Chairman Ronald T. Gerwatowski
Commissioner Abigail Anthony
Commissioner John C. Revens, Jr.

COMMENTS INVITED (Issued January 19, 2022)

Commission Staff is gathering information from stakeholders about the content of the final accounting provided by National Grid pursuant to the Standards for Interconnecting Distributed Generation (DG Tariff). Please provide comments to Luly Massaro at luly.massaro@puc.ri.gov by **February 10, 2022**. After that date, all comments will be posted on the PUC's website. If you have asked to be on the service list, please just send a copy of your comments to that list (attached to the email you received this from; Ms. Massaro is one of the recipients). If you have any questions or would like to be added to the service list, please contact Cindy Wilson-Frias at cynthia.wilsonfrias@puc.ri.gov

National Grid provided two examples of Final Accounting Reports as PUC 1-1-1 and 1-1-2 which can be found on the PUC's website at <http://www.ripuc.ri.gov/eventsactions/docket/5206page.html>. Please review the two examples and provide feedback on the following. For all responses, please be as specific as possible and provide examples when possible:

1. Your opinion regarding whether the information currently contained in the final accounting:
 - a. is presented clearly;
 - b. contains enough detail;
 - c. conforms to industry standards (we emphasize the need for specific information on why or why not is);
 - d. why any additional information would be beneficial, specifying the information and level of detail (e.g., solves a problem, improves efficiency, etc.);
2. Your opinion regarding:
 - a. what information is not contained in the final accounting (excluding incremental detail to existing information described above);
 - b. how this information should be presented;
 - c. why this information would be beneficial (e.g., solves a problem, improves efficiency, etc.).
3. If there is a format or practice from another electric distribution company in a state where you have developed a DG project that you prefer, please provide an example from a real project and rationale for why it is better and what problem(s) it solves. You may redact competitively sensitive information.
