RE: Kent County Water Authority – Docket No. 4611

Dear Ms. Massaro:

Please find enclosed herewith an original and nine (9) copies of the Kent County Water Authority's Responses to the Coventry Fire District's Data Requests as required by Commissioner DeSimone in the Memorandum dated July 22, 2016. An electronic copy has been provided to the service list. Should you have any questions, please contact me. Thank you.

Sincerely,

Mary B. Shekarchi
Attorney at Law

KENT COUNTY WATER AUTHORITY

Docket No. 4611

Response to First and Second Set of Data Requests (Follow-up__

From Coventry Fire District

July 22, 2016

CFD-1, CFD-2, CFD-3, CFD-4, CFD-5: The objections are overruled to the extent that the CFD is seeking any information KCWA has regarding ownership of the public fire hydrants within each municipality or fire district to which public fire protection bills are sent. KCWA shall provide any and all records relating to ownership of fire hydrants.

CFD: 1) List each public fire hydrant for which you seek to charge each Intervenor a rental fee by street and other identifying data in such manner that a layman can locate and identify the fire hydrant.

CFD: 2) As to each such public fire hydrant, set forth all facts, documents, deeds, grants, easements, licenses, bills of sale or other indicia upon which you rely in asserting by implication, or otherwise, that you own such fire hydrant and attach copies of the same.

CFD: 3) As to each such public fire hydrant, identify those which you contend were built, constructed or installed by any person, firm or entity other than you, set forth all facts, documents, deeds, grants, easements, licenses, bills of sale or other indicia upon which you rely in asserting by implication, or otherwise, that such fire hydrant was sold, conveyed or demised to you by any means whatsoever, including any consideration therefore, and attach copies of the same.

CFD: 4) As to each such public fire hydrant, which you contend was built, constructed or installed by any person, firm or entity other than you; identify the name and last known address of such person, firm or entity.

CFD: 5) Except as provided in response to a previous data request, as to each such public fire hydrant, which you contend was built, constructed or installed by any person, firm or entity other than you and which was conveyed to you, set forth the consideration for such conveyance.

RESPONSE: Ownership is clearly defined. Please see attached copies of the 1st KCWA regulations issued and current regulations.

Witness Responsible: T. Brown

**KENT COUNTY
WATER AUTHORITY**

**TO SUPERSEDE
PRESENT RULES AND REGULATIONS**

of the

Warwick & Coventry Water Co.

Pawtucket Valley Water Co.

East Greenwich Water Supply Co.

WEST WARWICK, R. I.

FILED APRIL 30, 1953

EFFECTIVE JULY 1, 1953

Amended 1-1-74

R. I. D. P. U. A. No. 3

**SECTION 7
FIRE HYDRANTS**

AUTHORIZATION:

The Kent County Water Authority shall install public fire hydrants at the written request from the proper City, Town or Fire District authority; subject however to all of the provisions described in Section 5 entitled "Main Pipe".

OWNERSHIP OF HYDRANTS:

All public fire hydrants and their connections are installed and maintained by the Kent County Water Authority and remain a part of the Authority's water system. No connection charge is placed against the installation of hydrants.

The use of hydrants for public fire protection shall be paid for by the requesting authority in accordance with provisions of "Annual Fire Hydrant Rental" as noted under "Rates for Water".

OBSTRUCTING FIRE HYDRANTS:

No person shall obstruct the access to any fire hydrant by placing or permitting any snow, debris, building material or other obstruction to remain on or about the hydrant which will in any manner interfere with its immediate use.

USE OF HYDRANTS:

Public fire hydrants are installed for the sole purpose of fire protection; and with the exception of the members of the Fire Departments operating the same for the legitimate purpose of extinguishing fires, no other use of such hydrants shall be made without the written consent of the Kent County Water Authority.

**SECTION 8
GENERAL**

CROSS CONNECTIONS PROHIBITED:

No plumber nor any other person shall cause a physical connection to be made between the Kent County Water Authority water supply and any other water supply, for commercial, domestic, sanitary, fire protection, boiler feed, or for any other purpose whatsoever.

No water closet, urinal bowl, or any other fixture shall be supplied directly from the Authority water system thru a flushometer or other valve unless such valve is set above the water closet, urinal bowl, or other fixture in such a manner as to prevent any possibility of back siphonage or pollution.

No plumbing fixtures, devices, or construction shall be installed which will provide a cross-connection between the Authority supply and a drainage system, soil or waste pipe, so as to permit or make possible the back flow of sewage or waste into the supply system. Draw-off pipes for draining sprinkler systems shall not be connected into a drainage system or a submerged pit.

If the Authority water supply is delivered to a tank which is also supplied with water from any other source, such tanks shall be open to atmospheric pressure and the authority water supplied above the maximum level in the tank. The tank shall be equipped with an overflow pipe of ample size to fix definitely the maximum level of water. There shall be at least 6 inches between the invert of the pipe supplying Authority water and the maximum level of water in the tank.

\$30.00 PER BOOK

subject to all the provisions of the Rules and Regulations of Kent County Water Authority and Rhode Island Public Utilities Commission.

2.6.1.2 The Kent County Water Authority has the right to determine the necessity for and the advisability of granting any application for this special service and has the right to determine the size of the service pipe, which will be utilized. This will depend upon the size of the street main available, the available pressure and volume on the main, the impact on the existing customers and capacity of the fire protection equipment within the building.

2.6.1.3 Connection between a fire protection water supply system and the water supply for human consumption to any premises without reduced pressure zone backflow protection is prohibited. It is mandatory that any fire protection water system be isolated from the domestic water supply system in all premises in a configuration that prevents any possibility of contamination of the domestic water supply.

2.6.1.4 All fire protection equipment for any building or premises connected to the Kent County Water Authority service shall be confined within the building and/or on the premises serviced. Where two or more connections are authorized for one building or premises, they shall be kept separated.

2.6.2 Inspection Fire Service:

2.6.2.1 All fire services shall be subject to periodic inspection by an authorized representative of the Kent County Water Authority. The property owner shall give the Authority representative assistance and use of the facilities for making this survey and provide any information that the Authority representative may need to complete his/her inspection requirements.

2.6.2.2 Violation of any of the rules governing fire supplies may result in immediate termination of service.

2.6.3 Public Fire Hydrants:

2.6.3.1 The Kent County Water Authority will install public fire hydrants at the written request from any city, town, or fire district authority. The requesting authority shall be responsible for payment of the quarterly fees in accordance with provisions for annual fire hydrant rental of Kent County Water Authority and any subsequent amendments. The installation shall be subject to all the provisions of these regulations, as to materials for service extension and construction.

2.6.3.2 All public fire hydrants and their connections shall be installed and maintained by the Kent County Water Authority and remain a part of the

Kent County Water Authority water system. No connection charge is placed against the installation of public fire hydrants.

2.6.3.3 Public fire hydrants are installed for the sole purpose of fire protection by members of a fire department. No other use of such hydrants shall be made without written consent of the Kent County Water Authority.

2.6.3.4 No person shall obstruct the access to any fire hydrant by placing or permitting any snow, debris, building material, or other obstruction to remain on or about the hydrant which would in any manner interfere with its immediate use. A minimum of a 4 foot radius from the operating nut of the hydrant is required to be kept clear from obstructions.

2.6.3.5 Public owned hydrants shall not be utilized for any reason other than emergency fire fighting or required fire fighting safety training. All fire fighting training involving the use of a public fire hydrant must be scheduled with and approved by the Kent County Water Authority prior to the commencement of training. A minimum of one-week notice is required, in order that the Kent County Water Authority can evaluate the current water demand situation within the area that will be affected by the training.

2.6.3.6 Fire departments are not allowed to flush or pressure test any hydrants, nor to fill trucks with water, nor operate hydrants, except in emergency situations, without prior notification given to Kent County Water Authority. Any water usage resultant from unauthorized operation of a hydrant shall be billed to the violator at the posted rates together with all damages and all court costs incurred by Kent County Water Authority, including but not limited to legal fees, labor hours, materials expended, any investigatory costs to determine the identity of the violator(s), and water used and all court costs.

2.6.4 Private Fire Hydrants:

2.6.4.1 Private fire hydrants will only be allowed by application to the Kent County Water Authority, provided that the hydrant type and installation meets all requirements of these rules and regulations for public hydrants. All private fire hydrant connections may only be made behind a master meter containing an approved type backflow preventer. The owner or developer is responsible for all costs associated with private hydrant installation and maintenance.

2.6.4.2 Private owned hydrants shall not be used for any reason other than emergency fire fighting and required maintenance. All maintenance involving the flowing of water through the hydrant must be scheduled with and approved by the Kent County Water Authority prior to

CFD-6: Objection is overruled to the extent that KCWA shall provide, in the aggregate, by year for each year since 2000, the total amount of maintenance or replacement costs related to fire hydrants. Such information shall be broken out by municipality or fire district where possible. The remainder of the question relating to installation shall be responded to in full and KCWA shall provide all records relating to the installation of hydrants.

CFD-6): As to each such public fire hydrant, which you contend you built, constructed or installed, advise of the date of construction, date the hydrant was placed in service (if different), set forth all costs of construction, set forth all costs of maintenance since construction (itemized by year), set forth the hydrant's life expectancy and attach records of all maintenance performed on said hydrants.

Response:

Hydrant maintenance costs in the aggregate by year since 2000 as follows:

FY	AMOUNT	FY	AMOUNT
06/2000	\$106,088.65	06/2009	\$ 97,044.51

CFD-7, CFD-8: Objection is overruled to the extent that CFD is seeking for the total number of public fire hydrants, KCWA shall identify how any have been fully amortized.

CFD-7) Identify the number of public fire hydrants within each fire district whose cost of construction or installation has been recovered.

CFD- 8) Identify the number of public fire hydrants within each fire district whose cost of construction or installation has not been recovered and the remaining balance thereof.

RESPONSE: The majority of hydrants are paid with rate revenue through the IFR program therefore, amortization does not apply. The numbers of hydrant paid with bond proceeds still outstanding would be de minimus.

Witness Responsible: J. Gershkoff

CFD-10: Objection is overruled to the extent that KCWA shall provide copies of its fire protection tariffs approved for effect since 2000, or in the alternative, where available, links to KCWA's compliance tariffs located on the PUC website.

CFD 10): Set forth and list by year, each tariff authorizing you to charge for public fire hydrants, the amount of the charge authorized by the tariff.

RESPONSE: Please refer to CFD2-1 response previously provided for copies.

Witness Responsible: T. Brown

CFD-14: Objection is sustained on the basis that the public fire hydrant system is not separate from the KCWA water system. However, to the extent that it appears CFD is seeking an explanation of the costs allocated to the public fire protection service that are included in the current rate request, KCWA shall so respond.

CFD-14): Set forth in detail the total cost for construction the public fire hydrant system in each municipality or district, your projected cost of maintenance and repair, the cost of money for any borrowing made by you to pay for the construction of the fire hydrant system, and the money which you have recovered, to date, in amortizing or paying off the total cost of such construction.

Response: As noted by the Commission's July 22, 2016 ruling, there is no "public fire hydrant system"; KCWA's entire water supply, pumping, transmission and distribution system is an integral part of the public fire hydrant system. The public fire hydrants by themselves are ineffective and useless for the extinguishment of fires without the remainder of the system that is needed to get adequate water to each of the public fire hydrants.

My Schedule 3B presents the value of all of KCWA's system assets as of June 30, 2015. The total value is \$145,776,119. The assets associated with service pipes (\$2,919,253) and T&D meters (\$2,193) are not needed for the "public fire hydrant system" and would reduce the overall cost of system components used for fire protection to \$142,854,673. As shown on this schedule, the total asset values were allocated to various cost components including fire services. \$28,802,669 or some 19.8% of the system assets are allocated to the total fire protection function (public and private fire services).

As shown on my Schedule 4A, the total fire protection costs are divided between public and private fire service based on relative, potential demands. The non-public fire hydrant assets assigned to fire protection equals the \$28,802,669 of total fire protection assets minus \$1,355,527 of public fire hydrant assets or \$27,447,141. Since 89.81% of the demands are related to public fire service, 89.81 % of the \$27,447,141 or \$24,649,284 are related to public fire service. When the value of the public fire hydrants assets (\$1,355,527) is added back to this, it yields a total "public fire hydrant system" value of \$26,004,811.

Witness Responsible: C. Woodcock

CFD-19 Objection overruled.

CFD-19): What management or other similar studies have you done or had done to provide you with options that would allow you to run your business more efficiently?

RESPONSE: Only two management studies are known to have been prepared.

Management Audit – Phase One Report June 1988

Management & Operation Study Final Report August 1997

The second report was never accepted by the Authority or implemented.

Witness Responsible: T. Brown

CFD-22, CFD-23 (Second Set of Data Request CFD-2 & CFD-2): Objection is overruled to the extent Coventry Fire District is requesting further explanation of the reason for the increase to fire protection charge from the costs used to set the current rates and the costs used to propose the rate year rates and proposed increases.

CFD-22): Assume that the rate schedule for Public Fire Service applicable for service to public fire hydrants in your service area on a quarterly basis is \$139.33 (effective December 7, 2013 to present). Assume that the proposed rate schedule for your FY2018 on a quarterly basis is \$260.89. To what facts, costs or other basis do you attribute the need to increase the rate schedule for Public Fire Service applicable for service to public fire hydrants in your service area on a quarterly basis by \$126.56?

CDF-23): Assume that the rate schedule for Public Fire Service applicable for service to public fire hydrants in your service area for your FY2018 on a quarterly basis is \$260.89. Assume that the proposed rate schedule for your FY2019 on a quarterly basis is \$277.28. To what facts, costs or other basis do you attribute the need to increase the rate schedule for Public Fire Service applicable for service to public fire hydrants in your service area on a quarterly basis by \$16.39?

Response: The current \$139.33 quarterly charge is based on an across the board increase to the prior public fire hydrant charges. The prior charges were increased 8.15% from the \$128.83 charge in effect prior to docket 4142. In Docket 3942, the total fire protection cost of \$1,203,801 was spread across 2336 public fire hydrants. With the 8.15% across the board increase, the total costs of public fire protection in Docket 4142 were \$1,301,911.

The attached table shows the changes in costs by category for each of the past dockets and the current docket with the two step increases. As can be noted, there is a significant change in the amount for Infrastructure Replacement (IFR). This change is due to a change in state law that allows for the collection of fire protection related IFR costs from public fire protection charges.

Witness Responsible: C. Woodcock
