Rhode Island Public Utilities Commission
89 Jefferson Boulevard
Warwick, RI 02888

Re: United Water Rhode Island, Inc. – Docket 4434

Dear Ms. Massaro:

Enclosed please find an original and nine (9) copies of the following document:

1. United Water Rhode Island, Inc.'s Responses to the Rhode Island Public Utilities Commission's Hearing Record Requests.

An electronic copy of this document has been provided to the service list.

Thank you for your attention to this matter.

Sincerely,

Joseph A. Keough, Jr.

Enclosures

STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION

DOCKET NO. 4434

Response of United Water Rhode Island, Inc.
To The Rhode Island Public Utilities Commission's
Hearing Record Requests

HRR-1: Please provide a list of fire hydrants that are planned to be painted.

RESPONSE: Attached is a list of hydrants that will be used to schedule the painting. The Company will be starting in Narragansett because that's where the hydrants need immediate attention. The Company will scrape and paint as many as can be finished within the financial constraints permitted.

Prepared by: Stan Knox

STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION

DOCKET NO. 4434

Response of United Water Rhode Island, Inc.
To The Rhode Island Public Utilities Commission's
Hearing Record Requests

HRR-4: 1) Please provide the number of private fire hydrants.

2) Please provide various rate designs related to Private and Public Fire Protection that keeps the total fire protection revenues as per the settlement agreement at \$635,616 and attempts to equalize the Public Hydrant rate and the 6" Private Fire service connection rate.

RESPONSE:

1) As stated at the hearing in this Docket, there is a distinction between Public Fire and Private Fire charges. Public Fire Charges represent hydrants that are owned by the Company, in public streets, and billed to either the municipality or the Union Fire District. Thus, United Water charges a single Public Fire Charge for each public fire hydrant. On the other hand, Private Fire Charges represent the size of the connection to United Water's main. Thus, United charges a single Private Fire Charge for each connection (with the amount of the charge depending on the size of the connection). From each private service connection the customer, on private property (either a lot or private street), may put as many hydrants or indoor fire sprinkler systems as the hydraulic capacity may allow. So each Private Fire Charge does not necessarily represent a single private fire hydrant.

In order to determine the number of private hydrants that are connected to each private service connection, United Water would need to physically go to each of the 139 private fire customers and count the number of hydrants that are connected to each private service line. Since these hydrants are not owned by the United, it does not have these records.

2) Attached are Schedules that reflect various scenarios in an attempt to equalize the Public Hydrant rate and the 6" private Fire service connection rate.

Schedule 1 – This Schedule summarizes the Settlement agreement with an across the board increase of 32.88%.

Current Charges

Quarterly Rate
Private Fire 6" - \$162.00
Public Fire - \$130.00

Proposed Settlement

Quarterly Rate	Percent Increase
Private Fire 6" - \$215.19	32.83%
Public Fire - \$173.00	33.08%

Schedule 2 – This Schedule equalizes the Private Fire 6" connection with the Public Fire hydrant rate by bringing the Public Fire rate up to the private fire 6" connection rate of \$215.19 as proposed in the Settlement Agreement (See Schedule 1). However in doing so, when multiplying the number of units (col 2) times the rate (col 3) total fire protection charges (col 4) are \$111,828 higher than the settlement amount of \$635,616. To compensate for that, the \$111,828 was allocated to each private fire service size and to public fire hydrants. For example the 2 ½" service size revenue in Col 4 of \$701 divided by the total revenues in Col 4 of \$747,444 times the \$111,828 results in the adjustment of (\$105). This was done for each service size and public hydrants. The result of this is an equalized rate of \$182.99 for the 6" Private Fire connection and the Public Hydrants.(Note- due to rounding the Public Fire rate is \$183.00)

Quarterly Rate	Percent Increase
Private Fire 6" - \$182.99	12.97%
Public Fire - \$183.00	40.77%

Schedule 3 – Schedule 3 develops a rate based upon 6" meter equivalents. The relationship of each service size rate to 6" (i.e.: $22.00/162.00 = 0.14$) times the number of units. Since hydrants are generally 6" they each count as 1. The total fire protection revenues of \$635,616 are divided by the total 6" equivalents of 868.36 to develop the quarterly rate. The result is a rate of \$182.99 which is the same as developed in Schedule 2.
