Luly E. Massaro, Clerk
Rhode Island Public Utilities Commission
89 Jefferson Boulevard
Warwick, RI 02888

Re: Docket No. 4185

Dear Luly:

This office represents Toray Plastic (America), Inc.

On behalf of Toray, enclosed for filing please find an original and twelve copies of Toray's First Set of Data Requests to the RI Economic Development Corporation in the above-referenced proceeding.

Thank you.

Very truly yours,

Michael R. McElroy

cc: Service List 4185

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
PUBLIC UTILITIES COMMISSION

IN RE: REVIEW OF AMENDED POWER :
PURCHASE AGREEMENT BETWEEN :
NARRAGANSETT ELECTRIC COMPANY : Docket No. 4185
d/b/a NATIONAL GRID AND :
DEEPWATER WIND BLOCK ISLAND, LLC :
PURSUANT TO R.I.G.L. § 39-26.1-7 :

TORAY PLASTICS (AMERICA), INC.'S FIRST SET OF DATA REQUESTS TO RHODE
ISLAND ECONOMIC DEVELOPMENT CORPORATION (EDC)

I. These requests relate to the EDC Advisory Opinion report:

1-1) Did you input into IMPLAN the data for the negative impacts that would be caused by high electricity prices for all ratepayers, especially the above market cost that would be paid for electricity as calculated by National Grid (NG) in docket 4111? If so, what kind of "data retrieval" (attachment 1) was used for the input? (Please answer this question separately for both the Block Island demonstration project and the large scale project.)

1-2) Does the data you inputted into IMPLAN reflect the existing RI business profile (i.e., what kind of businesses currently exist in RI)? Did you use 1985 regional data as you described in attachment 1? If so, do you think the existing regional data today is the same as the 1985 data? Please explain.

1-3) Are you aware of any statistical data to prove that IMPLAN can give you realistic estimate from your actual experiences in the past? If so, please provide the data.

1-4) On page 11, you said that every MW can displace 26 million cf of natural gas, and you calculated that 750 million cf of natural gas displacement can be achieved by the Block Island demonstration project. It appears that you used the name plate capacity of 28.8MW to make your calculations, even though actual output is estimated to be only 40% of name plate capacity. Is this correct? Please explain your answer.

1-5) On page 4, the title says "facilitate new and existing business expansion". Please separate table 1 data so that the new and existing business contributions are shown separately.

II. These questions relate to the Direct testimony of Mr. Parker:

1-6) Do you think that the floating structure you mentioned on page 7 can be adopted in the future large scale project? If so, what is the benefit of utilizing the conventional method in the Block Island demonstration project?

1-7) Do you know any case in which the final construction cost ended lower than budget in

either an onshore or an offshore wind project? If so, please identify the project(s) and explain the reason(s) why the cost ended up lower. (Page 16)

Respectfully submitted,
TORAY PLASTICS (AMERICA), INC.
By its attorney

Date: July 22, 2010
