Record Request No. 1

Request:

For its LRS groups without interval metering, when did the Company develop the class average load shape that it used to estimate the load-shaped demand corresponding to the July 27, 2020 peak event? (i.e., before 2020, during 2020, or at some other time?)

Response:

The July 2020 New England Class Average Load Shapes were developed during 2020, specifically in early September 2020, as there is a 2-month lag in gathering the necessary data.
