**MEMORANDUM**

TO: Docket Nos. 4513 Service List

FROM: Cynthia Wilson-Frias, Deputy Chief of Legal Services

RE: Proceeding to Establish a Pilot Metering Proposal for Municipal-Owned Streetlights – National Grid’s December 21, 2016 Status Report and Request for Modifications to the Pilot

DATE: January 17, 2017

Thank you for attending today’s status conference. After a discussion which suggested there was interest from the parties in moving forward with the pilot rather than discontinuing it, it was agreed that the parties would meet and develop a joint report to the PUC addressing where consensus or lack of consensus exists on developing and implementing a revised work plan designed to achieve the goals set forth in the PUC Order establishing this docket.

National Grid was also requested to give serious consideration and present ways that the information gleaned and lessons learned from the Information System Studies could be used to inform other dockets and other applications. This one area is responsible for a significant portion of the increased budget estimates as is the project management category. National Grid was requested to consider if any of the activities in this line item could be similarly transferable.

02/17/2017 – Joint report due to the Commission

03/01/2017 – 2:30 PM – Status conference, if needed
