

DON 1-1

Request:

Please provide a copy of all workpapers supporting the Schedules contained in the Testimony in native format (i.e., WORD and EXCEL or a compatible format). EXCEL workbooks should be provided with all formulas and links intact.

Response:

Please see attached zip file provided on USB Flash Drive.

DON 1-2

Request:

Please provide a copy of all studies, reports, analysis and related workpapers the Company relied upon to support its proposal to eliminate rate class G-62 and to transfer existing Rate G-62 customers to rate class G-32 in native format (i.e. WORD and EXCEL or compatible format). EXCEL workbooks should be provided with all formulas and links intact.

Response:

Narragansett Electric discusses its reasons for proposing to eliminate Rates G-62 and B-62 in the pre-filed direct testimony of Company Witness Howard S. Gorman, Pages 34-35 (Bates Pages 38-39 of Book 12). The computations performed by Narragansett Electric to determine the effects of eliminating Rates G-62 and B-62 and transfer existing customers to Rates G-32 and B-32 are included in the November 27, 2017 initial filing at Schedule HSG-5-E5 (Bates Page 192 of Book 12).

DON 1-4

Request:

Please explain what effect, if any, the instant filing proposals will have on distributed generation programs.

Response:

The proposals contained in the Company's November 27, 2017 initial filing will not have any effect on distributed generation programs because the current distributed generation programs are filed with, and reviewed and approved by, the Public Utilities Commission in other dockets.

DON 1-5

Request:

Please explain what effect, if any, the instant filing proposals will have on Combined Heat and Power incentives.

Response:

The proposals contained in the Company's November 27, 2017 initial filing will have no effect on Combined Heat and Power incentives because these incentives are filed with, and reviewed approved by, the Public Utilities Commission in the energy efficiency docket.
