B.2.3 Aggregation Agreement includes a declaration of any and all business or financial relations between aggregator and Verifier sufficient to ensure the independence of the Verifier in accordance with Section 6.8.iii.c of the RES Regulations (10% or more ownership in voting stock, or family officer/etc.). (per Appendix D.2.c)		
☐ Yes ☐ No ☒ N/A Comments:		
B.2.3.1 Aggregation Agreement includes statement indicating under what circumstances the Verifier would not be considered sufficiently independent of the individual Generation Unit, and that Generation Units not meeting this independence test would not be allowed to participate in the aggregation. (per Appendix D.2.c.1) □ Yes □ No ⋈ N/A		
Comments:		
B.2.4 Aggregation Agreement identifies the type of technology that will be included in the aggregation and provides a statement that the aggregation will include only individual Generation Units that meet all the requirements of the RES Regulations (physical location, vintage, etc.). (per Appendix D.2.d)		
☐ Yes ☐ No ☒ N/A Comments:		
B.2.5 Aggregation Agreement provides an adequate description of proposed operating procedures for the aggregation, by which the Verifier shall ensure that individual Generation Units in the aggregation comply with all eligibility requirements and that the NEPOOL GIS Certificates created accurately represent generation (see Section 6.8.iii.e of the RES Regulations). B.2.5.1 At a minimum the proposed operating procedures include reasonable and sufficient details for:

 Determining that the Generation Unit exists and is in compliance with RES Regulations and Commissionapproved Aggregation Agreement.

		 Meter reading procedure that allows the Verifier to verify these readings (manual or remote, via the aggregators own system or an independent system) in a manner fully compliant with NEPOOL GIS Operating Rules regarding metering.

		 Documenting a procedure to verify independently that the GIS Certificates created for the aggregation are consistent with the meter readings. 	
		☐ Yes ☐ No ☒ N/A	
		 Correcting discrepancies in NEPOOL GIS Certificate generation identified by the Verifier. 	
		☐ Yes ☐ No ☒ N/A Comments:	
B.2.6 Aggregation Agreement provides an adequate description of how the Verifier will be compensated for its services by the aggregator (in no instance is the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation). (per Appendix D.2.f) □ Yes □ No ⋈ N/A Comments:			
	B.2.7 Aggregation Agreement provides an adequate confirmation and a description of how, no less frequently than quarterly, the Verifier will directly energy into the NEPOOL GIS the quantity of energy production in the applicable time period from each Generation Unit in the aggregation. The entry of generation data by the Verifier must be through an interface designated for this purpose by the NEPOOL GIS and in accordance with NEPOOL GIS Operating Rules applicable to Third-Party Meter Readers and to which the Aggregation Owner shall not have access. C.2 Generation Unit is located in a control area adjacent to NEPOOL and, i accordance with Section 5.1.ii of the RES Regulations, will apply the associate Generation Attributes to the RES only to the extent that the energy produced by th Generation Unit is actually delivered into NEPOOL for consumption by New England customers. □ Yes ⋈ N
Comments:
C.2.1 Applicant acknowledges that satisfactory documentation (i.e., report from neighboring Generation Attribute accounting system or a affidavit) must be provided to verify that Generation Attributes from Generation Unit located in a control area adjacent to NEPOOL have no otherwise been, nor will be, sold, retired, claimed or represented as part of electrical energy output or sales, or used to satisfy obligations i jurisdictions other than Rhode Island (such assurances may consist of report from a neighboring Generation Attribute accounting system or a affidavit from the Generation Unit).
☐ Yes ☐ No ☒ N/. Comments:
 C.2.2 Applicant acknowledges that energy delivered from such Generation Unit into NEPOOL will be verified by the following: A unit-specific bilateral contract for the sale and delivery of such energy into NEPOOL Confirmation from ISO that the energy was actually settled in th ISO Market Settlement System, and Confirmation through the North American Reliability Council tagging system that the import of the energy into NEPOOL actually occurred, or such other requirements as the Commission deems appropriate
