**DOCKET NO. 20-10-16 APPLICATION OF WALLINGFORD RENEWABLE ENERGY, LLC FOR QUALIFICATION OF 2 OLIVER CREEK ROAD AND 100 PENT ROAD, WALLINGFORD, CT AS A CLASS I RENEWABLE ENERGY SOURCE**

November 18, 2020

## DECISION

On October 16, 2020, the Public Utilities Regulatory Authority (Authority) received an application from Wallingford Renewable Energy, LLC (Company) requesting that the Authority determine that the solar facility (Facility or Project) located at 2 Oliver Creek Road and 100 Pent Road Wallingford, Connecticut qualifies as a Class I renewable energy source.

The Facility was selected in response to the 2015 Request for Proposal (RFP) issued by the Department of Energy and Environmental Protection (DEEP). The RFP sought proposals for Class I renewable energy sources, large-scale hydropower and transmission to secure cost-effective sources to provide more affordable and reliable electric service, consistent with the state's energy and environmental goals and policies. The Authority approved power purchase agreements, including this Project, on September 7, 2017 in Docket No. 17-01-11, PURA Review of Public Act 15-107(b) Small Scal Energy Resource Agreements.

The Project generates electricity using solar power. The Facility will begin commercial operation on December 31, 2020, and will have an installed capacity of 15 MW. The Project will be a grid-connected generation facility located in Connecticut and will be subject to audits by the Authority. Although the Facility is not currently operating and not registered with the Independent System Operator of New England (ISO-NE) as required for Class I certification, the Authority waives both requirements because it previously reviewed the merits of the Project and determined that its approval was consistent with the State's energy and environmental goals and policies.

The Authority reviewed all of the information in the record and finds that pursuant to §16-1(a)(20) of the General Statutes of Connecticut, the Facility qualifies as a Class I renewable energy source, effective December 31, 2020. The Authority assigns the Facility Connecticut Renewable Portfolio Standard Registration No. CT201016.

The Authority's determination in this docket is based on the information submitted by the Company. The Authority may reverse its ruling or revoke the Company's registration if any material information provided proves to be false or misleading. The Company is reminded that it is obligated to notify the Authority within 10 days of any changes to any of the information it has provided.

**ORDER FOR COMPANY**

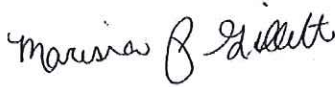

1. No later than January 14, 2021, the Company shall file with the Authority the Facility's ISO-NE Generation Unit Asset Identification Number.

DOCKET NO. 20-10-16 APPLICATION OF WALLINGFORD RENEWABLE ENERGY, LLC FOR QUALIFICATION OF 2 OLIVER CREEK ROAD AND 100 PENT ROAD, WALLINGFORD, CT AS A CLASS I RENEWABLE ENERGY SOURCE
