Rhode Island Public Utilities Commission

Ms. Luly Massaro
Commission Clerk
89 Jefferson Blvd.
Warwick, RI 02888

Re: Addendum to Year-End Status Report
RIPUC Docket No. 4211

Dear Ms. Massaro:

On behalf of Pascoag Utility District (Pascoag or the District), we herewith submit an original and nine copies of this Addendum to Pascoag's Year-End Status Report. In the original filing, submitted November 10, 2010, Pascoag stated it would provide updated information as it became available prior to the District's hearing date.

In this addendum, Pascoag is proposing two scenarios for Commission consideration. Under **Revised Option 1**, a residential customer using 500 kilowatt-hours of electricity would see his monthly decrease from \$76.58 to \$72.97, a reduction of \$3.61, or 4.7%.

Revised Option 2 would allow Pascoag to retain a portion of the over collection in a newly created Rate Stabilization Fund ("RSF"), and flow back a portion of the over collection. Under this option, a residential customer using 500 kilowatt-hours would see his monthly bill decrease from \$76.58 to \$74.90, a decrease of \$1.68, or 2.2%.

The two options are listed below:

Pascoag Revised Option 1

	<u>Current</u>	<u>Proposed</u>	<u>Difference</u>
SOS	\$0.07655	\$0.06678	(\$0.00977)
Transition	\$0.01158	\$0.01132	(\$0.00026)
Transmission	<u>\$0.02008</u>	<u>\$0.02290</u>	<u>\$0.00282</u>
Total	\$0.10821	\$0.10100	(\$0.00721)

Year-End Status Report

Addendum Filing

RIPUC Docket No. 4211

Addendum Testimony of Judith R. Allaire

Revised Schedules

Addendum Testimony of Judith R. Allaire, Assistant General Manager

Q. What is the purpose of this addendum filing?

A. The purpose of this filing is to update the original, submitted in early November, to include actual expenses and revenue for October and actual revenue for November.

In the original filing, Pascoag used estimates for this period and stated that it would provide an update to the Commission once the actual numbers were available.

Q. How does this change the original filing?

A. In the original filing, Pascoag forecast an over collection for the period ending December 31, 2010, of \$335,787. In this submittal, the over collection increases to \$357,986. The changes are highlighted in Table 1.

<u>Table 1</u>			
Forecast Over/(Under) Collection at year-end December 31, 2010 (1)			
	<u>Original Filing</u>	<u>Addendum Filing</u>	<u>Difference</u>
SOS	\$225,723	\$234,005	\$ 8,282
Transition	\$ 21,815	\$ 19,471	(\$ 2,344)
Transmission	<u>\$ 88,249</u>	<u>\$104,510</u>	<u>\$16,261</u>
	\$335,787	\$357,986	\$22,199

(1) Based on actual expenses and revenue for October and actual November revenue

Q. What contributed to the difference between the forecast and actual numbers?

A. October power expenses were less than forecast by \$44,101. Contributing factors to this included:

1. Less BELD energy purchases (at 7.3 cents/kwhr)
2. Increased energy purchases from MHG (at 6.3 cents/kwhr)
3. Increased sales to ISO
4. Interruptible NYPA energy
5. Lower transmission expense due, in part, to lower NGrid PTF expense
6. Less kilowatt-hour purchases than forecast

October sales to customers were higher than forecast, resulting in increased revenue of approximately \$19,273.

However, November sales to customers were lower than forecast, resulting in decreased revenue of \$41,175. One of the reasons November's sales were lower than forecast was the fact the "average" November temperatures were warmer than normal.

The net of these is the difference of \$22,199.

Q. What impact will this have on Pascoag's proposed rates?

A. In the original filing, Pascoag proposed two options for Commission's consideration. Under the revised Option 1, a flow-back of the full over collection, an average residential customer using 500 kilowatt-hours of electricity per month would see his monthly bill decrease from \$76.58 to \$72.97, a decrease of \$3.61, or 4.7%. Based on this scenario, the rates would be as outlined in Table 2, below:

<u>Table 2</u>			
<u>Pascoag Revised Option 1</u>			
	<u>Rates Based on flow-back of \$357,986</u>		
	<u>Current</u>	<u>Proposed</u>	<u>Difference</u>
SOS	\$0.07655	\$0.06678	(\$0.00977)
Transition	\$0.01158	\$0.01132	(\$0.00026)
Transmission	<u>\$0.02008</u>	<u>\$0.02290</u>	<u>\$0.00282</u>
	\$0.10821	\$0.10100	(\$0.00721)

In revised Option 2, Pascoag requests permission to retain \$200,000 of the forecast over collection to establish a new Rate Stabilization Fund ("RSF"), which could be used to offset Pascoag's investment in the proposed Special Purpose Entity ("SPE") project described in the original filing.

Under revised Option 2, a typical residential customer using 500 kilowatt-hours of electricity per month would see his bill decrease from \$76.58 to \$74.90, a decrease of \$1.68, or 2.2%. Based on this scenario, the rates would be as outlined in Table 3, below:

Table 3

Pascoag Revised Option 2

Based on flow-back of \$157,986 (Pascoag retains \$200,000)

	<u>Current</u>	<u>Proposed</u>	<u>Difference</u>
SOS	\$0.07655	\$0.07064	(\$0.00591)
Transition	\$0.01158	\$0.01132	(\$0.00026)
Transmission	<u>\$0.02008</u>	<u>\$0.02290</u>	<u>\$0.00282</u>
	\$0.10821	\$0.10486	(\$0.00335)

Q. Is there anything else that pertains to this filing?

A. Yes. In the original filing we neglected to talk about the growth factor used in the forecast. 2010 proved to be a year of high consumption by our customers for a number of reasons. The two largest contributing factors were the historic spring flooding and above average summer temperatures resulting in Pascoag reaching a new peak demand.

Taking that into consideration, Pascoag used a growth factor of one percent. This was determined to be reasonable based on several proposed residential developments planned for 2011. The first, and major project, is the construction of forty-three single family home and seventy-two multi-family homes in an area of Pascoag. This project, developed by the Rhode Island Housing Authority, has long been on the drawing board, and is now shovel ready, with construction expected to begin in the spring.

Additionally, in Harrisville, a new residential and commercial project, "Clock Tower Complex", is currently under construction and rental applications are now being accepted, with occupancy beginning in January 2011. This new complex will have forty-seven rental units and two commercial units.

And finally, a residential townhouse development, begun several years ago, has resumed construction. The project completed its first two phases of development, and currently has two additional multi-family units under construction with an additional ten to twelve duplex units being constructed over the course of the next year.

Since Pascoag uses a three-year average for forecasting in the filing, the extreme conditions of 2010 are somewhat mitigated, resulting in more typical consumption. Based on this, and with the beginnings of the economic recovery, one percent reflects accurate expectations.

Q. Does this conclude your testimony?

A. Yes, it does.

UPDAtED
