Commission Data Request 3-2

Request:

Mr. Glenning testified that a System Impact Study for the transmission line was expected to be completed by February 2010 (page 8 of 10, lines 7-9). However, Mr. Kremzier's response to Division 1-4 anticipates a System Impact Study by June 2010, at the earliest. Please provide Mr. Glenning's current estimate of the availability of the System Impact Study and related cost analysis of a transmission cable as Mr. Kremzier is not currently a witness to this docket.

Response:

The System Impact Study Final Report was originally expected to be completed in February 2010; however, the scope of the study changed and, as a result, the System Impact Study Final Report is now expected to be completed in June 2010.

The cost analysis for the transmission cable facilities is expected to be completed by the end of March 2010. If the expected completion dates for the distribution system analysis and/or the transmission system analysis are delayed, then the completion date for the cost analysis will also be delayed.
