Warwick, RI 02888

Re: Docket 4478 - Narragansett Bay Commission

Dear Ms. Massaro:

Enclosed please find an original and nine (9) copies of the following:

1. The Narragansett Bay Commission's Supplemental Response to the Division of Public Utilities And Carriers' First Set of Data Requests, specifically DIV 1-12.

NBC has received notification that there will be activity on one of the Workers' Compensation claims that was originally submitted as having no costs associated with it. These costs are for a claim on Employee 3 in the rate year and will total \$22,388.40 through 3/31/15.

2. The Narragansett Bay Commission's Supplemental Response to the Division of Public Utilities And Carriers' First Set of Data Requests, specifically DIV 1-15.

It came to our attention that the invoices for the vendor for biosolids disposal did not include 220 dry tons for months from July 2013-December 2013.

3. The Narragansett Bay Commission's Supplemental Response to the Division of Public Utilities And Carriers' First Set of Data Requests, specifically DIV 1-16.

This response was updated to reflect the new dry tons number for Field's Point.

Please note that an electronic copy of this filing has been sent to the service list. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Keough Jr.", with a stylized flourish at the end.

Joseph A. Keough Jr.

Enclosures

Narragansett Bay Commission
Docket No. 4478
Responses to Division's First Set of Data Requests

DIV 1-12. Please state whether there has been any change in the status of the former employees eligible for Workers Compensation – Old Claims provided in the responses to DIV. 1-10 and DIV. 2-4 in Docket No 4364. If yes, provide details.

Supplemental Answer: Yes, see table below.

Claimant	Date of Loss	Status
Former Employee 1	9/21/1983	Deceased
Former Employee 2	12/19/1988	Deceased
Former Employee 3	12/4/1993	\$22,388.40 through 3/31/15
Former Employee 4	8/26/199	Claim - Closed
Former Employee 5	11/15/1984	Continue - est. \$1,000/year

Narragansett Bay Commission
Docket No. 4478
Responses to Division's First Set of Data Requests

DIV 1-16. Please provide supporting documentation for the assumption that the biosolids production at Field's Point will continue to increase beyond the most recent levels.

Supplemental Answer: The figures clearly show an increasing trend with respect to biosolids production and according to NBC's Operations Manager this is the result of higher treatment levels achieved through the new BNR facilities at Field's Point. The facilities went on line in April 2013 and the chart below shows that on a 12-month moving average (which adjusts for seasonal impacts) the annual production is clearly trending upward. Simply straight-lining dry ton production from July 2013 through December 2013 results in an annual production of over 9,400 dry tons for FY 2014, the interim year in this docket.
