Column Notes

(b) Per Tax Department

4/ Impact of Federal Tax Reform on June 30, 2017 balance:
June Balance @ 35% \$122,924,988

Apr - Jun @ 31.55% \$687,425

Apr - Jun @ 35.00% \$762,595

Adjustment (\$75,170)

For decrease in federal tax rate

June Balance as Adjusted \$122,849,818

5/ The blended rate is calculated by weighting 31.55% for Sep 2017 through March 2018 and 21% for Apr 2018 through Aug 2018.

22					
23 Normalizing Adjustment					\$333,759

1/ 5 Year Average to be updated to include FY 2018 costs when the reports are made available by the Company's actuary

2/ The Company records a liability on its balance sheet in accordance with FAS 112/ASC 712 to accrue for the costs of benefits to employees who are in an inactive status, primarily employees who are on long-term disability. Adjustments in any particular year can increase or decrease the reserve resulting in positive or negative expense. Reserve decreases and the resulting negative expense would not be expected to occur on a long-term basis nor be reflected as positive income in a cost of service. As such, the minimum expected cost for FAS 112/ASC 712 for rate making purposes would be \$-0-.

Postal Service Announces 2017 Mailing Services Prices

Single Price for Commercial Letters up to 3.5 ounces, Adjusts FSS Pricing; Allows Extra Weight for Standard Flats

WASHINGTON — The United States Postal Service today filed notice with the Postal Regulatory Commission (PRC) of price changes for Mailing Services products planning to take effect in January 2017. The proposal includes a two cent increase in the price of a First-Class Mail Forever stamp, returning the price to 49 cents, which was the price of a Forever stamp before the Postal Service was required to remove the exigent surcharge by the PRC. The new prices, if approved, include a single price for First-Class Mail commercial presort letters weighing up to 3.5 ounces and a reduction in the one ounce meter price to 46 cents. This pricing strategy is designed to keep bills and statements in the mail by continuing to add value to commercial First-Class Mail.

Standard Mail is being rebranded as USPS Marketing Mail to better align the product name with our customer's use of this mail class. Proposed changes in Marketing Mail include removing the Flats Sequencing System (FSS) pricing which was of concern to mailers. This change will ensure that mailers pay for flats based on their volume density instead of the equipment flats are processed on. In addition, other changes include increasing the piece

Attachment 2

Schedule 23

Page 7 of 7

pound breakpoint from 3.3 to 4.0 ounces for Marketing Mail Flats and Parcel shaped pieces to encourage mailers to include more content, which will lead to more sales for mailers and support volume growth.

Some examples of new prices as follows:

	Edgent Price	Current Price	Proposed Price	% Change (Current to Proposed)
First-Class Letters				
Meters	\$0.485	\$0.465	\$0.460	-1.1%
Auto AADC	\$0.416	\$0.399	\$0.403	1.0%
Auto 5-D	\$0.391	\$0.376	\$0.373	-0.8%
Marketing Mail Letters				
Auto 5-D DSCF	\$0.221	\$0.211	\$0.217	2.8%
Saturation DSCF	\$0.157	\$0.151	\$0.155	2.7%
Flats – Piece Rated				
Auto 5-D DSCF	\$0.348	\$0.333	\$0.335	0.6%
CR Basic DSCF	\$0.256	\$0.245	\$0.252	2.9%
CR/CR Pallet DSCF	\$0.251	\$0.240	\$0.232	-3.3%
CR/CR Pallet DDU	\$0.243	\$0.233	\$0.221	-5.2%

The last time Single Piece First-Class prices increased was in January 2014. Today's price change filing does not include any price change for Postcards, for letters being mailed to international destinations or for additional ounces for Single Piece Letters. Stamp prices have stayed consistent with the average annual rate of inflation since the Postal Service was formed in 1971. In addition, the incentive for Full-Service IMB remains the same at three tenths of a cent for First-Class and one tenth of a cent for Marketing Mail and Periodicals. The PRC will review the prices before they are scheduled to take effect on January 22, 2017.

Pricing for Periodicals, Package Services and Extra Services will also be adjusted next year and can be found at <http://www.prc.gov/docs/97/97431/NOTICE-FINAL.pdf>. Today's filing does not affect Postal Service Shipping products and services.

The Postal Service receives no tax dollars for operating expenses and relies on the sale of postage, products and services to fund its operations.

We will be providing members with information regarding the impact on nonprofit rates as soon as possible.

1/ Sales and use tax liability is comprised primarily of sales tax collected from customers on taxable sales each month. These taxable sales are reported on a calendar month basis with the liability for each calendar month payable by the 20th of the following calendar month. Since these taxable sales are spread uniformly throughout the month, the average liability date for sales tax liability is assumed to be the 15th of each calendar month. In addition to sales tax, a minor amount of use tax is paid on taxable purchases from vendors. These amounts are individually small and are also incurred uniformly throughout the month. Accordingly, the average date vendor invoices are received (i.e. 15th of the month as assumed elsewhere in this study) is used as the average liability date for use tax in each calendar month. Since the average liability and payment dates for sales and use tax are the same, both are combined in the above analysis.

2/ Rhode Island law (Sec. 44-19) requires monthly reporting and payment of sales and use tax. The return for sales and use tax liability for the month, and payment of the entire liability for that month are due no later than the 20th of the following month. Rhode Island law (Sec. 44-1) states that liability and payment dates that fall upon a Saturday, Sunday, or legal holiday are extended by law to the next business day. Also under this Sec., payments are considered timely with evidence of mailing on or before the due date.

1/ Rhode Island law (Sec. 44-26) requires the payment of estimated Corporate Gross Earnings Tax (GET) during the tax year. This code section also stipulates the above payment dates and minimum payment percentages. Code Sec. 44-1 extends the required payment dates that fall upon a Saturday, Sunday or legal holiday, to the next business day. Finally, payments are considered timely under Sec. 44-1 with evidence of mailing on or before the required date. The Company pays 40% of 85% of its prior year GET on March 15 and 60% of 85% of its prior year GET on June 15. Any remaining tax due for the calendar year is paid with its GET return on February 28 of the subsequent year.

2/ Because Gross receipts taxes are collected and remitted on a calendar year basis, this amount reflects gross receipts tax accrual for the twelve months ended March 15, 2018

1/ For the purposes of this calculation, the weighted average liability date is deemed to be the 15th of each month. This is based on the fact that on average, salaries and wages (and the corresponding unemployment tax liabilities) accrue evenly throughout the month as employee hours are worked.

2/ IRS Code Sec. 3301 stipulates quarterly payment of unemployment tax liability. 100% of the liability for each quarter must be paid by the last day of the first month following that quarter.

- 1/ Payroll dates are the actual dates on which payroll was paid.
- 2/ The IRS Code stipulates payment of all withheld FICA and Federal Income Tax within one banking day under the \$100,000 One-Day Rule. 100% of the withholding must be deposited in a Federal Depository Bank within one day of the date payments are made. Payment due dates which fall upon a Saturday, Sunday, or holiday (i.e. non-banking day) are extended until the next banking day.
- 3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated above.

1/ Payroll dates are the actual dates on which payroll was paid.
2/ Rhode Island law (Sec. 44-30) stipulates payment of all withheld State Income Tax within three banking days after the end of each quarter-monthly liability period. 100% of the withholding on all payroll paid during each quarter-monthly period must be paid no later than the third banking day after the end of that period. Under Sec. 44-1, payment due dates which fall upon Saturday, Sunday, or a legal holiday, are extended until the next banking day. In addition, payment is considered timely with evidence of mailing by the due date.

1/ Payroll dates are the actual dates on which payroll was paid

2/ Rhode Island law (Sec. 44-30) stipulates payment of all withheld State Income Tax within three banking days after the end of each quarter-monthly liability period. 100% of the withholding on all payroll paid during each quarter-monthly period must be paid no later than the third banking day after the end of that period. Under Sec. 44-1, payment due dates which fall upon Saturday, Sunday, or a legal holiday, are extended until the next banking day. In addition, payment is considered timely with evidence of mailing by the due date.

Notes:

Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated on the attached schedules. This schedule simply summarizes these two separate calculations.

1/ For the purposes of this calculation, the weighted average liability (withholding) date is deemed to be the 15th of each month. This is based on the fact that on average, weekly salaries and wages (and the corresponding Temp. Disability Ins. liabilities) accrue evenly throughout the month as employee hours are worked.

2/ Rhode Island's Temporary Disability Insurance Act (Title 28 of R.I. law) stipulates quarterly payment of Temporary Disability Insurance withheld. 100% of the liability for each quarter must be paid by the last day of the first month after that quarter ends. Under Sec. 44-1, payment dates which fall upon a Saturday, Sunday or legal holiday are extended to the next business day. Payments are considered timely with evidence of mailing by the required date.

1/ Sales and use tax liability is comprised primarily of sales tax collected from customers on taxable sales each month. These taxable sales are reported on a calendar month basis with the liability for each calendar month payable by the 20th of the following calendar month. Since these taxable sales are spread uniformly throughout the month, the average liability date for sales tax liability is assumed to be the 15th of each calendar month. In addition to sales tax, a minor amount of use tax is paid on taxable purchases from vendors. These amounts are individually small and are also incurred uniformly throughout the month. Accordingly, the average date vendor invoices are received (i.e. 15th of the month as assumed elsewhere in this study) is used as the average liability date for use tax in each calendar month. Since the average liability and payment dates for sales and use tax are the same, both are combined in the above analysis.

2/ Rhode Island law (Sec. 44-19) requires monthly reporting and payment of sales and use tax. The return for sales and use tax liability for the month, and payment of the entire liability for that month are due no later than the 20th of the following month. Rhode Island law (Sec. 44-1) states that liability and payment dates that fall upon a Saturday, Sunday, or legal holiday are extended by law to the next business day. Also under this Sec., payments are considered timely with evidence of mailing on or before the due date.

1/ Rhode Island law (Sec. 44-26) requires the payment of estimated Corporate Gross Earnings Tax (GET) during the tax year. This code section also stipulates the above payment dates and minimum payment percentages. Code Sec. 44-1 extends the required payment dates that fall upon a Saturday, Sunday or legal holiday, to the next business day. Finally, payments are considered timely under Sec. 44-1 with evidence of mailing on or before the required date. The Company pays 40% of 85% of its prior year GET on March 15 and 60% of 85% of its prior year GET on June 15. Any remaining tax due for the calendar year is paid with its GET return on February 28 of the subsequent year.

2/ Because Gross receipts taxes are collected and remitted on a calendar year basis, this amount reflects gross receipts tax accrual for the twelve months ended March 15, 2018

1/ For the purposes of this calculation, the weighted average liability date is deemed to be the 15th of each month. This is based on the fact that on average, salaries and wages (and the corresponding unemployment tax liabilities) accrue evenly throughout the month as employee hours are worked.

2/ IRS Code Sec. 3301 stipulates quarterly payment of unemployment tax liability. 100% of the liability for each quarter must be paid by the last day of the first month following that quarter.

- 1/ Payroll dates are the actual dates on which payroll was paid.
- 2/ Payment of FICA expense is governed by the same rules as the other components of Federal payroll tax deposits (see notes on monthly FICA and Federal Income Tax withholding.
- 3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated.

- 1/ Payroll dates are the actual dates on which payroll was paid.
- 2/ The IRS Code stipulates payment of all withheld FICA and Federal Income Tax within one banking day under the \$100,000 One-Day Rule. 100% of the withholding must be deposited in a Federal Depository Bank within one day of the date payments are made. Payment due dates which fall upon a Saturday, Sunday, or holiday (i.e. non-banking day) are extended until the next banking day.
- 3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated above.

1/ For the purposes of this calculation, the weighted average liability (withholding) date is deemed to be the 15th of each month. This is based on the fact that on average, weekly salaries and wages (and the corresponding Temp. Disability Ins. liabilities) accrue evenly throughout the month as employee hours are worked.

2/ Rhode Island's Temporary Disability Insurance Act (Title 28 of R.I. law) stipulate quarterly payment of Temporary Disability Insurance withheld. 100% of the liability for each quarter must be paid by the last day of the first month after that quarter ends. Under Sec. 44-1, payment dates which fall upon a Saturday, Sunday or legal holiday are extended to the next business day. Payments are considered timely with evidence of mailing by the required date.

- 1/ Number of Days in Bill = Number of days between meter reads
- 2/ Billing lag = Number of days between meter read and bill date. Once billed, the sales become part of A/R and will be included in the Collection Lag calculation.
