

RENEWABLE ENERGY RESOURCES ELIGIBILITY **GDS TEAM RECOMMENDATION** For Consideration By The STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION

(Version 7 – September 12th, 2016)

Date: 9/13/2016 Docket #: 4629

Application Received: 7/12/2016. Application is to be certified as an existing renewable energy resource. On 8/16/2016 supplemental information was requested, including site

information and a completed Appendix C.

Generation Unit Information:

resource is recommended.

Unit Name: Worumbo Hydroelectric Project Unit Owner: Brown Bear II Hydro, Inc.

Unit Size (max. MW): 19.4 Location (city, state): Lisbon Falls, ME

Commercial Operation Date: 2/28/1989
Type of Certification Requested: ☑ Standard Certification ☐ Prospective Certification (Declaratory Judgment)
Generation Type and Technology Information: (check all that apply) ☐ Repowered Project ☐ Incremental Generation ☒ Incremental Intermittent ☐ Customer-Sited or Off-Grid System (or associated aggregations) ☐ Generation Unit Located in Control Area Adjacent to NEPOOL: NY ISO ☐ Solar ☐ Wind ☐ Ocean Thermal ☐ Geothermal ☒ Small Hydro ☐ Eligible Biomass ☐ Unlisted Biomass ☐ Biomass (fossil co-fired/multi-fuel) ☐ Fuel Cell (using an eligible renewable resource)
Recommendation: ☑ Approve (GIS Certification #: MSS 487) ☐ Reject ☐ Public Hearing Needed ☑ Existing Renewable Energy Resource ☐ New Renewable Energy Resource ☐ Capable of Producing as Both Existing & New Renewable Energy Resource Commentation: The Warumbe Project (FERC No. 2428) is leasted on the Andreasessia.
Comments: The Worumbo Project (FERC No. 3428) is located on the Androscoggin

River in Lisbon Falls and Durham, Maine. Approval as an existing renewable energy

RENEWABLE ENERGY RESOURCES ELIGIBILITY **GDS TEAM RECOMMENDATION**

For Consideration By The STATE OF RHODE ISLAND PUBLIC UTILITIES COMMISSION (page 2 of 2)

Primary Contact Name, Numbers and Address:

Scott D. Hall, Vice President

Brown Bear II Hydro, Inc.; PO Box 267, Orono, ME 04473

Phone: (207) 461-3617

Fax: () -

Email: shall@worumbohydro.com

Backup Contact Name, Numbers and Address:

Lewis C. Loon, Manager, Operations and Maintenance - USA 37 Alfred A. Plourde Parkway, Suite 2, Lewiston, ME 04240

Phone: (207) 786-8834 Fax: (207) 786-8812

Email: Lewis.Loon@kruger.com

Authorized Representative Name, Numbers and Address:

Jon Chadbourne, Director, Risk Management c/o ArcLight Capital Partners, LLC; 200 Clarendon Street, 55th Floor, Boston, MA 02116

Phone: (617) 531-6397 Fax: (617) 867-4698

Email: jchadbourne@arclightcapital.com

RENEWABLE ENERGY RESOURCES ELIGIBILITY DETAILED GDS TEAM APPLICATION REVIEW RESULTS

(Template V6 – September 12th, 2016) **Date of Final Review: 9/12/2016**

Note: Depending on the type of application (project vintage, type, location, fuel source, etc.) not all of these data items will be applicable.

A.		vable Energy Resource – Vintage (see appropriate Seations, Application Sections 3.1-3.9 and Appendix C):	ections of RES
		Generation Unit meets the definition of an Existing Ricce noted in RES Regulations Section 3.10 (first ente ion before 12/31/1997).	0,
	·	nents: Commercial Operation achieved 2/28/1989	
	A.2 Renev	Generation from the Unit meets one of the defi	
	Comn	nents: See below.	□ Yes ⊠ No □ N/A
		A.2.1 If Generation Unit is at a new site, adequiprovided to ensure that it first entered common December 31, 1997.	
		Comments: Facility is at an existing site	□ Yes □ No ⋈ N/A
		A.2.2 If Generation Unit is at the site of an Existin Resource, adequate documentation is provided to entered commercial operation after December 31 Existing Renewable Energy Resource has been retired by the such new Generation Unit.	o ensure that it first I, 1997 and that the ired and replaced with
		Comments: Commercial operation was before 12/3 applying to be an eligible existing resource	☐ Yes ☐ No ☒ N/A 1/1997; they are
		A.2.3 If a Repowered Generation Unit (as defined RES Regulations – complete replacement of Princrease in efficiency or material decrease in demonstration that at least 80% of resulting tax Generation Unit's plant and equipment is derived from made after December 31, 1997), adequate documensure that the entire output of said unit first entered after December 31, 1997 at the site of existing Generation Comments:	rime Mover, material air emissions, and basis of the entire material expenditures entation is provided to dommercial operation

A.2.4 If a multi-fuel facility, adequate documentation is provided to ensure that the renewable energy fraction of output from a Generation Unit in which

	an Eligible Biomass Fuel is first co-fired with fossil fuels after December 31, 1997.
	□ Yes □ No ⋈ N/A
	Comments:
	A.2.5 If Incremental Output from a <u>non</u> -Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.v of the RES Regulations.
	☐ Yes ☐ No ☒ N/A Comments:
	A.2.6 If Incremental Output from an Intermittent Existing Renewable Energy Resource, adequate documentation is provided to ensure that such output is attributable to capital investments for efficiency improvements or additions of capacity that were demonstrably completed after December 31, 1997 and that are sufficient to, were intended to, and can be demonstrated to increase annual electricity output in excess of ten percent (10%) over a Historical Generation Baseline as determined per Section 3.23.v of the RES Regulations.

B.3.1 Aggregation Agreement includes name and contact information and adequate evidence of qualifications of the Verifier to ensure that the Verifier will accurately and efficiently carry out its duties.
☐ Yes ☐ No ☒ N/A
Comments:
B.3.1.1 Additional evidence of Verifier qualifications requested and provided.
□ Yes □ No ⋈ N/A
Comments:
B.3.2 Aggregation Agreement includes a declaration of any and all business or financial relations between aggregator and Verifier sufficient to ensure the independence of the Verifier in accordance with Section 6.8.iii.c of the RES Regulations (10% or more ownership in voting stock, or family officer/etc.).
☐ Yes ☐ No ☒ N/A
Comments:
B.3.3 Aggregation Agreement includes statement indicating under what circumstances the Verifier would not be considered sufficiently independent of the individual Generation Unit, and that Generation Units not meeting this independence test would not be allowed to participate in the aggregation. □ Yes □ No ⋈ N/A
Comments:
B.3.4 Aggregation Agreement identifies the type of technology that will be included in the aggregation and provides a statement that the aggregation will include only individual Generation Units that meet all the requirements of the RES Regulations (physical location, vintage, etc.). □ Yes □ No ⋈ N/A
Comments:
B.3.5 Aggregation Agreement provides an adequate description of proposed operating procedures for the aggregation, by which the Verifier shall ensure that individual Generation Units in the aggregation comply with all eligibility requirements and that the NEPOOL GIS Certificates created accurately represent generation (see Section 6.8.iii.e of the RES Regulations).
☐ Yes ☐ No ☒ N/A
Comments:
 B.3.5.1 At a minimum the proposed operating procedures include reasonable and sufficient details for: Determining that the Generation Unit exists and is in
compliance with RES Regulations and Commission- approved Aggregation Agreement.
☐ Yes ☐ No ☒ N/A

Comments:

C.2.2 Applicant acknowledges that energy delivered from such Generation Unit into NEPOOL will be verified by the following:

- A unit-specific bilateral contract for the sale and delivery of such energy into NEPOOL
- Confirmation from ISO that the energy was actually settled in the ISO Market Settlement System, and
- Confirmation through the North American Reliability Council tagging system that the import of the energy into NEPOOL actually occurred, or such other requirements as the Commission deems appropriate

Comments:

D.	Eligible Fuel Source – Solar, Wind, Ocean Thermal, Geothermal, or Fuel Cell (using an eligible renewable resource) (see appropriate Sections of RES Regulations and Application Section 2.4):
	□ Yes ⊠ No
	Fuel Source:
E.	Eligible Fuel Source – Small Hydro Facilities (see appropriate Sections of RES Regulations and Application Sections 2.5-2.6):
	⊠ Yes □ No
	E.1 Aggregate capacity does not exceed 30 MW.
	Comments: 19.4 MW
	E.2 If "New Renewable Energy Resource", applicant acknowledges that facility does not involve any new impoundment or diversion of water with an average salinity of 20 parts per thousand or less.
	☐ Yes ☐ No ☒ N/A
	Comments: Existing resource at an existing impoundment
F.	Eligible Fuel Source – Biomass Facilities (see appropriate Sections of RES Regulations, Application Sections 2.7 and Appendix F):
	☐ Yes ⊠ No
	F.1 Generation Unit uses a biomass fuel source listed in RES Regulations Section 3.7.
	□ Yes □ No ⋈ N/A
	Comments:
	F.2 If source is other than RES Regulations Section 3.7-listed, said source has been designated as "clean wood."
	□ Yes □ No ⋈ N/A
	Comments:
	F.3 Fuel Source Plan can reasonably be expected to ensure that only Eligible Biomass Fuels will be used, and in the case of co-firing ensure that only that proportion of generation attributable to an Eligible Biomass Fuel be eligible. □ Yes □ No ⋈ N/A
	Comments:
	F.3.1 Fuel Source Plan specifies the type of Eligible Biomass Fuel to be used.
	□ Yes □ No ⊠ N/A
	Comments:
	F.3.2 If proposed fuel is "clean wood", Fuel Source Plan provides adequate substantiation as to why the fuel source should be considered a clean wood.

Comments:	⊔ Yes ⊔ No ⋈ N/A
F.3.3 In the case of co-firing with a fossil fuel, Fuel an adequate description of how such co-firing wil relative amounts of Eligible Biomass Fuel and fossil and how the eligible portion of generation output we such calculations based on the energy content of the	I occur and how the fuel will be measured, vill be calculated (with
