RE: Steere Electric LLC – Docket No. 4519

Dear Mr. Steere,

The Commission has completed its review of the supplemental documentation submitted on behalf of Steere Electric, LLC (Applicant) on February 2, 2015 regarding the Steere Electric LLC Generation Unit assigned GIS identification number and Commercial Operation Date. The supplied information received indicates that the facility began Commercial Operations on February 2, 2015 and that the facility has been assigned the NEPOOL-GIS Asset Identification Number MSS46998. The information provided also included the ISO-NE Generation Asset Registration Form identifying a nameplate capacity of 0.072 MW for the Steere Electric Generation Unit.

Commission Order No. 21641 approved Steere Electric's application for eligibility as a facility with a nameplate capacity of 0.0918 MW (DC). On February 4, 2015 in response to PUC's inquiry, the Applicant clarified that the nameplate capacity is reported in terms of AC capacity. Commission finds this acceptable and will update our records to reflect a nameplate capacity of 0.072 MW for the Steere Electric LLC Generation Unit. With this letter, Commission Staff also notifies the GIS Administrator of this update.

Commission Staff has determined that the supplied documentation is acceptable, and as authorized in Commission Order No. 21641 in Docket No. 4519, Commission Staff has assigned to the Steere Electric, LLC the unique Rhode Island Public Utilities Commission Eligible Renewable Energy Resource Facility Certification Number RI-4519-N15. Renewable Energy Certificates associated with the production of energy from the Steere Electric, LLC, which are minted on or after February 2, 2015, are eligible for the Rhode Island Renewable Energy Standard.

I can be reached at (401) 780-2107 should you have any questions regarding this matter.

Sincerely,

Luly E. Massaro
Commission Clerk

cc: James Webb - Administrator, NEPOOL GIS
