

RENEWABLE ENERGY RESOURCES ELIGIBILITY GDS TEAM RECOMMENDATION For Consideration By The

STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION

(Version 6 – August 20th, 2013)

Date: January 13, 2014	Docket #: 4459
Vermont Public Power Supply Authoric 5195 Waterbury-Stowe Road Waterbury Center, VT 05677 Phone: (802) 882-8508 Fax: (802) 24 Backup: Brian Callnan, Director of Povermont Public Power Supply Author 5195 Waterbury-Stowe Road Waterbury Center, VT 05677 Phone: (802) 882-8510 Fax: (802) 24	ter & Light Department sation (city, state): Morrisville, VT 1924 s: Gregory Morse, Senior Power Analyst, ity 14-6889 Email: gmorse@vppsa.com wer Supply and Transmission rity 14-6889 Email: bcallnan@vppsa.com mbers and Address: Craig Myotte, Manage
Application Received: Comments:	Date: November 4, 2013
Type of Certification Requested: ☐ Standard Certification ☐ Prospe	ctive Certification (Declaratory Judgment)
☐ Customer-Sited or Off-Grid System☐ Generation Unit Located in Contro	tal Generation

☐ Fuel Cell (using an eligible renewable resource)
Recommendation:
Needed
Existing Renewable Energy ResourceCapable of Producing as Both Existing & New Renewable Energy Resource
Comments:

RENEWABLE ENERGY RESOURCES ELIGIBILITY DETAILED GDS TEAM APPLICATION REVIEW RESULTS

(Template V5 – 11/15/11)

Date of Final Review: 01/13/2014

Note: Depending on the type of application (project vintage, type, location, fuel source, etc.) not all of these data items will be applicable.

Α.	Regula A.1 Energ comm	wable Energy Resource – Vintage (see appropriate Sections of RES ations, Application Sections 3.1-3.9 and Appendix C): Generation Unit meets the definition of an Existing Renewable gy Resource noted in RES Regulations Section 3.10 (first entering nercial operation before 12/31/1997). Yes Nonents: COD of 7/1/1924
	A.2 Rene	Generation from the Unit meets one of the definitions of New wable Energy Resource in RES Regulations Section 3.23. ☐ Yes ☒ No ☐ N/A
	Comments:	
		A.2.1 If Generation Unit is at a new site, adequate documentation is provided to ensure that it first entered commercial operation after December 31, 1997. ☐ Yes ☐ No ☒ N/A Comments: N/A
		A.2.2 If Generation Unit is at the site of an Existing Renewable Energy Resource, adequate documentation is provided to ensure that it first entered commercial operation after December 31, 1997 and that the Existing Renewable Energy Resource has been retired and replaced with such new Generation Unit. Yes No NA Comments: N/A
		A.2.3 If a Repowered Generation Unit (as defined in Section 3.29 of the RES Regulations – complete replacement of Prime Mover, material increase in efficiency or material decrease in air emissions, and demonstration that at least 80% of resulting tax basis of the entire Generation Unit's plant and equipment is derived from capital expenditures made after December 31, 1997), adequate documentation is provided to ensure that the entire output of said unit first entered commercial operation after December 31, 1997 at the site of existing Generation Unit.
		A.2.4 If a multi-fuel facility, adequate documentation is provided to ensure that the renewable energy fraction of output from a Generation Unit in which an Eligible Biomass Fuel is first co-fired with fossil fuels after December 31, 1997. Yes No NA

Comments: N/A A.2.5 If Incremental Output from a non-Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.v of the RES Regulations. ☐ Yes ☐ No ☒ N/A Comments: N/A A.2.6 If Incremental Output from an Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.vi of the RES Regulations. ☐ Yes ☐ No ☒ N/A Comments: N/A B. Eligible Customer-Sited/Off-Grid Generation Facility: ☐ Yes ⊠ No (see appropriate Sections of RES Regulations, Application Section 5 and Appendix D) B.1 Adequate documentation provided to ensure that NEPOOL GIS Certificates are created by way of an aggregation of Generation Units, physically located in the State of Rhode Island, using the same generation technology (see RES Regulations Section 6.8.i). ☐ Yes ☐ No Comments: N/A B.2 Proposed Aggregation Agreement (as specified in Section 6.8.iii of the RES Regulations) is reasonable and complete. ☐ Yes ☐ No Comments: N/A B.2.1 Aggregation Agreement includes name and contact information of the aggregator owner. | Yes | No Comments: N/A B.2.2 Aggregation Agreement includes name and contact information and adequate evidence of qualifications of the Verifier

duties.

Comments: N/A

to ensure that the Verifier will accurately and efficiently carry out its

☐ Yes ☐ No

	B.2.2.1 Additional evidence of varieties and provided. Comments: N/A	Verifier qualifications ☐ Yes ☐ No ☐ N/A
busine sufficie with Se owners	Aggregation Agreement includes ess or financial relations between ent to ensure the independence of Section 6.8.iii.c of the RES Regulateship in voting stock, or family officinents: N/A	aggregator and Verifier f the Verifier in accordance tions (10% or more
	B.2.3.1 Aggregation Agreement indicating under what circumstant be considered sufficiently independence test would not be aggregation. Comments: N/A	ces the Verifier would not ndent of the individual ation Units not meeting this
will be the ag meet a locatio	Aggregation Agreement identifies included in the aggregation and pagregation will include only individuall the requirements of the RES Roon, vintage, etc.).	orovides a statement that ual Generation Units that
propos Verifie aggreg NEPO (see S	Aggregation Agreement provides sed operating procedures for the ager shall ensure that individual Generation comply with all eligibility red OOL GIS Certificates created accusection 6.8.iii.e of the RES Regulaments: N/A	aggregation, by which the eration Units in the quirements and that the rately represent generation
	include reasonable and sufficientDetermining that the General	eration Unit exists and is in Julations and Commission-reement. Yes No No hat allows the Verifier to Julation remote, via the or an independent system) at with NEPOOL GIS metering. Yes No n data will be entered into

	 Documenting a procedure to verify independently that the GIS Certificates created for the aggregation are consistent with the meter readings.
	B.2.6 Aggregation Agreement provides an adequate description of how the Verifier will be compensated for its services by the aggregator (in no instance is the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation). Yes No Comments: N/A
C.	Generation Unit Location (see appropriate Sections of RES Regulations, Application Section 5 and Appendix E):
	C.1 Generation Unit is located in NEPOOL Control Area. \boxtimes Yes \square No Comments: Morrisville, VT
	C.1.1 Generation Unit is located in Rhode Island. ☐ Yes ☐ No Comments: -72.6029 W / 44.5616 N
	C.2 Generation Unit is located in a control area adjacent to NEPOOL and, in accordance with Section 5.1.ii of the RES Regulations, will apply the associated Generation Attributes to the RES only to the extent that the energy produced by the Generation Unit is actually delivered into NEPOOL for consumption by New England customers. Yes No Comments: See above
	C.2.1 Applicant acknowledges that satisfactory documentation (i.e., a report from neighboring Generation Attribute accounting system or an affidavit) must be provided to verify that Generation Attributes from a Generation Unit located in a control area adjacent to NEPOOL have not otherwise been, nor will be, sold, retired, claimed or represented as part of electrical energy output or sales, or used to satisfy obligations in jurisdictions other than Rhode Island (such assurances may consist of a report from a neighboring Generation Attribute accounting system or an affidavit from the Generation Unit) \[\sum Yes \sum No Comments: N/A \]
	 C.2.2 Applicant acknowledges that energy delivered from such Generation Unit into NEPOOL will be verified by the following: A unit-specific bilateral contract for the sale and delivery of such energy into NEPOOL

	 Confirmation from ISO that the energy was actually settled in the ISO Market Settlement System, and Confirmation through the North American Reliability Council tagging system that the import of the energy into NEPOOL actually occurred, or such other requirements as the Commission deems appropriate
D.	Eligible Fuel Source – Solar, Wind, Ocean Thermal, Geothermal, or Fuel Cell (using an eligible renewable resource) (see appropriate Sections of RES Regulations and Application Section 2.4): Yes No N/A Comments: Small Hydro
E.	Eligible Fuel Source – Small Hydro Facilities (see appropriate Sections of RES Regulations and Application Sections 2.5-2.6):
	E.1 Aggregate capacity does not exceed 30 MW.
	E.2 If "New Renewable Energy Resource", applicant acknowledges that facility does not involve any new impoundment or diversion of water with an average salinity of 20 parts per thousand or less. ☐ Yes ☐ No Comments: Section 2.6
F.	Eligible Fuel Source – Biomass Facilities (see appropriate Sections of RES Regulations, Application Sections 2.7 and Appendix F): Yes No N/A
	F.1 Generation Unit uses a biomass fuel source listed in RES Regulations Section 3.7.
	F.2 If source is other than RES Regulations Section 3.7-listed, said source has been designated as "clean wood".
	F.3 Fuel Source Plan can reasonably be expected to ensure that only Eligible Biomass Fuels will be used, and in the case of co-firing ensure that only that proportion of generation attributable to an Eligible Biomass Fuel be eligible. [Yes] No Comments: N/A
	F.3.1 Fuel Source Plan specifies the type of Eligible Biomass Fuel to be used.
