Second 2013 RI DG Enrollment Report

Pursuant to the provisions of the Distributed Generation (“DG”) Standard Contracts Act, R.I.G.L. §39-26.2-8(a), National Grid is submitting the attached report of the aggregate amount of project nameplate capacity that was the subject of the standard contracts entered into during the DG Standard Contract enrollment that occurred during September 2013 and the prices under each of the standard contracts that was executed. National Grid awarded two Standard Contracts in the Second 2013 Enrollment, totaling 1.791 MW of project nameplate capacity. Although the Company received applications for almost 15 MW of projects, the target of 5.516 MW was not satisfied. The shortfall for this enrollment period was associated with specified technology/technology classes not being represented under the current class target allocations (e.g., no Wind or selected Solar class proposals). In addition, certain projects were unable to execute contracts at this time.
