PLANNING COMMISSION

42 OLD GREAT RD,
N. SMITHFIELD, R.I.
765-6515

Dear Luly Massaco,

This is just a rough draft of a letter to the Journal

One of our church employees said he needed a raise because he travels from his home in Cambridge to his office in Worcester. I questioned the logic of living in an expensive area when you work in a low cost area. Like having a minimum wage part time job in Wornasket and living in Wellesley, Ma or Westerly, R.I.

Similar, the commentary by Dorrie Napoleone reads the same for me. Why should we who live on the mainland have to pay three times the rate for electricity for those who chose to live on an expensive island? 6-10-10 BT

Shure the union carpenters + steelworkers will have a short term job while we will be paying for thirty years. And at what 5% annual increase? recently adj. to ?? When was the last time Joe Sixpac got 5%??

With most of the towers being built in China even the cement will come from Canada! Shure it will make sense to use sand from R.I. (speaking of strip mining)

So for a few jobs selling our sand for the temp. project no jobs will really be created. As we have seen with other job creating project failures!
