Subject: Fwd: RE: Your 9/10/2012 letter to Mr. Green re: RIPUC Docket 4237 -

Luly, Please add this to the docket with the others from today. I have included the service list on this.
Thanks, Cindy

Dear Mr. Holmes,

Due to Mr. Voigtsberger adding my name, and that of Mr. Chuck DeNardo, to his list of people to whom he sent his earlier email, we have become unwantedly associated with this issue. Mr. DeNardo is the Chair, and I am the vice-Chair of an Institute of Electrical and Electronics Engineers Working Group developing a Guide to be used to address the identification and correction of what has commonly been called stray and contact voltage. We, individually and as officials of that working Group, take no position on the matter before either the Rhode Island Public Utilities Commission or the Maryland Public Service Commission. The work we do within the Working Group will not specify specific brands of equipment or material to be utilized in identification or remediation of stray and contact voltages. I respectfully request that our names be removed from the mailing lists that are associated with this issue.

My deepest sympathies go out to the Greens, the Lanes and to all the other families that have lost loved ones to the presence of contact voltage in publicly accessible places. While it is impossible to imagine the grief of these families, I can assure you that those of us who are directly involved with designing, building and maintaining the electric delivery systems are greatly touched by this grief and are dedicated to the elimination of those conditions that have led to such tragic outcomes. I believe that the efforts of the Working Group will help all those involved with the delivery and use of electric energy to achieve your stated goal of providing "the best and most thorough protection available."

Respectfully yours,

James Bouford
