

Division 2-1

Request:

Referring to Schedule MAL-1-ELEC, Page 1, please provide the financial statements from which the electric revenues and expenses in Column (a) were taken. The response should also include any workpapers necessary to derive the amounts on Schedule MAL-1-ELEC, Page 1 from the relevant financial statements.

Response:

The Company previously submitted Workpaper MAL-11, the FERC Financial Statements for the test year ended June 30, 2017. Attachment DIV 2-1, Page 1, Column (b) lists the reference to Workpaper MAL-11 and Column (e) shows the reference to Schedule MAL-1-ELEC, Page 1, Column (a).

Division 2-3

Request:

Referring to Schedule MAL-11-ELEC, Pages 3 and 4, please provide the Company Books from which the components of rate base were taken. The response should also include any workpapers necessary to derive the amounts on Schedule MAL-11-ELEC, Pages 3 and 4 from the Company Books.

Response:

The amounts on Schedule MAL-11-ELEC, Page 3, Columns (a) – (c) and Page 4, Columns (a) – (c)<sup>1</sup> come from the Narragansett Electric Earnings Report filed with the Public Utilities Commission on May 1, 2017. For Columns (d) and (e), please refer to the following attachments:

- Attachment DIV 2-3-1 – Schedule MAL-11-ELEC, Pages 3 and 4 complete with sourcing for all amounts in Columns (d) and (e).
- Attachment DIV 2-3-2 – A Company Balance Sheet by FERC account.
- Attachment DIV 2-3-3 – The Calculation of Integrated Facilities Agreement Related Expenses.
- Attachment DIV 2-3-4 – The June 2017 Integrated Facilities Agreement Bill.
- Attachment DIV 2-3-5 – Accumulated Deferred Income Tax (ADIT) information provided by the Tax Department.

---

<sup>1</sup> See Bates Pages 93-94 of Book 9.

Division 2-4

Request:

Referring to Schedule MAL-11-GAS, Page 2, please provide documentation and workpapers supporting the balances on Lines 1-13 and 29.

Response:

For Lines 1-13, please see Attachment DIV 2-4.

For Line 29, please refer to the Company's response to Division 2-22 for the requested information.

Since all EE activity is removed from the revenue requirement, this amount must also be removed.

Division 2-6

Request:

Referring to Schedule MAL-3, Page 8, please provide documentation supporting the inflation indices.

Response:

Please see Attachment DIV 2-6 for the requested information.

The Narragansett Electric Company d/b/a National Grid  
Calculation Of Inflation  
Occurring Between The Test Year And The Rate Year

Calculation of Inflation Rate:

	GDPIP	CPI	
(1) Index - Midpoint of Test Year June 2017	112.4	242.7	
(2) Index - Midpoint of Rate Year Aug 2019	<u>117.5</u>	<u>254.2</u>	
(3) Increase in Index From Midpoint Of The Test Year			
(4) To The Midpoint of Rate Year			
(5) <b>Inflation Factor %</b>	<u>4.52%</u>	<u>4.73%</u>	<u>4.63%</u>
(6) Source: Moody's Analytics ; refer to page 2	2.26%	2.37%	
	GDPIP	CPI

2035Q4	165.58	374.52

Test Year: 07/01/16-06/30/17  
Rate Year 1: 09/01/18-08/31/19  
Rate Year 2: 09/01/19-08/31/20  
Rate Year 3: 09/01/20-08/31/21

The GDP Price Index in the Test Year is the average of the GDP Price Index in 2016Q3, 2016Q4, 2017Q1 and 2017Q2:

<b>GDP</b>	<b>CPI</b>
<b>112.405</b>	<b>242.68</b>

The GDP Price Index in the Rate Year is the weighted average of the GDP Price Index in 2018:Q2, 2018:Q3, 2018Q4, 2019:Q1, 2019:Q2, 2019:Q3

<b>GDP</b>	<b>CPI</b>
<b>117.898</b>	<b>254.63</b>

Inflation between the Test Year and the Rate Year is the percent difference in the GDP Price Index between the two years, with the Test Year as the base:

<b>GDP</b>	<b>CPI</b>
<b>0.9534129</b>	<b>0.9530754</b>

Doc-Header Text: Retire Intangible Assets

Company Code: 5360 Narragansett Electric Co Providence

Reversal date: 04/01/2017

Amount Information

Total Dr: 12,459,613.51 USD

Total Cr: 12,459,613.51 USD

Journal Description

This entry is to retire assets that were determined to no longer be in service. Since these assets are intangible, they are eligible for gain loss treatment. This entry also records the gain/loss based on the Net Book Value on the work order.

Division 2-9

Request:

Referring to Schedule MAL-7-GAS, Page 5, please explain the reasons for the magnitude of the percentage increase in 2016.

Response:

The assessed value of Narragansett Gas' tangible property increased by \$99.7 million for the 2015-2016 tax year, producing an increase in taxes of \$3.89 million. The increase in tangible property arises from the Company's continued investment in gas infrastructure through the mains and services replacement programs, as well as to address overall system growth. During this time, the assessed value of Narragansett Gas' real property increased by \$5 million, producing increased taxes of \$0.28 million.

Division 2-10

Request:

Referring to Schedule MAL-11-ELEC, Page 2, please explain the reasons for the decrease in the Accumulated Deferred FIT balance in December 2016.

Response:

The decrease in Accumulated Deferred Federal Income Taxes (FIT) in December 2016 shown on Schedule MAL-11-ELEC, Page 2, is caused by an increase in the deferred tax asset for net operating losses (NOL). Accumulated deferred FIT can be assets or liabilities, but are generally liabilities that reduce rate base. The most common deferred tax liability is the result of book/tax timing difference associated with accelerated depreciation deducted for income-tax purposes versus the longer depreciation lives used to record book depreciation. Tax NOL deferred tax assets are generated when the Company has more tax deductions than taxable income. Tax NOLs reduce the Company's net accumulated deferred FIT, which has the effect of increasing rate base. The increase in NOL reported by Narragansett Electric is caused by the income tax return- to-tax book balance true-up (often referred to as the return-to-provision true up) for the Fiscal Year 2015 federal income tax return and refinement of the gas and electric segment allocation of the NOL.

Division 2-11

Request:

Referring to Schedule MAL-11-ELEC, Page 2, please provide details of the balance of Accumulated Deferred FIT as of June 2017. The response should show each component of the Accumulated Deferred FIT and the amount of each component.

Response:

The June 2017 Accumulated Deferred FIT shown on Schedule MAL-11-ELEC, Page 2, Line 20(e)<sup>1</sup> is comprised of the following components:

<u>Narragansett Electric</u>	June 2017
Property Related	(\$429,147,603)
Less: FAS109 ADIT	\$6,306,557
Net Operating Loss	\$66,850,227
Less: IFA	<u>\$159,376,648</u>
TOTAL	<u>(\$196,614,171)</u>

---

<sup>1</sup> See Bates Page 92 of Book 9.

Division 2-12

Request:

Referring to Schedule MAL-11-ELEC, Page 6, please provide documentation supporting the plant additions on Line 14.

Response:

The plant additions of \$74,878,000 shown on Page 6, Line 14 of Schedule MAL-11-ELEC<sup>1</sup> are derived from Narragansett Electric's Fiscal Year 2018 Electric Infrastructure, Safety, and Reliability Plan amount of \$74,843,000 (approved by the Public Utilities Commission in Docket No. 4682) plus an additional \$35,000 of general information services costs relating to physical security replacement shown on Page 5, Line 9(c) of Schedule MAL-11-ELEC.<sup>2</sup>

---

<sup>1</sup> See Bates Page 96 of Book 9.

<sup>2</sup> See Bates Page 95 of Book 9.

Division 2-13

Request:

Please provide the actual electric distribution plant additions for each month from September 2017 to the most recent month available.

Response:

Please see the below table for the actual monthly electric distribution plant additions since September 2017.

<u>2017</u>	<u>September</u>	<u>October</u>	<u>November</u>	<u>Grand Total</u>
ISR	\$ 4,181,908	\$ 6,817,893	\$ 4,775,989	\$ 15,775,790
Facilities	\$ 10	\$ 1,675,034	\$ 24,400	\$ 1,699,443
Total	\$ 4,181,917	\$ 8,492,927	\$ 4,800,388	\$ 17,475,232

Division 2-14

Request:

Referring to Schedule MAL-11-ELEC, Page 11, please explain why the balance on Line 1 reflects the Five Quarter Average balances on Schedule MAL-11-ELEC, Page 2, rather than the balances as of June 30, 2017 on Page 2.

Response:

The accumulated deferred tax balance on Schedule MAL-11-ELEC, Page 11, Line 1<sup>1</sup> was incorrectly referencing the wrong column on Schedule MAL-11-ELEC, Page 2.<sup>2</sup> The amount should have been referencing Column (e) on Page 2, which are the balances as of June 30, 2017. The impact of the change to electric rate base is a decrease of (\$12,675,980) for the rate year and a decrease to the revenue requirement of (\$1,492,613) for the period ending August 31, 2019. The correction will be made in the subsequent update to the cost of service for Narragansett Electric.

---

<sup>1</sup> See Bates Page 101 of Book 9.

<sup>2</sup> See Bates Page 92 of Book 9.

Division 2-15

Request:

Referring to Schedule MAL-11-ELEC, Page 11, please explain why the “proration” adjustments on Lines 33, 41, and 49 are necessary in the present case while such adjustments have not been presented in previous rate cases.

Response:

During 2015, the Internal Revenue Service (IRS) issued several Private Letter Rulings related to the appropriate amount of deferred tax to be included in rate tariffs, referencing the normalization regulations of Treas. Reg. §1.167(l)-1 and its proration requirement. As a result of these developments, utilities must take steps to assure compliance with the regulations.

In particular, IRS Regulation 26 C.F.R. §1.167(l)-1(h)(6) sets forth normalization requirements for regulated entities so that the benefits of accelerated depreciation are not passed back to customers too quickly. The penalty of a normalization violation is the loss of all federal income tax deductions for accelerated depreciation, including bonus depreciation.

Any regulatory filing that includes capital expenditures, book depreciation expense, and accumulated deferred income taxes (ADIT) related to those capital expenditures must follow the normalization requirements. When the regulatory filing is based on a future period, the deferred tax must be prorated to reflect the period of time that the ADIT balances are in rate base. This filing includes the Rate Year (*i.e.*, the twelve-month period ending August 31, 2019), Data Year 1 (*i.e.*, the twelve-month period ending August 31, 2020), and Data Year 2 (*i.e.*, the twelve-month period ending August 31, 2021). The inclusion of these forecasted fiscal year periods necessitates the proration computation. Thus, the proration adjustments shown in Schedule MAL-11-ELEC, Page 11, Lines 33, 41, and 49 are made in compliance with normalization requirements (see Bates Page 101 of Book 9).

Please note that proration adjustments also were included in the Company's two most recent Infrastructure, Safety, and Reliability (ISR) Plan filings for gas and electric for Fiscal Year 2018 and Fiscal Year 2019. The Company will continue to evaluate all rate filings that include a forecast of deferred tax balances related to tax depreciation to assure continued compliance with normalization requirements to protect federal income-tax deductions for the benefit of customers.

Division 2-16

Request:

Referring to Schedule MAL-11-ELEC, Page 11, please explain why the “proration” adjustments on Lines 33, 41, and 49 take account of changes in deferred tax balances that are not incorporated into the adjustments on Lines 29, 37 and 45.

Response:

The proration adjustments on Schedule MAL-11-ELEC, Page 11, Lines 33, 41, and 49<sup>1</sup> are based on some of the components of the changes in deferred tax balances on Lines 29, 37, and 45.

For example, the proration adjustment on Line 49 for the twelve months ended August 31, 2019 is based on Book Depreciation of \$51,424,939, shown on Page 11, Line 45. Book Depreciation of \$51,424,939 is a component of the proration adjustment reported on Page 13, Line 14.<sup>2</sup> Bonus Depreciation of \$19,866,468 and Remaining MACRS Tax Depreciation of \$4,158,912 are components of Total Tax Depreciation of \$49,930,437. Page 15, Line 7(c)<sup>3</sup> reports Bonus Depreciation of \$19,866,468; remaining MACRS Tax Depreciation of \$4,158,912 is the sum of Line 2(f) \$319,076, Line 5(f) \$2,349,851, and Line 8(f) \$1,489,985.

Please also see the Company's response to Division 2-15. Proration is based on adjustments related to the difference between book and tax depreciation. The proration computation, therefore, is based on the movement in deferred tax related to tax depreciation (including bonus depreciation), book depreciation and net operating loss (NOL) utilization (as the NOL is primarily attributable to accelerated tax depreciation).

The remaining components of “tax depreciation” of \$49,930,437 are Capital Repairs current deduction (\$17,941,595) and Cost of Removal (\$7,963,461), shown on Page 15, Line 7(b) and Line 9(f), respectively. These are not related to accelerated tax depreciation and therefore are excluded from the proration adjustment.

---

<sup>1</sup> See Bates Page 101 of Book 9.

<sup>2</sup> See Bates Page 103 of Book 9.

<sup>3</sup> See Bates Page 105 of Book 9.

Division 2-17

Request:

Referring to Schedule MAL-11-ELEC, Page 11, please explain why there is zero Net Operating Loss Utilization, although Schedule MAL-11-GAS, Page 11 reflects positive Net Operating Loss Utilization.

Response:

The Company's income taxes are filed as part of the federal consolidated income tax return of National Grid. Tax net operating losses (NOL) are generated when National Grid has more tax deductions than taxable income on a consolidated basis. National Grid is able to eventually take those tax deductions (i.e. NOL utilization) when the consolidated group has taxable income. National Grid is not projecting to generate taxable income until its Fiscal Year ended March 31, 2020. Schedule MAL-11-ELEC, Page 11<sup>1</sup>, shows zero Net Operating Loss (NOL) Utilization for all periods, while Schedule MAL-11-GAS, Page 11<sup>2</sup> reflects positive NOL Utilization on Line 48 for the twelve months ended August 31, 2019 (i.e. the Rate Year). NOL utilization is based on using NOLs from earliest years first. Based on historic vintaging of NOL generation and usage, Narragansett Gas has unused NOLs from the Fiscal Years ending March 31, 2009 and March 31, 2010. Narragansett Electric has unused NOLs beginning in the Fiscal Year ending March 31, 2012. On a first in first out basis, the Narragansett Gas NOLs from Fiscal Year 2009 and Fiscal Year 2010 would be applied against current federal taxable income first, and Narragansett Electric NOLs would not be applied until Fiscal Year 2009 and Fiscal Year 2010 NOL carryforwards from Narragansett Gas are depleted.

---

<sup>1</sup> See Bates Page 101 of Book 9.

<sup>2</sup> See Bates Page 122 of Book 9.

Division 2-18

Request:

Please provide the actual electric NOL balance as of each month from December 31, 2016 until the most recent month available.

Response:

The Company calculates its net operating losses (NOL) for Narragansett Electric and Narragansett Gas on a quarterly basis. The actual Narragansett Electric NOL balance based on the historic 35 percent federal corporate tax rate as of each quarter from December 31, 2016 through September 30, 2017 is:

<u>Narragansett Electric</u>	Dec-2016	Mar-2017	Jun-2017	Sep-2017
Net Operating Loss	\$84,676,529	\$64,305,301	\$66,850,227	\$66,850,227

Division 2-19

Request:

Please provide forecasted electric NOL balances from the most recent month available until August 31, 2019. The response should provide all supporting calculations and should describe all assumptions used in forecasting NOL balances.

Response:

Currently, the Company forecasts that electric net operating loss (NOL) balances will remain relatively constant through August 31, 2019. The Company is forecasting positive taxable income and is therefore not expecting to generate new electric NOLs during this time. It is also not expecting to utilize electric NOLs during this time as described in the Company's response to Division 2-17.

Narragansett Electric  
Net Operating Loss (at the  
historic 35% federal corporate  
tax rate)

Dec-2017	\$66,850,227
Mar-2018	\$66,850,227
Jun-2018	\$66,850,227
Sep-2018	\$66,850,227
Dec-2018	\$66,850,227
Mar-2019	\$66,850,227
Jun-2019	\$66,850,227
Sep-2019	\$66,850,227

The Company will be reviewing its assumptions on these calculations as a result of the federal legislation on tax reform. However, it will take some time for the exercise to be completed given the complexities of the legislation and associated computations.

Division 2-20

Request:

Referring to Schedule MAL-11-ELEC, Page 15, please explain why the MACRS depreciation includes only MACRS depreciation on plant additions for the relevant periods, but no MACRS depreciation on embedded plant as of June 30, 2017.

Response:

The Company made a miscalculation and did not include the MACRS depreciation on embedded plant as of June 30, 2017 within Page 15 of Schedule MAL-11-ELEC.<sup>1</sup> At a federal income tax rate of 35 percent, the impact is a decrease to rate base of (\$25,243,979) and a decrease to the revenue requirement of (\$2,903,788) for the year ending August 31, 2019. For the year ending August 31, 2020, it is a decrease to rate base of (\$26,104,043) and a decrease to the revenue requirement of (\$3,002,720). For the year ending August 31, 2021, it is a decrease to rate base of (\$38,674,946) and a decrease to the revenue requirement of (\$4,448,738). The Company will reflect this update in a subsequent submission of the cost of service for Narragansett Electric.

---

<sup>1</sup> See Bates Page 105 of Book 9.

Division 2-21

Request:

Referring to Schedule MAL-11-GAS, Page 2, please explain why the accumulated depreciation on Line 7 is virtually unchanged in the first three quarters and then decreases in March 2017 and June 2017. The response should include supporting documentation.

Response:

The accumulated depreciation on Schedule MAL-11-GAS, Page 2, Line 7<sup>1</sup> is virtually unchanged in the first three quarters because depreciation expense was largely offset by plant retirements and cost of removal during those quarters.

The accumulated depreciation decrease of \$5.7 million in March 2017, Schedule MAL-11-GAS, Page 2, Line 7(d), is mainly due to the Small World GIS system early write-off of \$7.5 million. Please refer to Attachment DIV 2-7 for manual journal entry details.

June 2017 accumulated depreciation further decreased by \$10.9 million as seen on Line 7(e), due to an initiative to retire gas meter encoder receiver transmitter (ERT) devices placed in service 1999 and prior that were still on the Company's books. ERT retirements totaled \$11.4 million. Please refer to Attachment DIV 2-21 for the ERT retirement details.

Division 2-22

Request:

Referring to Schedule MAL-11-GAS, Page 2, please provide documentation from the Tax Department for the amounts on Line 29, including details of the balance of Accumulated Deferred FIT as of June 2017. The response should show each component of the Accumulated Deferred FIT and the amount of each component.

Response:

The Accumulated Deferred FIT shown on Schedule MAL-11-GAS, Page 2, Line 29<sup>1</sup> is comprised of the following components (please note that as recorded all Accumulated Deferred FIT balances are at the historic 35% federal corporate tax rate):

<u>Narragansett Gas</u>	Jun-2016	Sep-2016	Dec-2016	Mar-2017	Jun-2017
Property Related	(\$179,294,883)	(\$188,165,083)	(\$196,438,023)	(\$194,359,700)	(\$201,685,820)
Less: FAS109 ADIT	\$180,807	\$371,137	\$438,456	\$422,169	\$415,406
Net Operating Loss	\$85,628,509	\$96,767,494	\$67,654,461	\$71,775,138	\$78,345,426
TOTAL	<u>(\$93,485,567)</u>	<u>(\$91,026,451)</u>	<u>(\$128,345,105)</u>	<u>(\$122,162,393)</u>	<u>(\$122,924,988)</u>

RIPUC Docket No. 4770  
Responses to Division's Second Set of Data Requests  
Issued December 21, 2017

Division 2-23

Request:

Referring to Schedule MAL-11-GAS, Page 3, please provide documentation supporting the plant additions on Line 11.

Response:

The following information is excerpted from Schedule MAL-11-GAS, Bates Page 116 (Book 9):

	<u>FY18</u>	<u>FY19</u>
	07/01/17 - 03/31/18	04/01/18 - 08/31/18
	(b)	(c)
<u>Distribution</u>		
1 FY 2018 Approved ISR Plan	\$72,140,000	\$38,823,750
2 Gas Expansion	\$500,000	\$0
3 Growth	\$16,818,896	\$12,609,760
4 Total Distribution	<u>\$89,458,896</u>	<u>\$51,433,510</u>
5		
<u>General Plant</u>		
7 Facilities	\$0	\$0
8 IS	\$149,000	\$0
9 Total General	<u>\$149,000</u>	<u>\$0</u>
10		
11 Distribution and General	<u><u>\$89,607,896</u></u>	<u><u>\$51,433,510</u></u>
Calculation of Plant Additions		
A Number of months reported above	<u>9</u>	<u>5</u>
B Average monthly plant additions	\$9,956,433	\$10,286,702
C		
D Months included in 12 months ending 08/31/2018	<u>7</u>	<u>5</u>
E Total applicable monthly additions	\$69,695,031	\$51,433,510
F Amount for the 1 <sup>st</sup> 7 months		<u>\$69,695,031</u>
G Plus: Plant Additions 12 Months Ended 08/31/2018		<u><u>\$121,128,540</u></u>

Line Notes

- B Line 11 divided by Line A
- E Line B multiplied by Line D
- F As reported on Line E Column (b)
- G Line E plus Line F

Division 2-24

Request:

Please provide the actual gas distribution plant additions for each month from September 2017 to the most recent month available.

Response:

	Sep 2017	Oct 2017	Nov 2017
Narragansett Gas Plant Additions	\$13,203,313	\$4,937,284	\$6,400,608

Division 2-25

Request:

Referring to Schedule MAL-11-GAS, Page 11, please explain why the “proration” adjustments on Lines 33, 41, and 49 are necessary in the present case while such adjustments have not been presented in previous rate cases.

Response:

Please see the Company's response to Division 2-15 for the requested information.

Division 2-26

Request:

Please provide the actual gas NOL balance as of each month from December 31, 2016 until the most recent month available.

Response:

Narragansett Gas calculates its net operating loss (NOL) on a quarterly basis. The actual Narragansett Gas NOL balance as of each quarter from December 31, 2016 through September 30, 2017 based on the historic 35% federal corporate tax rate is:

<u>Narragansett Gas</u>	Dec-2016	Mar-2017	Jun-2017	Sep-2017
Net Operating Loss	\$67,654,461	\$71,775,138	\$78,345,426	\$78,345,426

Division 2-27

Request:

Please provide forecasted gas NOL balances from the most recent month available until August 31, 2019. The response should provide all supporting calculations and should describe all assumptions used in forecasting NOL balances.

Response:

Currently, the Company forecasts that Narragansett Gas net operating loss (NOL) balances will remain relatively constant through fiscal year ending March 31, 2019, and then will decrease by \$459,868 per month throughout Fiscal Year 2020 (assuming the 35% historic tax rate and before proration adjustment), as the Company begins using its NOL. This is also explained in the Company's response to Division 2-17. At August 31, 2019, the forecasted NOL balance is \$76,046,087 before the proration adjustment.

Narragansett Gas  
Net Operating Loss

Dec-2017	\$78,345,426
Mar-2018	\$78,345,426
Jun-2018	\$78,345,426
Sep-2018	\$78,345,426
Dec-2018	\$78,345,426
Mar-2019	\$78,345,426
Apr-2019	\$77,885,559
May-2019	\$77,425,691
Jun-2019	\$76,965,823
Jul-2019	\$76,505,955
Aug-2019	\$76,046,087

The Company will be reviewing its assumptions on these calculations as a result of the federal legislation on tax reform. However, it will take some time for the exercise to be completed given the complexities of the legislation and associated computations.

Division 2-28

Request:

Referring to Schedule MAL-11-GAS, Page 15, please explain why the MACRS depreciation includes only MACRS depreciation on plant additions for the relevant periods, but no MACRS depreciation on embedded plant as of June 30, 2017.

Response:

The Company made a miscalculation and did not include the MACRS depreciation on embedded plant as of June 30, 2017 within Page 15 of Schedule MAL-11-GAS.<sup>1</sup> The impact is a decrease to rate base of (\$22,356,074) and a decrease to the revenue requirement of (\$2,334,662) for the year ending August 31, 2019. For the year ending August 31, 2020, it is a decrease to rate base of (\$35,536,632) and a decrease to the revenue requirement of (\$3,711,118). For the year ending August 31, 2021, it is a decrease to rate base of (\$48,580,873) and a decrease to the revenue requirement of (\$5,073,338). The Company will reflect this update in a subsequent submission of the cost of service for Narragansett Gas.

---

<sup>1</sup> See Bates Page 126 of Book 9.

Division 2-29

Request:

Referring to Schedule MAL-12, Page 6, please provide workpapers supporting the annualized wages based on June 30, 2017 employee complement and annual salaries on Line 10.

Response:

Please refer to Attachment DIV 2-29 for the requested information.

Division 2-30

Request:

Referring to Schedule MAL-12, Page 6, please provide documentation from Human Resources supporting the Vacancies on Line 14.

Response:

Please refer to Workpaper MAL-4, Page 13, Column entitled Electric Salary for the requested information (see Bates Page 187 of Book 10).

Division 2-31

Request:

Referring to Schedule MAL-12, Page 6, please provide the actual number of Electric Union and Non-Union employees by month from December 2015 until the most recent month available.

Response:

Please refer to Attachment DIV 2-31 for the requested information.

**The Narragansett Electric Company  
Headcounts for Electric Employees**

Division 2-33

Request:

Referring to Schedule MAL-12, Page 7, please provide documentation from Human Resources supporting the Vacancies on Line 14.

Response:

Please refer to Workpaper MAL-4, Page 13, Column entitled Gas Salary for the requested information (Bates Page 187 of Book 10).

Division 2-34

Request:

Referring to Schedule MAL-12, Page 7, please provide the actual number of Gas Union and Non-Union employees by month from December 2015 until the most recent month available.

Response:

Please refer to Attachment DIV 2-34 for the requested information.

25	Dec 2017	4,941.0	1,334.5

Division 2-37

Request:

Referring to Schedule MAL-13, please provide documentation supporting the plan cost rates.

Response:

Please see Attachment DIV 2-37 for a table providing the 2018 monthly rates for each available medical and dental plan. Please note that the monthly rates shown in Attachment DIV 2-37 reflect the full cost of the plan, covered by the combination of employer and employee contributions.

These rates provide the basis for the amounts shown on Schedule MAL-13, Pages 11 through 16.<sup>1</sup> Non-Union plans are then separated into various scenarios and the costs adjusted up or down to account for spousal buy-ups and wellbeing incentives, as discussed on Page 29 of Maureen P. Heaphy's testimony.<sup>2</sup>

---

<sup>1</sup> See Bates Pages 158 through 163 of Book 9.

<sup>2</sup> See Bates Page 78 of Book 1.

Medical Plan Rates for 2018

2018 Medical Rates - Non-Union
--------------------------------

	TW Plan #	Full Cost of the Plan	Employer Contribution	Employee Contribution

Division 2-40

Request:

Referring to Schedule MAL-22, Page 7, please explain the magnitude of the write-offs in 2013 and 2015.

Response:

The data shown on Schedule MAL-22, Page 7<sup>1</sup> for the 12-month period ending June 2013 were influenced by two inter-related factors. First, relatively high gas-supply costs occurred during the peak winter months of 2010/11, 2011/12, and 2012/13. In Rhode Island, this impact was offset by significantly warmer weather during the winter of 2011/12 and slightly warmer than normal weather during the winter of 2012/13. Narragansett Gas' revenues were suppressed by warm weather in 2011/12 and 2012/13, even though gas-supply costs were relatively high. The warm weather impact subsumed the impact of higher gas-supply costs, causing the revenue figure in the denominator of the bad-debt write-off percentage to be lower for the 12-months ending June 2013. With a lower revenue number in the denominator of the equation, a constant level of write-offs will appear to be a greater percentage of the total revenue amount.

In addition, Narragansett Gas converted to the CSS billing system in January 2012. After this conversion, the Company was able to improve the collection process from outbound calling to field visits. This process improvement resulted in more effective field visits. The field visits accomplished terminations of older arrears that were accumulated at a time when gas-supply costs were much higher. This also had the effect of making the write-off ratio appear higher.

Write-offs for the year ending June 2015 increased because of unfavorable weather in prior periods. Specifically, the winters of 2013/14 and 2014/15 were much colder than normal as indicated by the respective Heating Degree Days experienced during that period. This weather led to elevated arrears that went to write-offs during the 12-month period ending June 2015.

---

<sup>1</sup> See Bates Page 233 of Book 9.

Division 2-41

Request:

Referring to Schedule MAL-26, did the Company also eliminate the effect of credits to customers enrolled in the paperless billing program on test year revenues? If the response is affirmative, please explain where the revenue was adjusted to eliminate the effect of these credits. If the response is negative, please explain why such an adjustment to revenues is not appropriate.

Response:

Yes, the Company has eliminated the effect of paperless bill credits for customers who were receiving electronic bills from Narragansett Electric and Narragansett Gas during the test year.

Paperless bill credits applied to customer bills reduce distribution revenue (the opposite effect of billing a charge, which increases revenue), and this reduction in distribution revenue is recorded to the same FERC account as distribution revenue resulting from the billing of charges. There is no discreet adjustment to eliminate the reduction in distribution revenue created by paperless bill credits. Rather, the Company's calculation of rate year base distribution revenue inherently excludes the impact of paperless bill credits.

Specifically, the Company calculates rate year base distribution revenue as the normalized rate year billing units developed by Company Witnesses Joseph Gredder (for Narragansett Electric) and Theodore Poe (for Narragansett Gas) multiplied by the base distribution rates currently in effect. These calculations are presented in Workpaper PP-1-ELEC, Pages 9-10 and 12<sup>1</sup>, for Narragansett Electric, and Workpaper PP-1(a)-GAS, Pages 23-33<sup>2</sup>, for Narragansett Gas, and are summarized in Schedule PP-1-ELEC and Schedule PP-1-GAS, respectively. The Company does not forecast or otherwise estimate the number of customers who may participate in paperless billing during the rate year and therefore does not adjust base distribution revenue downward for such participation.

---

<sup>2</sup> See Bates Pages 123-133 of Book 15.

Division 2-42

Request:

Referring to Schedule MAL-30, please provide work papers supporting the normalizing adjustments on Pages 6 and 7.

Response:

For the Narragansett Electric adjustments on Page 6 of Schedule MAL-30<sup>1</sup>, please refer to the list below for the workpapers supporting the normalizing adjustments:

Integrated Facilities Agreement (IFA)	Workpaper MAL-1, Page 1 (See Bates Page 141 of Book 10)
Renewable Energy Growth Program	Attachment DIV 2-42, Page 1, Lines 26-29
Vegetation Management	Attachment DIV 2-42, Page 2, Line 16(d), Line 22(d), Line 27(d), Line 37(d), and Line 47(d)
Inspection and Maintenance	Attachment DIV 2-42, Page 3, Line 4(a)-(b), Line 12(b)-(d), and Line 20(d)
Parent Company Funding Initiatives	Attachment DIV 2-42, Page 4, Lines 2-4, Lines 7-8, Lines 10-12, and Line 17
Major Storm Activity	Attachment DIV 2-42, Page 5
Other	Schedule MAL-30, Page 6, Column (i) minus the sum of Columns (b)-(g) (See Bates Page 7 of Book 10)

For the Narragansett Gas adjustments on Page 7 of Schedule MAL-30<sup>2</sup>, please refer to the list below for the workpapers supporting the normalizing adjustments:

Gas Business Enablement	Attachment DIV 2-42, Page 6
Gas Cost Recovery (GCR)	Attachment DIV 2-42, Page 7
Other	Schedule MAL-30, Page 7, Column (e) minus the sum of Columns (b)-(d) (See Bates Page 8 of Book 10)

As noted on Attachment DIV 2-42, Page 6, The Company's normalizing adjustment for GBE was understated by \$66,969. The Company will correct the revenue requirement to include normalizing adjustments that will reduce the test year balance. The impact of the normalizing adjustments is shown below with inflation factored in for the twelve-month period ending

Division 2-43

Request:

Referring to Schedule MAL-31, Page 7, please reconcile the Test Year Total of \$3,481,162 to the Base Allowance \$4,311,132 on Schedule MAL-31, Page 7.

Response:

The "Base Allowance" of \$4,311,132 referenced in the question is part of the \$7,311,132 annual allowance included in base distribution rates in Docket No. 4323 for recovery of major deferrable storm costs.

The remaining amount included in the \$7,311,132 annual allowance is \$3,000,000 of temporary annual customer contributions intended to reimburse the Company for costs incurred associated with Hurricane Sandy. Collection of this amount was set to expire on January 31, 2019, but was recently extended by the Public Utilities Commission (PUC) through June 30, 2021 as part of the Company's Storm Contingency Fund Replenishment proceeding (Docket No. 4686). The annual allowance of \$7,311,132, net of the \$3,000,000 of temporary contributions equals the \$4,311,132 referenced in this information request.

The \$3,481,162 on Schedule MAL-31, Page 7<sup>1</sup> reflects the amount of incremental operation and maintenance (O&M) expense charged to the Test Year for non-major storm costs that are not eligible to be recovered through the Company's Storm Contingency Fund. Non-major storms are those storms with incremental O&M costs less than the \$1,100,000 Storm Contingency Fund threshold that the Company and the Division of Public Utilities and Carriers have agreed to as one of the provisions of the Joint Proposal and Settlement Agreement filed with the PUC on September 25, 2017 in Docket No. 4686. This agreement is pending PUC approval.

The Base Allowance of \$4,311,132 and the incremental non-major storm costs of \$3,481,162 are amounts that cannot be reconciled. The Base Allowance relates to the recovery of major storm fund deferrable storm costs, while the \$3,481,162 relates to the recovery of non-major storm costs. Therefore, the amounts are not comparable.

---

<sup>1</sup> See Bates Page 18 of Book 10.

Division 2-44

Request:

Referring to Schedule MAL-31, Page 7, please provide documentation for the amounts on Lines 1-9.

Response:

When the Company prepares for a storm event, the Company records all storm restoration costs to work orders. The Company tracks these work orders to determine if the total incremental operation and maintenance (O&M) costs exceed the threshold for becoming a deferred (*i.e.*, qualifying for the Storm Contingency Fund) weather event. Please see Attachment DIV 2-44 for the information requested for each non-deferred storm (*i.e.*, for storms with O&M costs below \$1.1 million Storm Contingency Fund threshold<sup>1</sup>).

---

<sup>1</sup> Per the Joint Proposal and Settlement Agreement between the Company and the Division of Public Utilities and Carriers filed with the Public Utilities Commission on September 25, 2017 in Docket No. 4686.

Total	3,481,162

Division 2-45

Request:

Referring to Workpaper MAL-6a, please provide workpapers and calculations supporting the rate of return of 10.29%.

Response:

Please see Attachment DIV 2-45 for the requested information.

**Service Company Rate of Return - Rate Year**

Line	Capital Structure (a)	Cost Rate (b)	Weighted Return (c)	Taxes (d)	Pre-tax Return (e)
1 Long Term Debt	50.00%	3.70%	1.85%		1.85%
2					
3 Preferred Stock	0.00%	0.00%	0.00%		0.00%
4					
5 Total Common Equity	50.00%	10.10%	5.05%	3.39%	8.44%
6					
7 Total Capitalization	100.00%		6.90%	3.39%	10.29%

Col (a) = Service Company capital structure

Col (b) Line 1 = Service Company debt rate

Col (b) Line 5 = Narragansett ROE as requested in this docket

Col (c) = Col (a) times Column (b)

Col (d) = Col (c) divided by 1-effective tax rate of 40.2% less Col (c)

Col (e) = Col (c) plus Col (d)

Division 2-46

Request:

Referring to Workpaper MAL-6a, Lines 293-410, for each project with a total spend over \$3 million, please provide the following:

- a. A brief description of the project
- b. The presently expected in-service date of the project
- c. The presently expected total spend for the project
- d. The work order for the project
- e. Any cost-benefit analysis that was prepared for the project

Response:

For parts a.-d., please refer to Attachment DIV 2-46. The projects that are missing work orders have not gone through sanctioning and have yet to spend capital dollars.

For part e., there is no cost benefit analysis available for these projects. That analysis is completed for Net Present Value projects only, and none of the selections above are categorized as such.

Narragansett Electric and Narragansett Gas  
Service Company Rents  
Existing Service Company Capital Software allocated to Operating Companies as Rent Expense  
For the Rate Year beginning 09/01/2018 and ending 08/31/2019

Line	Investment Name	Project Description	Program Description	INVP #	Work Order	Bill Pool	Inception to Date \$	Forecasted to Complete	Total Spend	In Service Date
1	INVP 3932 Call Center Customer Contact Center/SDC Technology Upgrade Implement Solution	National Grid's U.S. Contact Center handles approximately 65,000 calls per day. The U.S. Customer Contact Centers and Service Delivery Center (SDC) are currently operating on core technologies that are no longer supported by their respective vendor and National Grid has third party vendors in place to manage the day to day support. This project will facilitate the replacement and consolidation of these critical systems to support the reliability of key communication channels between National Grid, our customers, and our employees. Core systems to be replaced include: Automatic Call Distribution system (ACD); Interactive Voice Response (IVR); Computer Telephony Integration (CTI); Call Center Workforce Management (WFM); and Call Recording/Quality Monitoring.	FY18 Plan	3932	90000179806	C175	\$718,036	\$27,006,964	\$27,725,000	09/02/18
2	Regulatory Mandates - FY19	Every year, there are a number of IS projects that are initiated as a direct result of, or are driven by the need to comply with regulations, laws, tariffs, orders, agreements or other matters promulgated by Federal, State, or Local governmental agencies. National Grid has forecasted in its three-year investment plans the need to budget approximately \$20M per year across all regulatory jurisdictions for IS projects resulting from future regulatory mandates.	Other Mandates			G020		\$19,140,000	\$19,140,000	03/31/19
3	INVP 4914 US CNI-EMS Lifecycle Hardware and Software Upgrade	The existing computing hardware and software supporting the New York and New England CNI Energy Management System (EMS) is near end-of-life and at risk of running unsupported versions of operating systems and software. A capacity limitation of the current configuration is limiting the system's ability to respond to growing demands, including in the distributed generation area. Running the EMS systems on this hardware and software leaves National Grid at risk of losing visibility of the grid and potentially control of remotely operated devices and equipment. A failure could cause both reputational and financial impacts to National Grid from both our regulators and governmental agencies.	FY18 Plan	4914		U186		\$14,897,000	\$14,897,000	08/01/19
4	INVP 4307 US Win 7 Refresh Ph 3	The End User Device Refresh-Windows 7 project will transition the remaining users from XP to the current standard operating system of Windows 7. Currently, there are approximately 6000 users that rely on XP due to legacy applications. XP is no longer in support and Microsoft has stopped producing security patches, thus posing reliability and security risks to the company. This project will remediate the legacy applications to work on Windows 7 and upgrade the users laptops to Windows 7	Tech. Modernization	4307	90000175959	G020	\$13,133,973	\$483,484	\$13,617,457	12/31/17
5	INVP 4750 Customer Experience Transformation Tech Program	This program will replace out of support platforms to mitigate existing risks to our customer self-serve billing, payments and other communications portals, and set the foundation for the processes and technology changes needed to drive step improvements to the customer experience. Operational efficiencies will be realized through the migration of customers to self-service channels, and through re-engineering of processes and transactions. The program will focus on re-engineering the customer's digital interactions to create a universal and seamless customer experience through multiple service options: Web, Mobile, Text, Email, and future emerging channels.	Growth Play Book	4750	90000187233	C175		\$10,496,000	\$10,496,000	08/31/19
6	INVP 3614D1 Ent Network Security	Enterprise Network Security (ENS) project is part of the overall programme of Cyber Security improvements to enhance National Grid's (and its energy networks), ability to detect security threats and determine the nature of incidents as, or potentially before, they occur, allowing improvement in response to detected threats and the production of internal intelligence.	Cyber Security	3614D1	90000141765	G020	\$8,849,386	\$1,433,885	\$10,283,271	01/31/18

Line	Investment Name	Project Description	Program Description	INVP #	Work Order	Bill Pool	Inception to Date \$	Forecasted to Complete	Total Spend	In Service Date
7	INVP 4398 Storms/ISched Upgrade	As the primary Work Management and Scheduling tools for the legacy National Grid service territories, 'STORMS' and 'IScheduler' are critical applications in support of both Electric and Gas Operations. The applications have become increasingly unstable, experiencing multiple outages over the past several years. The vendor is no longer in a position to support the applications without upgrades that will bring the applications onto current technology. The project will upgrade the work management system (STORMS) to the latest version of technology including: server hardware, system software and database software, along with bringing both standard and custom application code to the latest version of the technology. The investment will also replace the aged middleware components with new, supported components. As part of the project, the work management scheduling tool (IScheduler) will be replaced with the vendor's latest scheduling tool and integrated with the STORMS product.	FY18 Plan	4398	90000179024	G160	\$4,878,263	\$4,625,000	\$9,503,263	04/23/18
8	INVP 4570 US CNI Tech Services-Network Equipment Lifecycle Replacements	This Policy-driven investment will procure networking assets needed to replace out of warranty equipment and support infrastructure in the Energy Management System and Outage Management System (EMS/OMS) Data Centers, Communications rooms, Operations Centers, and Support areas across the National Grid service territory in New York and New England that are no longer supported by the hardware and software vendors.	FY18 Plan	4570	90000182161	G186		\$9,169,203	\$9,169,203	08/01/19
9	S005242 M112 Systemic Improvement	This project replaces the existing FERC module with the FERC on SAP HANA solution. The new HANA solution allows for FERC data to be created in parallel with all other data leading to a faster closing process and real time reporting capabilities.	FY18 Plan		90000156074	G020	\$8,354,545	\$0	\$8,354,545	07/10/17
10	INVP 4464 Data Visualization	This project will establish Tableau and Alteryx software solutions in a cloud environment to enable self-service reporting and data visualization capabilities for the organization. The proposed solution will provide the opportunity for improved decision making by providing capabilities to enhance data access to very large data sets, analytics, data visualization and export to other analytical software capabilities. Over time, it will also establish the foundation to replace software tools for reporting that are no longer supported by the original vendor and produce essential reports for oversight of the operation. The project will provide the base infrastructure required to run the services, including: - procurement of software - installation of Tableau and Alteryx in a Cloud Environment - packaging of software for deployment to desktops - implementation of user and system support services - end user training	FY18 Plan	4464	90000181341	G020	\$6,062,970	\$2,005,119	\$8,068,089	09/30/17
11	INVP 4408 Doc Mgmt Systems Replacement Delivery	The Document Management Systems used to store, retrieve, and update electric, gas and power plant engineering drawings and documents at National Grid are beyond their useful lifespan and are creating an unacceptable level of risk to the company. Inability to retrieve electric, gas and power plant information and mapping could lead to non-compliance with legal obligations for document storage, and programs including "Dig-Safe", leading to risk of accidental system damage. The applications have not been upgraded since their deployment and are now unsupportable due to their aging computing technology and software. The downstate TeamCenter application has started to collapse, as some components of the system have shut down and will no longer function properly. The Documentum desktop versions 5.3 and 6.0 are no longer supported by the vendor and are not compatible with Windows 7 operating system. TeamCenter is also not compatible with Windows7. As a result, some business units have not been able to upgrade to the Windows 7 environment and are still working on the Windows XP operating system. Some areas are using the web version of Documentum which is cumbersome, slow, and creating inefficiencies. Continued use of the XP operating system presents a significant cyber security risk.	FY18 Plan	4408	90000181343	G149	\$3,022,116	\$3,027,139	\$6,049,256	06/22/18

Line	Investment Name	Project Description	Program Description	INVP #	Work Order	Bill Pool	Inception to Date \$	Forecasted to Complete	Total Spend	In Service Date
12	INVP 4395 US Mobile Device Refresh	This policy-driven project will implement 750 mobile devices previously purchased as part of INVP 4671 – Mobile device refresh FY17 project. In addition, the project will purchase 200 new mobile devices and mounting accessories to continue the effort of eliminating old devices from the field. Mobile devices are mainly ruggedized computers – Panasonic Toughbooks and iTronix devices used in the field to access work management applications. A majority of mobile devices used in the field are more than 5 years old and these devices impact day to day productivity. These old devices break down frequently and can't be easily repaired due to unavailability of parts and accessories (in some cases manufacturers have stopped supporting the devices). The replacement of old mobile devices with latest tough books will allow field technicians to have the reliable equipment and data required to perform their work in a safe and efficient manner.	FY18 Plan	4395	90000184599	G020	\$105,733	\$4,387,211	\$4,492,944	03/31/18
13	INVP 3614B7 CNI Network Security	This investment is required to enhance National Grid's Cyber Security resilience to help maintain safe and reliable operations of the US CNI gas and electricity networks associated with cyber assets This project is a part of the Cyber Security improvement program that is focused on improvement of the wider network security architecture, designed to mitigate the identified network security risks. This investment will complete the Development and Implementation phase and deliver Security Information and Event Management capabilities to US CNI environments that will enhance the detection, investigation and remediation of Cyber Security threats impacting US CNI environments. It will also deliver additional network security capabilities to 'Protect' US CNI environments from various security risks and help to 'Identify' and 'Detect' any potential threats in the current environments. This investment enhances existing cyber security systems by providing the capability for holistic analysis of the National Grid US CNI networks and infrastructure for the US Cyber Security Operations Center and associated teams, supporting direction of resources to tackle the most pertinent areas of risk.	Cyber Security	3614B7	90000141753	G020	\$2,734,702	\$1,433,885	\$4,168,587	03/31/18
14	INVP 4411AB Distributed Generation Portal	Distributed Generation (DG) customer integration into the National Grid electric network is a fast growing area of National Grid's business that is regulated and mandated across all National Grid electric service territories. Each state has its own interconnection tariff, which outlines the process, forms, cost, timelines, penalties, and tracking and reporting requirements for administering the end-to-end DG interconnection process. In New York, the New York Public Service Commission requires that all electric distribution companies create and manage an online portal for Distributed Generation (DG) application submissions ("NY State Standardized Interconnection Requirements and Application Process for New Distributed Generators 2 MW or Less Connected in Parallel with Utility Distribution Systems," Section I. D). The Massachusetts Department of Public Utilities has implemented a penalty-based enforcement mechanism with penalties up to \$1.5 million/year, which requires verifiable tracking of application process time dependencies for DG applications. This project will deliver on providing the self-service portal and system of record for DG in New York. The project will also provide a base workflow engine that can be further enhanced to provide functionality necessary for DG in New England, new electric connection in all National Grid electric service territories, and new gas connections in all National Grid gas service territories.	Mandate	4411A+B	90000179919	C198	\$2,521,972	\$1,606,514	\$4,128,486	11/30/17

Line	Investment Name	Project Description	Program Description	INVP #	Work Order	Bill Pool	Inception to Date \$	Forecasted to Complete	Total Spend	In Service Date
15	INVP 4489 Active Directory Improvements	Active Directory (AD) is a key service that supports core authentication for all National Grid computers and servers logging onto the corporate network in both the United States (US) and United Kingdom (UK). Therefore, AD provides access to all Information Systems (IS). The scope of this initiative is to implement a refreshed global AD infrastructure and support services. The new AD environment will unify all global applications that use the AD service. It is critical that National Grid can ensure that the AD service is reliable and supports core authentication requirements to all current and proposed applications.	Tech. Modernization	4489	90000188606	G020		\$3,555,000	\$3,555,000	12/31/18
16	INVP 4491 ICE Replacement	This investment is required to replace the current instant messaging, collaboration, and email (ICE) services with a set of similar, or enhanced, services provided by Office 365. The current ICE platform cannot support the business demand due to limitations in the current functionality and the inability of the current service to be upgraded.	Tech. Modernization	4491	90000184581	G020	\$495,534	\$2,952,188	\$3,447,722	12/31/18
17	INVP 4606 Data Visualisation Expansion	This investment will expand the use of the Tableau, reporting platform across more use cases and business areas. Tableau provides data visualizations and analytics that aid management in the development of strategic and operational Plans.	Tech. Modernization	4606	90000188602	G020		\$3,435,000	\$3,435,000	06/30/19
18	INVP 4469 Informatica Upgrade/Microstrategy Replacement Program	This is a policy-driven project to perform a Feasibility and Analysis (F&A) study of National Grid's Informatica / MicroStrategy / Oracle Business Intelligence (BI) environment. The goal is to identify the most efficient and effective way to evolve to a BI, Analytics and Reporting platform that will support current and future business needs. At the conclusion of this Feasibility and Analysis exercise a detailed road map comprised of prioritized initiatives addressing the new solution implementation, decommissioning and archiving of legacy environment will be delivered to National Grid.	FY18 Plan	4469		G239		\$3,381,162	\$3,381,162	05/01/18
19	INVP 4708 Business Innovation Projects 2	The Business Innovation Program will deliver a series projects that include: Big Data Analytics, Process, and Workflow automation with Robotics, CSS system upgrade pilot, and Mobile device capability enhancements. Additionally, application rationalization will be covered under the scope of this investment.	Tech. Modernization	4708		G020		\$3,368,613	\$3,368,613	03/31/19
20	INVP 4728 Business Innovation Projects 3	The Business Innovation Program will deliver a series projects that include: Big Data Analytics, Process, and Workflow automation with Robotics, CSS system upgrade pilot, and Mobile device capability enhancements. Additionally, application rationalization will be covered under the scope of this investment.	Tech. Modernization	4728		G020		\$3,368,613	\$3,368,613	03/31/19
21	INVP 4707 Business Innovation Projects 1	The Business Innovation Program will deliver a series projects that include: Big Data Analytics, Process, and Workflow automation with Robotics, CSS system upgrade pilot, and Mobile device capability enhancements. Additionally, application rationalization will be covered under the scope of this investment.	Tech. Modernization	4707		G020		\$3,368,613	\$3,368,613	03/31/18
22	All Companies Physical Security Replacements - FY18	This is annual capital replacement program for Physical Security. Physical Security is responsible for protecting National Grid's personnel and assets, and incorporates a security system as part of the overall security plan. To fulfill this responsibility, it is necessary to ensure that all security related equipment and assets in New England are in good condition. This project replaces assets that are at or near end of life and/or assets that are no longer under vendor warranty.	Physical Security	N/A	90000180292	G020	\$1,701,013	\$1,515,640	\$3,216,653	03/31/18
23	INVP 4568 US CNI-EMS Lifecycle Hardware and Software Upgrade	The server and workstation hardware for the Energy Management System (EMS) replacement project was purchased in 2010. The hardware is now near peak operating capacity and may constrain the capacity of the associated databases in EMS. The application vendor ASEA Brown Boveri (ABB), is recommending a hardware refresh for the EMS environments in order to increase the capacity of the databases to accommodate future growth. This Policy-driven investment will procure the equipment needed for the project stages for the hardware and software refresh of the current ABB EMS.	FY18 Plan	4568	90000183145	U186	\$3,144,063	\$0	\$3,144,063	08/01/19

Line	Investment Name	Project Description	Program Description	INVP #	Work Order	Bill Pool	Inception to Date \$	Forecasted to Complete	Total Spend	In Service Date
24	INVP 4706 1327 Interfaces - 523 FTS, 340 RDX, 245 MQSI, 253 JCAPS, 44 PM4D, 7 VB	This project will migrate legacy interfaces to new supported middleware services that support file transfers (SAP PI and Oracle Fusion). The current technology is unsupported and is at risk since security patches are no longer being provided.	Tech. Modernization	4706		G020		\$3,083,333	\$3,083,333	06/30/19
25	INVP 4479 US Control-Gas Electronic Bulletin Board (EBB) Upgrade	This policy-driven project will execute a Feasibility and Analysis (F&A) study to determine the overall costs, technical approach and select the most appropriate tool for replacing existing out of support Gas Electronic Bulletin Board (EBB) system that facilitates automated process of gas transportation confirmations.	Mandates	4479		G210		\$3,000,000	\$3,000,000	05/01/18
