Why would Governor Raimondo embrace such an outrageous KLUGE? Why would RI PUC agree to purchase this inflated price electricity? Today, The RI Governor sounds like the master of spin, illusion, delusion, conclusion and destruction? Is she becoming a very dangerous and technically ignorant operative in over her head? She is now further enabling the reconstituted European solar and wind industrial complex, having seen its markets evaporate at home, to scam Rhode Island on an even larger scale! Wind and solar is a "road map to nowhere" where the only green is extorted tax and rate payers monies. The regional and national challenge is via disruptive new technologies a modernization for strategic energy acquisition , conversion and distribution. The Raimondo infomercial today marched out the usual actors on line to partake in the spoils extorted from tax and rate payers. Further for good measure the elitist virtue peddling victim hood dog whistle misrepresenting the earths natural climate / GEO cycle was rolled out. Such justifying another Raimondo Rhode Map to nowhere. Yes, a costly, low energy density, low capacity factor & intermittent output capability approach positioned off shore in harms way for nor esters and hurricanes is a fools expensive undertaking. What RI Governor Raimondo has apparently unknowingly contributed too is creation of a unhealthy triad of interdependent big wind, Solar and Oil industrial complex. Yes, on land already destroying forest and farm lands with high property taxes economic black mail forcing solar and wind installs and now destroying equally precious fishing grounds with monster Industrial Wind Turbines off our coast. Oh, yes big oil takes up the electricity brown & black outs when the wind does not blow and the sun does not shine.

further reading;

Wind and solar is a road map to nowhere. Yes, big picture for a little state.
