

RENEWABLE ENERGY RESOURCES ELIGIBILITY GDS TEAM RECOMMENDATION For Consideration By The STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION

Date: 08-08-2012

Generation Unit and Contact Information: Unit Name: Orono B Hydroelectric Project Unit Owner: Black Bear Development Holdings, LLC Unit Size (max. MW): 3.75Location (city, state): Orono, ME Commercial Operation Date: TBD (Prior to December 31, 2013 per contract) Contact Name, Numbers and Address: Scott D. Hall, Vice President, Environmental & Business Services - Black Bear Hydro Partners, LLC. PO Box 276, Milford, ME 04461. Phone: (207) 827-5364 Fax: (207) 827-4102. SHall@blackbearhydro.com Backup: Jon Chadbourne, Vice President, Risk Management - ArcLight Capital Partners, LLC, 200 Clarendon St. 55 th Floor, Boston, MA 02116. Phone: (617) 531-6397. Fax: (617) 867-4698. JChadbourne@arclightcapital.com Authorized Representative Name, Numbers and Address: Daniel R. Revers, President, Black Bear Development Holdings, LLC, c/o Arclight Capital Partners, LLC, 200 Clarendon St. 55 th Floor, Boston, MA 02116. Phone: (617) 531-6397. Fax: (617) 567-4698. DRevers@arclightcapital.com
Application Received: Date: 05/25/2012 Comments: Supplemental information was received in 07/06/2012 and 07/31/2012 emails from Scott Hall that the commission was also copied on. This information includes updated responses to Sections 3.2-3.5, a completed Appendix C, and site information and facility information for Orono A and Orono B in the form of a FERC order and license, a system impact study, an engineering study, and generation data.
Type of Certification Requested: ☐ Standard Certification ☐ Prospective Certification (Declaratory Judgment)
Generation Type and Technology Information: (check all that apply) ☐ Repowered Project ☐ Incremental Generation ☐ Incremental Intermittent ☐ Customer-Sited or Off-Grid System (or associated aggregations) ☐ Generation Unit Located in Control Area Adjacent to NEPOOL: ☐ Solar ☐ Wind ☐ Ocean Thermal ☐ Geothermal ☐ Small Hydro

☐ Eligible Biomass ☐ Unlisted Biomass ☐ Biomass (fossil co-fired/multi-fuel) ☐ Fuel Cell (using an eligible renewable resource)
Recommendation: ☐ Approve (GIS Certification #: TBD) ☐ Reject ☐ Public Hearing Needed ☐ Existing Renewable Energy Resource ☐ New Renewable Energy Resource ☐ Capable of Producing as Both Existing & New Renewable Energy Resource
Comments: GDS recommends conditional approval, with the condition that Black Bear send proof of commercial operation and the assigned GIS number for Orono B when available.

RENEWABLE ENERGY RESOURCES ELIGIBILITY DETAILED GDS TEAM APPLICATION REVIEW RESULTS

(Template V5 – 11/15/11)

Date of Final Review: 08/08/2012

Note: Depending on the type of application (project vintage, type, location, fuel source, etc.) not all of these data items will be applicable.

Regula A.1 Energ comm	wable Energy Resource – Vintage (see appropriate Sections of RES ations, Application Sections 3.1-3.9 and Appendix C): Generation Unit meets the definition of an Existing Renewable by Resource noted in RES Regulations Section 3.10 (first entering nercial operation before 12/31/1997). The Yes No nents: Applied as New Generation
A.2 Rene	Generation from the Unit meets one of the definitions of New wable Energy Resource in RES Regulations Section 3.23. ☐ Yes ☐ No ☐ N/A
existing unit and no gene failures (See Orono A has much more processed (See general and Orono E considered to supplemental construction therefore reconstruction and the supplemental construction construction the supplemental construction constru	nents: 3.23 (ii). Orono B is a new facility on an existing site. The on the site, Orono A, had low generation totals in 1995 and 1996, ration for part of 1996 and all of 1997 due to a series of penstock generation data that was provided as supplemental information). It is since received a series of rehabilitations, and it currently produces cower than it did during the historical generation baseline period tion data that was provided as supplemental information). Orono A derive power from the same impoundment, and are therefore to be on the same site. An engineering study was provided as all information that used modeling software to show that the of Orono B will not limit the generation of Orono A in any way. GDS commends that any existing generation from 1995 and 1996 should to the Orono A facility, and that the Orono B facility should be
	A.2.1 If Generation Unit is at a new site, adequate documentation is provided to ensure that it first entered commercial operation after December 31, 1997. Yes No N/A Comments:
thoir conditio	A.2.2 If Generation Unit is at the site of an Existing Renewable Energy Resource, adequate documentation is provided to ensure that it first entered commercial operation after December 31, 1997 and that the Existing Renewable Energy Resource has been retired and replaced with such new Generation Unit. Yes No N/A Comments: Providing this documentation should be a condition of onal approval. Commercial Operation is estimated to be before
December 3	

A.2.3 If a Repowered Generation Unit (as defined in Section 3.29 of the RES Regulations – complete replacement of Prime Mover, material increase in efficiency or material decrease in air emissions, and demonstration that at least 80% of resulting tax basis of the entire Generation Unit's plant and equipment is derived from capital expenditures made after December 31, 1997), adequate documentation is provided to ensure that the entire output of said unit first entered commercial operation after December 31, 1997 at the site of existing Generation Unit.
A.2.4 If a multi-fuel facility, adequate documentation is provided to ensure that the renewable energy fraction of output from a Generation Unit in which an Eligible Biomass Fuel is first co-fired with fossil fuels after December 31, 1997. Yes No N/A Comments:
A.2.5 If Incremental Output from a non-Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.v of the RES Regulations.
A.2.6 If Incremental Output from an Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.vi of the RES Regulations.
Eligible Customer-Sited/Off-Grid Generation Facility: Yes No (see appropriate Sections of RES Regulations, Application Section 5 and Appendix D)
B.1 Adequate documentation provided to ensure that NEPOOL GIS Certificates are created by way of an aggregation of Generation Units, physically located in the State of Rhode Island, using the same generation technology (see RES Regulations Section 6.8.i).

В.

B.2 the RE Comm	S Reg	sed Aggregation Agreement (as specified in Sgulations) is reasonable and complete.	Section 6.	8.iii of No
		Aggregation Agreement includes name and on ation of the aggregator owner. nents:	contact Yes	☐ No
	inform		of the Ve	
		B.2.2.1 Additional evidence of Verifier qual requested and provided.	ifications No	□ N/A
	busine sufficie with S	Aggregation Agreement includes a declaration of the Verifier section 6.8.iii.c of the RES Regulations (10% of the voting stock, or family officer/etc).	and Verifi in accord	er
		B.2.3.1 Aggregation Agreement includes stindicating under what circumstances the Veribe considered sufficiently independent of the Generation Unit, and that Generation Units nindependence test would not be allowed to paggregation. Comments:	ifier would individua ot meetin	al g this
	will be the ag meet a	Aggregation Agreement identifies the type of included in the aggregation and provides a siggregation will include only individual Generatiall the requirements of the RES Regulations (pon, vintage, etc.).	tatement on Units t	that
	propos Verifie	Aggregation Agreement provides an adequatesed operating procedures for the aggregation, er shall ensure that individual Generation Units gation comply with all eligibility requirements a	, by which s in the	the

	NEPOOL GIS Certificates created accurately represent generation (see Section 6.8.iii.e of the RES Regulations). Yes No Comments:
	 B.2.5.1 At a minimum the proposed operating procedures include reasonable and sufficient details for: Determining that the Generation Unit exists and is in compliance with RES Regulations and Commission-approved Aggregation Agreement. Yes No Meter reading procedure that allows the Verifier to verify these readings (manual or remote, via the aggregators own system or an independent system) in a manner fully compliant with NEPOOL GIS Operating Rules regarding metering. Yes No Specifying how generation data will be entered into NEPOOL GIS to create Certificates. Yes No Documenting a procedure to verify independently that the GIS Certificates created for the aggregation are consistent with the meter readings. Yes No Correcting discrepancies in NEPOOL GIS Certificate generation identified by the Verifier. Yes No
	B.2.6 Aggregation Agreement provides an adequate description of how the Verifier will be compensated for its services by the aggregator (in no instance is the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation).
C.	Generation Unit Location (see appropriate Sections of RES Regulations, Application Section 5 and Appendix E):
	C.1 Generation Unit is located in NEPOOL Control Area. \boxtimes Yes \square No Comments: Orono, ME
	C.1.1 Generation Unit is located in Rhode Island.
	C.2 Generation Unit is located in a control area adjacent to NEPOOL and, in accordance with Section 5.1.ii of the RES Regulations, will apply the associated Generation Attributes to the RES only to the extent that the energy produced by the Generation Unit is actually delivered into NEPOOL for consumption by New England customers. Yes No Comments:

	(i.e., a report from neighboring Generation Attribute accounting system or an affidavit) must be provided to verify that Generation Attributes from a Generation Unit located in a control area adjacent to NEPOOL have not otherwise been, nor will be, sold, retired, claimed or represented as part of electrical energy output or sales, or used to satisfy obligations in jurisdictions other than Rhode Island (such assurances may consist of a report from a neighboring Generation Attribute accounting system or an affidavit from the Generation Unit) Yes No Comments:
	 C.2.2 Applicant acknowledges that energy delivered from such Generation Unit into NEPOOL will be verified by the following: A unit-specific bilateral contract for the sale and delivery of such energy into NEPOOL Confirmation from ISO that the energy was actually settled in the ISO Market Settlement System, and Confirmation through the North American Reliability Council tagging system that the import of the energy into NEPOOL actually occurred, or such other requirements as the Commission deems appropriate Yes No
	Comments:
D.	Eligible Fuel Source – Solar, Wind, Ocean Thermal, Geothermal, or Fuel Cell (using an eligible renewable resource) (see appropriate Sections of RES Regulations and Application Section 2.4): Yes No N/A Comments:
E.	Eligible Fuel Source – Small Hydro Facilities (see appropriate Sections of RES Regulations and Application Sections 2.5-2.6):
	E.1 Aggregate capacity does not exceed 30 MW.
	E.2 If "New Renewable Energy Resource", applicant acknowledges that facility does not involve any new impoundment or diversion of water with an average salinity of 20 parts per thousand or less. Yes No Comments:
F.	Eligible Fuel Source – Biomass Facilities (see appropriate Sections of RES Regulations, Application Sections 2.7 and Appendix F): Yes No N/A
	F.1 Generation Unit uses a biomass fuel source listed in RES Regulations Section 3.7.

	If source is other than RES Regulations Section 3.7- e has been designated as "clean wood". nents:	listed, sa ☐ Yes	
that or	Fuel Source Plan can reasonably be expected to ense Biomass Fuels will be used, and in the case of co-finly that proportion of generation attributable to an Eligne eligible.	iring ensi	ure
	F.3.1 Fuel Source Plan specifies the type of Eligible to be used. Comments:	e Biomas Yes	s Fuel No
	F.3.2 If proposed fuel is "clean wood", Fuel Source adequate substantiation as to why the fuel source sh considered a clean wood. Comments:	nould be	vides N/A
	F.3.3 In the case of co-firing with a fossil fuel, Fuel includes an adequate description of how such co-firing and how the relative amounts of Eligible Biomass Fuel will be measured, and how the eligible portion of output will be calculated (with such calculations based energy content of the proposed fuels used). Yes Comments:	ng will oo lel and fo f generat ed on the	ccur essil ion
	F.3.4 Fuel Source Plan includes an adequate described measures will be taken to ensure that only the Eligib Fuel is used (e.g., standard operating protocols or pull be implemented at the Generating Unit, contracts suppliers, testing or sampling regimes). Comments:	ie Bioma Procedure	ss es that
	F.3.5 Fuel Source Plan includes adequate assurant stored at or brought to the Generation Unit will only be Biomass Fuels or fossil fuels used for co-firing. Comments:		e
	F.3.6 If proposed fuel includes recycled wood waster Plan provides adequate documentation to ensure the meets the definition of Eligible Biomass Fuel and also material separation, storage, or handling standards a	at such for meets	ıel

Comments:

	Regulations.	I/A
	F.3.7 Applicant certifies that it will file all reports and oth information necessary to enable the Commission to verify the going eligibility of the renewable energy generators pursuant Section 6.3 of the RES Regulations. Yes No N Comments:	on- to
	F.3.8 A copy of the Generation Unit's Valid Air Permit equivalent authorization has been attached and the effective data and issuing state or jurisdiction has been identified. Yes No N Comments:	ate
G.	Other Comments/Observations:
