**Re: The Narragansett Electric Company d/b/a National Grid
Aquidneck Island Reliability Project
PUC Docket No. 4614**

Dear Ms. Massaro:

I am enclosing for filing on behalf of The Narragansett Electric Company d/b/a National Grid ("TNEC") a Motion for Protective Order and TNEC's responses to the Rhode Island Division of Public Utilities Second Set of Interrogatories and Requests for Production in the above docket. I am sending electronic copies to the Service List and will provide a hard copy to anyone that requests it.

We are filing the unredacted items under seal by copy of this letter by hand delivery. We request that the unredacted items be protected from public disclosure and subjected to a protective order.

Sincerely,

Peter V. Lacouture

Enclosure

Copy to: PUC Docket No. 4614 Service list (via e-mail)

In re The Narragansett Electric Company :
d/b/a National Grid :
(Aquidneck Island Reliability Project) : Docket No. 4614

**Motion of The Narragansett Electric Company d/b/a National Grid
for Protective Treatment of Confidential Information**

Now comes The Narragansett Electric Company d/b/a National Grid (“TNEC” or the “Company”) and hereby moves that the Public Utilities Commission (“PUC”) grant protection from the public disclosure of certain confidential information submitted in the Company’s responses to the Rhode Island Division of Public Utilities’ Second Set of Data Requests (“Data Requests”), as permitted by R.I.G.L. §38-2-2(4)(F).

I. INTRODUCTION

Concurrently with this Motion, the Company is submitting its responses to the Data Requests. The responses that require protective treatment from disclosure to the public include the unredacted (i) Attachment 2A to Data Request Response R-II-2 and (ii) Attachment 3A to Data Request Response R-II-3 (collectively, the “Attachments”). The Attachments were redacted to avoid public disclosure of critical energy infrastructure information (“CEII”). The CEII in the Attachments should not be treated as a public record under state law as the information is highly sensitive scientific and technological data, “the disclosure of which would endanger the public welfare and security.” R.I.G.L. §38-2-2(4)(F). This motion seeks protection for the unredacted version of Attachments and any other CEII which may be used during these proceedings (collectively, “CEII Materials”).

CEII is defined by the Federal Energy Regulatory Commission (“FERC”) as:

Specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure (physical or virtual) that:

1. Relates details about the production, generation, transmission, or distribution of energy;
2. Could be useful to a person planning an attack on critical infrastructure;
3. Is exempt from mandatory disclosure under the [Federal] Freedom of Information Act, 5 U.S.C. § 552; and
4. Does not simply give the general location of the critical information.

18 CFR § 388.113(c)(1). In turn, “critical infrastructure” is defined as:

Existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health or safety, or any combination of those matters.

18 CFR § 388.113(c)(2).

Accordingly, the Company requests that a protective order be issued by the PUC to protect from public disclosure the CEII Materials and that any such information which is used in these proceedings be made a part of the sealed record.

II. LEGAL STANDARD

Rhode Island’s Access to Public Records Act (“APRA”), R.I.G.L. §38-2-1 *et. seq.*, sets forth the parameters for public access to documents in the possession of state and local government agencies. Under APRA, all documents and materials submitted in connection with the transaction of official business by an agency are deemed to be a “public record,” unless the information contained in such documents and materials falls within one of the exceptions specifically identified in R.I.G.L. §38-2-2(4). Therefore, to the extent that information provided to the PUC falls within one of the designated exceptions to APRA, the PUC has the authority under the terms of APRA to deem such information to be confidential and to protect that information from public disclosure.

In that regard, R.I.G.L. §38-2-2(4)(F) provides that the following records shall not be deemed public:

Scientific and technological secrets and the security plans of military and law enforcement agencies, the disclosure of which would endanger the public welfare and security.

The Rhode Island Supreme Court has held that the agencies making determinations as to the disclosure of information under APRA may apply the balancing test established by the Court in Providence Journal v. Kane, 577 A.2d 661 (R.I. 1990). Under this balancing test, the PUC may protect information from public disclosure if the benefit of such protection outweighs the public interest inherent in disclosure of information pending before regulatory agencies.

III. BASIS FOR CONFIDENTIALITY

The Company seeks protection from public disclosure of CEII Materials not for its own internal purposes, but for the welfare and safety of the public. The general practice of the Company and its affiliates is to provide CEII Materials to select external audiences on a need-to-know basis after execution of Non-Disclosure Agreements. Because of national security concerns as evidenced by FERC's CEII regulations, quoted above, the Company seeks a Protective Order for the CEII Materials in this proceeding.

The benefits of protecting this information from the public outweigh the public interest inherent in disclosure of information pending before regulatory agencies. The electric transmission infrastructure information in the CEII Materials is critical to the safe and reliable operation of the electric system and the safety of the public in general. The information should be treated in a confidential manner because disclosure of this information to the public could

facilitate the ability of individuals to damage the Company's utility infrastructure and the regional electric transmission system.

Public disclosure of this information would be contrary to the public interest and represent an undue risk to public safety. Extreme care must be exercised to protect sensitive information regarding the location of and operating information related to critical electric infrastructure from unnecessary public disclosure. For these reasons, the PUC should determine that the CEII materials are "scientific and technological secrets ... the disclosure of which would endanger the public welfare and security" and provide protective treatment for the CEII Materials by granting this Motion for a Protective Order pursuant to R.I.G.L. §38-2-2(4).¹

IV. CONCLUSION

The Company respectfully requests that the CEII Materials identified herein (i) be kept confidential indefinitely, (ii) not be placed in the public docket, and (iii) be disclosed only to the PUC members and to other parties that sign non-disclosure agreements.

WHEREFORE, the Company respectfully requests that the PUC grant its Motion for Protective Treatment as stated herein.

¹ 18 CFR §§388.112 and .113 of the FERC regulations provide for protection of CEII material submitted to FERC. As such, CEII material is also exempt from public disclosure under §38-2-2(4)(S) which exempts from disclosure records "required to be kept confidential by federal law or regulation..."

Respectfully submitted,

The Narragansett Electric Company d/b/a
National Grid
