marketer may assign Customer to an Aggregation Pool with other Customers electing NFT or FT-1 transportation service or establish a one-customer Aggregation Pool. Specific Marketer requirements and obligations are described in Item 5.0 below.

4.02.0 Nominations:

Issued: September 1, 2009

The nomination requirements in Item 1.04.0 above apply to

the provision of NFT Service.

Effective: November 1, 2009

Deleted: Second

#### TRANSPORTATION TERMS AND CONDITIONS

4.03.0 <u>Imbalances:</u>

The Daily and Monthly Imbalance provisions in Items 2.03 above apply equally here.

4.04.0 Curtailments:

Customer will curtail or discontinue service when, in the sole opinion of the Company, such curtailment or interruption is necessary in order for it to continue to supply the gas requirements of its firm customers at such time. The Company will attempt to give the customer and customer's marketer three (3) working days' notice of such curtailment, except in emergency situations, when at least one hour's notice shall be given.

For any period that a customer fails to curtail the use of gas as requested by the Company, the charge for gas consumption will be equal to the non-firm transportation service customer charge plus Gas Usage at a penalty of 5 times the Daily Index. Such use of gas under these circumstances shall be considered an "unauthorized use" of gas purchased from the Company, and billed to the customer's account.

In the event where the Company, in its sole discretion, grants the customer an exemption from the curtailment, the use of gas under these circumstances shall be referred to as an "authorized use of gas." Authorized use of gas during a curtailment will be for a limited time period and will be purchased from the Company. The charge for gas consumed under these conditions will be billed to the customer and based on the non-firm transportation service customer charge plus the Company's highest cost gas required to meet demand during the applicable curtailment period, plus the current firm sales service rate excluding the firm customer charges. Payments for this use, whether authorized or unauthorized, shall not preclude the Company from turning off the customer's supply of gas in the event of the failure to interrupt, or curtail, the use thereof when requested to do so.

#### 5.00 MARKETER AGGREGATION SERVICE:

5.01.0 Character of

Deleted: Second

#### TRANSPORTATION TERMS AND CONDITIONS

#### **Service:**

This service allows Marketers to aggregate customer accounts and form Aggregation Pools for the purpose of making initial and subsequent nominations, making delivery to a designated Point of Receipt, and for balancing of Actual Transportation Quantity with Gas Usage on Customer's behalf. The Company will transport gas, owned by the Customers of the Aggregation Pool, to the Point(s) of Delivery for each Customer included in such pool. A Marketer shall be designated by each Customer on the Transportation Service Application, and each such customer must be assigned by the Marketer to an Aggregation Pool of one or more customers. Changing the designated Marketer is allowed under the conditions in Item 1.02 above and is accomplished through the execution of a new Transportation Service Application. Once so designated, the Company will rely on information provided by the Customer's Marketer for nomination, balancing and scheduling purposes and all notices provided by the Company to Customer's Marketer shall be deemed to have been provided to the Customer.

# 5.02.0 Aggregation Pools:

The aggregation of Customer accounts into an aggregation pool is limited by the transportation service of the respective Customers.

The Customer's transportation service restriction requires that Customers subscribing to non-daily metered FT-2 Service must be aggregated in a separate pool from Customers subscribing to daily metered FT-1 or NFT Service. Customers subscribing to FT-1 or NFT can be combined in a single Aggregation Pool. A separate Marketer Account will be established for each Marketer Aggregation Pool.

A further restriction on daily metered Aggregation Pools is that the election of a supplemental service such as Pool Balancing Service, shall apply to the entire Aggregation Pool and not just an individual customer in the Aggregation Pool. Separate Aggregation Pools are required for FT-1 or NFT Service with Pool Balancing Service versus FT-1 or NFT Service without the supplemental service.

#### TRANSPORTATION TERMS AND CONDITIONS

#### **Service:**

Service is available for daily metered Marketer Aggregation Pools concurrent with the term of the Aggregation Pool.

The intent of this service is to accommodate minor, unintentional imbalances between an Aggregation Pool's Customer's daily usage at the Point(s) of Delivery and Actual Transportation Quantities delivered to the Company's distribution system at the Point of Receipt. Marketer must notify the Company by October 1<sup>st</sup> to elect Pool Balancing Service commencing November 1<sup>st</sup> or at least thirty (30) days prior to establishment of an Aggregation Pool.

Under the Pool Balancing Service, the Company agrees to provide a daily balancing service for imbalances up to a Marketer designated Maximum Daily Balancing Entitlement. Such entitlement is expressed as a percentage of the Aggregation Pool's Gas Usage and includes the 10% tolerance described in Item 2.03.1 above. Daily imbalances greater than the Marketer designated Maximum Daily Balancing Entitlement will remain subject to the balancing provisions outline in the Company's Terms and Conditions of Transportation Service.

The Company reserves the right to limit service offered under this schedule, subject to availability, in the Company's sole discretion, of adequate gas transmission, gas supply and/or gas storage capability or force majeure, or as otherwise provided in the Company's Terms and Conditions.

### 5.04.1 Pool Balancing Rate:

Variable Charge: \$ per Therm Gas Usage per percent

> elected (Maximum Daily Balancing Entitlement % net of 10% standard

tolerance)

Where: - The rate is as calculated in the Company's annual Gas Cost Recovery Filing.

- Gas Usage is total of all Aggregation Pool

Customers.

- Maximum Daily Balancing Entitlement % is specified in Marketer Aggregation Pool

#### TRANSPORTATION TERMS AND CONDITIONS

Agreement and includes the 10% standard tolerance.

#### 5.05 Billing:

Billing for monthly customer charges and transportation charges for quantities actually delivered shall be based on the readings at each individual meter for the Customer and billed on a billing cycle basis to the Customer. The Customers and Marketers shall be liable for all rates, charges and surcharges allowed for in the Company's Rate Schedules related to transportation services provided to each customer individually.

Calculation of charges applicable to the Aggregation Pool will be based on aggregated Gas Usage, MDQ's, etc. of all Customers in the Aggregation Pool. Billing for charges applicable to an Aggregation Pool, e.g., imbalance charges, credits or penalties, and FT-2 Throughput charges shall be billed to the Marketer on a calendar month basis.

All bills rendered to the Marketer are due within 10 days from the date of the invoice. A late payment charge, in accordance with regulations of the Rhode Island Public Utilities Commission and the Rhode Island Division of Public Utilities and Carriers, shall accrue after 10 days.

- 1.5 Marketer agrees to provide to Company no later than 30 days before the above identified commencement date Transportation Service Applications for all end user customers in Marketer's Aggregation Pool identified in 1.1 above. Such list is to include: Customer Name; Billing Address; NG account #; and, name and telephone number of customer contact person.
- 1.6 Marketer agrees to notify Company in writing of any changes in the makeup of an Aggregation Pool as provided in the Company's Transportation Terms and Conditions.
- 1.7 Marketer represents and warrants that it has accepted the designation as the Marketer of each customer of the Aggregation Pool and agrees in each case to be bound by, perform, and pay all charges applicable to transportation service to the Customer's account in accordance with the provisions of the Company's tariff.

#### 2.0 PIPELINE CAPACITY RELEASE:

- 2.1 Company agrees to provide to Marketer no later than 15 days before the above identified commencement date, the quantity of interstate pipeline capacity allocated for Marketer's FT-1 and FT-2 Aggregation Pool(s) broken down by individual customer.
- 2.2 Marketer agrees to accept assignment of such firm interstate pipeline capacity in accordance with the Company's Transportation Terms and Conditions, Schedule C, Item 1.07.
- 2.3 Company agrees to update the calculation of the quantity of interstate pipeline capacity annually based on customers' most recent historical usage in accordance with the Company's Transportation Terms and Conditions, Schedule C, Item 1.07.

### 3.0 PUBLIC REGULATION:

Issued: September 1, 2009

- 3.1 Company is a public utility subject to regulation by Rhode Island Public Utilities Commission ("Commission"). This Agreement is subject to any limitations, modifications or amendments ordered by the Commission, regardless of whether said order resulted from a petition, request or other solicitation directed to the Commission by a party to the Agreement. Compliance by Company with any order, rule, regulation or policy statement of the Commission, or of any other federal, state or local governmental authority, whether issued before or after the effective date of this Agreement, shall relieve Company of any liability for its failure to perform any of its obligations hereunder as a result of such compliance. In the event of the issuance of any order of the Commission which materially modifies the provisions of this Agreement, either Company or Marketer shall have the option to terminate this Agreement by giving written notice of termination to the other party at any time within thirty (30) days after the issuance of said order.
- 3.2 This Agreement shall be subject to Company's General Terms and Conditions and Transportation Terms and Conditions on file with the Commission to the extent those Terms and Conditions are not inconsistent with the provisions of this Agreement.

# THE NARRAGANSETT ELECTRIC COMPANY STORAGE AND PEAKING RESOURCE AGREEMENT

This Agreement ("Agreement") is entered into this day of, 200, by and between the Narragansett Electric Company, d/b/a National Grid, a subsidiary of National Grid USA with a principal place of business in the State of Rhode Island at 280 Melrose Street, Providence, Rhode Island (herein called "NG" or the "Company") and (herein called "Marketer.")
WITNESSETH THAT:
WHEREAS, Marketer seeks to obtain service respecting a quantity of the Company's contracted underground storage and peaking resources pursuant to the terms and conditions for FT-2 Transportation Service in the Company's tariff, RIPUC NG-GAS No. 101, Section 6, Schedule C; and
WHEREAS; Marketer desires that the Company transport quantities of gas delivered by Marketer for use at the locations of customers belonging to an FT-2 Aggregation Pool (hereafter called "Points of Delivery"); and
WHEREAS: Company, is willing to provide such storage and transportation service to Marketer.
NOW, THEREFORE, Company and Marketer agree that Company, subject to the Company's General Terms and Conditions, Transportation Terms and Conditions, limitations and provisions hereof, commencing
1.0 SCOPE OF AGREEMENT:  1.1 The Company will calculate the Maximum Storage Quantities for both Underground Storage and for Peaking services ("MSQ-U" and "MSQ-P" respectively) as well as the Maximum Daily Quantities for both Underground Storage and Peaking services ("MDQ-U" and "MDQ-P" respectively) in accordance with Item 3.02 in Section 6, Schedule C of the Company's tariff. Such calculated quantities can change during the term of the agreement to the extent that the makeup of the Marketer's FT-2 Aggregation Pool changes.
1.2 Marketer hereby agrees to utilize and manage such services and inventories attributed to its account in accordance with the Operational Parameters described in Item 3.02.3 of the

Formatted Table

Deleted: Second

- 2.1 All nominations for either withdrawals from or injections to storage will take place at the Company's citygate.
- 2.2 Purchases of inventory service from the Company will be at the Company's weighted average storage commodity cost of gas at the time of purchase or as otherwise stated in the Company's currently effective tariff.
- 2.3 Purchase of any storage inventory service from the Company will require payment via electronic transfer of funds within ten days of invoice unless the Marketer and Company mutually agree to payment over a 3 month period, which would include a monthly finance charge based on a monthly rate using the latest published Fleet Prime less 200 basis points (2%).
- 2.4 Notwithstanding any provisions to the contrary, Marketer acknowledges and warrants that sale and marketable title to any storage gas injected into the Company's system shall thereupon transfer to the Company, and that Marketer's interests shall thereafter be limited to the contractual rights to service as provided by this Agreement. Marketer further acknowledges that it shall bear no ownership interest in any other storage or peaking assets or inventory of the Company.
- 2.5 If Marketer needs to sell or assign its service rights representing underground storage inventory attributed to its account as a result of customers switching to other marketers, it may, subject to authorization by NG, sell the inventory rights to another marketer, nominate withdrawal of supplies, or sell the inventory to NG. Marketers with inventory levels in excess of the Maximum Storage Quantities may be required by the Company to nominate underground storage to satisfy their FDU. If the Marketer has excess peaking resources, it could nominate those inventories to the extent allowed under the operational parameters or would be required to sell such excess peaking resource rights to NG at the price the inventory was originally purchased from NG.

#### 3.0 SUCCESSORS AND ASSIGNS:

3.1 This Agreement shall be binding on the parties hereto and their respective successors and assigns. This Agreement may not be assigned by Marketer without the prior written consent of the Company.

#### 4.0 PUBLIC REGULATION:

4.1 Company is a public utility subject to regulation by Rhode Island Public Utilities Commission ("Commission"). This Agreement is subject to any limitations, modifications or amendments ordered by the Commission, regardless of whether said order resulted from a petition, request or other solicitation directed to the Commission by a party to the Agreement. Compliance by Company with any order, rule, regulation or policy statement of the Commission, or of any other federal, state or local governmental authority, whether issued before or after the effective date of this Agreement, shall relieve Company of any liability for its failure to perform any of its obligations hereunder as a result of such compliance. In the event of the issuance of

# THE NARRAGANSETT ELECTRIC COMPANY d/b/a NATIONAL GRID

**Rhode Island Public Utilities Commission Tariff** 

**RIPUC NG-GAS No. 101** 

"CLEAN" Tariff Pages

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2
Gas Charge
Schedule A, Sheet 1
Second Revision

# GAS COST RECOVERY CLAUSE

# 1.0 GENERAL:

### 1.1 Purpose:

The purpose of this clause is to establish procedures that allow the Company, subject to the jurisdiction of the Rhode Island Public Utilities Commission ("RIPUC"), to annually adjust its rates for firm sales and the weighted average cost of upstream pipeline transportation capacity in order to recover the costs of gas supplies, pipeline and storage capacity, production capacity and storage, purchased gas working capital, and to credit supplier refunds, capacity credits from off-system sales and revenues from capacity release transactions.

The Gas Cost Recovery Clause shall include all costs of firm gas, including, but not limited to, commodity costs, demand charges, local production and storage costs and other gas supply expense incurred to procure and transport supplies, transportation fees, inventory costs, requirements for purchased gas working capital, all applicable taxes, and deferred gas costs. Any costs recovered through the application of the Gas Charge shall be identified and explained fully in the annual filing.

# 1.2 Applicability:

The Gas Charge shall be calculated separately for the following rate groups:

- (1) Residential Non-Heating, Low Income Residential Non-Heating, Large C&I High Load Factor, Extra Large C&I High Load Factor;
- (2) Residential Heating, Low Income Residential Heating, Small C&I, Medium C&I, Large C&I Low Load Factor, and Extra Large C&I Low Load Factor;
- (3) ;FT-2 Firm Transportation Marketers
- (4) Natural Gas Vehicles

The Company will make annual Gas Charge filings based on forecasts of applicable costs and volumes and annual Reconciliation filings based on actual costs and volumes. The Gas Charge shall become effective with consumption on or after November 1<sup>st</sup> as designated by the Company. In the event of any change subsequent to the November effective date which would

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2
Gas Charge
Schedule A, Sheet 2
Second Revision

# **GAS COST RECOVERY CLAUSE**

cause the estimate of the Deferred Gas Cost Balance to differ from zero by an amount greater than one (1) percent of the Company's gas revenues, the Company may make a Gas Charge filing designed to eliminate that non-zero balance.

Unless otherwise notified by the RIPUC, the Company shall submit the Gas Charge filings no later than 60 days before they are scheduled to take effect. The Annual Reconciliation filing will be made by August 1 of each year containing actual data for the twelve months ending June 30 of that year.

### 2.0 GAS CHARGE FACTORS

### 2.1 Gas Charges to Sales

**Customers:** 

The Gas Charge consists of five (5) components: (1) Supply Fixed Costs, (2) Storage Fixed Costs, (3) Supply Variable Costs (4) Storage Variable Product Costs, and (5) Storage Variable Non-product Costs. These components shall be computed using a forecast of applicable costs and volumes for each firm rate schedule based on the following formula:

$$GC_S = FC_S + SFC_S + VC_S + SVC_S + SVNC_S$$

## Where:

$GC_S$	Gas Charge applicable to Residential Non-Heating,
	Low Income Residential Non-Heating, Residential
	Heating, Low Income Residential Heating, Small C&I,
	Medium C&I, Large Low and High Load C&I, and
	Extra Large Low and High Load C&I sales.

FC<sub>S</sub> Supply Fixed Cost Component for a rate classification. See Item 3.1 for calculation.

SFC<sub>S</sub> Storage Fixed Cost Component for a rate classification. See Item 3.2 for calculation.

VC<sub>S</sub> Supply Variable Cost Component for a rate classification. See Item 3.3 for calculation.

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2
Gas Charge
Schedule A, Sheet 3
Second Revision

# **GAS COST RECOVERY CLAUSE**

SVC<sub>S</sub> Storage Variable Product Cost Component for a rate

classification. See Item 3.4 for calculation.

SVNC<sub>S</sub> Storage Variable Non-product Cost Component for a

rate classification. See Item 3.5 for calculation.

This calculation will be adjusted for the uncollectible percentage approved in the most recent rate case proceeding and the Gas Charges to Sales Customers are subject to the Rhode Island Gross Earnings Tax provisions in Section 1, Schedule D.

# 2.2 Gas Charge to FT-2

# **Marketers:**

The FT-2 Firm Transportation Marketer Gas Charge (GC<sub>M</sub>) recovers costs associated with storage and peaking resources and is calculated as follows:

$$GC_M = SFC_S + SVNC_S$$

#### Where:

GC<sub>M</sub> Gas Charge applicable to Marketers for FT-2 Firm

Transportation Service

SFC<sub>S</sub> Storage Fixed Cost Component. See Item 3.2 for

calculation.

SVNC<sub>S</sub> Storage Variable Non-product Cost Component. See

Item 3.5 for calculation.

### 2.3 Gas Charge to Natural

**Gas Vehicles:** 

The Natural Gas Vehicle Gas Charge (GC<sub>NGV</sub>) recovers costs associated with natural gas distributed to the public at Company owned NGV stations and is calculated as follows:

$$GC_{NGV} = FC_S + VC_S$$

Where:

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2
Gas Charge
Schedule A, Sheet 4
Second Revision

# **GAS COST RECOVERY CLAUSE**

# 3.5 Storage Variable Non-product Cost

**Component:** 

The Storage Variable Non-product Cost Component shall include all variable costs related to the operations, maintenance and delivery of storage, as determined in the most recent rate case proceeding, injection and withdrawal costs, taxes on storage, delivery of storage gas to the Company's Distribution System, and requirements for purchased gas working capital. Any costs recovered through the application of the Storage Variable Non-Product Cost Component shall be identified and explained fully in the annual filing.

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2 Gas Charge Schedule A, Sheet 10 Second Revision

# **GAS COST RECOVERY CLAUSE**

The Storage Variable Non-product Cost Component is calculated for each applicable rate schedule as follows:

$$SVNC_{S} = \frac{TC_{SVNC} - TR_{SVNC} + WC_{SVNC} + R_{SVNC}}{Dt_{S}}$$

#### Where:

 $SVNC_S$ 

Storage Variable Non-product Cost Component for Residential Non-Heating, Low Income Residential Non-Heating, Residential Heating, Low Income Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I or FT-2 service.

 $TC_{SVNC}$ 

Total Storage Variable Non-product Costs, all variable costs, including, but not limited to supply related local production and storage costs, injection and withdrawal costs, and taxes on storage. The level of supply related local production and storage costs shall be as determined in most recent rate case proceeding.

TR<sub>SVNC</sub> Total Credits to Storage Variable Non-product

Total Creatis to Storage Variable 11011 product

Costs.

WC<sub>SVNC</sub> Working Capital requirements associated with Total

Storage Variable Non-product Gas Costs. See Item 5.0

for calculation.

R<sub>SVNC</sub> Deferred Storage Variable Non-product Cost Account

Balance as of October 31, as derived in Item 6.0.

Dt<sub>S</sub> Forecast of annual sales related to Residential Non-Heating, Low Income Residential Non-Heating,

Section 2
Gas Charge
Schedule A, Sheet 11
Second Revision

# **GAS COST RECOVERY CLAUSE**

Residential Heating, Low Income Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I. Extra Large Low and High Load C&I and throughput related to FT-2 service.

# 4.0 POOL BALANCING

**4.1 Purpose:** This section establishes a procedure to allow the Company,

subject to the jurisdiction of the RIPUC, to adjust on an annual basis its rates for firm pool balancing service set forth in Section

6, Schedule C, Item 5.04 of RIPUC NG-GAS No. 101

**4.2** Calculation: BAL = (FC + SFC + SVC) \* 1%

Where:

BAL Balancing Charge for Pool Balancing Service

applicable to Marketer pool throughput per percent of

balancing service elected.

FC Fixed Cost Component as calculated in Item 3.1

above.

SFC Storage Fixed Cost Component as calculated in Item

3.2 above.

SVC Storage Variable Product Cost Component as

calculated in Item 3.4 above.

5.0 WORKING CAPITAL REQUIREMENT:

 $WC_M = WCA_M * [DL / 365] * COC$ 

Where:

WC<sub>M</sub> Working Capital requirements of Supply Fixed

(WC  $_{FC}$  ), Storage Fixed (WC  $_{SFC}$  ), Supply Variable (WC  $_{SV}$  ), Storage Variable Product (WC  $_{SVC}$  ) or

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2 Gas Charge Schedule A, Sheet 12 Second Revision

# **GAS COST RECOVERY CLAUSE**

Storage Variable Non-product ( $WC_{SVNC}$ ) Cost Components.

WCA<sub>M</sub> Working Capital Allowed in the Supply Fixed, Storage Fixed, Supply Variable, Storage Variable Product, or Storage Variable Non-product Cost component calculations.

DL Days Lag approved in the most recent rate case proceeding.

Weighted Pre-tax Cost of Capital, consisting of three components: Short-term Debt, Long-term Debt, and Common Equity. The Common Equity components shall reflect the rates approved in the most recent rate case proceeding. The Short-term debt component shall be based on the Company's actual short-term borrowing rate for the twelve months ended June as presented in the Company's annual Distribution Adjustment Clause (DAC) filing in support of the Earnings Sharing Mechanism (ESM). The long-term debt component will be based on the Company's actual long-term borrowing rate as presented in the Company's annual DAC filing.

# 6.0 DEFERRED GAS COST ACCOUNT:

The Company shall maintain five (5) separate Deferred Gas Cost Accounts: (1) Supply Fixed Costs and revenues, (2) Storage Fixed Costs and revenues, (3) Supply Variable Costs and revenues, (4) Storage Variable Product Costs and revenues, and (5) Storage Variable Non-product Costs and revenues. Entries shall be made to each of these accounts at the end of each month as follows:

An amount equal to the allowable costs incurred, less:

1. Gas Revenues collected adjusted for the RIGET and uncollectible % approved in the most recent rate case proceeding;

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2 Gas Charge Schedule A, Sheet 13 Second Revision

# **GAS COST RECOVERY CLAUSE**

- 2. Credits to costs, including but not limited to GCR Deferred Responsibility surcharge/credits and Transitional Sales Service (TSS) surcharge revenues.
- 3. Monthly interest based on a monthly rate of the current Bank of America prime interest rate less 200 basis points (2%), multiplied by the arithmetic average of the account's beginning-of-the-month balance and the balance after entries 1. and 2. above.

# 7.0 REFUNDS

# 7.1 During Refund Period

If the Company receives a cash refund resulting from gas supply overcharges during a historical "refund period," where the historical "refund period" is the most recent 60-month period, and the amount of the refund equals or exceeds 2% of the Company's total gas costs for the prior fiscal year, the amount to be refunded to any firm customer who used gas during the refund period and who is not on the suspended debt file shall be equal to:

The customers' billed usage during Refund Period X

Amount to be Refunded
Firm Sales during Refund Period

where the Amount to be Refunded equals Total Amount of Refund minus the incremental costs incurred by the Company in effecting the distribution of the supplier refund.

The customer shall receive this amount in the form of:

- 1. A lump-sum bill credit if the customer's account is active or if the customer's final bill has not been paid; or
- 2. A personal check if the customers account is closed and paid in full and the amount of the check exceeds \$25; or
- 3. A combination bill credit/personal check if the amount of the credit exceeds the unpaid balance of the customer's final bill.

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No. 101

Section 2 Gas Charge Schedule A, Sheet 14 Second Revision

# **GAS COST RECOVERY CLAUSE**

The total amount of individually calculated refunds of \$2 or less to have been paid by check will be credited to the Deferred Gas Cost Account. Checks which are not deliverable or paid within 90 days of the mailing shall be canceled and also credited to the Deferred Gas Cost Account.

Should any canceled refund checks later become a liability of the Company, the cost shall be debited to the Deferred Gas Cost Account.

# 7.2 Prior To Refund Period:

If the Company receives a cash refund resulting from gas supply overcharges during periods prior to the historical refund period, then the refund shall be credited to the appropriate Deferred Cost Account.

# 7.3 <u>Less Than 2%</u>

If the amount of the refund is less than 2% of the Company's total gas cost for the prior fiscal year, it shall be credited to the appropriate Deferred Cost Account.

# 8.0 WEIGHTED AVERAGE UPSTREAM PIPELINE TRANSPORTATION COST

At the request of a marketer or the Division, the Company will provide within 21 days an estimate of the pipeline path costs for the next GCR year beginning November 1. The estimate will be based on the most recent GCR filing updated for current commodity pricing and other known changes which would significantly affect the factor. Concurrent with the annual GCR filing, the Company shall calculate the final weighted average cost of upstream pipeline transportation capacity. The cost shall be applicable to capacity release under the Transportation Terms and Conditions effective November 1 of each year or at such time as the Commission approves the rates.

September 1, 2009
Page 73

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 2

Attachment GLB-7 Docket No. \_\_\_\_\_

Third Revision

# TRANSPORTATION TERMS AND CONDITIONS

These terms and conditions apply to those Commercial and Industrial customers classified as Medium, Large, Extra Large, or Non-firm who purchase gas supplies from sources other than the Company for transportation service by the Company pursuant to RIPUC NG No.101, Section 5, Schedule B, C, and D, and Section 6, Schedule A, as well as to any Marketers designated to act on the Customer's behalf pursuant to a Transportation Service Application and executing a Marketer Aggregation Pool Service Agreement. Transportation service will also be governed by the Company's General Terms and Conditions of Service to the extent not inconsistent herewith.

The Company reserves the right to restrict the availability of Transportation Service should the number of customers exceed the capability of the Company to reliably administer the service or if the integrity of the distribution system is put at risk.

If a Customer requesting service hereunder has been a sales service customer of the Company at the same service location within the preceding twelve month period, any underrecovered or overrecovered gas costs attributable to such prior service under the Gas Cost Recovery Clause in Section 2, Schedule A, shall be determined and paid by Customer or credited to Customer's account. The calculation of such underrecovered or overrecovered gas costs shall be in accordance with the Customer Deferred Gas Cost Calculation Guideline as on file with the Commission from time to time.

# **1.01.0 TERM OF SERVICE:**

# 1.01.1 FT-1 Transportation Service:

FT-1 Transportation Service will commence on the first day of a calendar month subject to satisfying the Company's Transportation Terms and Conditions and be for an initial term of up to one year to reflect a common anniversary of November 1<sup>st</sup>. Service shall continue thereafter on a year-to-year basis, unless terminated by Customer, marketer or the Company, effective with the

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 3
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 74

# TRANSPORTATION TERMS AND CONDITIONS

Customer's next billing cycle, upon at least thirty (30) days' advance written notice to the other. The Marketer shall be responsible for providing the Company with an executed Transportation Service Application for each customer account being added to its FT-1 Aggregation Pool no less than thirty (30) days prior to commencement of service. The Company's receipt of the Transportation Service Application initiates the thirty (30) day notice period.

# 1.01.2 FT-2 Transportation Service:

FT-2 Transportation Service will commence on the first day of a Customer's billing cycle subject to satisfying the Company's Transportation Terms and Conditions. Service shall continue thereafter on a year-to-year basis unless terminated by Customer, marketer or the Company, effective with the Customer's next billing cycle, upon at least fifteen (15) days advance written notice to the other. The Marketer shall be responsible for providing the Company with an executed Transportation Service Application for each Customer being added to its FT-2 Aggregation Pool no less than fifteen (15) days prior to commencement of service. The Company's receipt of the Transportation Service Application initiates the fifteen (15) day notice period.

# **1.01.3** Non-Firm Transportation (NFT)

**Service:** 

Customers classified as Non-Firm Transportation (NFT) will be able to commence transportation as of the first (1<sup>st</sup>) of any calendar month subject to meeting the nomination requirements established in Item 1.03 following and having submitted to the Company an executed Transportation Service Application.

A Customer's designation as NFS or NFT shall remain in effect until the Company is notified of a further change. Such notice is required by 9 a.m. two (2) business days before the start of the calendar month when such change is to take effect. Switching to or initiating transportation service mid-month is generally not allowed.

### 1.02.0 Designation Of Marketer:

Section 6 Transportation Terms and Conditions Schedule C, Sheet 4 Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 75

### TRANSPORTATION TERMS AND CONDITIONS

# 1.02.1 Firm Transportation:

Customers wishing to switch Marketers will be allowed to do so at the start of a calendar month, in the case of FT-1 Service, or at the start of a customer's billing cycle, in the case of FT-2 Service. The Customer and the new Marketer shall execute a new Transportation Service Application listing the new Marketer as their designated Marketer. The Company must receive the new Transportation Service Application at least thirty (30) days prior to the change in the case of FT-1 Service, and at least fifteen (15) days prior to the customer's meter read in the case of FT-2 Service. For an FT-1 Service customer without a capacity assignment from the Company, see Item 1.07 below, the Company must be notified of such change by 9 a.m. at least two (2) business days before the start of the calendar month The Company will not accept a Transportation Service Application which designates a Marketer that has not executed an Aggregation Pool Service Agreement. If a Customer switches marketers, switches transportation services and/or switches to sales service more than once in a twelve month period, an administrative charge of \$50 shall be billed to the Customer to cover the processing of the request.

If the Company receives more than one Transportation Service Application for the same customer account with different designations of Marketer, the Company will contact the Customer for clarification and confirmation.

The Company will notify the Marketer of record in the event that a customer account assigned to the Marketer's Aggregation Pool is terminated.

Marketer must provide the Company with (30) days advance notice in the event that the Marketer terminates service to a Customer in its Aggregation Pool.

Customers not subject to Default Transportation Service in Item 2.04 below, may return to sales service with at least thirty (30) days advance notice, subject to availability, in the Company's sole discretion, of adequate gas transmission, gas supply and/or gas storage capability, and subject to the Company's Transitional Sales Service Rate,

Page 76

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 5
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

# TRANSPORTATION TERMS AND CONDITIONS

Section 5 Schedule H, of the Commercial and Industrial Services.

These provisions for switching marketers or returning to Sales Service do not excuse the performance of any contractual obligations between the customer and a marketer, including the potential requirement of paying damages to the marketer for a breach of any such contractual obligation.

# 1.02.2 Non-Firm Transportation:

Switching Marketers is allowed at the start of any calendar month with the provision that the Company receive the Customer's Transportation Service Application designating the effective Marketer by 9 a.m. at least two (2) business days before the start of the month for which the switch is effective.

These provisions for switching marketers do not excuse the performance of any contractual obligations between the customer and a marketer, including the potential requirement of paying damages to the marketer for a breach of any such contractual obligation.

If the Company receives more than one Transportation Service Application for the same customer account with different designations of Marketer, the Company will contact the Customer for clarification and confirmation.

# 1.03.0 **Nominations:**

### **1.03.1** General:

Marketer shall provide notice via the Company's Electronic Bulletin Board the required information relative to Shipper and Transporting Pipeline names and contract number(s) on which deliveries will be made and the specified quantity of gas that Marketer will deliver to the Point(s) of Receipt on each day of the calendar month. Marketer is required to have separate nomination names and contract numbers for each of Marketer's Aggregation Pools. Additional information may be required by the Company.

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 6
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 77

# TRANSPORTATION TERMS AND CONDITIONS

# 1.03.2 Dispatch Communication:

All nomination information shall be communicated to the Company's Gas Supply Operations Department via the Company's Electronic Bulletin Board (EBB). Marketer shall be responsible for monitoring the EBB 24 hours per day, seven days per week for dispatch purposes. In the event that the Company is unable to contact a Marketer regarding any nomination or dispatch, the Company may take any action it deems necessary to maintain system integrity as otherwise outlined in the General Terms and Conditions.

# 1.03.3 Initial Nominations:

The Nomination terms for FT-1 and NFT Service for deliveries to commence service on the first day of any calendar month will be submitted to the Company not later than the initial nomination deadline of the upstream Transporting Pipeline(s) transporting gas for Marketer. Such nominations will specify the quantity to be scheduled on each day of the month. The nomination requirements for FT-2 Service are described in Item 3.03 below.

As a condition of confirming any nomination, Company may direct Marketer to have gas delivered to an alternate Point of Receipt on the same Transporting Pipeline. Upon receipt of such directions, Marketer will arrange with the Transporting Pipeline to have gas delivered to the Point of Receipt designated by Company. Such alternate point of Receipt will remain the Point of Receipt for Marketer's gas for the period stated by the Company in its instructions until Company directs Marketer otherwise.

# 1.03.4 Subsequent Nominations:

After the first day of the calendar month, Marketer may alter its nomination, provided that the revised nomination for delivery on any day is submitted to Company not later than 1:00 PM, in the case of FT-1 and NFT Service, of the prior gas day. Any nomination submitted after the initial monthly nomination will include Marketer's anticipated quantities for the remainder of the calendar month. For FT-

Page 78

Transportation Terms and Conditions
Schedule C, Sheet 7
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

# TRANSPORTATION TERMS AND CONDITIONS

2 Service, the nomination requirements are described in Item 3.03 below.

# 1.03.5 Intra-Day Nominations:

For daily metered Aggregation Pools, the Company will accept and implement, on a best efforts basis, an intra-day nomination submitted after the nomination deadline for the following gas day but before the start of the following gas day. An intra-day nomination within the gas day will be accepted at the Company's sole discretion.

One (1) such nomination per gas day shall be accepted subject to confirmation by the Transporting Pipeline.

# 1.03.6 Scheduling of Service:

Company will attempt to confirm with Transporting Pipeline(s) that the nominated quantities equal the Scheduled Transportation Quantity. If such nomination is confirmed, the Company will schedule said quantities to the Marketer at the designated Point of Receipt(s).

If Marketer is purchasing gas at the Company's citygate, they are responsible for identifying the original delivering contract number, Shipper and any additional title transfers.

If Marketer's nominations on the Company's Electronic Bulletin Board are not consistent with nominations on Transporting Pipeline, then the smaller of the two nominations shall prevail, and all associated balancing and penalty assessments shall be based on the smaller nomination.

# 1.04.0 Protection Of System Operations:

# 1.04.1 Company Operational

Flow Order (OFO):

Service hereunder may be limited as provided in the Company's General Terms and Conditions. Further, in the event that the Company determines in its sole judgment that it must take prompt action in order to maintain system integrity or to ensure Company's continued ability to provide service to its firm customers, the Company may declare a Critical Day or issue an OFO. In addition to the

Page 79

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 8
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

# TRANSPORTATION TERMS AND CONDITIONS

OFOs listed below, the Company shall have the right to issue any other OFO reasonably intended to serve the above stated purpose. The Company may take any one or more of the following actions:

- (1) declare a Critical Day which would require
  Marketer to fully utilize upstream capacity that it
  received from Company through Capacity Release;
  and require Marketer to fully schedule storage
  resources allocated as part of FT-2 Service, i.e., up
  to the MDQ-U, prior to relying on peaking
  resources to the extent they are needed to meet their
  customer's demands;
- (2) take any actions that are within Company's operational capability to reduce or eliminate Marketer or Aggregation Pool excess receipts; and
- (3) take any actions that are within Company's operational capability to reduce or eliminate Marketer or Aggregation Pool excess takes.

An OFO will likely be issued at forty four (44) Degree Days or colder.

# 1.04.2 Pipeline Operational Flow Order:

If, at any time, an immediate upstream pipeline issues an order changing the requirements at the Point(s) of Receipt, then Company may so notify Marketer and direct Marketer to modify requirements at the Point(s) of Receipt to the extent necessary for Company to comply with the pipeline's order. Marketer will be responsible for coordinating with their customers regarding any necessary change to Customer's quantity of Gas Usage.

# 1.04.3 Marketer Responsibility:

In the event Company takes action to alleviate excess imbalances it will nonetheless remain the obligation of Marketer to make such further adjustments to nominations, both to Company, Shipper, and to Transporting Pipeline, during the remainder of the month to resolve accumulated imbalances or to account for subsequent changes in actual

Page 80

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 9
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

### TRANSPORTATION TERMS AND CONDITIONS

deliveries. Company's exercise of its authority under this section will have no effect on Marketer's liability for unauthorized overrun or imbalance penalties that apply to Marketer under this tariff or any similar charge, including scheduling penalties, imposed by any upstream Transporting Pipeline(s).

An operational flow order may be issued by the Company as a blanket order to all transportation customers, or to individual Marketer's Aggregation Pools, whose actions are determined by the Company to jeopardize system integrity.

For Critical Days or OFO's aggravated by underdelivery, the Marketer will be charged a penalty of 5 times the Daily Index for the aggregated Gas Usage of Customers in the Aggregation Pool that exceed 102% of the Marketer's aggregate actual receipts on the Transporting Pipeline at the Point of Receipt. The Marketer will be charged a penalty of 0.1 times the Daily Index for the differences between said receipts and said usage that exceed 20% of said receipts [(Receipts – Usage) > (20% x Receipts)].

For Critical Days or OFO's aggravated by overdelivery, the Marketer will be charged a penalty of 0.1 times the Daily Index for the aggregated Gas Usage of Customers in the Aggregation Pool that exceed 120% of the Marketer's aggregate actual receipts on the Transporting Pipeline at the Point of Receipt. The Marketer will be charged a penalty of 5 times the Daily Index for the differences between said receipts and said usage that exceed 2% of said receipts [(Receipts – Usage) > (2% x Receipts)].

# 1.05.0 Unauthorized Use:

In the event the Company provides a Marketer with as much notice as Company deems practicable of an Operational Flow Order per Item 1.04.0 or other curtailment of service and thereby reduces the Scheduled Transportation Quantity for delivery, the total Gas Usage by the Customer may not exceed the revised Scheduled Transportation Quantity. If, on any Gas Day, after notice

Page 81

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 10

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Third Revision

# TRANSPORTATION TERMS AND CONDITIONS

of curtailment, the quantity of gas taken by Marketer's Customers in an Aggregation Pool, exclusive of NFT customers whose use under a curtailment is covered in Item 4.04 below, exceeds Marketer's Scheduled Transportation Quantity as so revised for the Aggregation Pool, and the Company has not authorized such excess quantity, then all such Gas Usage constitutes Unauthorized Use and is subject to an overrun penalty for each Dekatherm not delivered of 5 times the Daily Index. Such charges will be billed to the Marketer's account.

# **1.06.0** Shipper And Transporting Pipeline Requirements:

Marketer warrants with respect to each Aggregation Pool, that it has entered into the necessary agreements for the purchase and delivery of a gas supply to the Point of Receipt which it wants Company to transport and that it has entered into the necessary transportation agreements for the delivery of gas supply to the Point of Receipt. Marketer acknowledges that it must arrange for the delivery of Actual Transportation Quantities to the Company sufficient to include both the Scheduled Transportation Quantities and the applicable Company Fuel Adjustments.

In addition, Marketer warrants that at the time of delivery of its gas supply to the Point of Receipt, Marketer shall have good title to such gas, free of all liens, encumbrances and claims whatsoever. Marketer shall indemnify the Company and save it harmless from all suits, actions, debts, accounts, damage, costs, losses and expenses arising from or out of any adverse legal claims of third parties to or against said gas supply.

# 1.07.0 Capacity Release:

Each Marketer serving any Customer migrating from Non-Firm Sales, Non-Firm Transportation or Firm Sales Service to FT-1 or FT-2 Transportation Service or from another Marketer's Aggregation Pool where they were previously assigned pipeline capacity by the Company, will be required to accept, for each such Customer account, an assignment of a portion of Company's firm interstate pipeline transportation capacity at maximum rates for an

September 1, 2009
Page 82

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 11

Attachment GLB-7 Docket No. \_\_\_\_\_

Third Revision

# TRANSPORTATION TERMS AND CONDITIONS

initial term of up to one year. The Company shall determine the quantity to be released, based on a pro-rata percentage of the customer account's Average Normalized Winter Day Usage to the system total, and the pipeline on which such capacity will be released. The quantity of capacity shall be set forth in the confirmation materials provided to the Marketer. For all Customers classified as Medium, Large or Extra-Large this quantity will be reviewed annually against the Customer's most recent usage patterns. Any change in Customer's required capacity will be reflected in a revised capacity release with the Marketer for effect on the following November 1st. In the event that a marketer stops delivering gas on behalf of an existing capacity exempt customer, the customer will be prohibited from taking firm Company sales service. Such customers may select default transportation service as described in Item 2.04.0 below.

Marketer shall be required to execute a Capacity
Assignment Agreement at the time a Marketer establishes
an Aggregation Pool or any other instruments reasonably
required by Company or interstate pipeline necessary to
effectuate such assignment. Marketer is responsible for
utilizing and paying for the assigned capacity consistent
with the terms and conditions of the interstate pipeline's
tariffs and this tariff. Marketer is responsible for payment
of all upstream pipeline charges associated with the
assigned firm transportation capacity, including but not
limited to demand and commodity charges, shrinkage, GRI
charges, cash outs, transition costs, pipeline overrun
charges, annual change adjustments and all other applicable
charges. These charges will be billed directly to the
Marketer by the interstate pipeline.

All Capacity Assignments for FT-1 Transportation Service will be effective with the commencement of service. Capacity Assignments for FT-2 Customers will be effective the 1<sup>st</sup> of the upcoming month for Transportation Service Applications received prior to the 10<sup>th</sup>. For FT-2 Transportation Service Applications received on or after the 10<sup>th</sup> of the month, the capacity release will not be

Page 83

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 12
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

### TRANSPORTATION TERMS AND CONDITIONS

effective until the 1<sup>st</sup> of the month subsequent to the upcoming month.

Capacity assignments will be effective for an initial term of up to one year through the following November 1<sup>st</sup>. The capacity assignments shall be reviewed each November 1<sup>st</sup> and be subject to annual adjustment as described above. All releases hereunder will be subject to recall under the following conditions: (1) when required to preserve the integrity of the Company's facilities and service; (2) at the Company's option, whenever the Marketer fails to deliver gas in an amount equal to the Scheduled Transportation Quantity; and (3) any other conditions set forth in the capacity release transaction between the Marketer and the Company.

The Company shall assess a surcharge/credit to marketers based on the difference between the charges of the upstream pipeline transportation capacity and the weighted average of the Company's upstream pipeline transportation capacity charges as calculated by the Company. To the extent that the charges of such released pipeline capacity are greater than the weighted average charges, the marketer shall receive credit for such difference in charges based on the total quantity of capacity released by the Company to the Marketer. The per Dt charge is calculated by subtracting the charge per Dt for the released pipeline capacity from the Company's weighted average Upstream Transportation charges as identified in the Company's annual Gas Cost Recovery Filing. To the extent that the cost of such released pipeline capacity is less than the weighted average cost, the marketer shall be surcharged for such difference.

On or before August 1 each year, the Company shall calculate and provide to marketers, as defined in Section 6, Schedule C, Item 5.00, its best estimate of: (1) the over (under) recovery balance in its deferred gas cost account; and (2) the anticipated fixed costs for interstate pipeline capacity, storage and peaking supplies.

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 13
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 84

# TRANSPORTATION TERMS AND CONDITIONS

During the calendar month of September, each Marketer will be required to submit a new Capacity Assignment Agreement indicating pipeline capacity path preferences based on the available paths identified in the Company's annual Gas Cost Recovery Filing. Each Marketer shall identify pipeline capacity preferences for: (1) existing customers, and (2) any new customers. Marketer shall have the right to retain capacity released on existing paths if such paths remain available. Any changes from the Marketer's previous election will be effective November 1<sup>st</sup> in conjunction with the updating of customer capacity quantities described above. Subject to availability, Marketers may change path preferences for assignment of pipeline capacity during the year for any new customers added to their Aggregation Pool by filing with the Company a new Capacity Assignment Agreement with at least 30 days advance notice.

The capacity released to a Marketer stays with the customer account on which it is based and as such, will be reassigned at such time that a Customer terminates their contract with a Marketer or reverts back to the Company as of the date of the customer's service termination.

Each Marketer's capacity assignment associated with Customers in an aggregation pool shall be reviewed on a monthly basis prior to the tenth (10<sup>th</sup>) calendar day of the month, and adjusted to reflect any net changes resulting from the addition and deletion of customers to the pool.

**1.07.1 New Loads:** 

New Customers classified as Large or Extra-Large electing FT-1 transportation service will not be required to take assignment of the Company's capacity resources as described in 1.07.0 above. The consumption of such Customers may be subject to annual review and confirmation by the Company. Customers who fail to meet the minimum requirement for the Large classification shall be required to take assignment of the Company's capacity resources after no less than 60 days notice. Marketers for such customers may be responsible for obtaining citygate capacity at a specific citygate on the Company's system as determined by the Company. Such determination will be

Page 85

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 14
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

# TRANSPORTATION TERMS AND CONDITIONS

based on the customer's location, load characteristics and distribution system requirements.

In the event that a marketer stops delivering gas on behalf of a customer without Company assigned pipeline capacity, the customer will be prohibited from taking firm Company sales service. Such customers may select default transportation service as described in Item 2.04.0 below.

1.08.0 Facilities:

Company shall own, operate and maintain, at its expense, its gas distribution facilities to the Point of Delivery. Customer shall furnish, maintain and operate the facilities required between Company's Point of Delivery and Customer's equipment.

**1.9.0 Quality:** 

Marketer is responsible for insuring that all gas received, transported and delivered hereunder to the Point of Receipt meets the quality specifications and standards outlined in the General Terms and Conditions of the Transporting Pipeline's FERC Gas Tariff.

1.10.0 Possession of Gas:

Company shall be deemed to be in control and possession of transportation gas to be delivered in accordance with this service from receipt at the Point(s) of Receipt until it shall have been delivered to Customer at the Point of Delivery. Marketer shall be deemed to be in possession and control of the gas prior to such receipt by the Company and Customer shall be deemed to be in control and possession of transportation gas after such delivery by the Company to the Point of Delivery. Company shall have no responsibility with respect to such gas before it passes the Point of Receipt or after it passes such Point of Delivery or on account of anything which may be done, happen or arise with respect to such gas after Point of Delivery.

1.11.0 Provision of Future Taxes, Surcharges Fees, Etc.:

In the event a tax of any kind is imposed or removed by any government authority upon the sale or transportation of gas or upon the gross revenues derived therefrom (exclusive, however, of taxes based on Company's net income), the rate for service to Customer and/or Marketer,

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 15
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 86

# TRANSPORTATION TERMS AND CONDITIONS

as the Company deems appropriate, shall be adjusted by an amount equal to or otherwise properly reflecting said tax. Similarly, the effective rate for service hereunder shall be adjusted to reflect any refund or imposition of any surcharges or penalties applicable to service hereunder which are imposed or authorized by any governmental authority.

# 1.12.0 Retention of Pipeline Fuel Adjustment:

The Company shall retain in kind, from the quantities of gas actually delivered to the Point(s) of Receipt for Marketers' accounts, the amount thereof equal to the applicable Company Fuel Allowance. Such Company Fuel Allowance shall be calculated by the Company based upon an average of the Company's most recent five (5) years experience, fuel loss and unaccounted for or similar quantity based adjustments.

# 1.13.0 Limitations of Liability:

The liability of the Company shall be limited in accordance with the provisions of the Company's General Terms and Conditions.

# 1.14.0 Force Majeure:

Neither Company nor Marketer shall be liable to the other or to Customer for delays or interruptions in performing their respective obligations hereunder arising from any acts, delays or failure to act on the part of, or compliance by Marketer or Company with any operating standard imposed by any governmental authority, or by reason of an act of God, accident or disruption, including without limit, strikes or equipment failures, or any other reason beyond Marketer's or Company's control, provided, however, in the event of an occurrence of one or more of the foregoing events, reasonable diligence shall be used to over come such event. The party claiming force majeure shall, on request, provide the other party with a detailed written explanation thereof, and of the remedy being undertaken.

# 2.0 FT-1 TRANSPORTATION SERVICE:

#### 2.01.0 Character of

Section 6 Transportation Terms and Conditions Schedule C, Sheet 16 Third Revision

Attachment GLB-7 Docket No. \_\_\_\_ September 1, 2009

Page 87

#### TRANSPORTATION TERMS AND CONDITIONS

**Service:** 

This service provides firm, 365 day transportation of Customer purchased gas supplies to customers electing to have Gas Usage recorded on a daily basis at the Point of Delivery. The Customer shall identify on the Transportation Service Application a Marketer that it has designated to perform initial and subsequent nominations, to receive scheduling and other notices from the Company, and to do balancing. Such Marketer shall assign Customer to an Aggregation Pool with other Customers electing FT-1 or NFT service or establish a one-customer Aggregation Pool and execute an appropriate Marketer Aggregation Pool Service Agreement. Specific Marketer requirements and obligations are described in Item 5.0 below.

2.02.0 <u>Telemetering:</u>

The Company will provide at the Customer's expense, at the Point of Delivery to the Customer, a device that the Company will attach to its metering equipment for the purpose of monitoring the Gas Usage. The Customer shall be responsible to supply a dedicated electrical supply and a telephone line at a location acceptable to Company and capable of transmitting information collected from the monitoring device to the Company's computer system. The Customer shall be responsible for the maintenance and service of the telephone line. Should a dedicated phone line be required, it is the responsibility of the Customer to schedule the installation, to notify Company when such installation has been completed, and the Customer is responsible for any associated charges. FT-1 and NFT transportation service shall not commence until the telemetering equipment is in place and operational.

2.03.0 Balancing:

FT-1 and NFT Service is subject to both Daily and Monthly balancing provisions. It will be the Marketer's responsibility to provide accurate and timely nominations of quantities proposed to be received and delivered by Company under this service and to maintain as nearly as possible, equality between the Gas Usage and the Actual Transportation Quantity. Marketer shall be solely responsible for securing faithful performance by Shipper and Transporting Pipeline, and the Company shall not be responsible as a result of any failure of Shipper or Transporting Pipeline to perform. Charges and Penalties

September 1, 2009
Page 88

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 17

Attachment GLB-7 Docket No. \_\_\_\_\_

Third Revision

#### TRANSPORTATION TERMS AND CONDITIONS

associated with FT-1 and NFT balancing are billed to the Marketer.

2.03.1 Daily Imbalances:

The Marketer must maintain a balance between daily receipts and daily usage within the following tolerances:

Off-Peak Season: The difference between the Marketer's

Aggregation Pool actual receipts and the aggregated gas usage of customers in the Aggregation Pool shall be within 15% of said receipts. The Marketer shall be charged a penalty of 0.1 times the Daily Index for all differences not within the

15% tolerance.

Peak Season: The difference between the Marketer's

Aggregation Pool actual receipts and the aggregated gas usage of customers in the Aggregation Pool shall be within 10% of said receipts. The Marketer shall be charged a penalty of 0.5 times the Daily Index for all differences not within the

10% tolerance.

Critical Day(s): The Company will determine if the

Critical Day will be aggravated by an underdelivery or an overdelivery, and so notify the Marketer when a Critical Day is declared pursuant to Item 1.05 above.

If the Marketer has an accumulated imbalance within a month, the Marketer may nominate to reconcile such imbalance, subject to the Company's approval, which approval shall not be unreasonably withheld.

**2.03.2** Monthly Imbalances:

For each Aggregation Pool, the Marketer must maintain total Actual Transportation Quantities within a reasonable tolerance of total monthly Gas Usage. Any differences between total Monthly Transportation Quantities for an Aggregation Pool and the aggregated Gas Usage of Customers in the Aggregation Pool, expressed as a

Page 89

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 18
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

percentage of total Monthly Transportation Quantities will be cashed out according to the following schedule:

Imbalance Tier	Overdeliveries	<u>Underdeliveries</u>
0% ≤ 5%	The average of the Daily Indices for the relevant Month.	The highest average of seven consecutive Daily Indices for the relevant Month.
> 5% \le 10%	0.85 times the above stated rate	1.15 times the above stated rate
> 10% ≤ 15%	0.60 times the above stated rate	1.4 times the above stated rate
> 15%	0.25 times the above stated rate.	1.75 times the above stated rate.

For purposes of determining the tier at which an imbalance will be cashed out, the price will apply only to volumes within a tier. For example, if there is a 7% Underdelivery on a Delivering Pipeline, volumes that make up the first 5% of the imbalance are priced at the highest average of the seven consecutive Daily Indices. Volumes making up the remaining 2% of the imbalance are priced at 1.15 times the average of the seven consecutive Daily Indices.

All cash-out charges or credits, as determined above, will be applied to the Marketer's monthly invoice for the Aggregation Pool.

Designated Marketers may arrange with another of Company's Marketers providing service to the same Point of Receipt to exchange, purchase or sell daily or monthly imbalance gas. The Company will notify each Marketer of its monthly imbalance following the close of the billing month in which the imbalance occurs. Marketers will have

Page 90

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 19
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

three business days following such notification to notify Company of any imbalance exchange or sale and to confirm such transaction.

#### 2.03.3 Pass-Through of Upstream Imbalance Charges:

In addition to other charges provided for in this Section, Marketer will be responsible for any imbalance charge or penalty imposed on Company by an upstream pipeline as a direct result of an imbalance, scheduling error, unauthorized overrun or other similar charges caused by Marketer. The Company shall assign imbalance penalties assessed to the Company by upstream pipelines to sales and transportation customers based on the extent that each group caused such penalties, as determined by the Company. The portion of any such penalty assigned to transportation service shall be further assigned to individual Marketers based on the extent to which each Marketer's Aggregation caused such penalties, as determined by the Company.

# 2.04.0 Default Transportation Service:

Default Transportation Service is available to any Commercial or Industrial customer account classified as Large or Extra Large that subscribes to FT-1 Transportation Service and that does not have pipeline capacity assignment from the Company. Customers electing this service must provide written notice to the Company via mail, FAX or E-mail that their marketer will no longer be delivering gas on their behalf and that they wish to avail themselves of the service. Such service will continue in effect until either service is established with a new marketer through the execution of a new Transportation Application per Item 1.03.1 above or service is terminated.

This service provides for a continuous supply of gas of not less than 1,000 Btu per cubic foot, and is provided on a best efforts basis with as little as 24 hours advance notice. Where notification is at least 24 hours in advance but less than three business days before the start of a calendar

Page 91

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 20
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

month, the service provided will be Short-Notice Default Transportation Service. Where notice is provided at least three business days prior to the start of a calendar month, the service provided will be Advance-Notice Default Transportation Service. Short-Notice Default Transportation Service will be switched to Advance-Notice Default Transportation Service at the start of a subsequent month once the service has been in effect for the three business day period before the start of such month.

Default Transportation Service is a temporary surrogate for provision of gas to a customer that would otherwise be provided by a marketer, hence it includes nominating and balancing. Customer must maintain an operational telemetering device as required in Item 2.02.0 above.

2.04.1 **Rates:** 

Pricing for Default Transportation Services shall be set forth in a Price Sheet filed with the Commission. The Company and Default Transportation Service supplier shall review the pricing of these services annually and file necessary revisions with the Commission concurrent with the Company's annual Gas Cost Recovery Filing.

#### 3.0 FT-2 TRANSPORTATION SERVICE:

3.01.0 Character of Service:

This service provides firm, 365 day transportation of Customer purchased gas supplies to customers without the requirement for recording daily Gas Usage at the Customer's Point of Delivery. Daily Nominations are calculated by the Company on the basis of a consumption algorithm, the marketer is obligated to deliver to the citygate such quantities, and any imbalances are netted against storage resources allocated to the Marketer on the Customer's behalf.

The Customer's designated Marketer, as identified on the Customer's Transportation Service Application, shall be allocated a quantity of Company contracted underground storage and peaking resources sufficient to meet the Customer's design winter supplemental supply requirements as determined by the Company. These

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 21
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 92

#### TRANSPORTATION TERMS AND CONDITIONS

resources are assigned to the Marketer pursuant to a written agreement with the Company, for the purpose of meeting the Company forecasted daily usage under the operational parameters described below. Additional Marketer requirements and obligations are described in Item 5.0 below.

#### 3.02.0 Storage And Peaking Resources:

Annually, the Company will calculate a Customer's total storage and peaking resource requirements under design winter conditions based on the Customer's most recent historical usage. The result of the calculations will establish the Maximum Storage Quantity-Underground (MSQ-U) and Peaking (MSQ-P) allocated for Marketer's use. The calculations will also establish a Maximum Daily Quantity-Underground (MDQ-U) and Peaking (MDQ-P) to set operational parameters for daily withdrawals and injections.

### 3.02.1 Maximum Storage Quantity (MSQ):

The MSQ for a Customer is the difference between their weather normalized total consumption under design winter conditions for the November through March period, minus the quantity of gas that could be delivered with their pipeline capacity assignment. The MSQ is allocated between underground storage (MSQ-U) and Peaking (MSQ-P) in the same percentage as is available on a Company-wide basis. These quantities represent the maximum storage and peaking inventories available to the Marketer for meeting the Customer's Gas Usage needs and are key components in the operational parameters regarding management of the resources.

#### 3.02.2 Maximum Daily Quantity -

**Storage (MDQ-S):** 

The Customer's MDQ-S is calculated by the Company as the difference between the Customer's peak day usage under design winter conditions and the Customer's pipeline capacity assignment. This MDQ-S requirement in MMBtu is then allocated between underground storage (MDQ-U) and Peaking (MDQ-P) in the same percentage as is available on a Company-wide basis. These quantities serve

Page 93

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 22
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

to define the maximum quantities that can be nominated for withdrawal by a Marketer and are a component of the operational parameters for the service.

### 3.02.3 Operational Parameters:

The storage resources inventory balance for the Underground Storage and Peaking accounts shall be tracked by the Company and made available to the Marketers via electronic means. These balances will be updated each Gas Day to reflect Marketer nominations for either injections or withdrawals. The balances will also be updated continuously to reflect imbalances identified at the time of the Customer's billing cycle which will be netted against the Underground Storage Account.

The Company will establish Maximum and Minimum inventory levels reflective of the Company's available resources. There will be separate inventory levels for both Underground Storage and Peaking Resources. Such levels will be as provided in the annual Gas Cost Recovery Filing.

In addition to operational parameters for overall inventory levels, there are both Daily and Monthly maximums established for the quantities which the Marketer can nominate for withdrawal or for injection. These factors vary by month and as the marketer's inventory level changes. Such factors will be as provided in conjunction with the annual Gas Cost Recovery Filing.

### 3.02.4 Inventory Purchases:

To meet the revised required minimum storage balance levels resulting from the addition of new customers to an Aggregation Pool, Marketer may trade or purchase storage supplies from another Marketer, make injections to underground storage or purchase inventory from the Company, subject to availability. The Company will update an FT-2 aggregation pool's MSQ assignments concurrent with the Customer's initiation of transportation service with the designated marketer.

At the time that a Customer migrates to FT-2 Transportation Service or switches Marketers, the new

September 1, 2009
Page 94

Section 6

Transportation Terms and Conditions

Attachment GLB-7 Docket No. \_\_\_\_\_

Schedule C, Sheet 23

Third Revision

### TRANSPORTATION TERMS AND CONDITIONS

designated Marketer will have a one-time opportunity to purchase an amount of inventory, from the Company, based on the MSQ requirement of Customers being added to the aggregation pool and the month when transportation service will commence. The Company will calculate the amount of storage inventory to be made available and provide such information to the Marketer upon receipt of a completed Transportation Service Application. The Marketer will have 5 business days to respond to the Company's offer. For Customers migrating during the April through October period, the maximum amount of storage inventory sold to a Marketer will be calculated as follows:

Inventory Sold = (x/7)\*Customer's MSQ

#### where:

Inventory Sold = the maximum amount of inventory the Company will sell to a Marketer

x = the number of off peak months since April 1st.

7 = the total number of off peak/storage injection months

Customer's MSQ = the Customer's total storage requirements under design winter conditions

Thus, for a Customer migrating to FT-2 service effective July 1, the Marketer would be able to purchase up to three-sevenths (3/7) of the Customer's MSQ from the Company to account for injections to storage during the months of April, May and June. The marketer would then be responsible for nominating sufficient injections during the July to October period to ensure that the inventory in storage for the FT-2 aggregation pool was at the minimum level identified in the Company's operational parameters

For Customers migrating during the peak period of November through March, the inventory sold will be based on the lesser of: (1) the added Customers' monthly minimum requirement outlined in the Company's operational parameters or (2) the incremental amount of inventory required to bring the Marketer's pool in compliance with the minimum requirement. For example,

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No.101

Section 6 Transportation Terms and Conditions Schedule C, Sheet 24 Third Revision

#### TRANSPORTATION TERMS AND CONDITIONS

if the customer were to start transporting in February, the Marketer would have the option to purchase storage inventory from the Company in the amount equal to the February minimum inventory level of the Customer's MSQ. Marketer may purchase such amount from the Company at a rate calculated as indicated below.

The Company shall develop a price for the inventory based on the published NYMEX price, and adjusted for transportation, storage and carrying charges.

The price per Dt at the Company's citygate shall be calculated using the following formula:

$$Dt = NY + BS + TR + ST + CC$$

where:

\$\footnote{\text{Dt}} = \text{cost per MMBtu charged to Marketers} \\
\text{for storage inventory at the Company's} \\
\text{citygate} \\
\text{NY} = \text{NYMEX Settlement Price} \\
\text{BS} = \text{Basis Differential for East Louisiana} \\
\text{TS} = \text{Transportation Cost} \\
\text{ST} = \text{Storage Cost} \\
\text{CC} = \text{Carrying Cost} \\
\end{array}

In the event that a Marketer fails to nominate or obtain sufficient storage inventory for its Customers such that the Aggregation Pool's inventory is below the operational parameter minimum, the Marketer will be unable to nominate storage or peaking quantities to satisfy the FDU.

For Customers commencing FT-2 transportation service during off-peak months (April - October), Marketer will receive an assignment of peaking inventory during the following October for a November 1<sup>st</sup> effective date. For Customers migrating to FT-2 during peak months (November - March), Marketer will receive an assignment of peaking inventory concurrent with the commencement of service. The amount of peaking inventory assigned shall be based on the lesser of: (1) the added Customers'

Page 96

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 25
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

monthly minimum requirement outlined in the Company's operational parameters or (2) the incremental amount required to bring the Marketer's pool in compliance with the minimum requirement. Marketers would be able to purchase peaking inventory from NG at the Company's weighted cost of LNG inventory. All transactions are subject to authorization by NG.

Marketers needing to sell underground storage inventory as a result of customers switching to other marketers would be able to sell the inventory to another marketer, subject to authorization by NG, nominate withdrawal of supplies, or sell the inventory in excess of the Maximum Storage Quantity to NG. Marketers with inventory levels in excess of the Maximum Storage Quantities may be required by the Company to nominate underground storage to satisfy their FDU. If the Marketer has excess peaking resources, they could nominate those inventories to the extent allowed under the operational parameters or would be required to sell such excess peaking resources to NG at the price the inventory was originally purchased from NG.

3.02.5 Rates:

The Marketer is responsible for procuring and maintaining inventory levels associated with the underground storage and peaking resources allocated by the Company as part of FT-2 Service. The following charges are for the recovery of the fixed costs and other miscellaneous costs associated with the provision of the underground storage and peaking resources and are billed to the Marketer:

FT-2 Throughput: \$ per Therm Gas Usage . The rate is as calculated in the Company's most recent Gas Cost Recovery Filing.

3.03.0 Nominations:

The Company shall calculate the Forecasted Daily Usage (FDU) of the aggregation pool using a Consumption Algorithm for each of the customers in the aggregation pool. The Company shall have sole responsibility for such Consumption Algorithm and by selecting FT-2 service, Marketer agrees to abide by the results of such algorithm. The algorithm is:

Page 97

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 26

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Third Revision

#### TRANSPORTATION TERMS AND CONDITIONS

FDU = Base Load + (HU factor \* FDD)

where:

FDU = an individual customer account's forecasted daily usage for the next gas day
Base Load = average daily consumption for the most recent July and August billing cycles
HU Factor = most recent billing cycle consumption, minus the base load, divided by the heating degree days for the billing cycle
FDD = forecasted heating degree days for the gas day

FDU will be adjusted for any Company fuel allowance.

starting at 10:00 AM the next day

The Company will provide to the Marketer no later than 9:30 AM each day using an electronic posting or via facsimile the FDU for the next gas day which would start at 10:00 AM the next day. If the Company is unable to provide to the Marketer the FDU using an electronic posting or via facsimile before 9:30 AM, the default FDU will be the prior day's FDU. The Marketer shall be obligated to nominate any combination of pipeline, underground storage or peaking equal to the FDU for the next gas day. Such nomination is to be posted on the Company's Electronic Bulletin Board no later than 1:00 PM before the start of the next gas day. The Company shall not accept or confirm any nominations that are greater than the FDU of the aggregation pool and any nominations for storage and peaking resources must be in accordance with the applicable operational parameters. Quantities nominated for injection into storage are over and above quantities to meet the FDU. Any nominations to inject supplies into storage or nominate supplies from storage must be separately identified and made to the Company's citygate. If storage inventory is below the minimums established above, Marketer will not be able to nominate storage or peaking quantities to satisfy the FDU nomination requirement.

3.03.1 Critical Days:

To satisfy the FDU nomination requirement on Critical Days, the Marketer is required to fully utilize upstream

Page 98

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 27

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Third Revision

#### TRANSPORTATION TERMS AND CONDITIONS

capacity that it received from Company through Capacity Release so as to help avoid restricting the Company's ability to provide efficient and reliable firm transportation and sales service. Notice of Critical Days will be posted on the EBB no later than concurrent with the posting of the FDU nomination requirement.

3.03.2 <u>Under-deliveries</u>:

Any under-deliveries of the aggregation pool's gas requirements, up to the FDU, will be treated as Unauthorized Use and subject to penalty charges as provided in Item 1.06.0 above.

3.04.0 Balancing:

Imbalances between customer Gas Usage and the Forecasted Daily Usage (FDU) will be netted out against the underground storage inventory at the time of a customer's billing cycle. Quantities used in excess of FDU will be subtracted from the underground storage inventory level. If Gas Usage is less than FDU, the difference will be treated as an injection to underground storage and added to the inventory level. All quantities will be adjusted for Company Fuel Allowance.

#### 4.0 NFT SERVICE:

4.01.0 Character Of Service:

This service provides interruptible transportation of Customer purchased gas supplies to customers with telemetering equipment and that are eligible to be classified under Section 6, Schedule A of the Company's Tariff. The Customer shall identify on the Transportation Service Application a Marketer that it has designated to perform initial and subsequent nominations, to receive scheduling and other notices from the Company, and to do balancing. Such Marketer may assign Customer to an Aggregation Pool with other Customers electing NFT or FT-1 transportation service or establish a one-customer Aggregation Pool. Specific Marketer requirements and obligations are described in Item 5.0 below.

**4.02.0** Nominations:

The nomination requirements in Item 1.04.0 above apply to the provision of NFT Service.

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 28
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 99

#### TRANSPORTATION TERMS AND CONDITIONS

4.03.0 Imbalances:

The Daily and Monthly Imbalance provisions in Items 2.03 above apply equally here.

4.04.0 Curtailments:

Customer will curtail or discontinue service when, in the sole opinion of the Company, such curtailment or interruption is necessary in order for it to continue to supply the gas requirements of its firm customers at such time. The Company will attempt to give the customer and customer's marketer three (3) working days' notice of such curtailment, except in emergency situations, when at least one hour's notice shall be given.

For any period that a customer fails to curtail the use of gas as requested by the Company, the charge for gas consumption will be equal to the non-firm transportation service customer charge plus Gas Usage at a penalty of 5 times the Daily Index. Such use of gas under these circumstances shall be considered an "unauthorized use" of gas purchased from the Company, and billed to the customer's account.

In the event where the Company, in its sole discretion, grants the customer an exemption from the curtailment, the use of gas under these circumstances shall be referred to as an "authorized use of gas." Authorized use of gas during a curtailment will be for a limited time period and will be purchased from the Company. The charge for gas consumed under these conditions will be billed to the customer and based on the non-firm transportation service customer charge plus the Company's highest cost gas required to meet demand during the applicable curtailment period, plus the current firm sales service rate excluding the firm customer charges. Payments for this use, whether authorized or unauthorized, shall not preclude the Company from turning off the customer's supply of gas in the event of the failure to interrupt, or curtail, the use thereof when requested to do so.

#### 5.00 MARKETER AGGREGATION SERVICE:

5.01.0 Character of

Page 100

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 29
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

#### Service:

This service allows Marketers to aggregate customer accounts and form Aggregation Pools for the purpose of making initial and subsequent nominations, making delivery to a designated Point of Receipt, and for balancing of Actual Transportation Quantity with Gas Usage on Customer's behalf. The Company will transport gas, owned by the Customers of the Aggregation Pool, to the Point(s) of Delivery for each Customer included in such pool. A Marketer shall be designated by each Customer on the Transportation Service Application, and each such customer must be assigned by the Marketer to an Aggregation Pool of one or more customers. Changing the designated Marketer is allowed under the conditions in Item 1.02 above and is accomplished through the execution of a new Transportation Service Application. Once so designated, the Company will rely on information provided by the Customer's Marketer for nomination, balancing and scheduling purposes and all notices provided by the Company to Customer's Marketer shall be deemed to have been provided to the Customer.

### 5.02.0 Aggregation Pools:

The aggregation of Customer accounts into an aggregation pool is limited by the transportation service of the respective Customers.

The Customer's transportation service restriction requires that Customers subscribing to non-daily metered FT-2 Service must be aggregated in a separate pool from Customers subscribing to daily metered FT-1 or NFT Service. Customers subscribing to FT-1 or NFT can be combined in a single Aggregation Pool. A separate Marketer Account will be established for each Marketer Aggregation Pool.

A further restriction on daily metered Aggregation Pools is that the election of a supplemental service such as Pool Balancing Service, shall apply to the entire Aggregation Pool and not just an individual customer in the Aggregation Pool. Separate Aggregation Pools are required for FT-1 or NFT Service with Pool Balancing Service versus FT-1 or NFT Service without the supplemental service.

Page 101

Section 6

Transportation Terms and Conditions
Schedule C, Sheet 30
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

#### TRANSPORTATION TERMS AND CONDITIONS

The Marketer Aggregation Pool Service Agreement and Pool Balancing Service Agreement shall have an initial term through the following November 1<sup>st</sup>. Thereafter, the Marketer Aggregation Pool Service Agreement and Pool Balancing Service Agreement shall be automatically renewed for successive one year terms, unless notice of termination is provided by the Marketer on or before October 1<sup>st</sup> or if the Company has terminated the agreement under its collection procedures. Marketers may assign their Aggregation Pool Service Agreements to another certified Marketer with the Company's consent.

5.02.1 Rates:

The monthly aggregation pool charge is applicable only during months when Customers assigned to the pool are transporting.

Monthly Charge:

Daily Metered Pool \$ 150.00 per Non-Daily Metered Pool \$ 450.00 per

### **5.03.0 Marketer Oualifications:**

In order to be designated hereunder as a Marketer, the Marketer must meet the following qualifications:

- (1) The Marketer must be authorized by the Rhode Island Public Utilities Commission in accordance with Commission Regulations for Utility Interaction with Gas Marketers;
- (2) The Marketer must demonstrate to the Company that it meets the following creditworthiness standards:
- A. The Marketer, or a guarantor, maintains a minimum rating from one of the rating agencies and no rating below the minimum from one of the other two rating agencies. For the purposes of this Section, minimum rating shall mean "BBB" from Standard & Poor's, "Baa2" from Moody's Investor Service, or "BBB" from Fitch Ratings (minimum rating)

The Narragansett Electric Company d/b/a National Grid

RIPUC NG-GAS No.101

Section 6 Transportation Terms and Conditions Schedule C, Sheet 31 Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009 Page 102

#### TRANSPORTATION TERMS AND CONDITIONS

- B. If a Marketer or a guarantor, is not rated by Standard & Poor's, Moody's Investor Service or Fitch Ratings, it shall satisfy the Company's creditworthiness requirements if the Marketer, or a guarantor maintains a minimum "1A2" rating from Dun & Bradstreet (Dun and Bradstreet minimum rating) and the Marketer maintains 24 months good payment history with the Company
- C. In the event that the Marketer has not met the credit standards above, then the Marketer must so notify the Company and the Marketer will be required to use one of the financial vehicles specified in 5.03.2 to satisfy the Company's credit standards.
- (3) Marketers must have an executed Marketer Aggregation Pool Service Agreement with the Company and accepted its designation as the marketer for each customer by countersigning the applicable Transportation Service Application.
- (4) Marketers must provide the Company with a copy of their GET exemption certificate, state sales tax exemption certificate or other appropriate exemption certificate(s) in order to be exempt from the applicable taxes.

#### 5.03.1 Calculation of Credit Risk

and Security for Natural Gas

**Imbalance Risk:** 

The Company may require a Marketer to provide security equal to three times the highest month's gas usage of the Marketer's Aggregation Pool at the firm sales rate applicable to the upcoming peak period. This amount may be updated at the Company's discretion

**5.03.2 Security Instruments:** 

The following financial arrangements are acceptable methods of providing security:

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 32
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009 Page 103

#### TRANSPORTATION TERMS AND CONDITIONS

- (1) Deposit or prepayment, which shall accumulate interest at the applicable rate per annum approved by the Rhode Island Public Utilities Commission;
- (2) Standby irrevocable letter of credit or surety bond issued by a bank, insurance company or other financial institution with at least an "A" bond rating;
- (3) Security interest in collateral; or,
- (4) Guarantee by another party or entity with a credit rating of at least "BBB" by S&P, "Baa2" by Moody's, or "BBB" by Fitch; or
- (5) Other means of providing or establishing adequate security.

The Company may refuse to accept any of these methods for just cause provided that its policy is applied in a nondiscriminatory manner to any Marketer. If the credit rating of a bank, insurance company, or other financial institution that issues a letter of credit or surety bond to a Marketer falls below an "A" rating, the Company shall allow a minimum of five business days for a Marketer to obtain a substitute letter of credit or surety bond from an "A" rated bank, insurance company, or other financial institution.

The Marketer agrees that the Company has the right to access and apply the deposit, letter of credit or other financial vehicle to any payment obligations, not in dispute, which are deemed by the Company to be late. The Company may review and determine the status of a Marketer's creditworthiness at its sole discretion. If Marketer is unable to maintain the Company's credit approval or otherwise ceases to meet the Marketer Qualifications, the Company may terminate the Marketer Aggregation Pool Agreement as of the first day of the month following written notice to Marketer.

5.04 Pool Balancing

#### TRANSPORTATION TERMS AND CONDITIONS

#### **Service:**

RIPUC NG-GAS No.101

Service is available for daily metered Marketer Aggregation Pools concurrent with the term of the Aggregation Pool.

The intent of this service is to accommodate minor, unintentional imbalances between an Aggregation Pool's Customer's daily usage at the Point(s) of Delivery and Actual Transportation Quantities delivered to the Company's distribution system at the Point of Receipt. Marketer must notify the Company by October 1<sup>st</sup> to elect Pool Balancing Service commencing November 1<sup>st</sup> or at least thirty (30) days prior to establishment of an Aggregation Pool.

Under the Pool Balancing Service, the Company agrees to provide a daily balancing service for imbalances up to a Marketer designated Maximum Daily Balancing Entitlement. Such entitlement is expressed as a percentage of the Aggregation Pool's Gas Usage and includes the 10% tolerance described in Item 2.03.1 above. Daily imbalances greater than the Marketer designated Maximum Daily Balancing Entitlement will remain subject to the balancing provisions outline in the Company's Terms and Conditions of Transportation Service.

The Company reserves the right to limit service offered under this schedule, subject to availability, in the Company's sole discretion, of adequate gas transmission, gas supply and/or gas storage capability or force majeure, or as otherwise provided in the Company's Terms and Conditions.

#### **5.04.1 Pool Balancing Rate:**

Variable Charge: \$ per Therm Gas Usage per percent

elected (Maximum Daily Balancing Entitlement % net of 10% standard

tolerance)

Where: - The rate is as calculated in the Company's annual Gas Cost Recovery Filing.

- Gas Usage is total of all Aggregation Pool Customers.
- Maximum Daily Balancing Entitlement % is specified in Marketer Aggregation Pool

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 34
Third Revision

Attachment GLB-7 Docket No. \_\_\_\_\_ September 1, 2009

Page 105

#### TRANSPORTATION TERMS AND CONDITIONS

Agreement and includes the 10% standard tolerance.

**5.05 Billing:** 

Billing for monthly customer charges and transportation charges for quantities actually delivered shall be based on the readings at each individual meter for the Customer and billed on a billing cycle basis to the Customer. The Customers and Marketers shall be liable for all rates, charges and surcharges allowed for in the Company's Rate Schedules related to transportation services provided to each customer individually.

Calculation of charges applicable to the Aggregation Pool will be based on aggregated Gas Usage, MDQ's, etc. of all Customers in the Aggregation Pool. Billing for charges applicable to an Aggregation Pool, e.g., imbalance charges, credits or penalties, and FT-2 Throughput charges shall be billed to the Marketer on a calendar month basis.

All bills rendered to the Marketer are due within 10 days from the date of the invoice. A late payment charge, in accordance with regulations of the Rhode Island Public Utilities Commission and the Rhode Island Division of Public Utilities and Carriers, shall accrue after 10 days.

**6.0 SERVICE AGREEMENTS:** (See Attached Sheets)

Attachment GLB-7

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No.101

Issued: September 1, 2009

Section 6 Transportation Terms and Conditions Schedule C, Sheet 36 Third Revision

Effective: November 1, 2009

### THE NARRAGANSETT ELECTRIC COMPANY MARKETER AGGREGATION POOL SERVICE AGREEMENT

This Agreement ("Agreement") is entered into this day of, 200, by and between The Narragansett Electric Company, d/b/a National Grid, a subsidiary of National Grid USA with a principal place of business in the State of Rhode Island at 280 Melrose Street, Providence, Rhode Island (herein called "NG" or the "Company") and (herein called "Marketer.")
WITNESSETH THAT:
WHEREAS, the Company's tariff, RIPUC NG-GAS No. 101, Section 6, Schedule C, provides for and establishes terms and conditions for a Marketer Aggregation Pool; and
WHEREAS; Marketer desires to establish an Aggregation Pool and desires Company to provide pool aggregation services pursuant to such Schedule C and to transport quantities of gas delivered by Marketer for use at the locations of customers belonging to the Aggregation Pool (hereafter called "Points of Delivery"); and
WHEREAS: Company, is willing to provide such service to Marketer.
NOW, THEREFORE, Company and Marketer agree that Company, subject to the Company's General Terms and Conditions, Transportation Terms and Conditions, limitations and provisions hereof, commencing
<ul> <li>1.0 AGGREGATION POOL:</li> <li>1.1 Marketer is establishing a single Aggregation Pool as indicated by an X:</li> <li>Daily Metered</li> <li>Non-daily Metered</li> </ul>
1.2 Marketer hereby subscribes to Company's Marketer Aggregation Service pursuant to Item 5.00 of the Company's Transportation Terms and Conditions, Section 6, Schedule C.
1.3 Marketer elects to subscribe to Company's Aggregation Pool Balancing Service pursuant to Item 5.04 of Company's Transportation Terms and Conditions, Section 6, Schedule C, NO YES with a Maximum Daily Balancing Entitlement of % (which % includes the standard 10% tolerance).
1.4 Marketer represents and warrants that Marketer has met and will continue to meet the Marketer qualifications in Item 5.03 of Company's Transportation Terms and Conditions, Section 6, Schedule C.

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No.101

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 37
Third Revision

- 1.5 Marketer agrees to provide to Company no later than 30 days before the above identified commencement date Transportation Service Applications for all end user customers in Marketer's Aggregation Pool identified in 1.1 above. Such list is to include: Customer Name; Billing Address; NG account #; and, name and telephone number of customer contact person.
- 1.6 Marketer agrees to notify Company in writing of any changes in the makeup of an Aggregation Pool as provided in the Company's Transportation Terms and Conditions.
- 1.7 Marketer represents and warrants that it has accepted the designation as the Marketer of each customer of the Aggregation Pool and agrees in each case to be bound by, perform, and pay all charges applicable to transportation service to the Customer's account in accordance with the provisions of the Company's tariff.

#### 2.0 PIPELINE CAPACITY RELEASE:

- 2.1 Company agrees to provide to Marketer no later than 15 days before the above identified commencement date, the quantity of interstate pipeline capacity allocated for Marketer's FT-1 and FT-2 Aggregation Pool(s) broken down by individual customer.
- 2.2 Marketer agrees to accept assignment of such firm interstate pipeline capacity in accordance with the Company's Transportation Terms and Conditions, Schedule C, Item 1.07.
- 2.3 Company agrees to update the calculation of the quantity of interstate pipeline capacity annually based on customers' most recent historical usage in accordance with the Company's Transportation Terms and Conditions, Schedule C, Item 1.07.

#### 3.0 PUBLIC REGULATION:

- 3.1 Company is a public utility subject to regulation by Rhode Island Public Utilities Commission ("Commission"). This Agreement is subject to any limitations, modifications or amendments ordered by the Commission, regardless of whether said order resulted from a petition, request or other solicitation directed to the Commission by a party to the Agreement. Compliance by Company with any order, rule, regulation or policy statement of the Commission, or of any other federal, state or local governmental authority, whether issued before or after the effective date of this Agreement, shall relieve Company of any liability for its failure to perform any of its obligations hereunder as a result of such compliance. In the event of the issuance of any order of the Commission which materially modifies the provisions of this Agreement, either Company or Marketer shall have the option to terminate this Agreement by giving written notice of termination to the other party at any time within thirty (30) days after the issuance of said order.
- 3.2 This Agreement shall be subject to Company's General Terms and Conditions and Transportation Terms and Conditions on file with the Commission to the extent those Terms and Conditions are not inconsistent with the provisions of this Agreement.

This Agreement is entered into and shall be construed in accordance with the laws of the State of Rhode Island and any actions hereunder shall be brought in the appropriate forum within the State of Rhode Island.

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No.101

Issued: September 1, 2009

Section 6 Transportation Terms and Conditions Schedule C, Sheet 39 Third Revision

Effective: November 1, 2009

### THE NARRAGANSETT ELECTRIC COMPANY STORAGE AND PEAKING RESOURCE AGREEMENT

Th	nis Agreement ("Agreement") is entered into this day of, 200,
by and	between the Narragansett Electric Company, d/b/a National Grid, a subsidiary of
	al Grid USA with a principal place of business in the State of Rhode Island at 280 se Street, Providence, Rhode Island (herein called "NG" or the "Company") and (herein called "Marketer.")
	WITNESSETH THAT:
FT-2 T	WHEREAS, Marketer seeks to obtain service respecting a quantity of the Company's cted underground storage and peaking resources pursuant to the terms and conditions for Transportation Service in the Company's tariff, RIPUC NG-GAS No. 101, Section 6, alle C; and
	WHEREAS; Marketer desires that the Company transport quantities of gas delivered by ter for use at the locations of customers belonging to an FT-2 Aggregation Pool (hereafter "Points of Delivery"); and
Marke	WHEREAS: Company, is willing to provide such storage and transportation service to ter.
and pro	NOW, THEREFORE, Company and Marketer agree that Company, subject to the any's General Terms and Conditions, Transportation Terms and Conditions, limitations ovisions hereof, commencing
Maxim "MDQ tariff.	SCOPE OF AGREEMENT:  The Company will calculate the Maximum Storage Quantities for both Underground e and for Peaking services ("MSQ-U" and "MSQ-P" respectively) as well as the num Daily Quantities for both Underground Storage and Peaking services ("MDQ-U" and Per" respectively) in accordance with Item 3.02 in Section 6, Schedule C of the Company's Such calculated quantities can change during the term of the agreement to the extent that keup of the Marketer's FT-2 Aggregation Pool changes.
Compa	Marketer hereby agrees to utilize and manage such services and inventories attributed to ount in accordance with the Operational Parameters described in Item 3.02.3 of the any's Transportation Terms and Conditions, Section 6, Schedule C and as on file with the Utilities Commission as part of the Company's annual Gas Cost Recovery filing.
2.0	INVENTORY SERVICES:

The Narragansett Electric Company d/b/a National Grid RIPUC NG-GAS No.101

Section 6
Transportation Terms and Conditions
Schedule C, Sheet 40
Third Revision

- 2.1 All nominations for either withdrawals from or injections to storage will take place at the Company's citygate.
- 2.2 Purchases of inventory service from the Company will be at the Company's weighted average storage commodity cost of gas at the time of purchase or as otherwise stated in the Company's currently effective tariff.
- 2.3 Purchase of any storage inventory service from the Company will require payment via electronic transfer of funds within ten days of invoice unless the Marketer and Company mutually agree to payment over a 3 month period, which would include a monthly finance charge based on a monthly rate using the latest published Fleet Prime less 200 basis points (2%).
- 2.4 Notwithstanding any provisions to the contrary, Marketer acknowledges and warrants that sale and marketable title to any storage gas injected into the Company's system shall thereupon transfer to the Company, and that Marketer's interests shall thereafter be limited to the contractual rights to service as provided by this Agreement. Marketer further acknowledges that it shall bear no ownership interest in any other storage or peaking assets or inventory of the Company.
- 2.5 If Marketer needs to sell or assign its service rights representing underground storage inventory attributed to its account as a result of customers switching to other marketers, it may, subject to authorization by NG, sell the inventory rights to another marketer, nominate withdrawal of supplies, or sell the inventory to NG. Marketers with inventory levels in excess of the Maximum Storage Quantities may be required by the Company to nominate underground storage to satisfy their FDU. If the Marketer has excess peaking resources, it could nominate those inventories to the extent allowed under the operational parameters or would be required to sell such excess peaking resource rights to NG at the price the inventory was originally purchased from NG.

#### 3.0 SUCCESSORS AND ASSIGNS:

3.1 This Agreement shall be binding on the parties hereto and their respective successors and assigns. This Agreement may not be assigned by Marketer without the prior written consent of the Company.

#### **4.0 PUBLIC REGULATION:**

4.1 Company is a public utility subject to regulation by Rhode Island Public Utilities Commission ("Commission"). This Agreement is subject to any limitations, modifications or amendments ordered by the Commission, regardless of whether said order resulted from a petition, request or other solicitation directed to the Commission by a party to the Agreement. Compliance by Company with any order, rule, regulation or policy statement of the Commission, or of any other federal, state or local governmental authority, whether issued before or after the effective date of this Agreement, shall relieve Company of any liability for its failure to perform any of its obligations hereunder as a result of such compliance. In the event of the issuance of

#### **Gas Procurement Incentive Plan for National Grid**

Revised Effective December 1, 2008

#### I. Objective

To encourage National Grid (or "Company") to achieve lower overall gas commodity costs for its customers.

#### II. Structure of the Gas Procurement Incentive Plan

- A. This Plan became effective June 1, 2003. It will be reviewed with each gas cost recovery ("GCR") filing. The Company will file Plan results semi-annually at the end of January and July. These reports shall include reporting all Plan activity and results through the end of the month prior to the filing.
  - 1. Gas Procurement Incentives apply only to discretionary purchases and/or hedges made on or after June 1, 2003. The first month for which the incentive will be calculated under the Plan will be November 2003.
- B. The GPIP will be subject to limits on the magnitude of incentives applicable to the Company in each fiscal year.
  - 1. For the Gas Procurement Incentive Program limitations are placed on the maximum amount of incentives that can be earned or penalties paid by National Grid for each fiscal year. For at least the first two years of the program (i.e., through June 30, 2005):
    - a. National Grid may not earn more than \$1,000,000 in Gas Procurement Incentives in any fiscal year; and
    - b. National Grid may not be exposed to penalties of more than \$500,000 in any fiscal year.
- C. The Company will file its forecasted normal weather natural gas purchase requirements with its annual GCR filing. In addition, whenever the Company updates its annual forecast of projected purchases at the time of the annual update or in the event that an adjustment based on migration is

**Deleted:** t\\business shares\\rig\finance\\pricshar\\dkt 3982 - gcr 2008-09\\compliance\\attachment glb-8 doc

warranted, it will file support for the revised purchase forecast with the Commission and Division.

#### III The Gas Procurement Incentive Program

- D. The Company will make purchases of natural gas or natural gas futures which lock or hedge the NYMEX Henry Hub portion of the variable cost. For any future gas supply month the Company will make three types of gas purchases:
  - 1. Mandatory Purchases and/or Hedges
    - a. Are defined as mandatory monthly purchases of gas volumes or hedges made in approximately uniform monthly increments. (Mandatory purchases and/or hedges will vary as the forecast of purchases is updated periodically and in order to adjust for the rounding of the 10,000 Dth futures contract.)
    - b. Will equal 60% of forecasted normal weather gas purchase requirements for the April and October gas supply months and 70% of forecasted normal weather gas purchase requirements for the remaining ten months. Purchases and/or hedges will be based on the forecast of requirements in place when the purchases and/or hedges are made.
    - c. Will be purchased in approximately uniform monthly increments on a mandatory basis starting 24 months prior to the month of delivery and ending 4 months prior to the start of deliveries.
    - d. The first purchases and/or hedges made each month will be deemed the Company's mandatory hedge up to the amount of the Company's scheduled mandatory requirement for the month.
    - e. The Company will make the financial hedges in increments of one contract, 10,000 Dth. The Company will adjust the schedule of hedging to achieve the required mandatory level. Within the constraints of 10,000 Dth contract increments, the Company will seek to maximize the

uniformity of monthly mandatory purchase/hedge volumes over the 20 month period specified in paragraph III.A.1.c.

f. The Company and the Division may agree to accelerate a portion of the mandatory hedges. They will notify the Commission of any such plan and provide 3 business days for the Commission to object. Accelerated hedges will neither earn an incentive nor be used in the calculation of mandatory benchmark.

Formatted: Bullets and Numbering

#### 2. Discretionary Purchases and/or Hedges

- a. Are defined as the purchases and/or hedges established at least 6 business days prior to the start of the delivery month for delivery to the system or storage in excess of the mandatory hedging requirements in a month.
- b. The cost and benefit of any financial purchases and/or hedges will be included in the calculation of the average unit price.
- c. May not cause the total (mandatory plus discretionary), fixed price purchases and financial purchases and/or hedges to exceed 95% of the forecasted normal weather requirements for a given supply month.
- Other Discretionary Purchases and/or Hedges Not Subject To Incentives
  - a. LNG
  - b. Supplies that lock in price but are not part of the program.
  - Hedges specifically put in place as part of the Natural Gas
     Procurement Management Program to lock in optimization savings for customers.

Formatted: Bullets and Numbering

d. Purchases and/or hedges made less than 6 business days prior to the beginning of the month, during the month or under a contract which does not allow for the locking of the price.

e. Purchases and/or hedges made due to updated levels of forecasted migration of throughput volumes from transportation service to sales service.

Formatted: Bullets and Numbering

#### E. Computation of Gas Procurement Incentives

Gas Procurement Incentives will be determined on the basis of comparisons of the volume-weighted average cost per dekatherm of discretionary purchases and/or hedges made after June 1, 2003, and the volume weighted average cost per dekatherm of mandatory gas purchases, excluding any accelerated hedges, and/or hedges made after June 1, 2003 for the same gas supply month. All comparisons will be based on the NYMEX portion of the variable cost per dekatherm of the purchased gas supply or the price of the NYMEX futures contract.

Deleted:

Deleted: , including fees,

- F. Any purchases and/or hedges made for a future gas supply month, excluding other discretionary purchases and/or hedges not subject to incentives as shown in III.A.3, that are in excess of the mandatory purchases and/or hedges requirement for the month, will be deemed discretionary purchases and/or hedges.
- G. The timing of discretionary purchases and/or hedges is left solely to the discretion of the Company. However, beginning in November 2005 the Company will make sufficient discretionary purchases and/or hedges by November 1st of each year, such that a minimum of 80% of supply needed for December, January and February and 75% of supply needed for a normal November and March will be at a fixed or capped price. The fixed and capped supplies will include all forward purchases, financially based purchases and/or hedges, DOMAC FCS contract purchases fixed in price, LNG supplies and storage supplies.
- E. After all purchases and/or hedges for forecasted gas requirements for a given gas supply month are completed, the volume-weighted average cost of mandatory purchases and/or hedges will be computed. That volume weighted average cost for mandatory purchases and/or hedges will then be compared against the actual cost of each discretionary purchase and/or hedge made for the same gas supply month.
  - 1. For all discretionary purchases and/or hedges executed more than eight months prior to the start of the gas supply month, the

Company will be provided a positive incentive equal to 10% of the difference between the cost of each discretionary purchase and the volume-weighted average cost for mandatory purchases and/or hedges for the same gas supply month if the cost of the discretionary purchase and/or hedge is less than the volume weighted average of mandatory purchases and/or hedges for the same gas supply month. In the event that the cost of the discretionary purchases/hedges is at least 50 cents less than the cost of the mandatory purchases/hedges, the incentive will be 20%.

- 2. For all discretionary purchases and/or hedges executed within the last eight months prior to the start of the gas supply month, the Company will be provided as positive incentive equal to 10% of the difference between the cost of each discretionary purchase and the volume-weighted average cost for mandatory purchases and/or hedges for the same gas supply month if the cost of the discretionary purchase and/or hedge is less than the volume weighted average of mandatory purchases for the same gas supply month.
- 3. For any and all discretionary purchases and/or hedges that are made at a cost which is greater than the volume-weighted average cost for mandatory purchases and/or hedges, made for the same gas supply month, regardless of when they occur prior to the start of the gas supply month, the Company will be assess a penalty equal to 10% of the difference between the volume-weighted average cost for mandatory purchases and/or hedges and the cost of the each such discretionary purchase,
- 4. The net incentive/penalty for the Company for each gas supply month shall equal the sum of the incentives/penalties calculated for all individual discretionary purchases and/or hedges executed for the subject gas supply month.

#### **Gas Procurement Incentive Plan for National Grid**

Revised Effective December 1, 2008

#### I. Objective

To encourage National Grid (or "Company") to achieve lower overall gas commodity costs for its customers.

#### II. Structure of the Gas Procurement Incentive Plan

- A. This Plan became effective June 1, 2003. It will be reviewed with each gas cost recovery ("GCR") filing. The Company will file Plan results semi-annually at the end of January and July. These reports shall include reporting all Plan activity and results through the end of the month prior to the filing.
  - 1. Gas Procurement Incentives apply only to discretionary purchases and/or hedges made on or after June 1, 2003. The first month for which the incentive will be calculated under the Plan will be November 2003.
- B. The GPIP will be subject to limits on the magnitude of incentives applicable to the Company in each fiscal year.
  - 1. For the Gas Procurement Incentive Program limitations are placed on the maximum amount of incentives that can be earned or penalties paid by National Grid for each fiscal year. For at least the first two years of the program (i.e., through June 30, 2005):
    - a. National Grid may not earn more than \$1,000,000 in Gas Procurement Incentives in any fiscal year; and
    - b. National Grid may not be exposed to penalties of more than \$500,000 in any fiscal year.
- C. The Company will file its forecasted normal weather natural gas purchase requirements with its annual GCR filing. In addition, whenever the Company updates its annual forecast of projected purchases at the time of the annual update or in the event that an adjustment based on migration is

warranted, it will file support for the revised purchase forecast with the Commission and Division.

#### III The Gas Procurement Incentive Program

- D. The Company will make purchases of natural gas or natural gas futures which lock or hedge the NYMEX Henry Hub portion of the variable cost. For any future gas supply month the Company will make three types of gas purchases:
  - 1. Mandatory Purchases and/or Hedges
    - a. Are defined as mandatory monthly purchases of gas volumes or hedges made in approximately uniform monthly increments. (Mandatory purchases and/or hedges will vary as the forecast of purchases is updated periodically and in order to adjust for the rounding of the 10,000 Dth futures contract.)
    - b. Will equal 60% of forecasted normal weather gas purchase requirements for the April and October gas supply months and 70% of forecasted normal weather gas purchase requirements for the remaining ten months. Purchases and/or hedges will be based on the forecast of requirements in place when the purchases and/or hedges are made.
    - c. Will be purchased in approximately uniform monthly increments on a mandatory basis starting 24 months prior to the month of delivery and ending 4 months prior to the start of deliveries.
    - d. The first purchases and/or hedges made each month will be deemed the Company's mandatory hedge up to the amount of the Company's scheduled mandatory requirement for the month.
    - e. The Company will make the financial hedges in increments of one contract, 10,000 Dth. The Company will adjust the schedule of hedging to achieve the required mandatory level. Within the constraints of 10,000 Dth contract increments, the Company will seek to maximize the

- uniformity of monthly mandatory purchase/hedge volumes over the 20 month period specified in paragraph III.A.1.c.
- f. The Company and the Division may agree to accelerate a portion of the mandatory hedges. They will notify the Commission of any such plan and provide 3 business days for the Commission to object. Accelerated hedges will neither earn an incentive nor be used in the calculation of mandatory benchmark.

#### 2. Discretionary Purchases and/or Hedges

- a. Are defined as the purchases and/or hedges established at least 6 business days prior to the start of the delivery month for delivery to the system or storage in excess of the mandatory hedging requirements in a month.
- b. The cost and benefit of any financial purchases and/or hedges will be included in the calculation of the average unit price.
- c. May not cause the total (mandatory plus discretionary), fixed price purchases and financial purchases and/or hedges to exceed 95% of the forecasted normal weather requirements for a given supply month.
- 3. Other Discretionary Purchases and/or Hedges Not Subject To Incentives
  - a. LNG
  - b. Supplies that lock in price but are not part of the program.
  - c. Hedges specifically put in place as part of the Natural Gas Procurement Management Program to lock in optimization savings for customers.
  - d. Purchases and/or hedges made less than 6 business days prior to the beginning of the month, during the month or under a contract which does not allow for the locking of the price.

e. Purchases and/or hedges made due to updated levels of forecasted migration of throughput volumes from transportation service to sales service.

#### E. Computation of Gas Procurement Incentives

Gas Procurement Incentives will be determined on the basis of comparisons of the volume-weighted average cost per dekatherm of discretionary purchases and/or hedges made after June 1, 2003, and the volume weighted average cost per dekatherm of mandatory gas purchases, excluding any accelerated hedges, and/or hedges made after June 1, 2003 for the same gas supply month. All comparisons will be based on the NYMEX portion of the variable cost per dekatherm of the purchased gas supply or the price of the NYMEX futures contract.

- F. Any purchases and/or hedges made for a future gas supply month, excluding other discretionary purchases and/or hedges not subject to incentives as shown in III.A.3, that are in excess of the mandatory purchases and/or hedges requirement for the month, will be deemed discretionary purchases and/or hedges.
- G. The timing of discretionary purchases and/or hedges is left solely to the discretion of the Company. However, beginning in November 2005 the Company will make sufficient discretionary purchases and/or hedges by November 1st of each year, such that a minimum of 80% of supply needed for December, January and February and 75% of supply needed for a normal November and March will be at a fixed or capped price. The fixed and capped supplies will include all forward purchases, financially based purchases and/or hedges, DOMAC FCS contract purchases fixed in price, LNG supplies and storage supplies.
- E. After all purchases and/or hedges for forecasted gas requirements for a given gas supply month are completed, the volume-weighted average cost of mandatory purchases and/or hedges will be computed. That volume weighted average cost for mandatory purchases and/or hedges will then be compared against the actual cost of each discretionary purchase and/or hedge made for the same gas supply month.
  - 1. For all discretionary purchases and/or hedges executed more than eight months prior to the start of the gas supply month, the

Company will be provided a positive incentive equal to 10% of the difference between the cost of each discretionary purchase and the volume-weighted average cost for mandatory purchases and/or hedges for the same gas supply month if the cost of the discretionary purchase and/or hedge is less than the volume weighted average of mandatory purchases and/or hedges for the same gas supply month. In the event that the cost of the discretionary purchases/hedges is at least 50 cents less than the cost of the mandatory purchases/hedges, the incentive will be 20%.

- 2. For all discretionary purchases and/or hedges executed within the last eight months prior to the start of the gas supply month, the Company will be provided as positive incentive equal to 10% of the difference between the cost of each discretionary purchase and the volume-weighted average cost for mandatory purchases and/or hedges for the same gas supply month if the cost of the discretionary purchase and/or hedge is less than the volume weighted average of mandatory purchases for the same gas supply month.
- 3. For any and all discretionary purchases and/or hedges that are made at a cost which is greater than the volume-weighted average cost for mandatory purchases and/or hedges, made for the same gas supply month, regardless of when they occur prior to the start of the gas supply month, the Company will be assess a penalty equal to 10% of the difference between the volume-weighted average cost for mandatory purchases and/or hedges and the cost of the each such discretionary purchase,
- 4. The net incentive/penalty for the Company for each gas supply month shall equal the sum of the incentives/penalties calculated for all individual discretionary purchases and/or hedges executed for the subject gas supply month.
