Re: Your Letter Regarding Docket No. 4237 Contact Voltage Legislation and Mandates

Dear Ms. Rustigian:

The Public Utilities Commission ("Commission") is in receipt of your letter dated today regarding your request to allow CVIC to intervene in the hearings in Docket No. 4237. Before the Commission can consider the substance of such a request, because it is on behalf of an organization, it needs to be filed by an attorney licensed to practice law in Rhode Island. This requirement can be found in the Commission Rules of Practice and Procedure 1.4, referencing the appropriate Rhode Island law. A quick search of the Rhode Island Bar Association website does not show you as being an attorney in Rhode Island. However, if you are, please simply provide your RI Bar number for our reference.

You are, of course, invited to provide public comment at the beginning of the hearing on September 24, 2012 without the need to file any formal request with the Commission. The Commission allows public comment by any member of the public or representative of an organization at the start of each public hearing. You may also follow the actions in the docket on the Commission's website, including viewing a copy of filings made with the Commission at: <http://www.ripuc.org/eventsactions/docket/4237page.html>

Please feel free to contact me with any questions at 401-780-2147.

Sincerely,

Cynthia G. Wilson-Frias
Senior Legal Counsel
