Constellation NewEnergy, Inc.

Electricity Supply Agreement – Fixed Price Solutions

United Water Rhode Island Inc. ("Customer") AND CONSTELLATION NEWENERGY, INC. ("CNE") AGREE AS FOLLOWS:

Defined Terms. Capitalized terms have the meanings set out in this Electricity Supply Agreement, including the attached General Terms and Conditions ("Agreement"); generally the words "you" and "your" refer to the Customer listed above and the words "we" and "us" refer to CNE, unless the context clearly requires otherwise.

Purchase and Sale of Electricity. You will purchase and receive, and we will sell and supply all of your electricity requirements at the prices set forth below for each account identified in the Account Schedule below ("Account"). By signing this Agreement, you authorize us to enroll each Account with your UDC so that we can supply those Account(s). You will take such actions as we request to allow us to enroll each Account in a timely manner. You agree that we may select such sources of energy as we deem appropriate to meet our obligations under the Agreement. We will enroll each Account with the applicable UDC as being supplied by us and will take such other actions with the applicable UDC and ISO necessary for us to meet our obligations under the Agreement. The specific prices for each Account are set forth in the Account Schedule, below.

You are also responsible to pay (1) Taxes - which we will pass through to you on your bill or as part of the price of electricity, as may be required by law, rule or regulation and (2) UDC charges for delivery/distribution services if we provide you a single bill that includes UDC charges. Your prices are fixed for the existing term of this Agreement and only subject to change if there is a change in law, as described in Section 5 of the General Terms and Conditions below. The UDC charges (if any) and Taxes are charged to you as a "pass-through," which means they will change during the existing term of this Agreement if and as the related charges assessed or charged to us vary for any reason, including but not limited to the types of changes described above.

Cost Components. For each of the items listed as "Fixed" below, this means the item is included in your contract prices as set forth in the Account Schedule. For each of the items listed as "Passed Through" below, this means that you will be charged the costs associated with the line item in accordance with the

definitions of each item in Section 1, Definitions of the General Terms and Conditions.

Energy Costs	Fixed
Ancillary Services And Other ISO Costs	Fixed
Capacity Costs	Fixed
Line Loss Costs	Fixed
FERC Order 745 Costs	Passed Through

The contract prices contained in the Account Schedule have been reduced to reflect a fixed credit to you for the Auction Revenue Rights and Transmission Loss Credits associated with the Account(s). The contract prices also include any credit costs and margin as well as Renewable Portfolio Standards Costs.

Retail Trade Transactions. At any time during the term of this Agreement, you may request the purchase of renewable energy certificates in an amount equal to a prescribed percentage of your load volume by entering into one or more Retail Trade Transactions ("RTTs") between us. If we both agree to the pricing and terms of the renewable energy certificates purchase, a separate RTT Confirmation signed by both of us will document each such purchase and be incorporated herein.

Term. This Agreement will become effective and binding after you have signed the Agreement and we have counter-signed. Subject to successful enrollment of your Account(s), this Agreement shall commence on or about the date set forth under "Start Date", and end on or about the date set forth under "End Date", unless extended on a holdover basis as described in this Agreement. The actual Start Date is dependent on the UDC successfully enrolling the Account(s) and furnishing us with all necessary information regarding the Account(s) meter read cycle and meter read date(s). The dates set forth in the Account Schedule below reflect UDC information available at that time or as otherwise estimated by us. The actual meter read dates may occur on or about the dates set forth herein. We will use commercially reasonable efforts to begin service to each Account(s) on the actual meter read date on or about the Start Date set forth herein. If we are unable to timely enroll an Account, the Start Date will commence on the next regularly scheduled UDC meter read cycle date following successful enrollment. The End Date will remain the same unless extended for a holdover term. We shall not be liable for any failure to enroll or drop an Account by the Start and End Date due to circumstances beyond our control. We will not be responsible for any gaps in service that may occur between the termination of your service from a prior supplier and the commencement of supply from us.

Nothing in this Agreement shall be deemed to require or otherwise obligate us to offer to extend the term of this Agreement. If following termination or expiration of this Agreement (whether in whole or in part), for any reason, some or all of the Accounts remain designated by the UDC as being supplied by us, we may continue to serve such Account(s) on a month-to-month holdover basis. During such holdover term, we will calculate your invoice as follows: (Each Account's metered usage, as adjusted by the applicable line loss factor) times (the applicable ISO-published Real Time Locational Based Marginal Price ("LMP") (or in NYISO Zone J, the ISO-published Day Ahead LMP) + \$.00525/kWh) + (a pass through of all costs and charges incurred by us for the retail delivery of energy to you) + Taxes. This Agreement will continue to govern the service of such Accounts during such holdover term. Either party may terminate the holdover term at any time within its discretion at which time we will drop each Account as of the next possible meter read date to the then applicable tariff service, whether default service or otherwise.

Your Invoice. Your invoice will contain all charges applicable to your electricity usage, including Taxes (which are passed through to you). You will receive one invoice from the UDC for UDC charges and one invoice from us for all other charges unless we agree otherwise. All amounts charged are due in full within twenty (20) days of the invoice date, and we reserve the right to adjust amounts previously invoiced based upon supplemental or additional data we may receive from your UDC. Your invoices will be based on actual data provided by the UDC, provided that if we do not receive actual data in a timely manner, we

will make a good faith estimate using your historical usage data and other information. Once we receive actual data we will reconcile the estimated charges and adjust them as needed in subsequent invoices. Div. 4-11: With regard to Account No. 50620—Other Utilities Power:

- a. Please explain, in detail, the basis for selecting a three-year average (2010-2012) as the appropriate historical period for projecting such expense for the rate year.
- b. Additionally, please explain why this expense was significantly higher in 2011 than in other recent historical periods.
- c. Please provide actual costs for 2013.

#### RESPONSE:

- a. A three year average was used to normalize the level of expense since the amount of expense can vary from year to year. In order to keep consistency with all the adjustments the Company considered appropriate to use 3 years average.
- b. The amount of 2011 includes expenses of \$12,659 related to additional fuel and diesel for the generator due to power outages during the storm Irene.
- c. The actual cost for the 12 months ending December 2013 is \$20,781

Nalco C-9 is anticipated to increase about 44 percent from the test year unit cost

of \$0.72/lb. to \$1.0395/lb. for the rate year.

year 2010 than during 2011 and 2012. Please state whether there have been

any changes in the dosage rate for Nalco C-9 or other usage parameters.

RESPONSE:

The dosing rate was cut by 1/3 (3 part dosage down to 2) in 2011. In 2013 usage is also down considerably since UWRI is treating less frequently due to its last lead and copper test showing no lead or copper (resulting in the less frequency usage of this chemical).

This chemical is used for corrosion control, due to the EPA lead and copper rule.

With regard to the response to question Div. 2-34 regarding efficiency testing Div. 4-17:

wells, the Company stated that "...the Company tested 3 wells in 2013 for the

amount of \$1,425. The Company expects to test up to three wells per year."

However, Ms. Gil's Exhibit 3, Schedule 15A includes \$3,325 as part of other

charges for Account No. 923 for seven wells (\$475 per well). Please indicate

whether the company anticipates testing three or seven wells annually, and if an

adjustment to Ms. Gil's Exhibit 3, Schedule 15A is necessary.

**RESPONSE:** 

The Company expects to test three of its wells per year.

The amount included in Exhibit 3, Schedule 15A should be \$1,425 per year instead of \$3,325.

Data Requests

Set 4

- 4-18: With regard to the response to Div. 2-35:
  - a. Please explain the difference in the costs that are deemed to be maintenance and the amounts deemed to be capital.
  - b. Please identify the amount incurred for well rehabilitation expense in each year from 2006 through 2013.
  - c. Please identify the expected frequency of well rehabilitation on a going forward basis.

#### RESPONSE:

a) The costs that were deemed maintenance are directly associated with the well rehabilitation. As per the capital policy, the expenditures which do not result in a betterment, or those that are for repairs and maintenance, should be expensed. Because the actual well rehabilitation is intended to bring the condition of the well back to its previous condition, rather than providing an improvement, that work would be considered expense. Costs for items such as pump replacement, or well casing or screen replacement, which provide a betterment to the system, would be considered capital.

Expenditures which do not result in an addition, replacement, reconstruction, or betterment should be expensed.

Expenditures for repairs and maintenance should be expensed, unless it is determined that because of their materiality and unusual nature, the costs should be deferred for future rate recovery.

- b) The Company has not performed a well rehabilitation since prior to 2006
- c) The Company plans to rehabilitate individual wells every 5-10 years, or as needed to maintain the expected well yield. Overall the Company currently plans to rehabilitate on average one well every 2-3 years to maintain the overall system yield.

Conversely, Ms. McEvoy's Exhibit 5 shows the cost of the Tower Hill Tank project will increase plant in service by about \$3.306 million. Please indicate whether it is correct that the cost of the Tower Hill Tank project has been reduced to \$2.03 million. If not, please explain and reconcile the difference.

#### **RESPONSE:**
