On August 1, 2017, National Grid submitted its Distribution Adjustment Clause filing to the Public Utilities Commission for effect November 1, 2017, in accordance with the Company's gas Tariff, RIPUC NG No. 101, Section 3, Schedule A. The Distribution Adjustment Clause includes the Pension Adjustment Factor (PAF) and the Earnings Sharing Mechanism ("ESM") factors. The Company did not include a computation of the ESM factor in its August 1 filing. The Company's filing of August 1, 2017 was supplemented by a filing on September 1, 2017, which included a calculation of the ESM factor.

The Division has been assisted in the review of the pension adjustment factor and earnings calculation by David Effron of Berkshire Consulting. On August 31, 2017, the Division submitted data requests to National Grid seeking additional information, documentation, and clarification relative to the PAF filing. On September 21, 2017, National Grid provided responses to the Division's requests. Based on its review of the Company's filings and the responses to associated data requests, the Division has no recommended adjustments to the Company's Gas PAF and recommends its approval for effect November 1, 2017.

National Grid calculated an ESM factor of zero in its filing of September 1, 2016. On September 8, 2017, the Division submitted data requests to National Grid seeking additional information, documentation, and clarification relative to the ESM. The Company submitted responses on October 3. Based on its review of the Company's filings and the responses to associated data requests, the Division has no recommended adjustments to the Company's ESM and recommends its approval for effect November 1, 2017.
