Third 2013 RI DG Enrollment Report

Pursuant to the provisions of the Distributed Generation (“DG”) Standard Contracts Act, R.I.G.L. §39-26.2-8(a), National Grid is submitting the attached report of the aggregate amount of project nameplate capacity that was the subject of the standard contracts entered into during the DG Standard Contract enrollment that occurred during October/November 2013 and the prices under each of the standard contracts that was executed. National Grid awarded six Standard Contracts in the Third 2013 Enrollment, totaling 2.996 MW of project nameplate capacity. Although the Company received applications for almost 20 MW of projects, the target of 8.324 MW was not satisfied. The shortfall for this enrollment period was associated with specified technology/technology classes being under represented or not being represented under the current class target allocations (e.g., no Anaerobic Digestion class proposals). In addition, certain projects that were awarded were unable to execute contracts.
