Re: Jericho Power Class I REC Certification

Ms. Massaro,

Please accept this letter as notification that the Jericho Wind farm in Berlin, NH, was commercially online and generating electricity as of Monday, October 26, 2015. Upon receipt of this letter, we respectfully request that you certify the project as eligible to generate RI Class I RECs.

For your files, we are attaching communication with ISO-NE regarding the test power currently being produced and its eligibility for RECs. We are also including communication with James Webb, the NEPOOL GIS Administrator, indicating that he is aware of the project and is awaiting final approval from RI PUC verifying the project's RI REC Class I certification for the NEPOOL GIS system. Lastly, we are including communication from Eversource, the local utility, confirming that they started seeing energy on Monday, October 26, 2015.

If you have any questions, please do not hesitate to contact us.

Thank you,

Nate Hanson

Mark,

See below from Eversource regarding power generation. Would you like something more formal?

Mike,

Copying you for your files.

Best,
Lindsay

Lindsay - yes, I can confirm that on behalf of Eversource (see meter readings below). Is this email adequate? If there is something more formal required, let me know or pass it along and I can sign it Monday.
Thanks

This appears to be confirmation that they reviewed your application, however the certification is pending notifying the PUC of the commercial operation date. Once they certify the project, they will issue you a certification letter with a unique NH PUC RPS certification ID to be applied to your wind project. At that point I would update the GIS with the NH eligibility.

James,

See attached. We received approval from NHPUC.

Best,
Lindsay

Hi Lindsay, sounds like you are all set on the meter side. I'll wait to hear back on your NH approval. Thanks for following up on this. Have a good weekend.

James,

I contacted ISO-NE regarding test power RECs. The response is attached and affirmative that the project generates RECs associated with test power.

Please let me know if you have any questions. Assuming this is acceptable to you, we plan to confirm with the NHPUC that the project has achieved its "Initial Date of Commercial Operation" for generating RECs as the project has synched with the grid and commenced generating power.

Thank you for your help with this process.

Thank you,
Lindsay

Subject: RE: [EXT] Jericho Wind: pre-COD billing

Hi Lindsay,

I don't know much on GIS and RECs but I do know for certain that you will get RECs for all generation, even the MW you put out prior to COD.

Regards,
Jay

*** EXTERNAL email. Please be cautious and evaluate before you click on links, open attachments, or provide credentials. ***

Jay,

Will the energy generated by the wind turbines during the commissioning phase, pre-COD, be shared with NEPOOL GIS for tracking RECs?

Thanks,
