

## RENEWABLE ENERGY RESOURCES ELIGIBILITY GDS TEAM RECOMMENDATION For Consideration By The

## STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION

(Version 6 – August 20<sup>th</sup>, 2013)

(*6131011	o magasi z	.0 , 2010)	
<b>Date:</b> January 13, 2014			Docket #: 4460
Generation Unit and Contact Inforunit Name: Cadys Falls Unit Owner: Village of Morrisville Would Size (max. MW): 1.3 MW Locommercial Operation Date: Janual Contact Name, Numbers and Addrew Vermont Public Power Supply Authors 5195 Waterbury-Stowe Road Waterbury Center, VT 05677 Phone: (802) 882-8508 Fax: (802) 2882-8508 Fax: (802) 2882-8508 Fax: (802) 2982-8509 Fax: (802) 2982-8510 Fax	Vater & Ligocation (cary 1, 189- ess: Gregority  244-6889 Power Suppority  244-6889  Vumbers & Departme	ity, state): Mor 4 (approx.) ory Morse, Sen Email: gmorse oply and Transr Email: bcallna and Address: C	ristown, VT  nior Power Analyst,  e@vppsa.com  mission  an@vppsa.com  raig Myotte, Manager
Application Received: Comments:	Date:	November 4,	2013
Type of Certification Requested:  ☐ Standard Certification ☐ Prosp	pective Ce	ertification (Dec	laratory Judgment)
Generation Type and Technology  Repowered Project Increme Customer-Sited or Off-Grid Syste Generation Unit Located in Cont Solar Wind Ocean Tr Eligible Biomass Unlisted Bio	ental Gene em (or ass rol Area A nermal	eration	cremental Intermittent gations)

☐ Fuel Cell (using an eligible renewable resource)
Recommendation:
Approve (GIS Certification #: MSS 1165) Reject Public Hearing
Needed  ⊠ Existing Renewable Energy Resource  □ New Renewable Energy Resource
Capable of Producing as Both Existing & New Renewable Energy Resource
Comments:

## RENEWABLE ENERGY RESOURCES ELIGIBILITY DETAILED GDS TEAM APPLICATION REVIEW RESULTS

(Template V5 – 11/15/11)

Date of Final Review: 01/13/2014

Note: Depending on the type of application (project vintage, type, location, fuel source, etc.) not all of these data items will be applicable.

Α.	Regula A.1 Energ comm	wable Energy Resource – Vintage (see appropriate Sections of RES ations, Application Sections 3.1-3.9 and Appendix C): Generation Unit meets the definition of an Existing Renewable gy Resource noted in RES Regulations Section 3.10 (first entering nercial operation before 12/31/1997).  Yes \( \subseteq \) Nonents: approximate COD of 1/1/1894
	A.2 Rene	Generation from the Unit meets one of the definitions of New wable Energy Resource in RES Regulations Section 3.23.  ☐ Yes ☐ N/A
	Comr	nents:
		A.2.1 If Generation Unit is at a new site, adequate documentation is provided to ensure that it first entered commercial operation after December 31, 1997. ☐ Yes ☐ No ☒ N/A Comments: N/A
		A.2.2 If Generation Unit is at the site of an Existing Renewable Energy Resource, adequate documentation is provided to ensure that it first entered commercial operation after December 31, 1997 and that the Existing Renewable Energy Resource has been retired and replaced with such new Generation Unit.   Yes No N/A Comments: N/A
		A.2.3 If a Repowered Generation Unit (as defined in Section 3.29 of the RES Regulations – complete replacement of Prime Mover, material increase in efficiency or material decrease in air emissions and demonstration that at least 80% of resulting tax basis of the entire Generation Unit's plant and equipment is derived from capital expenditures made after December 31, 1997), adequate documentation is provided to ensure that the entire output of said unit first entered commercial operation after December 31, 1997 at the site of existing Generation Unit.
		A.2.4 If a multi-fuel facility, adequate documentation is provided to ensure that the renewable energy fraction of output from a Generation Unit in which an Eligible Biomass Fuel is first co-fired with fossil fuels after December 31, 1997.

A.2.5 If Incremental Output from a non-Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.v of the RES Regulations. ☐ Yes ☐ No ☒ N/A Comments: N/A A.2.6 If Incremental Output from an Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.vi of the RES Regulations. ☐ Yes ☐ No ☒ N/A Comments: N/A B. Eligible Customer-Sited/Off-Grid Generation Facility: ☐ Yes ⊠ No (see appropriate Sections of RES Regulations, Application Section 5 and Appendix D) B.1 Adequate documentation provided to ensure that NEPOOL GIS Certificates are created by way of an aggregation of Generation Units, physically located in the State of Rhode Island, using the same generation technology (see RES Regulations Section 6.8.i). ☐ Yes ☐ No Comments: N/A B.2 Proposed Aggregation Agreement (as specified in Section 6.8.iii of the RES Regulations) is reasonable and complete. ☐ Yes ☐ No Comments: N/A B.2.1 Aggregation Agreement includes name and contact information of the aggregator owner. | Yes | No Comments: N/A B.2.2 Aggregation Agreement includes name and contact information and adequate evidence of qualifications of the Verifier

Comments: N/A

duties.

Comments: N/A

to ensure that the Verifier will accurately and efficiently carry out its

	<ul> <li>Documenting a procedure to verify independently that the GIS Certificates created for the aggregation are consistent with the meter readings.  Yes No</li> <li>Correcting discrepancies in NEPOOL GIS Certificate generation identified by the Verifier. Yes No</li> <li>Comments: N/A</li> </ul>
	B.2.6 Aggregation Agreement provides an adequate description of how the Verifier will be compensated for its services by the aggregator (in no instance is the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation).
C.	Generation Unit Location (see appropriate Sections of RES Regulations, Application Section 5 and Appendix E):
	C.1 Generation Unit is located in NEPOOL Control Area. $\boxtimes$ Yes $\square$ No Comments: Morristown, VT
	C.1.1 Generation Unit is located in Rhode Island. ☐ Yes ☐ No Comments: -72.6120 W / 44.5775 N
	C.2 Generation Unit is located in a control area adjacent to NEPOOL and, in accordance with Section 5.1.ii of the RES Regulations, will apply the associated Generation Attributes to the RES only to the extent that the energy produced by the Generation Unit is actually delivered into NEPOOL for consumption by New England customers.   Yes No Comments: See above
	C.2.1 Applicant acknowledges that satisfactory documentation (i.e., a report from neighboring Generation Attribute accounting system or an affidavit) must be provided to verify that Generation Attributes from a Generation Unit located in a control area adjacent to NEPOOL have not otherwise been, nor will be, sold, retired, claimed or represented as part of electrical energy output or sales, or used to satisfy obligations in jurisdictions other than Rhode Island (such assurances may consist of a report from a neighboring Generation Attribute accounting system or an affidavit from the Generation Unit)
	<ul> <li>C.2.2 Applicant acknowledges that energy delivered from such Generation Unit into NEPOOL will be verified by the following:</li> <li>A unit-specific bilateral contract for the sale and delivery of such energy into NEPOOL</li> </ul>

	<ul> <li>the ISO Market Settlement System, and</li> <li>Confirmation through the North American Reliability Coun tagging system that the import of the energy into NEPOOI actually occurred, or such other requirements as the Commission deems appropriate</li> </ul>	
	Comments: N/A	No
D.	Eligible Fuel Source – Solar, Wind, Ocean Thermal, Geothermal, or Fuel Cell (using an eligible renewable resource) (see appropriate Sections of RES Regulations and Application Section 2.4):	S
E.	Eligible Fuel Source – Small Hydro Facilities (see appropriate Sections of RE Regulations and Application Sections 2.5-2.6):	ES N/A
	E.1 Aggregate capacity does not exceed 30 MW.	No
	E.2 If "New Renewable Energy Resource", applicant acknowledges the facility does not involve any new impoundment or diversion of water with an average salinity of 20 parts per thousand or less.	h
F.	Eligible Fuel Source – Biomass Facilities (see appropriate Sections of RES Regulations, Application Sections 2.7 and Appendix F):  Yes No I	V/A
	F.1 Generation Unit uses a biomass fuel source listed in RES Regulations Section 3.7.	No
	F.2 If source is other than RES Regulations Section 3.7-listed, said source has been designated as "clean wood".	No
	F.3 Fuel Source Plan can reasonably be expected to ensure that onl Eligible Biomass Fuels will be used, and in the case of co-firing ensure that only that proportion of generation attributable to an Eligible Biomas Fuel be eligible.    Yes   Comments: N/A	s
	F.3.1 Fuel Source Plan specifies the type of Eligible Biomass Futo be used.   Comments: N/A	uel No

• Confirmation from ISO that the energy was actually settled in

F.3.2 If proposed fuel is "clean wood", Fuel Source Plan provides adequate substantiation as to why the fuel source should be considered a clean wood. ☐ Yes ☐ No ☒ N/A Comments: N/A	
F.3.3 In the case of co-firing with a fossil fuel, Fuel Source Plan includes an adequate description of how such co-firing will occur and how the relative amounts of Eligible Biomass Fuel and fossil fuel will be measured, and how the eligible portion of generation output will be calculated (with such calculations based on the energy content of the proposed fuels used).   Yes  N/A Comments: N/A	١.
F.3.4 Fuel Source Plan includes an adequate description of what measures will be taken to ensure that only the Eligible Biomass Fuel is used (e.g., standard operating protocols or procedures that will be implemented at the Generating Unit, contracts with fuel suppliers, testing or sampling regimes).	
F.3.5 Fuel Source Plan includes adequate assurance that the fuels stored at or brought to the Generation Unit will only be Eligible Biomass Fuels or fossil fuels used for co-firing. Yes No Comments: N/A	
F.3.6 If proposed fuel includes recycled wood waste, Fuel Source Plan provides adequate documentation to ensure that such fuel meets the definition of Eligible Biomass Fuel and also meets material separation, storage, or handling standards acceptable to the Commission and furthermore consistent with the RES Regulations.   Yes N/A N/A Comments: N/A	
F.3.7 Applicant certifies that it will file all reports and other information necessary to enable the Commission to verify the ongoing eligibility of the renewable energy generators pursuant to Section 6.3 of the RES Regulations.	-
☐ Yes ☐ No ☒ N/A Comments: N/A	
F.3.8 A copy of the Generation Unit's Valid Air Permit of equivalent authorization has been attached and the effective date and issuing state or jurisdiction has been identified.  ☐ Yes ☐ No ☐ N/A	)
Comments: N/A	

G. Other Comments/Observations: GIS # and Capacity verified on GIS website. 100% Existing. It is Maine Class II certified but no certification was provided as Maine Class II is self-registry with no certification letter released. The CT Class II Certification was provided.
