Generation Unit Information: Unit Name: SED-59 Tom Harvey Rd LLC Unit Owner: Solect Energy Development, LLC Unit Size (nameplate MW): 0.144 MW AC (0.1736 MW DC) Unit Size (max. demonstrated MW): 0.144 MW AC (0.1736 MV Location (city, state): Westerly, RI	W DC)
Commercial Operation Date: COD not yet reached	

Type of Certification Requested:

Standard Certification

Prospective Certification (Declaratory Judgment)

Generation Type and Technology Information: (check all that apply)

Repowered Project □ Incremental Generation □ Incremental Intermittent

Customer-Sited or Off-Grid System (or associated aggregations)

Generation Unit Located in Control Area Adjacent to NEPOOL:

Solar □ Wind □ Ocean Thermal □ Geothermal □ Small Hydro

Eligible Biomass □ Unlisted Biomass □ Biomass (fossil co-fired/multi-fuel) □ Fuel Cell (using an eligible renewable resource)

Recommendation:

Approve (GIS Certification #: TBD) □ Reject □ Public Hearing Needed

Existing Renewable Energy Resource ⊠ New Renewable Energy Resource

Capable of Producing as Both Existing & New Renewable Energy Resource

Comments: Conditional approval recommended – CO date and GIS Number will be needed. This is a RE Growth program participant – National Grid will therefore serve as the 3rd party meter reader & enter data into the GIS using an MSS number and will retain ownership of the RECs. As such, no Appendix D is required & National Grid must generate the MSS # through NEPOOL on behalf of the unit owner. Supplemental information requests and clarifying communications were sent and responses received between March 30th and June 9th regarding Appendix D, GIS number, anticipated CO date, participation in RE Growth, and other items.
